

# Die SZ im EEG-Rausch oder wie viel Zumutung verträgt der Leser

## Vorspann

Eine karrikaturreife Darstellung zur Energiewende war die Tatsache, dass in der gleichen SZ-Ausgabe[1] sowohl eine halbseitige Anzeige des Niedersächsischen Ministeriums erschien:

*„Auch bayerische Unternehmen brauchen Strom! Ziehen Sie direkt an die Quelle, ins Land mit Energie: nach Niedersachsen.“*

wie auch der im Folgenden beschriebene Artikel über die Energiewende in Bayern:

*„Die Lichter brennen weiter“*

Den dritten Artikel in der gleichen Zeitungsausgabe[3], das Interview mit Herrn Edenhofer vom PIK über die Papst-Enzyklika, die nötige Transformation und erforderliche Zwangsverwaltung der Atmosphäre, kann man nur jedem empfehlen, der dabei sein will, wie die Entwicklung zu einer (Öko-) Diktatur offen ausgesprochen, im Vorfeld vorbereitet und von staatsergebenen Medien positiv bewertet wird. Geschichte wiederholt sich eben. Zu spät geborene brauchen nur Geduld, dann versäumen sie nichts.

**Zuerst einmal das  
Einfache, die**

# **Anzeige aus Niedersachsen**

**Im Blog-Artikel [2]  
Elektro-  
Energiespeicherung,  
Notwendigkeit,  
Status und Kosten  
ist dargestellt wie  
eine vom  
Niedersächsischen  
Ministerium  
beauftragte**

**Energiestudie  
belegt, dass  
Niedersachsen seine  
Stromspeicherproble  
matik bei weitem  
nicht gelöst hat.  
Die Anzeige kann  
deshalb nur  
bedeuten, dass das  
dortige Ministerium  
– wie leider üblich  
– ihre eigene**

**Studie nicht liest,  
oder bewusst  
ignoriert. Denn  
dass die  
Ökostromquellen  
regelmäßig  
versiegen, bleibt  
auch in  
Niedersachsen der  
Normalfall. Wer  
also deswegen  
dorthin ziehen**

**würde, käme nur von  
einer  
Mangelverwaltung in  
eine andere.**

**„Die  
Lichter**

**brennen  
weiter“**

**Im SZ-  
Artikel  
„Die**

**Lichter  
brennen  
weiter“,  
sind  
nicht  
Grablicht**

Warum sich

daran nach 2016 irgend etwas ändern soll, bleibt mehr als ein Rätsel des „Experten“. Ach ja, da wird eine Stromtrasse erschlossen, über die Windstrom aus den Ostländern nach Bayern fließt. Nur würde dieser Ökostrom nichts am Reservebedarf ändern, denn dieser gilt ja gerade für die dadurch fehlende Grundlast. Sicher wird dieser zusätzliche Zappelstrom aber im Bayerischen Stromnetz zu massiven Netzproblemen führen. Die Industrie wartet schon gierig darauf, diese lösen zu dürfen. Lukrative Geschäfte macht man dann, wenn Not am Mann ist und deshalb Kosten keine Rolle spielen.

