International Conference on Climate and Energy
9-10 November 2017, Düsseldorf, Germany

Dear friend,

We hereby invite you to our international climate and energy conference in Düsseldorf. From the 9th – 10th November researchers and experts will present and discuss lesser known scientific and political aspects of climate and energy.

Even if different events are currently dominating the headlines, the theme of „climate protection“ and thus the „Energiewende“ seem to be immortal. Because, despite the enormous costs of the energy supply and its questionable benefits, the policy, supported by almost all established media, maintains this

Be there when professors Shaviv (Israel) and Svensmark (Denmark) present the influence of cosmic radiation on the climate and its change, Marc Morano from Washington explains the US climate and energy policy. **These and many other speakers** will give you the chance to get a picture of yourself and meet other people who want to be informed about the mainstream.

If you are unable to attend the conference yourself, we would be pleased if you forward the invitation to interested parties.

We are looking forward to welcoming you in **Düsseldorf**

Dr. Holger Thuss