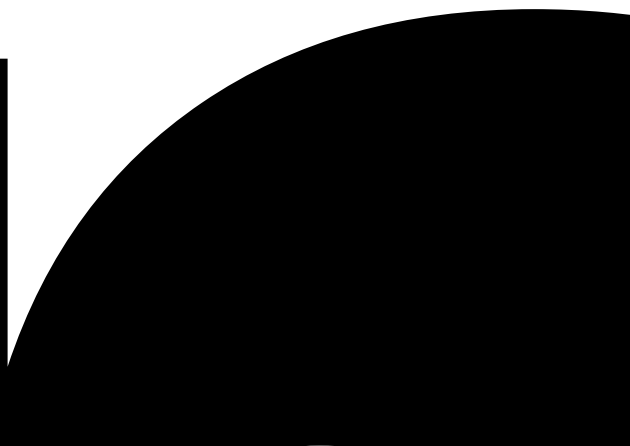

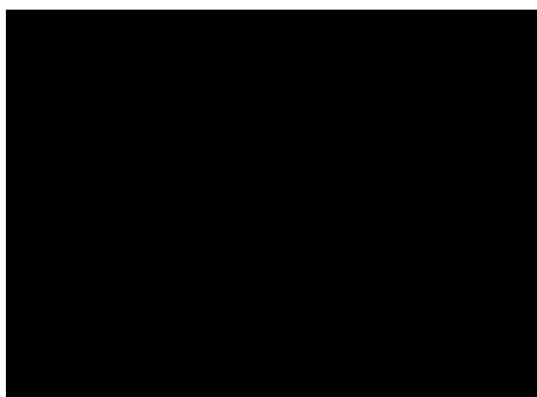

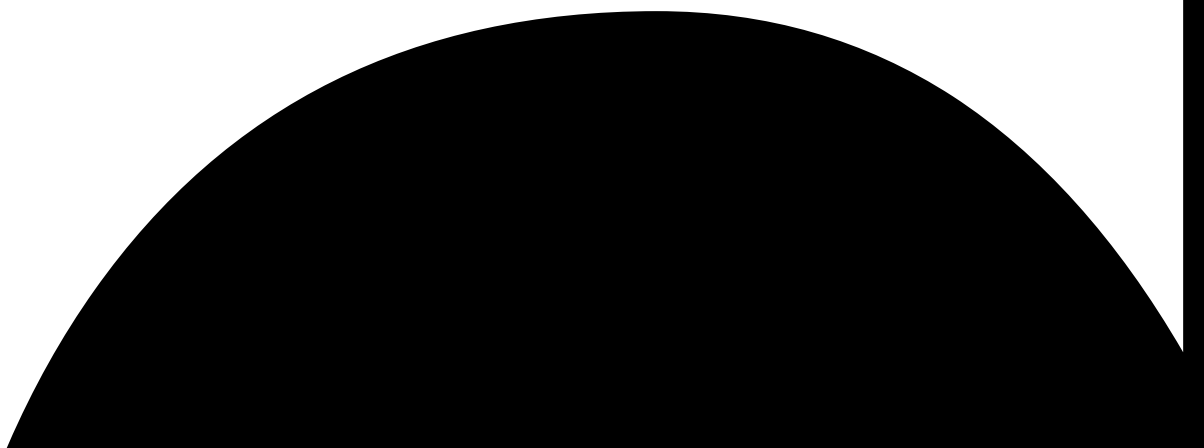

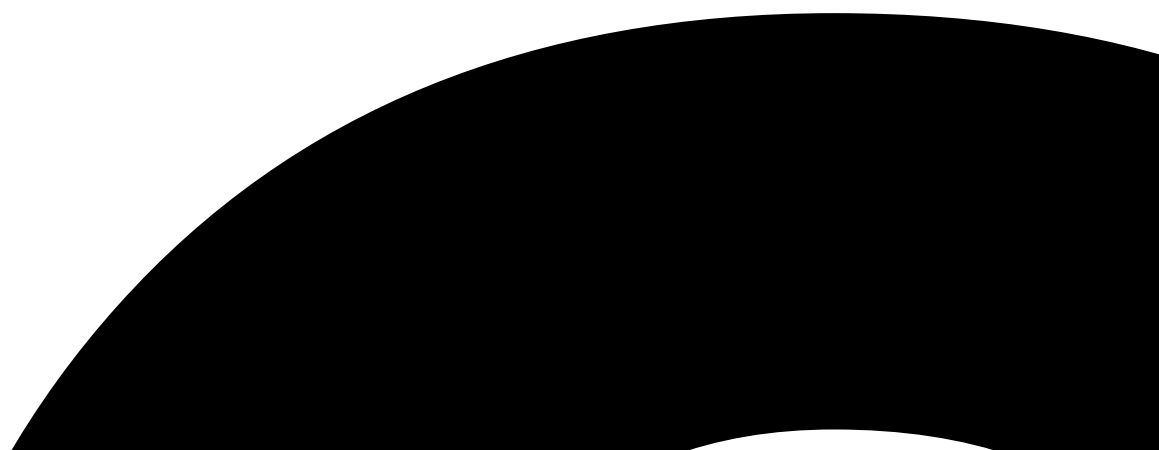

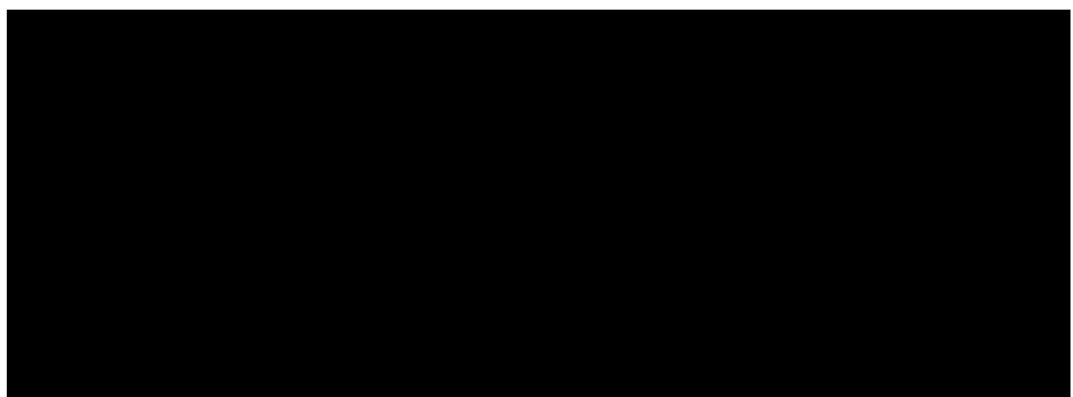

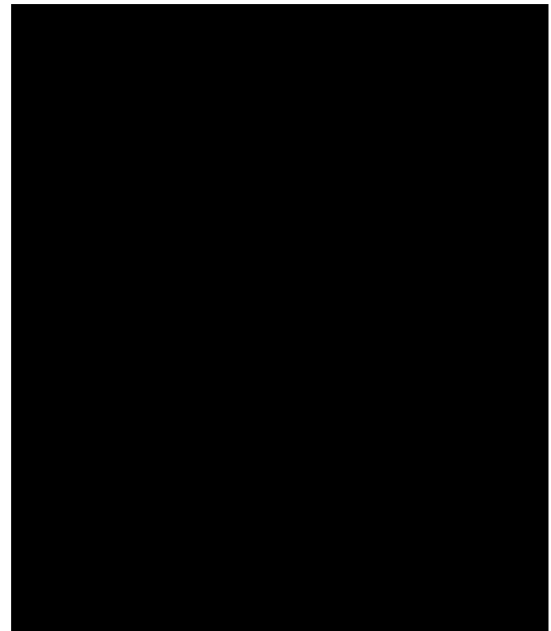

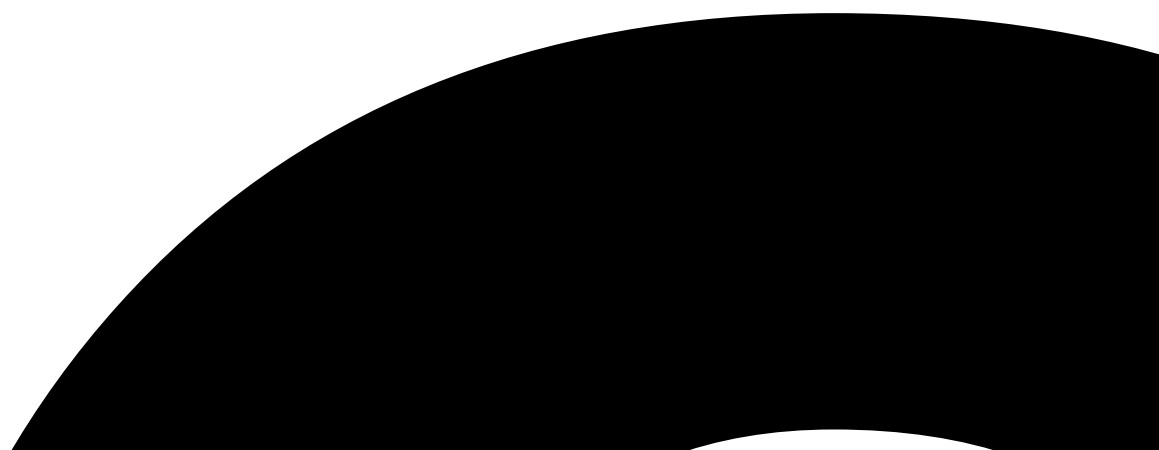

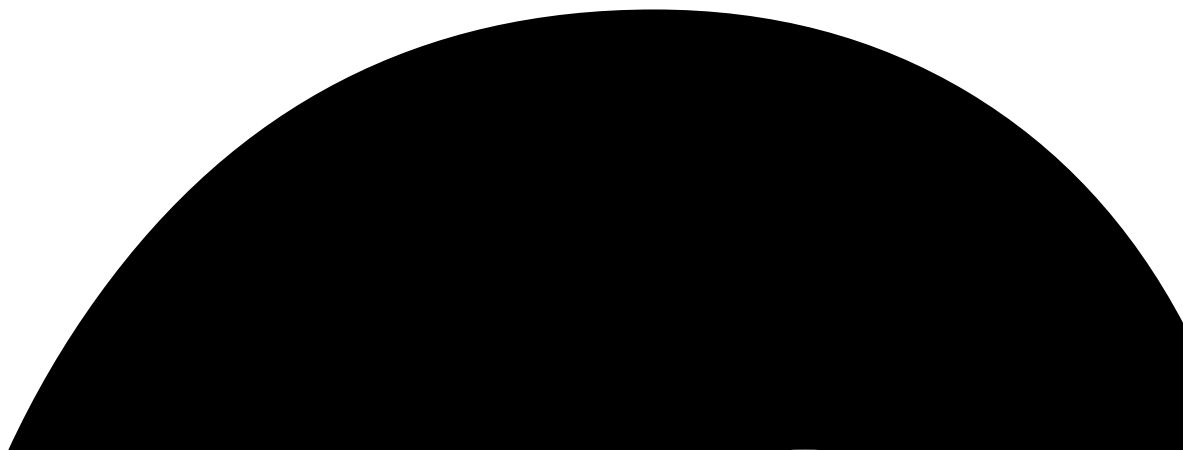

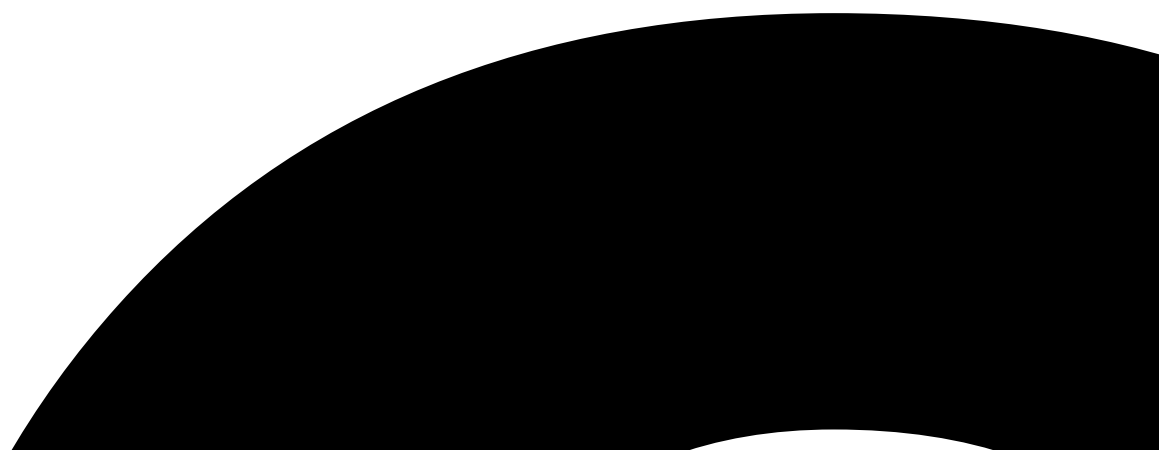

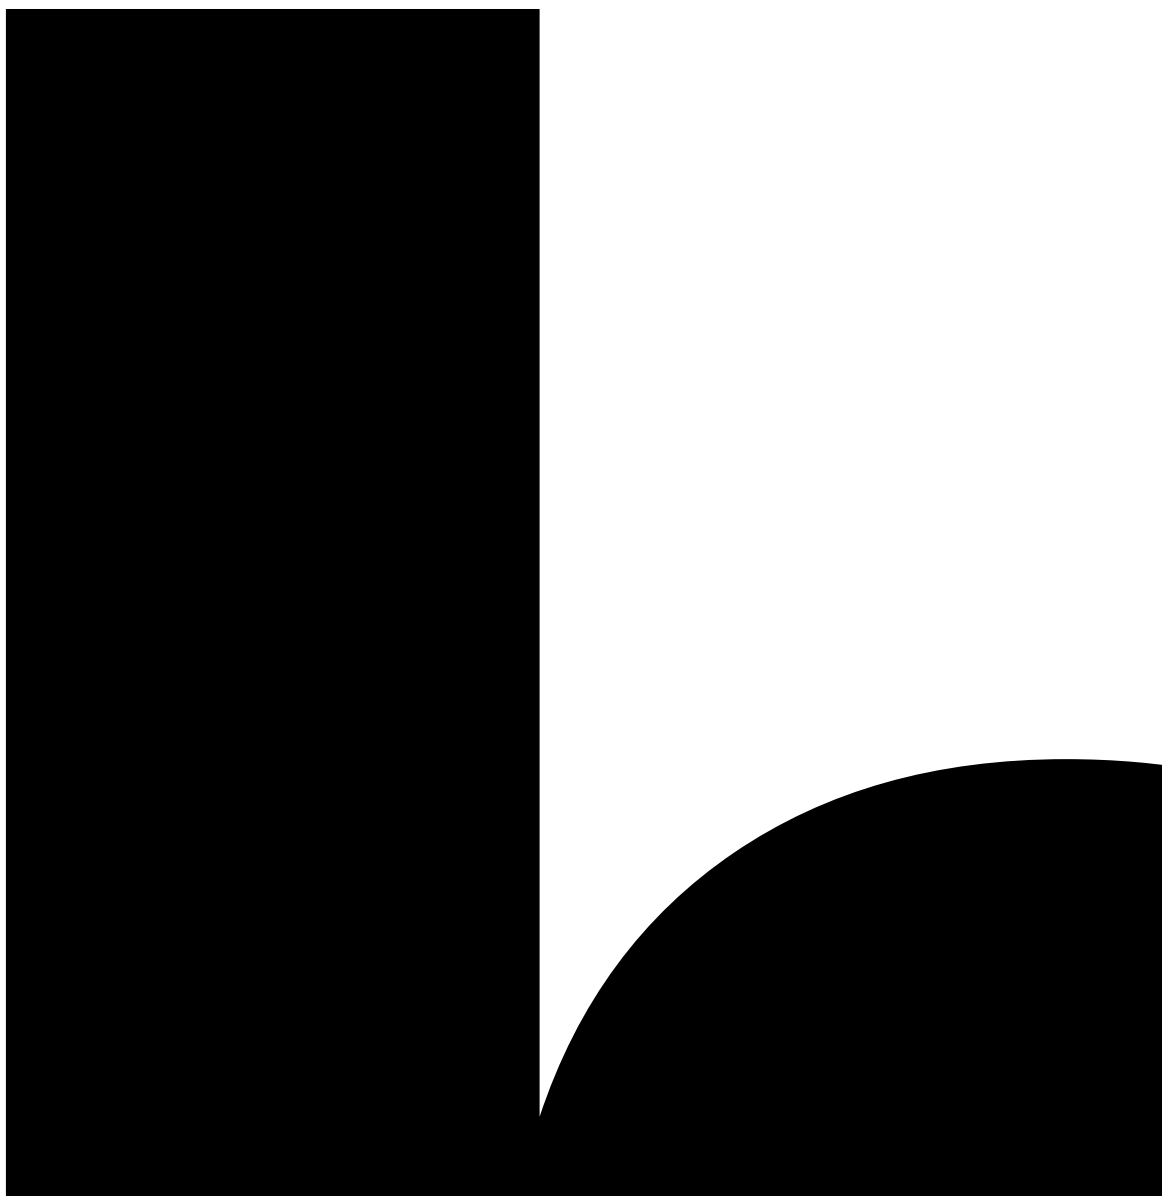

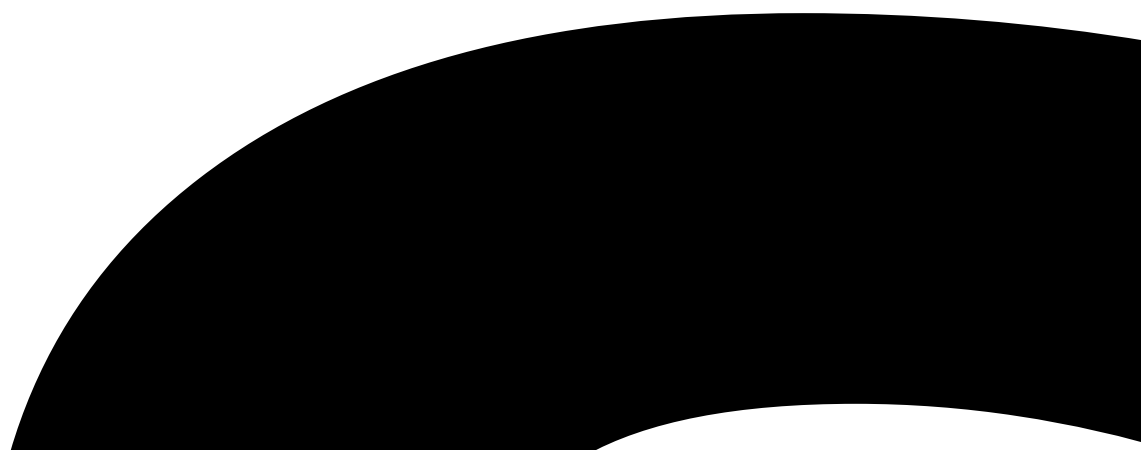

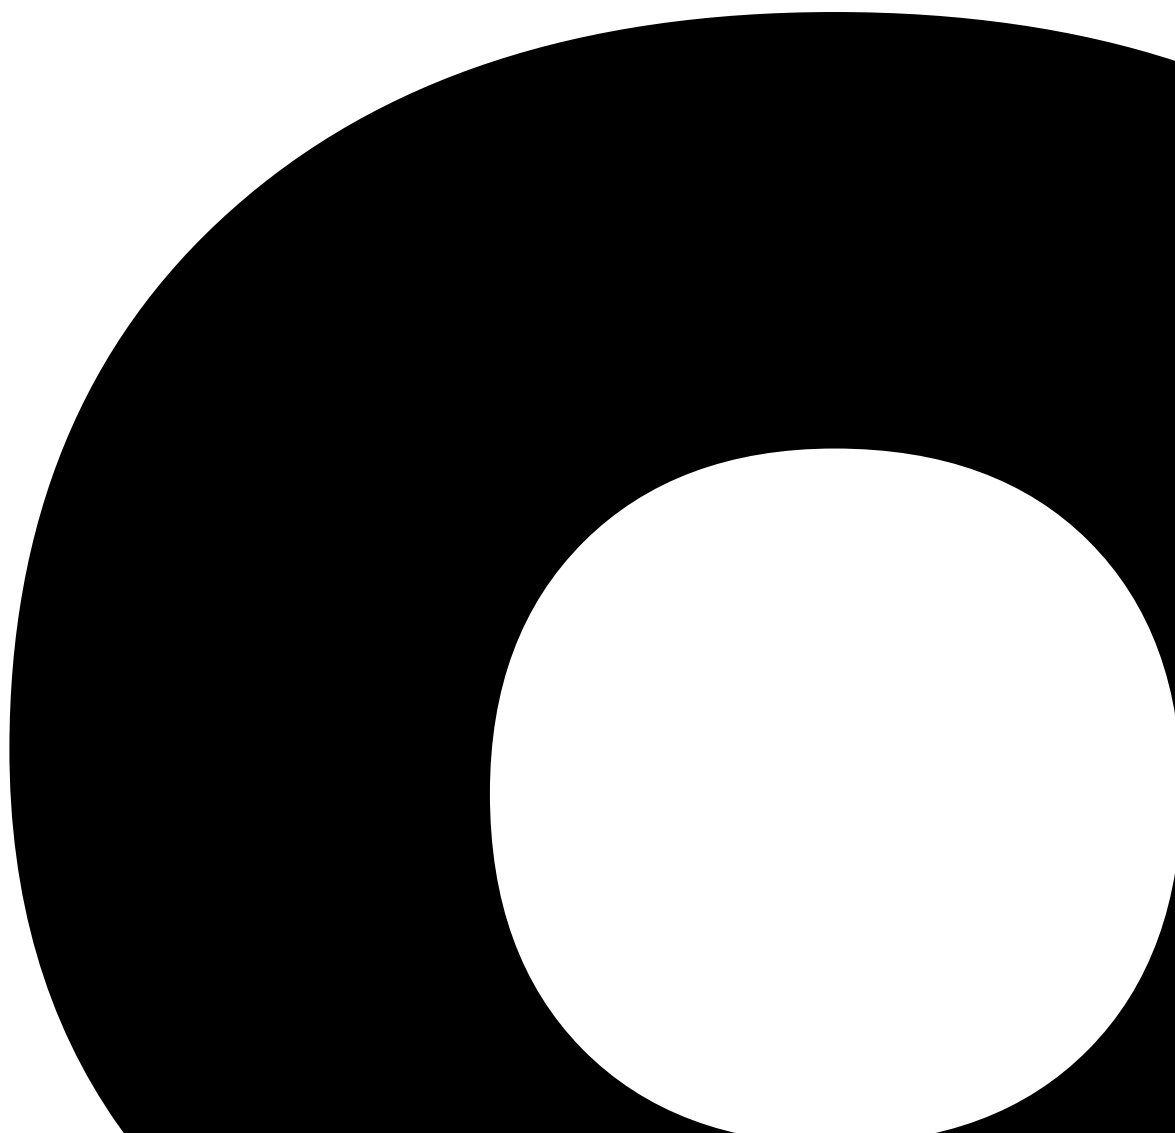

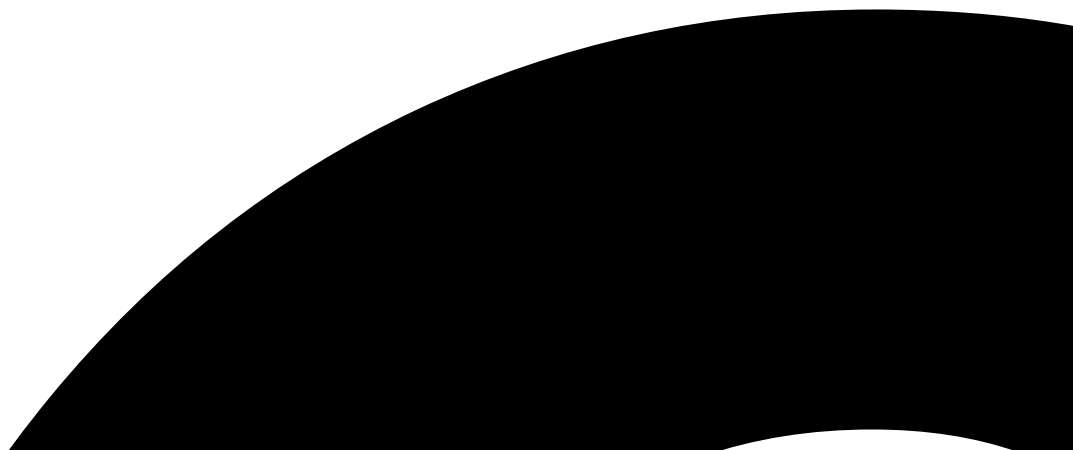

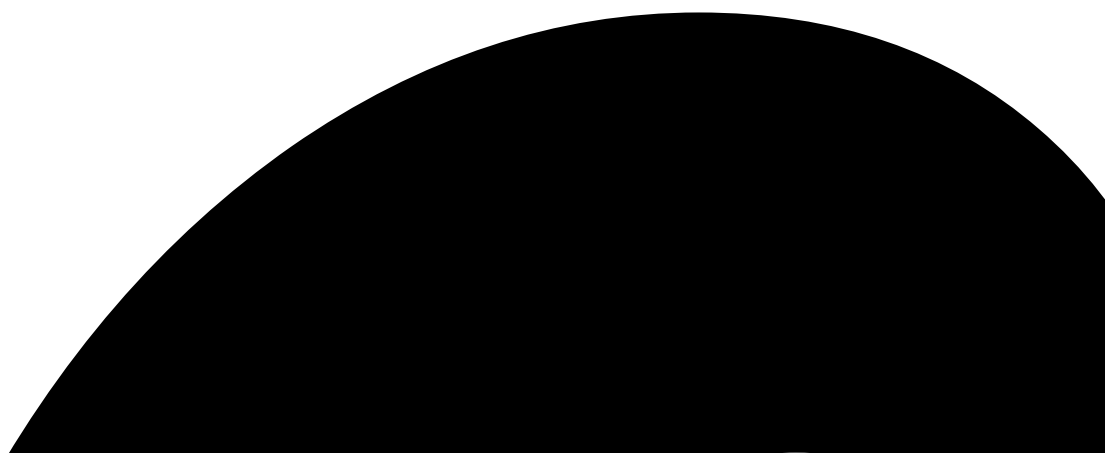

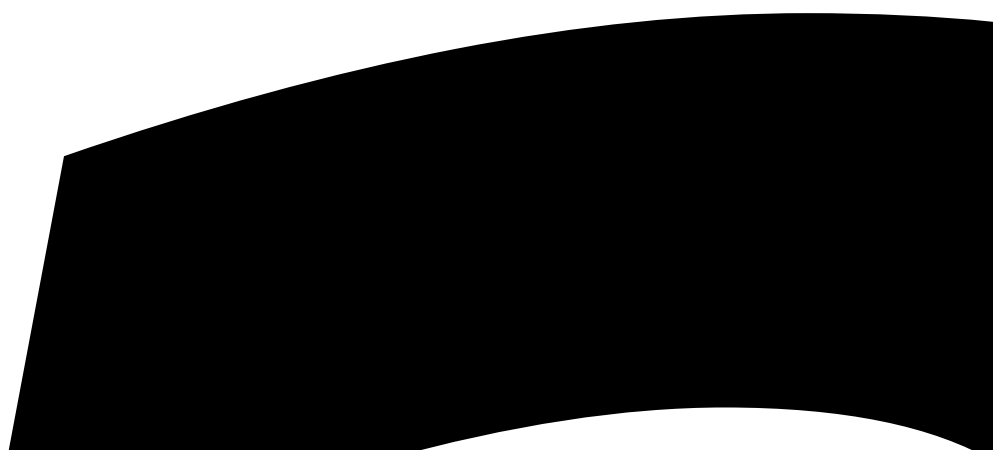

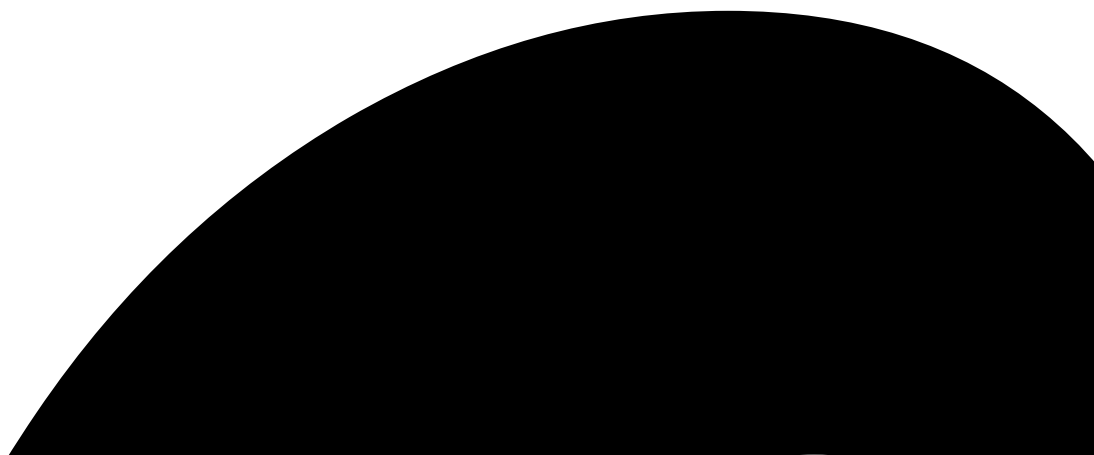

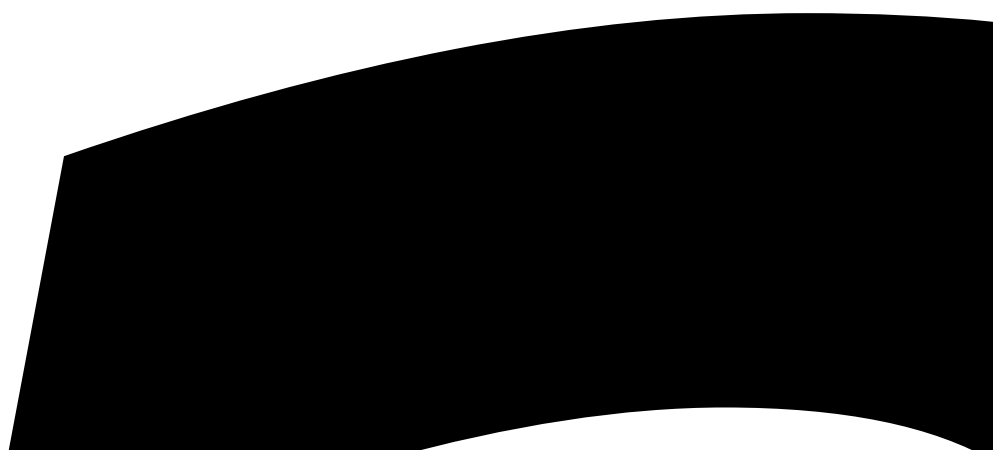

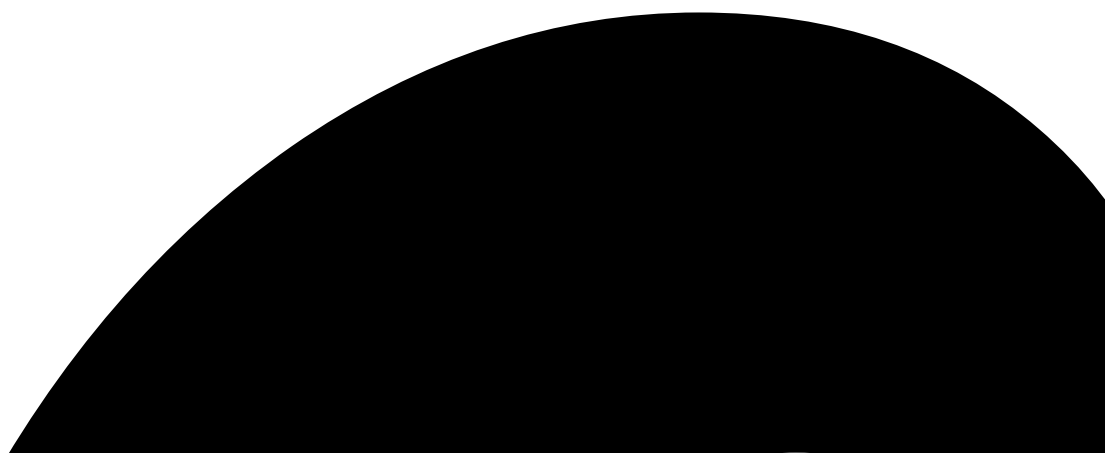

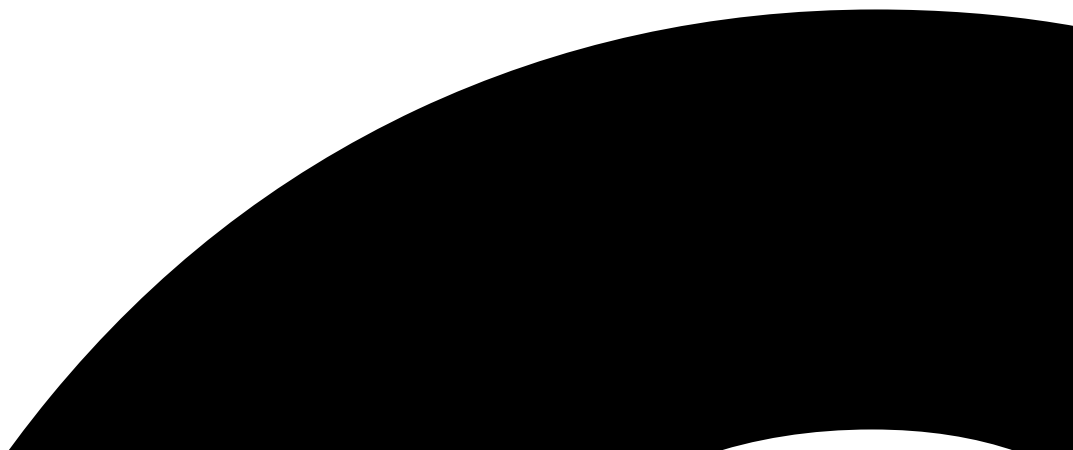

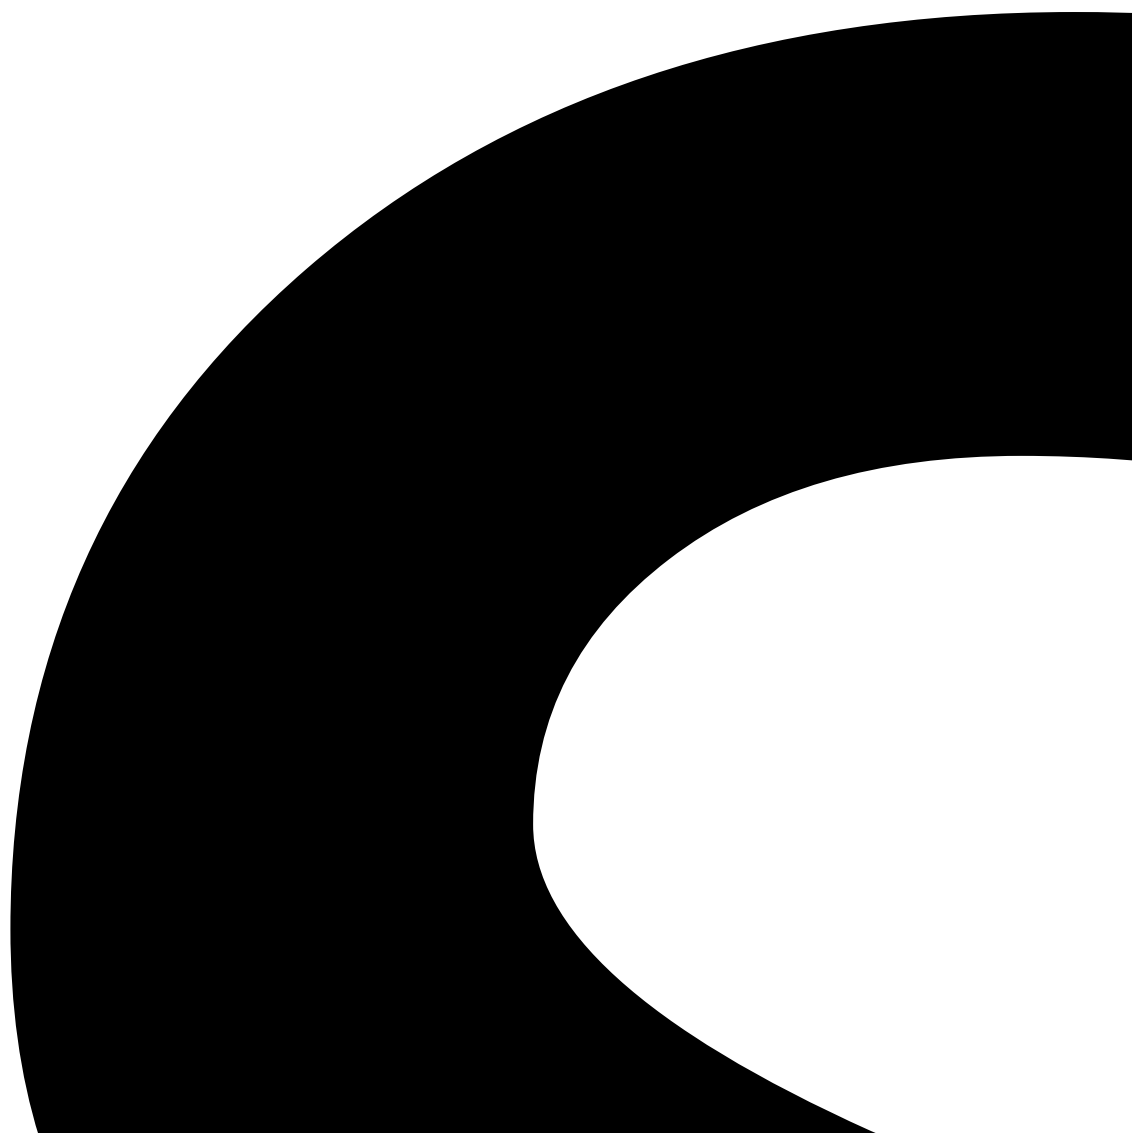

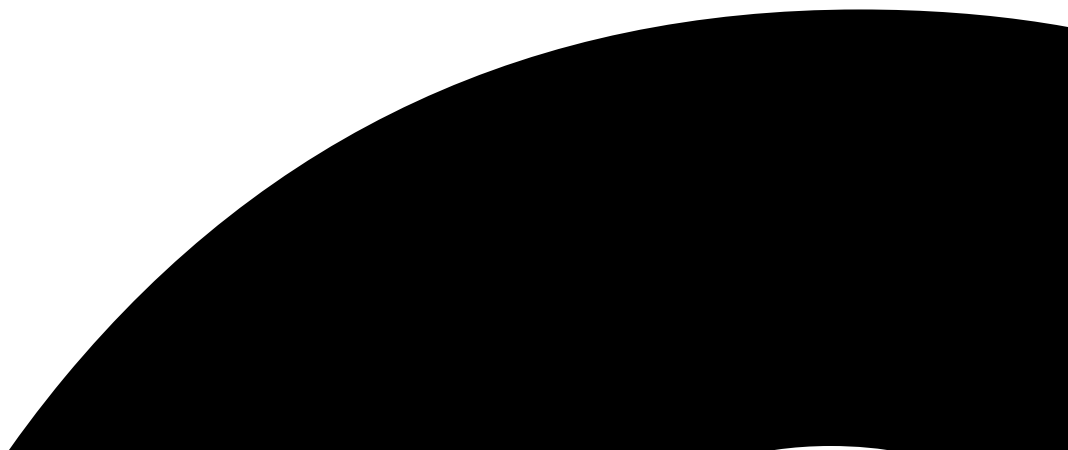

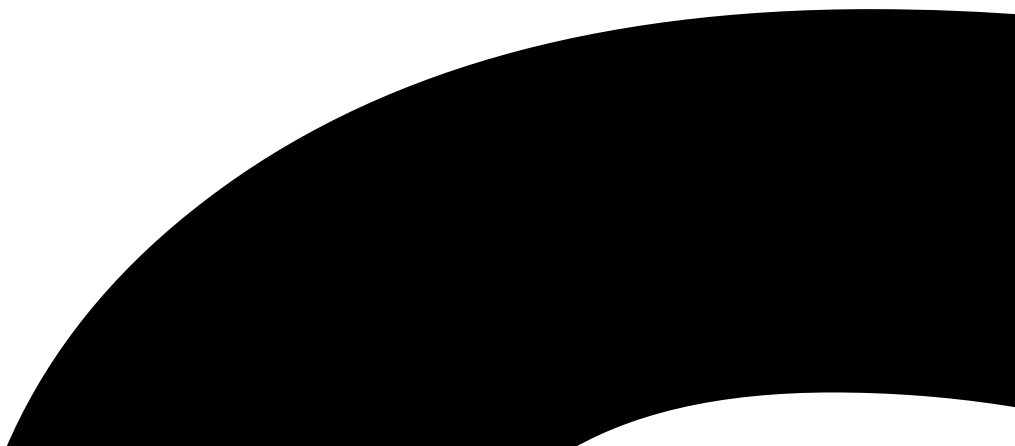

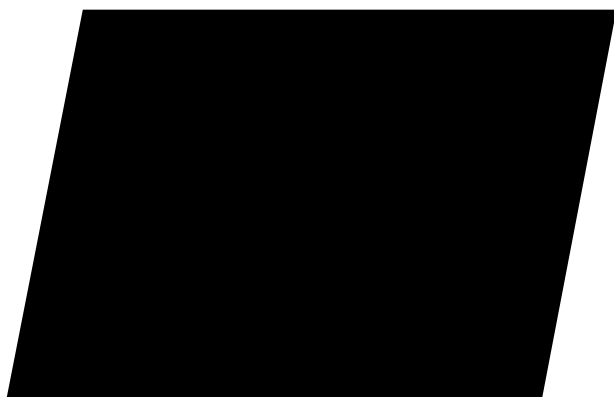

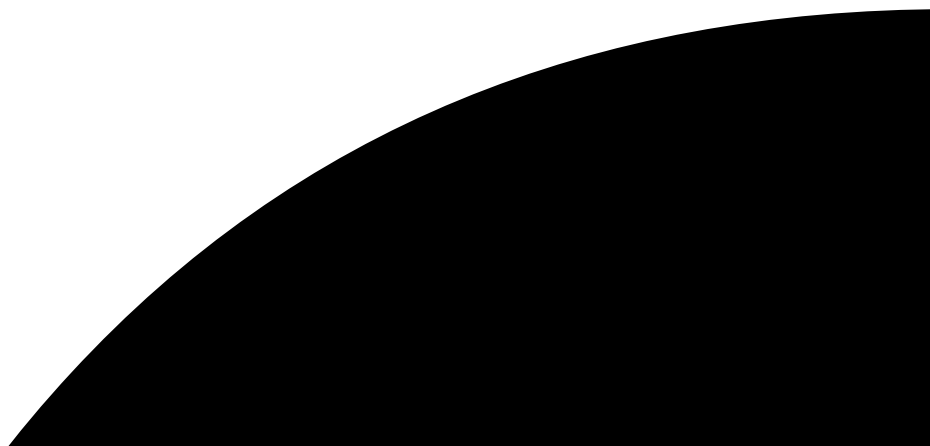

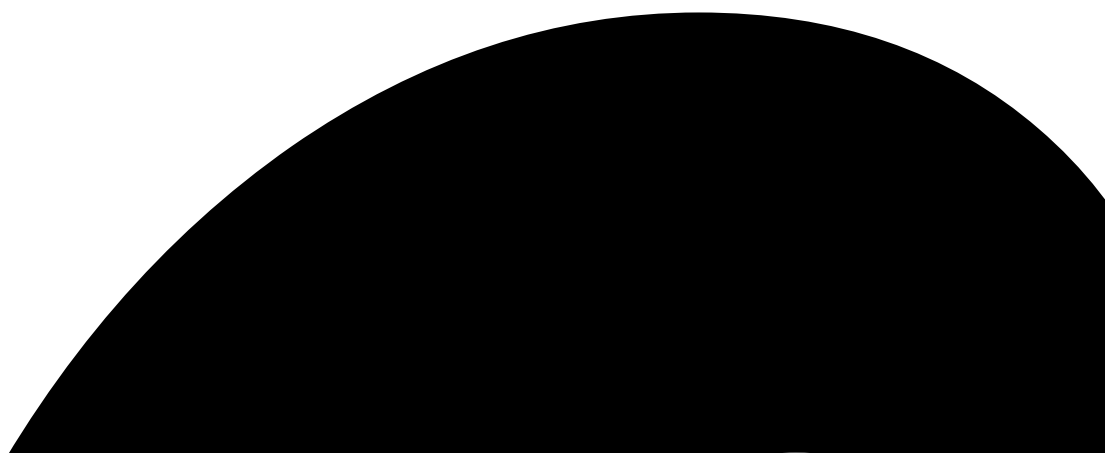

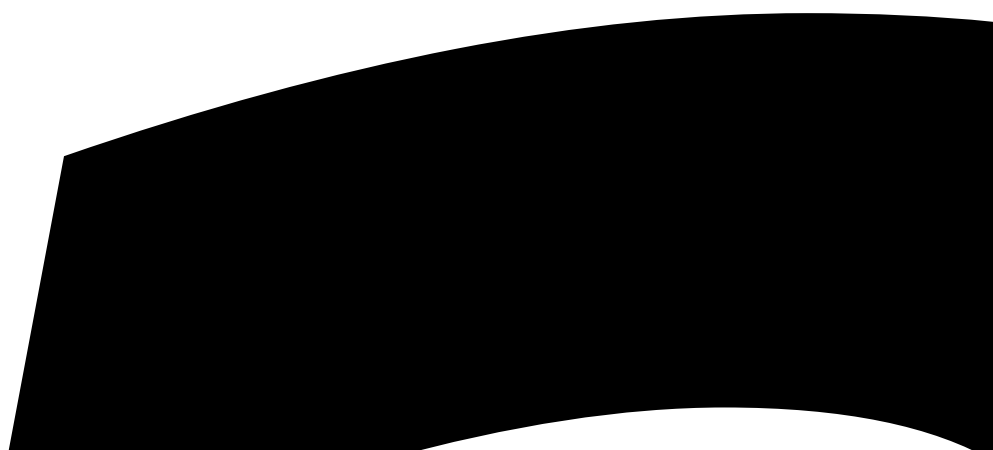

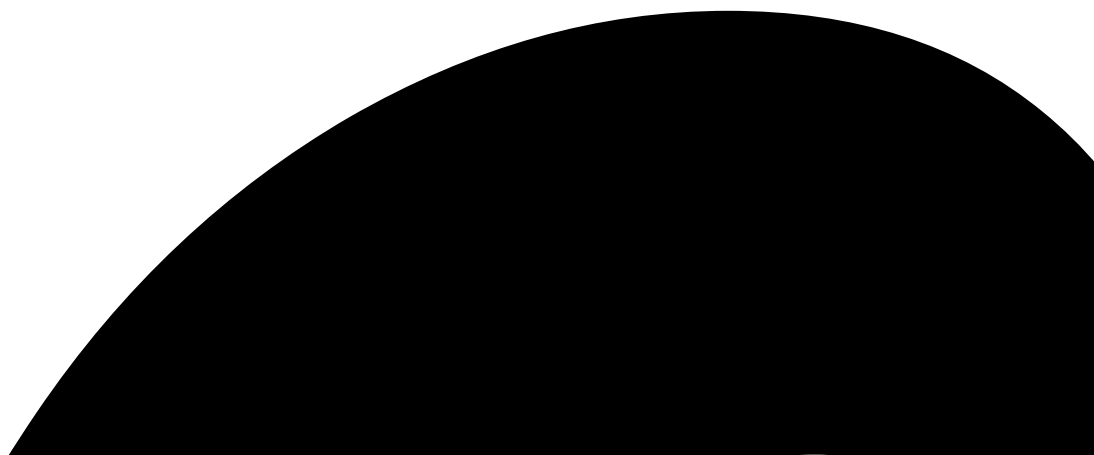

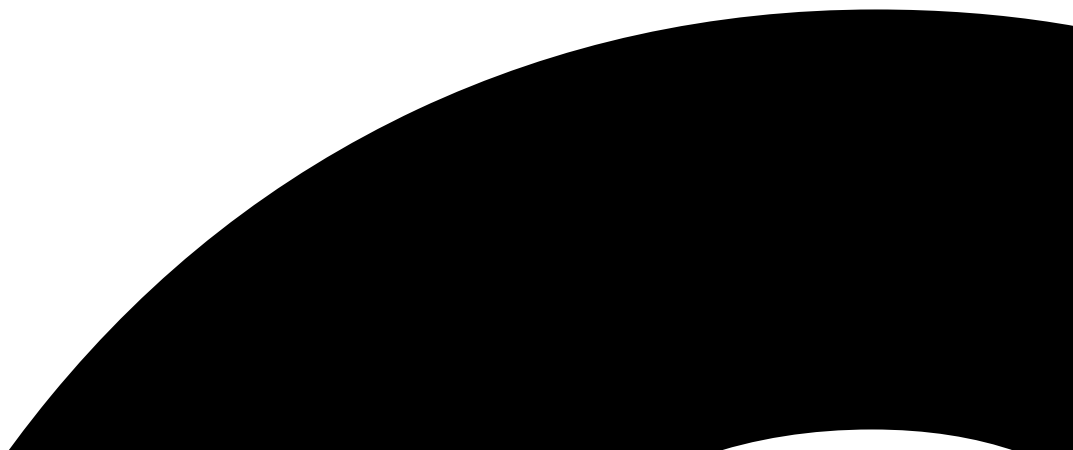

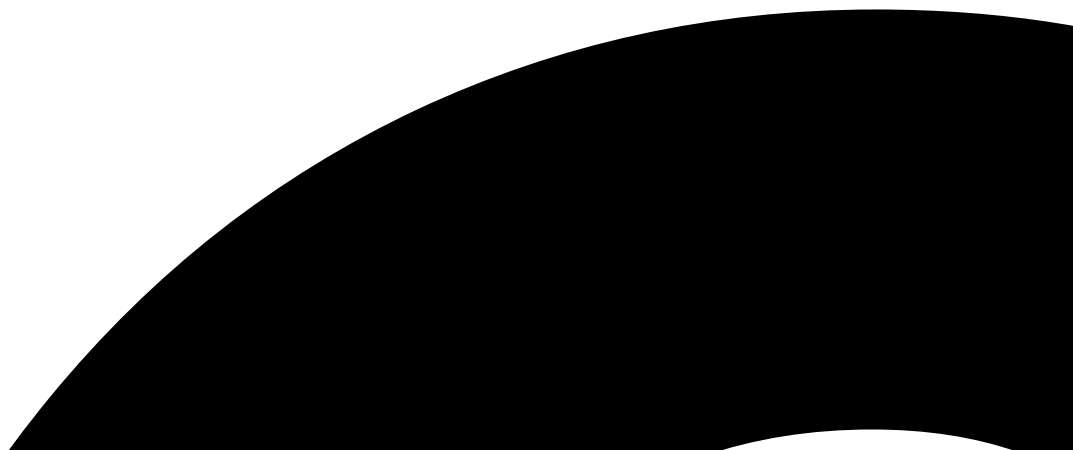

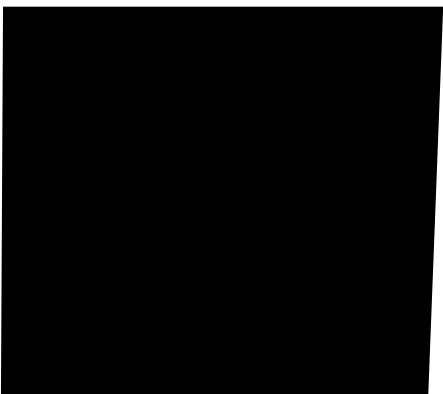

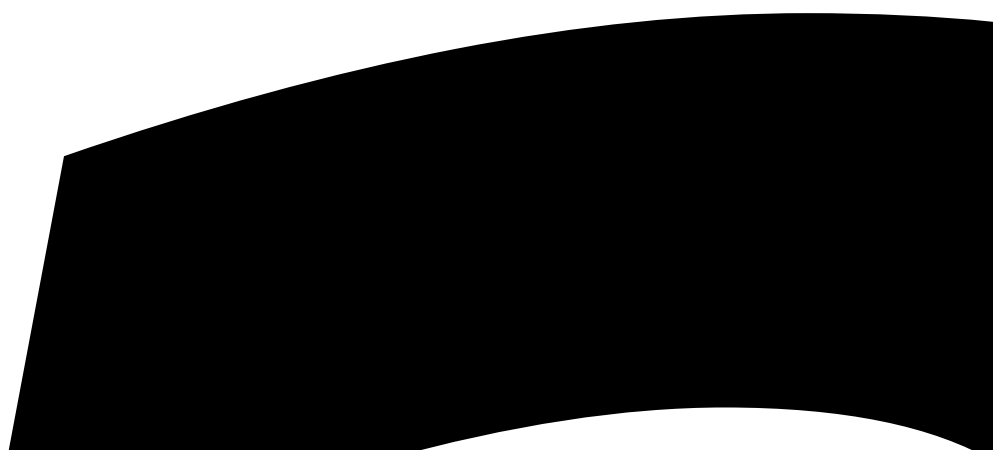

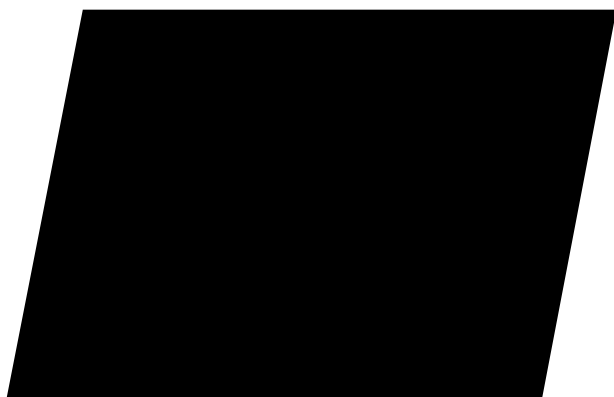

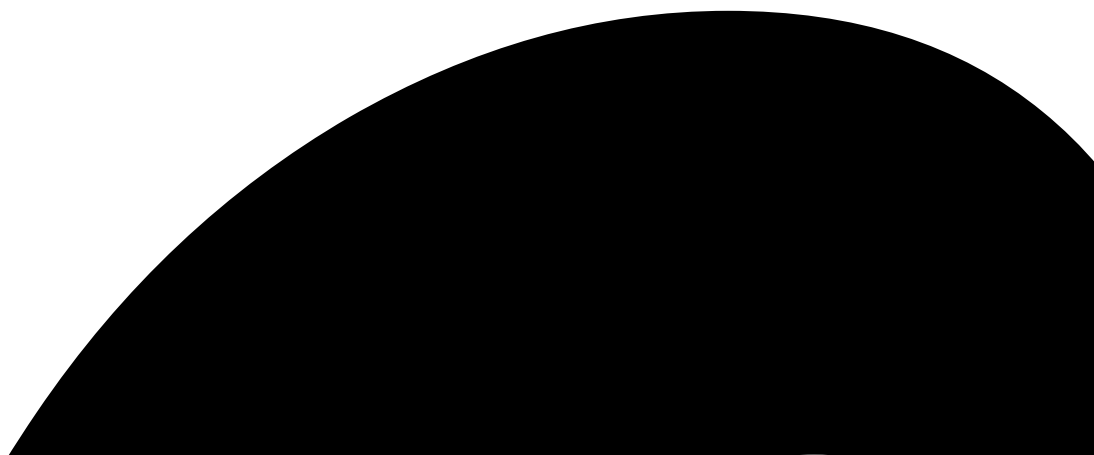

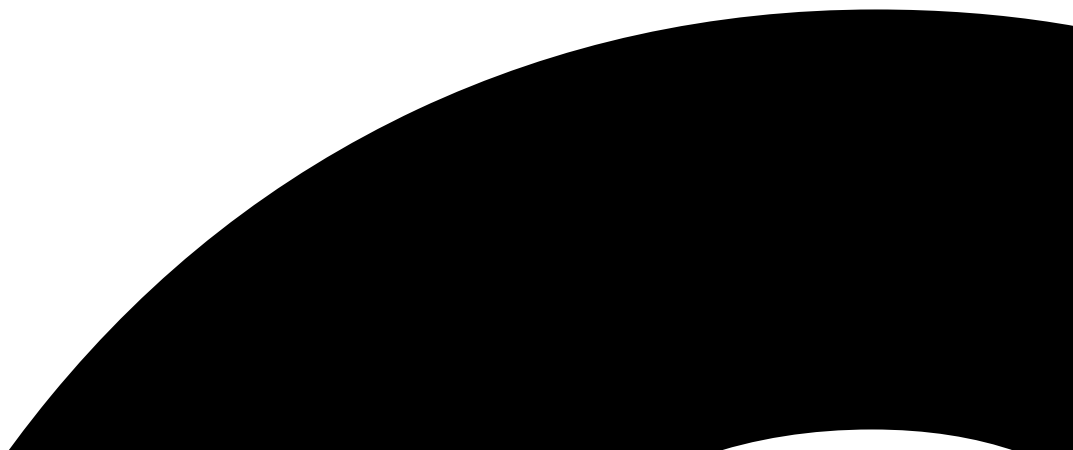

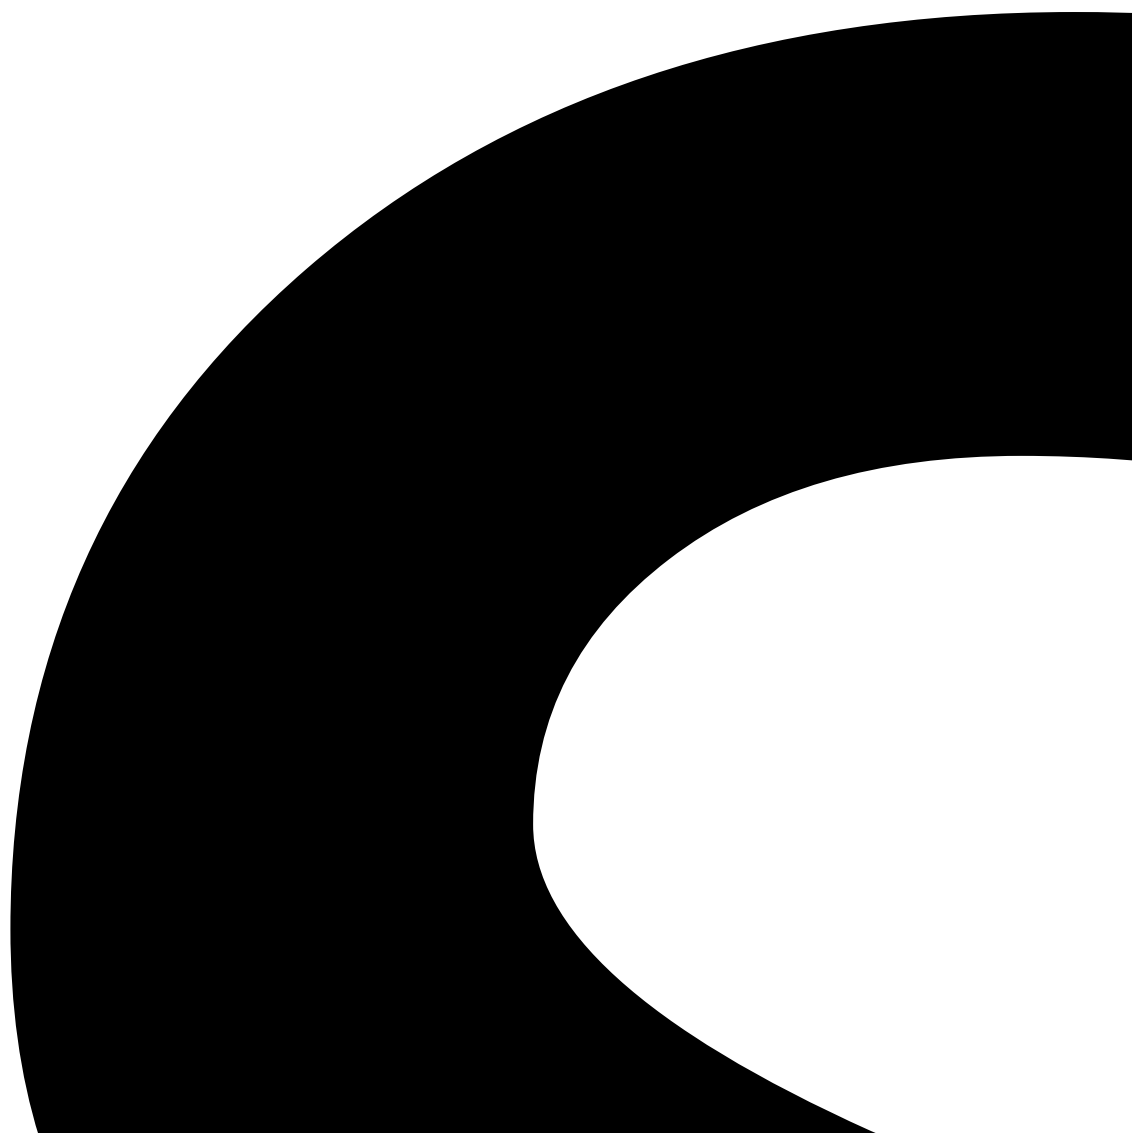

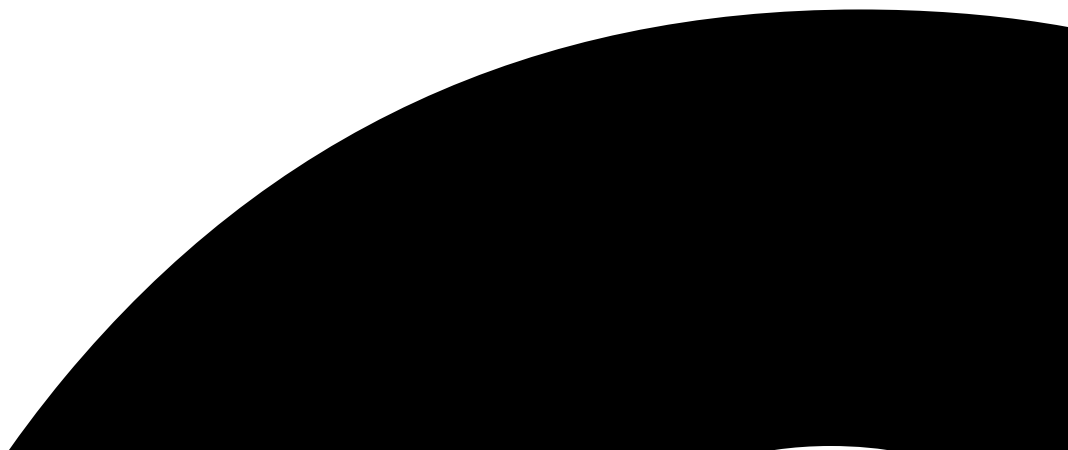

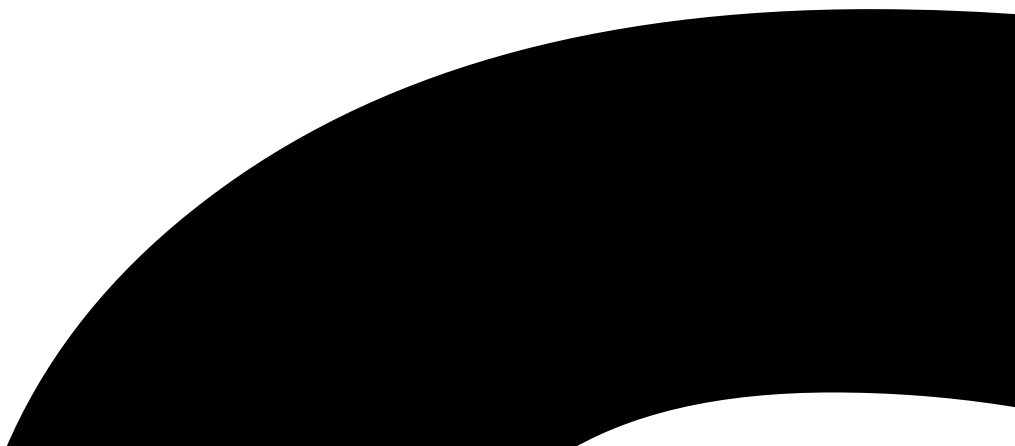

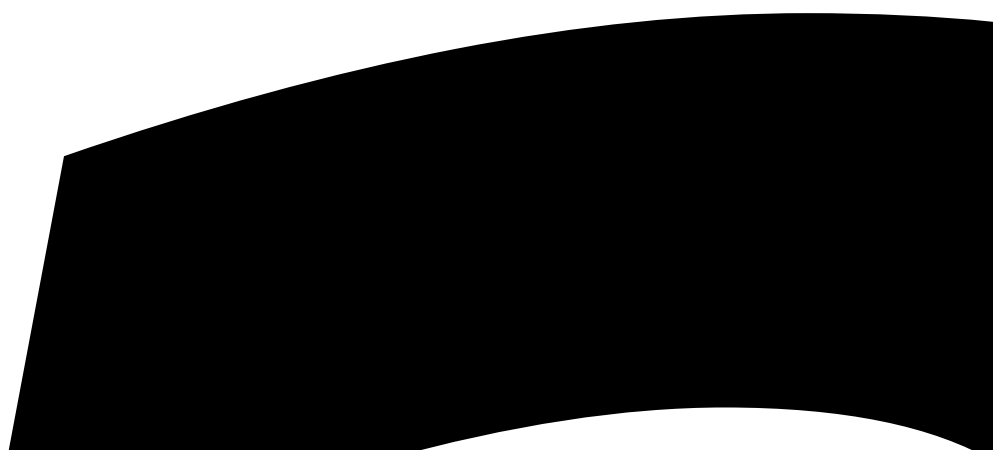

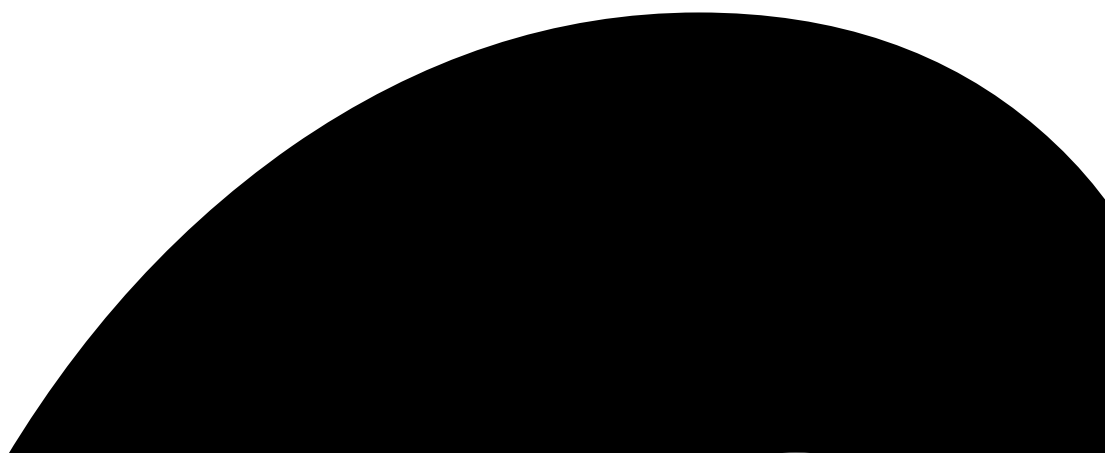

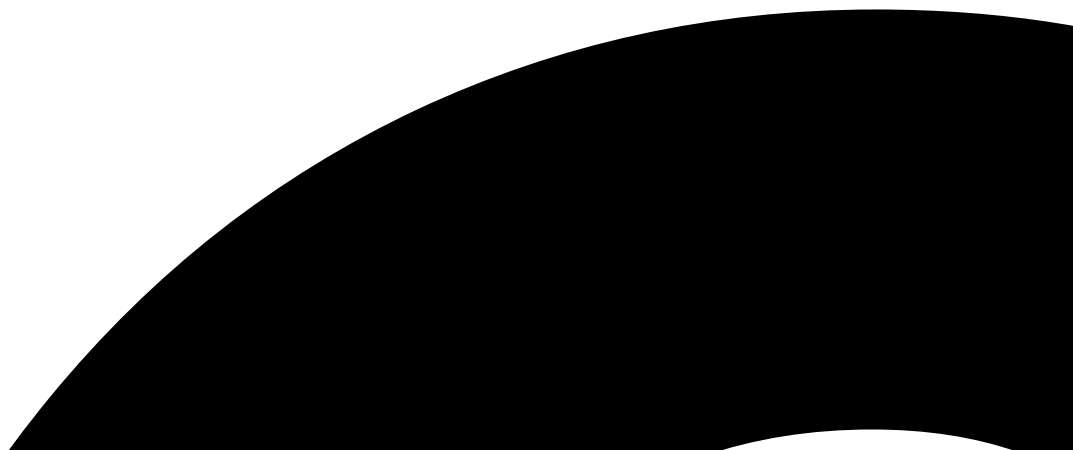

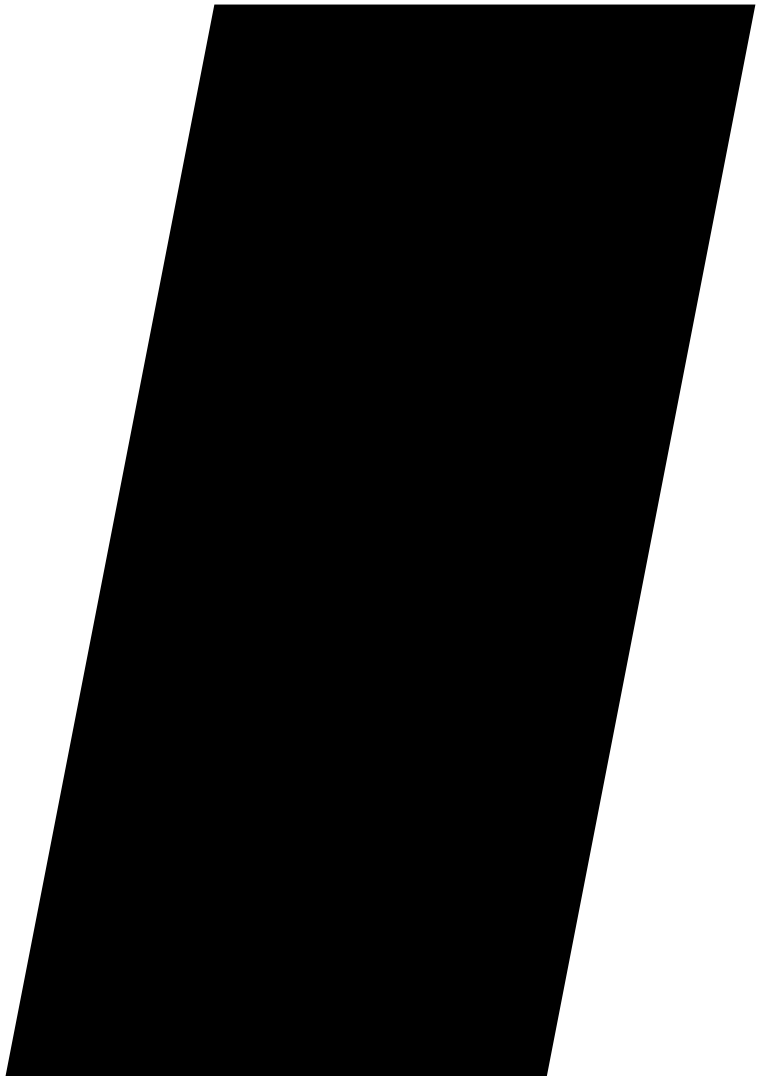

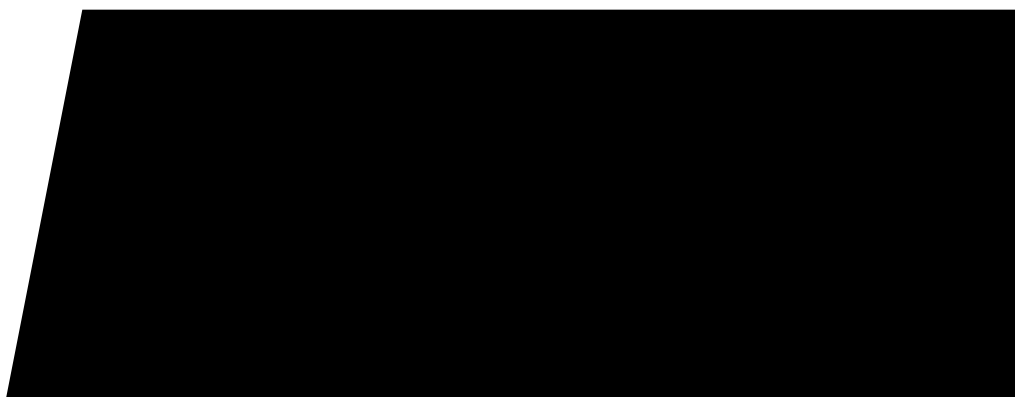

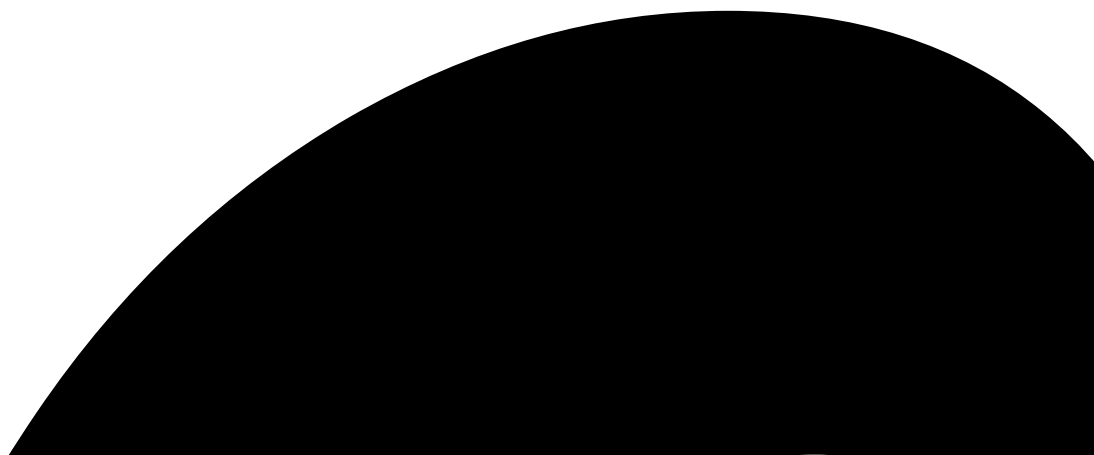

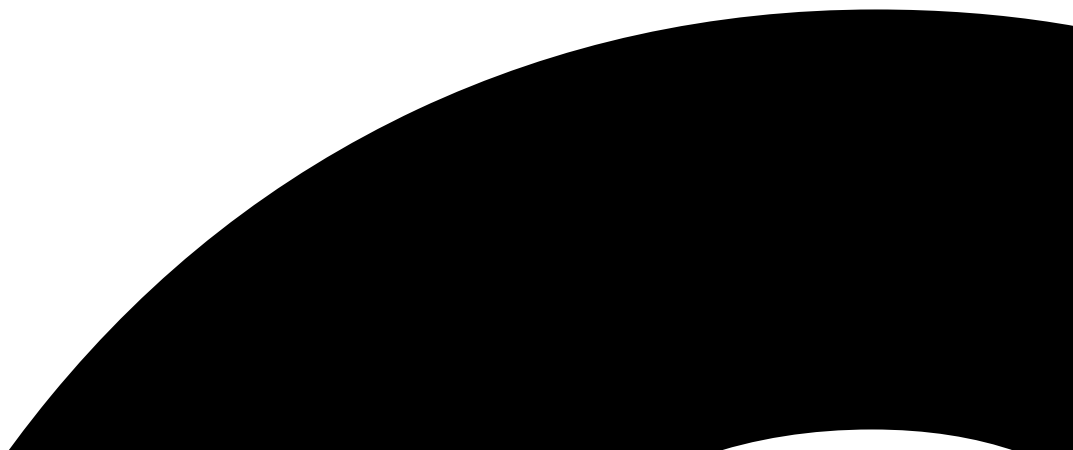

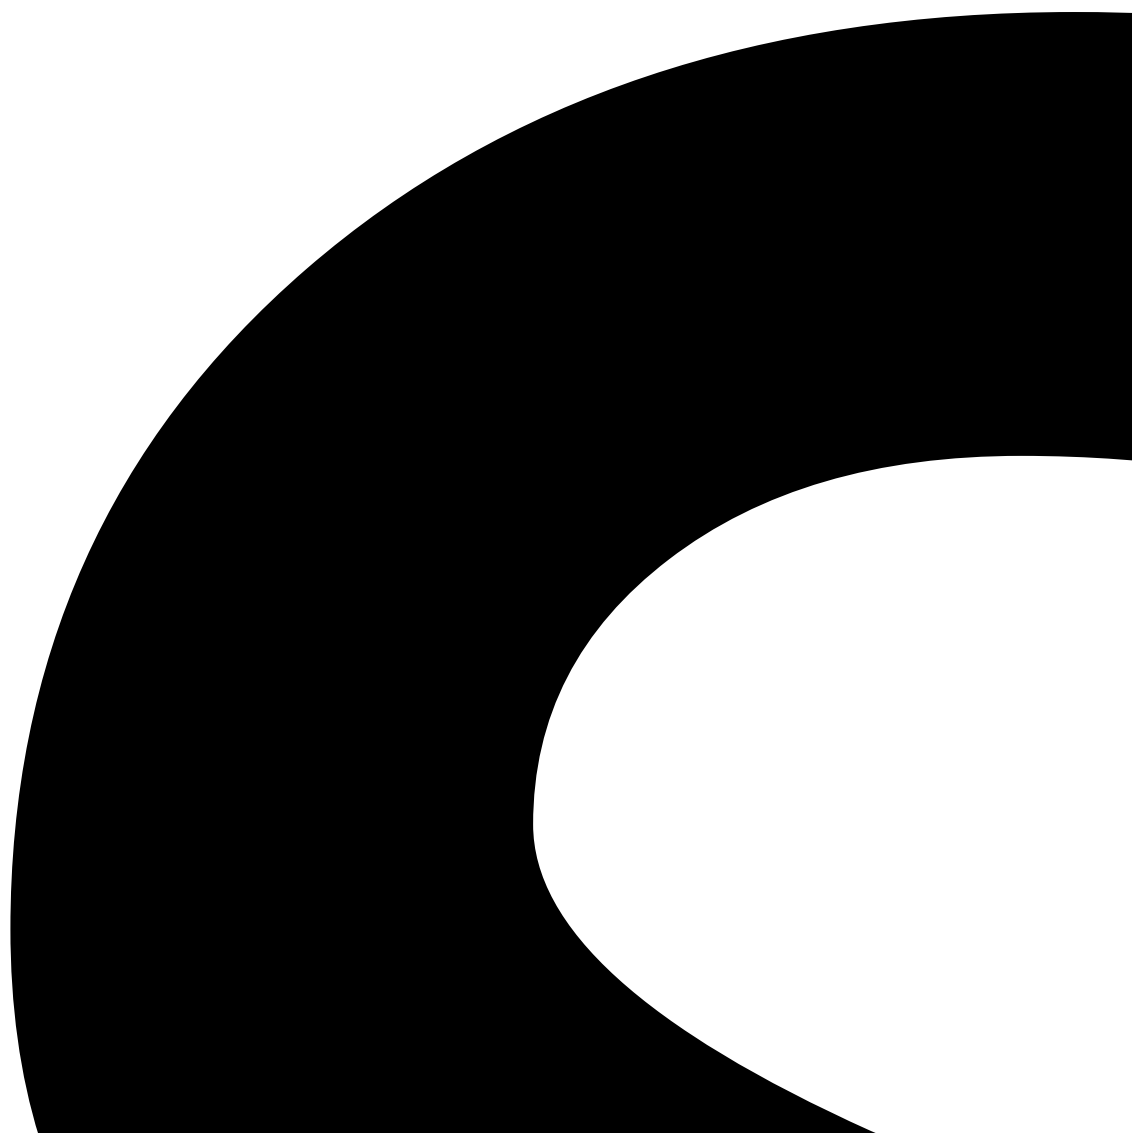

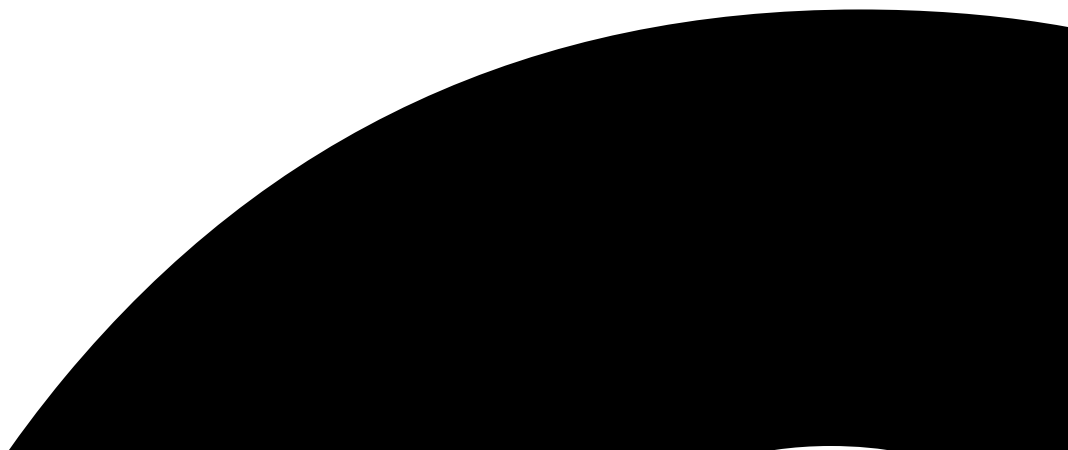

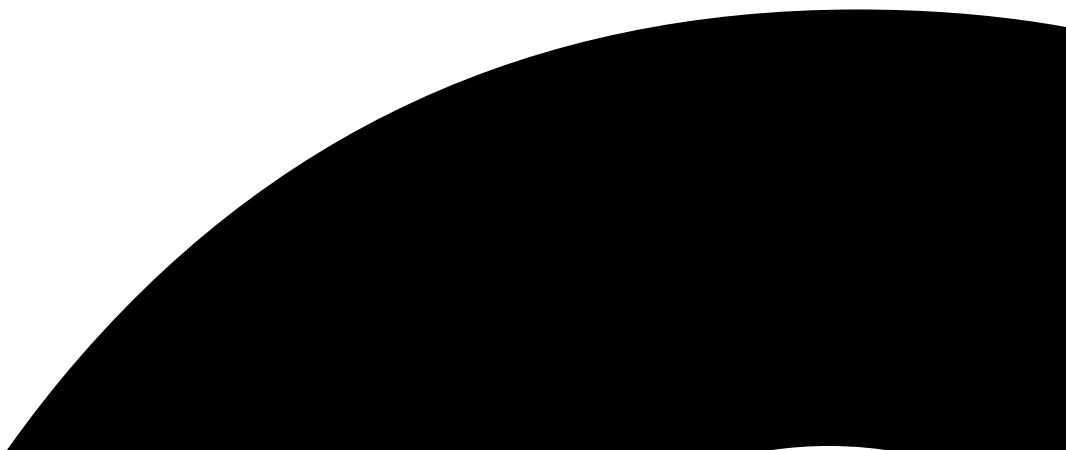

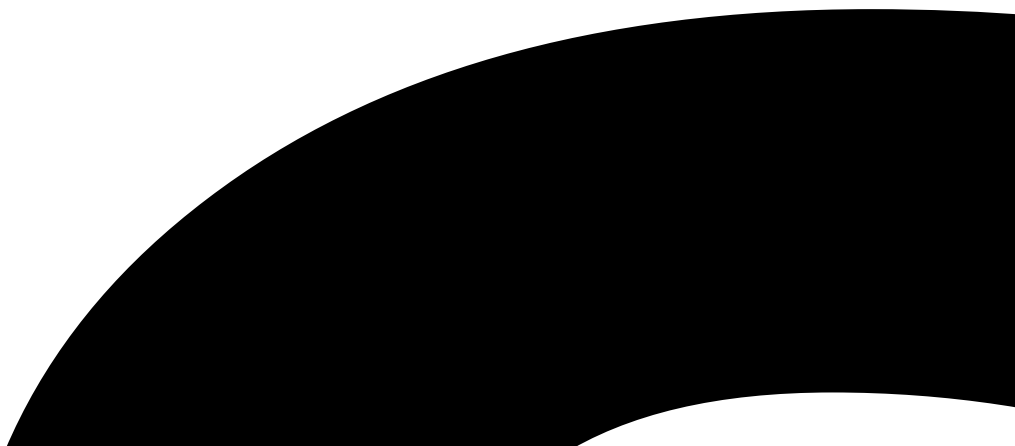

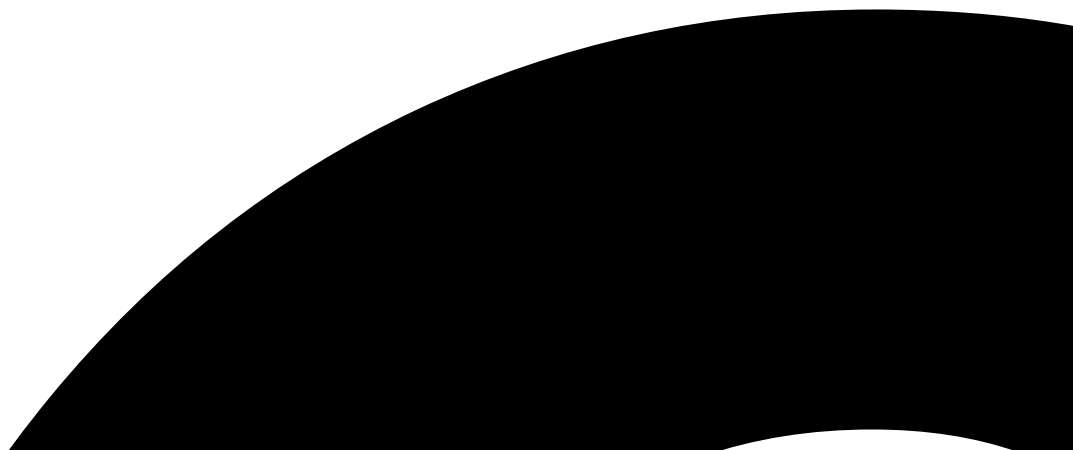

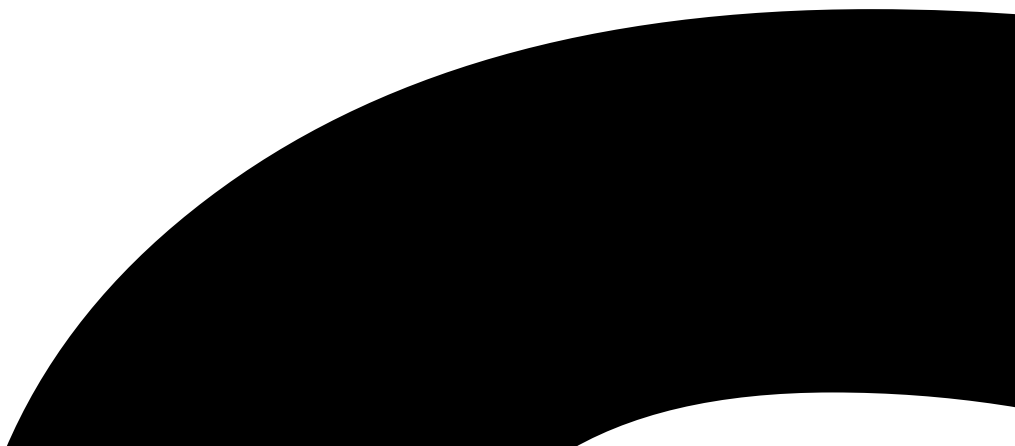

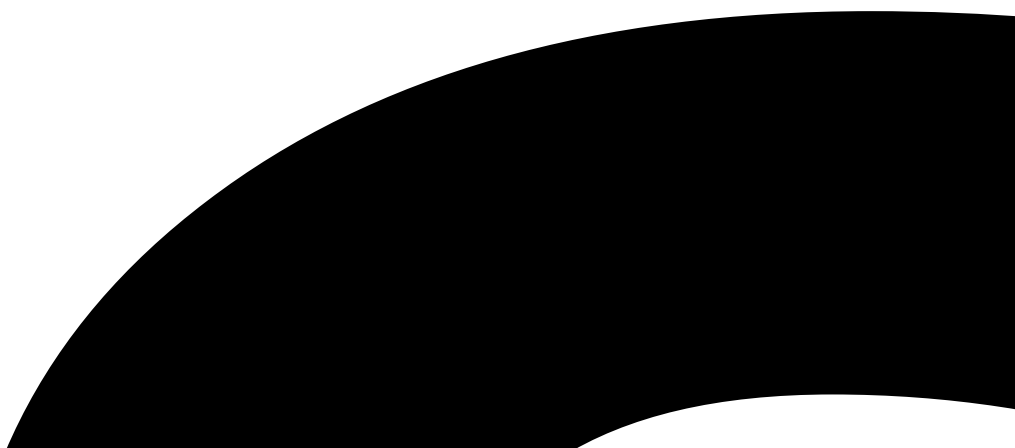

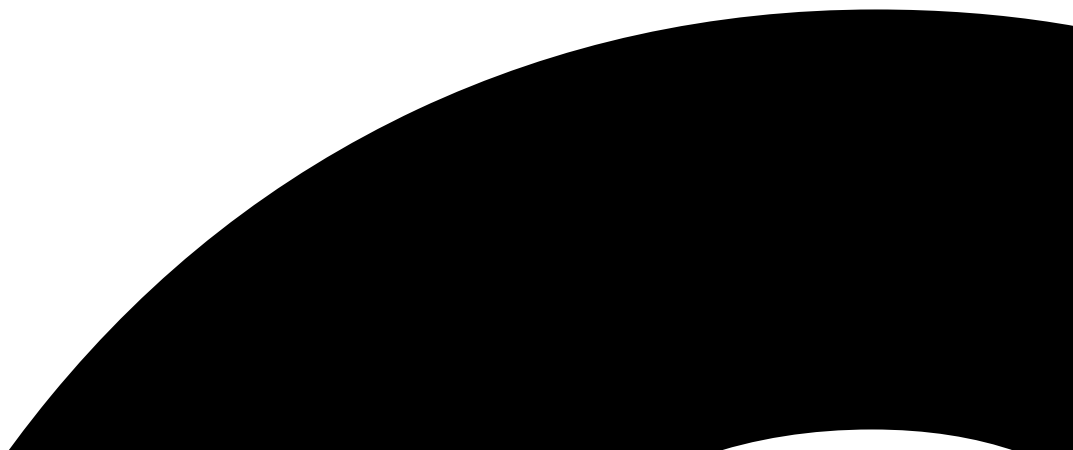

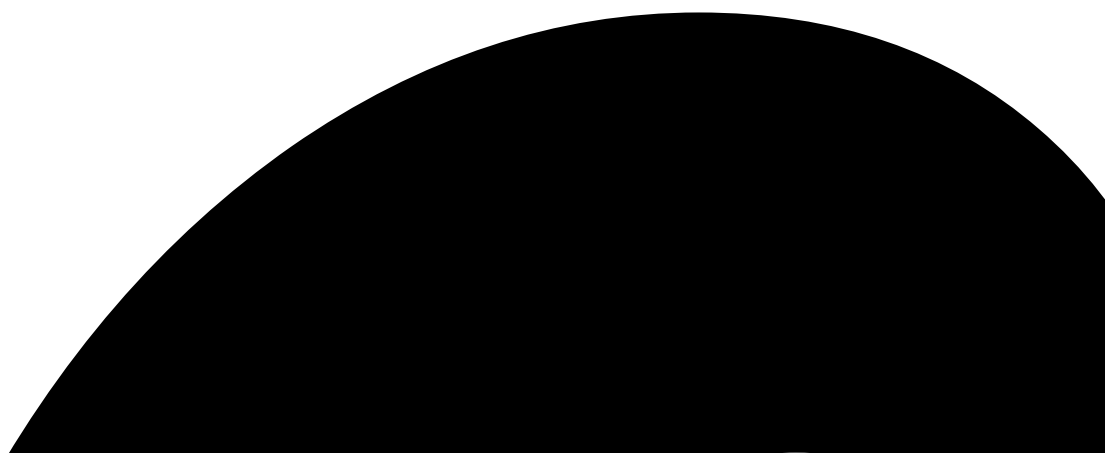

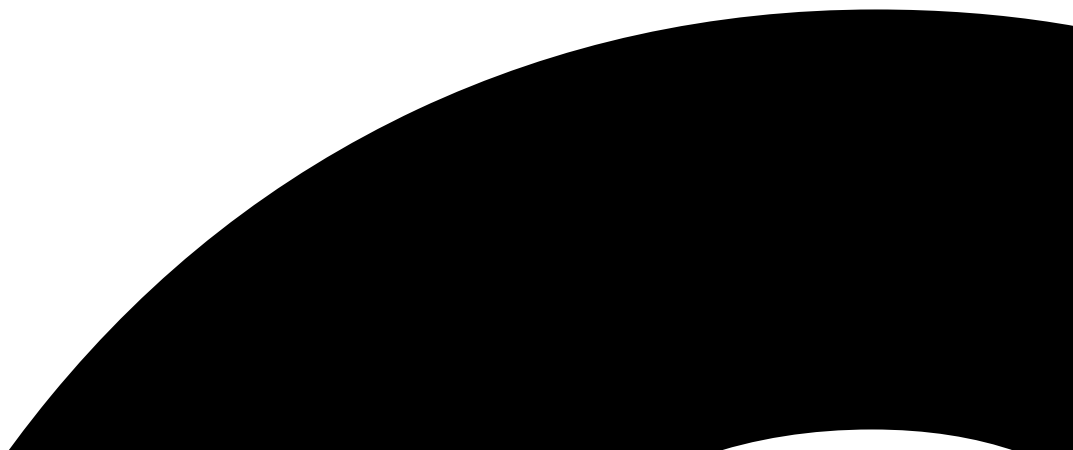

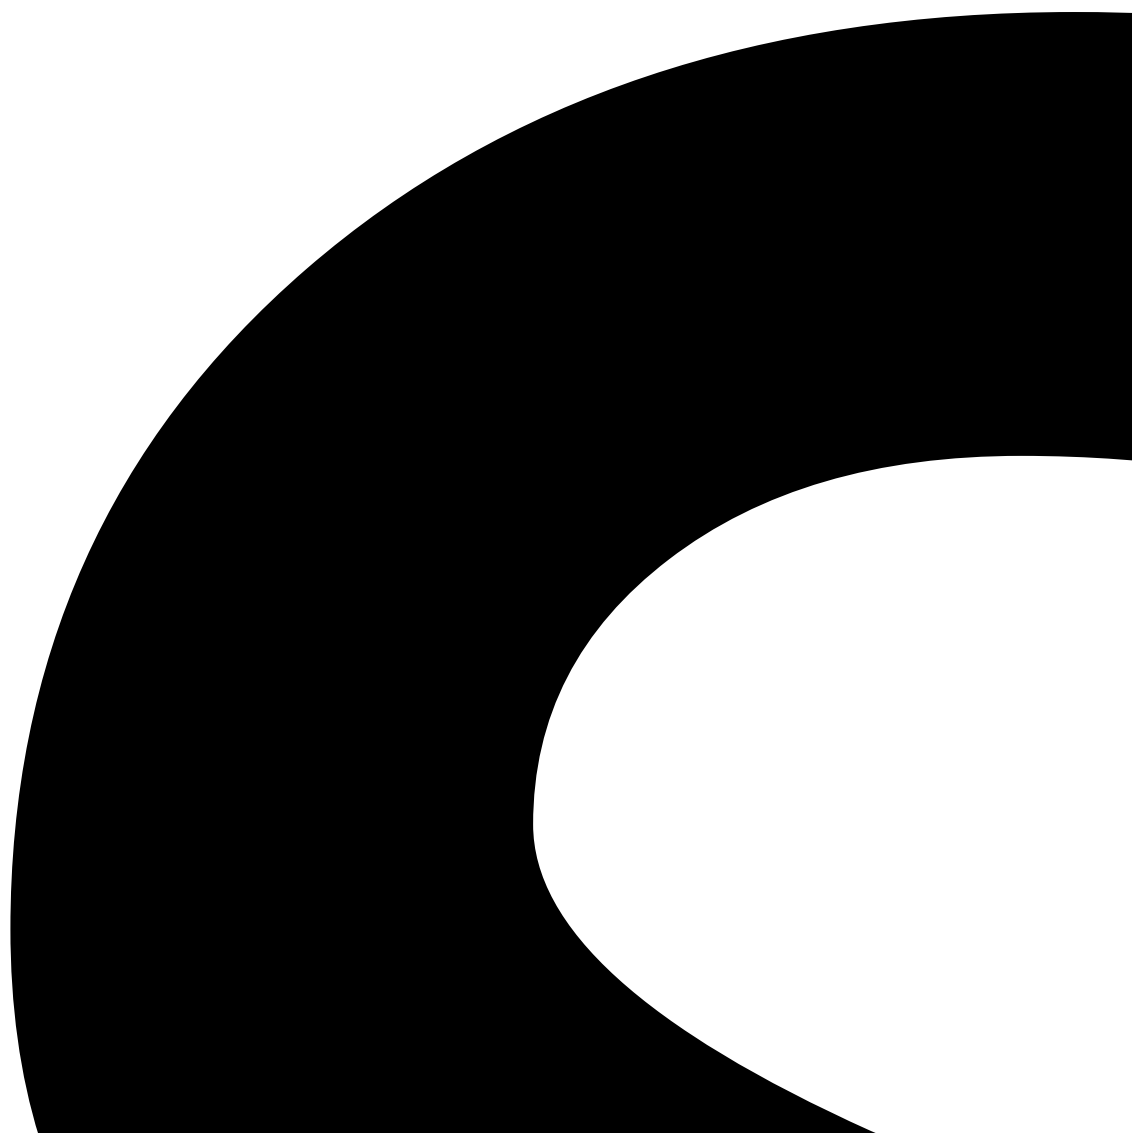

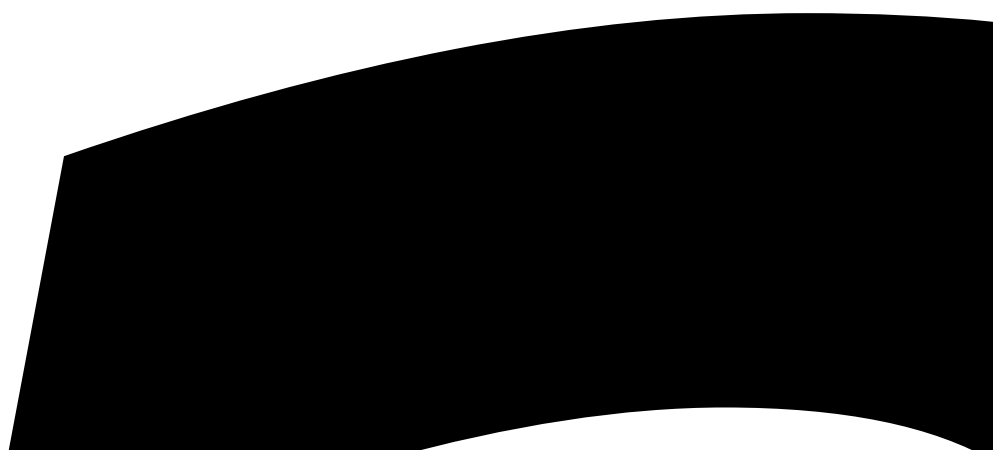

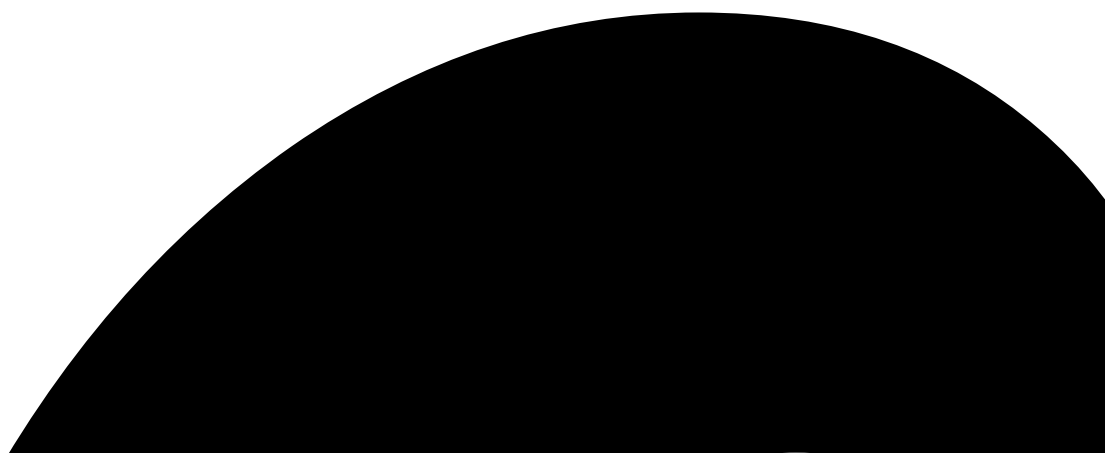

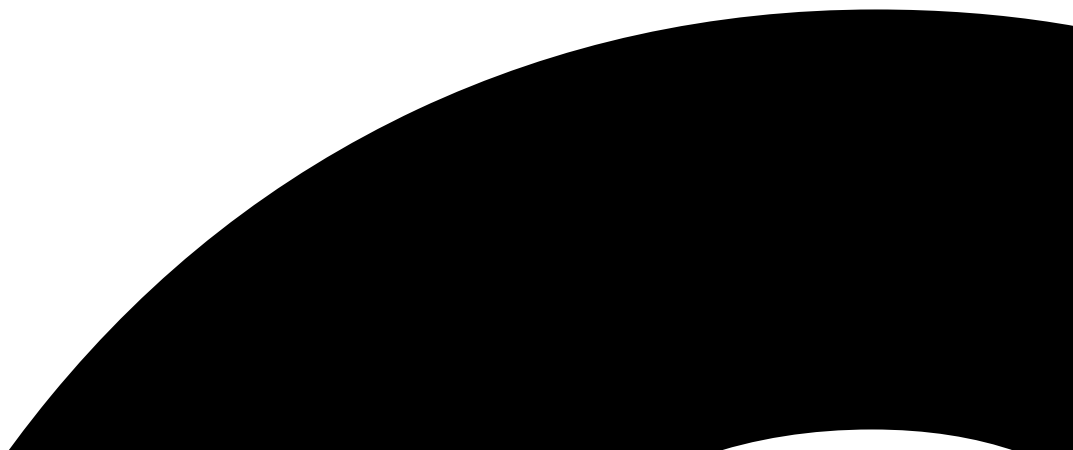

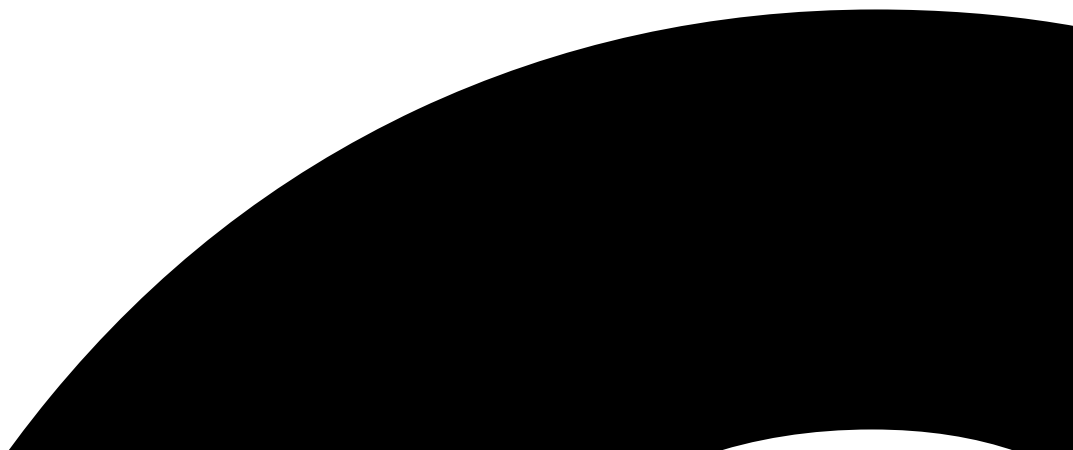

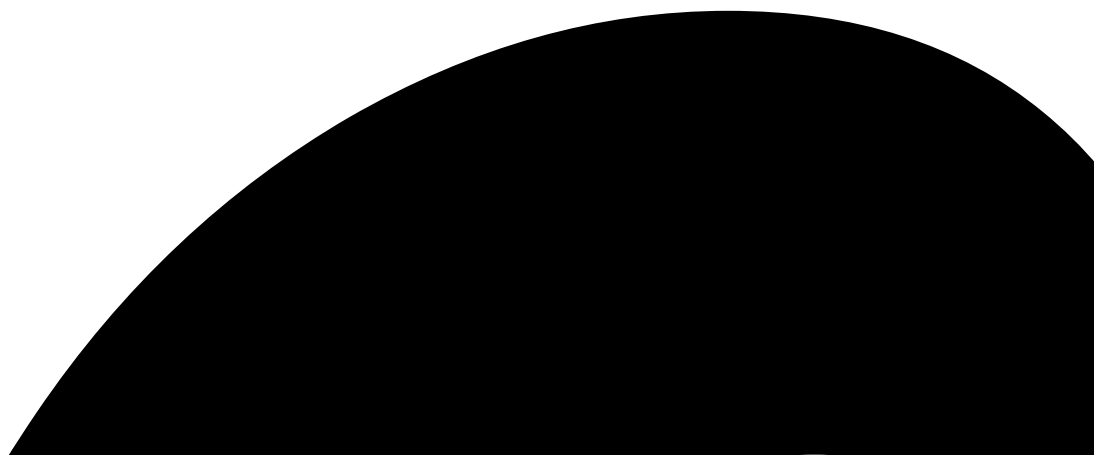

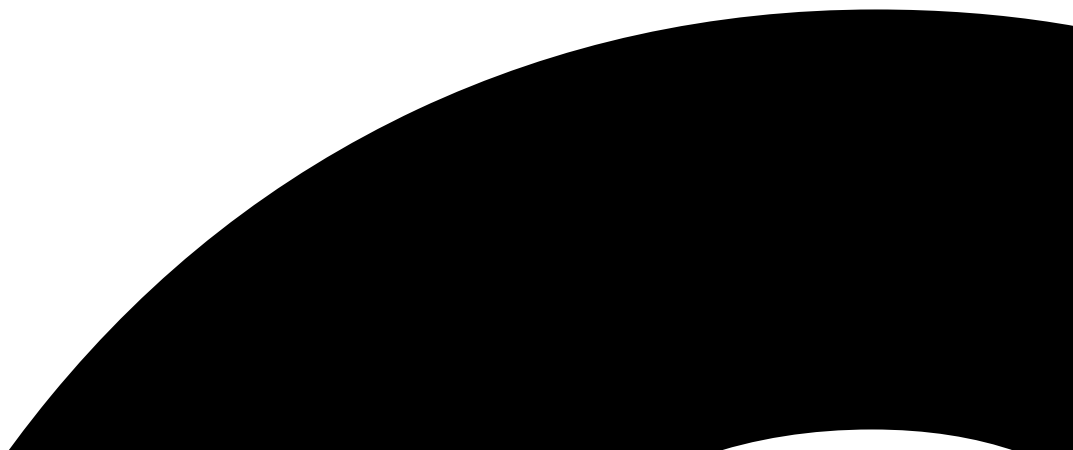

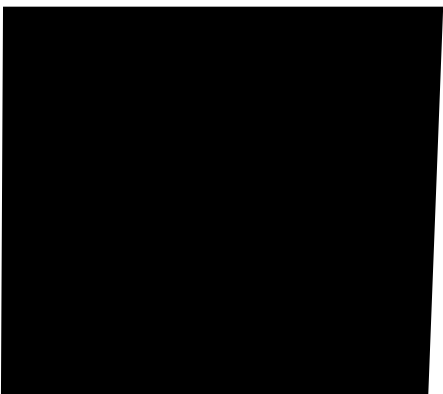

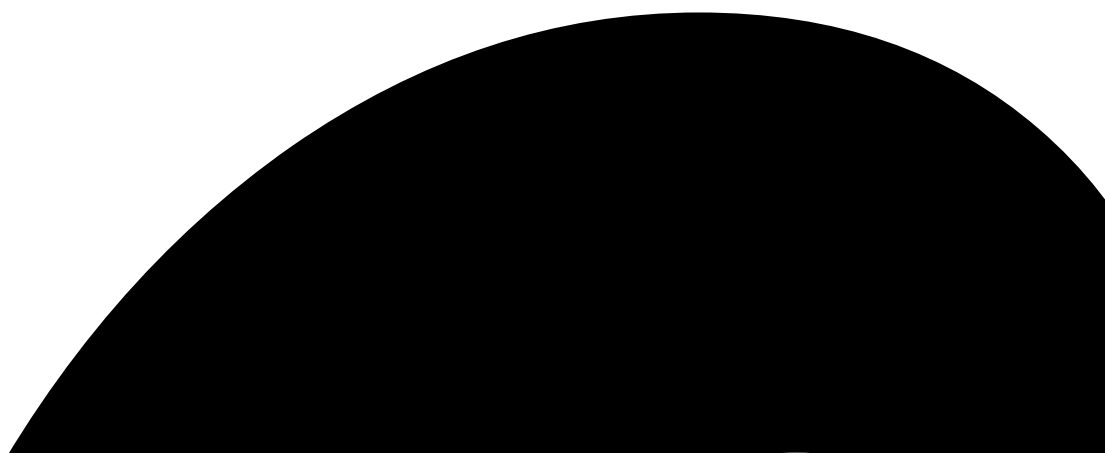

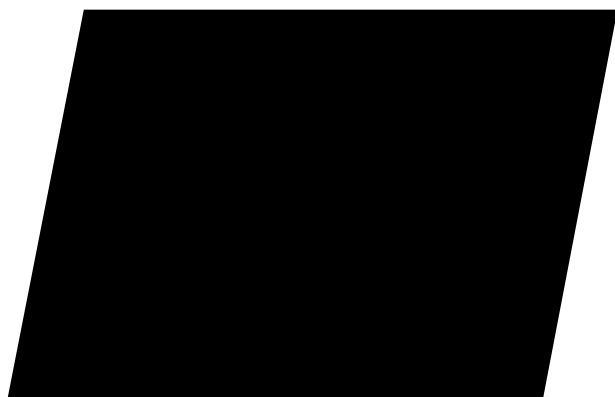

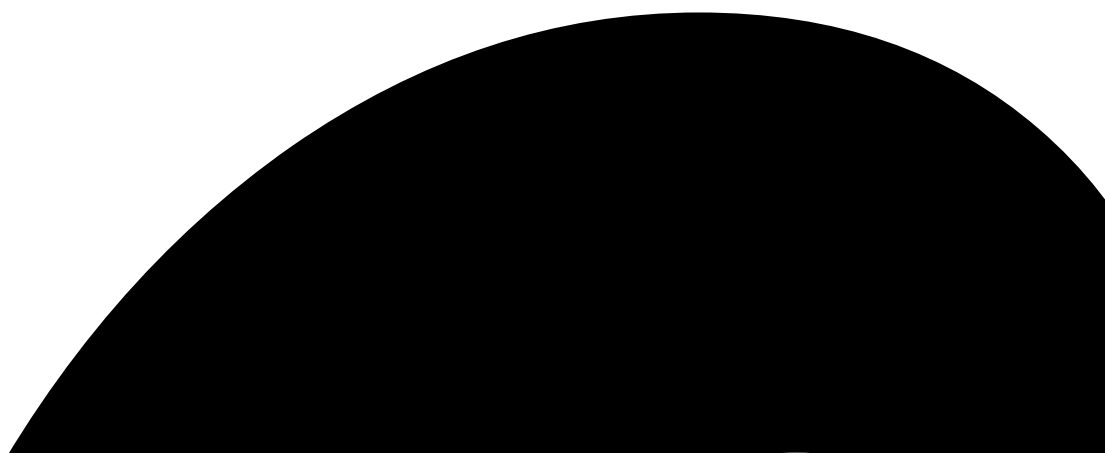

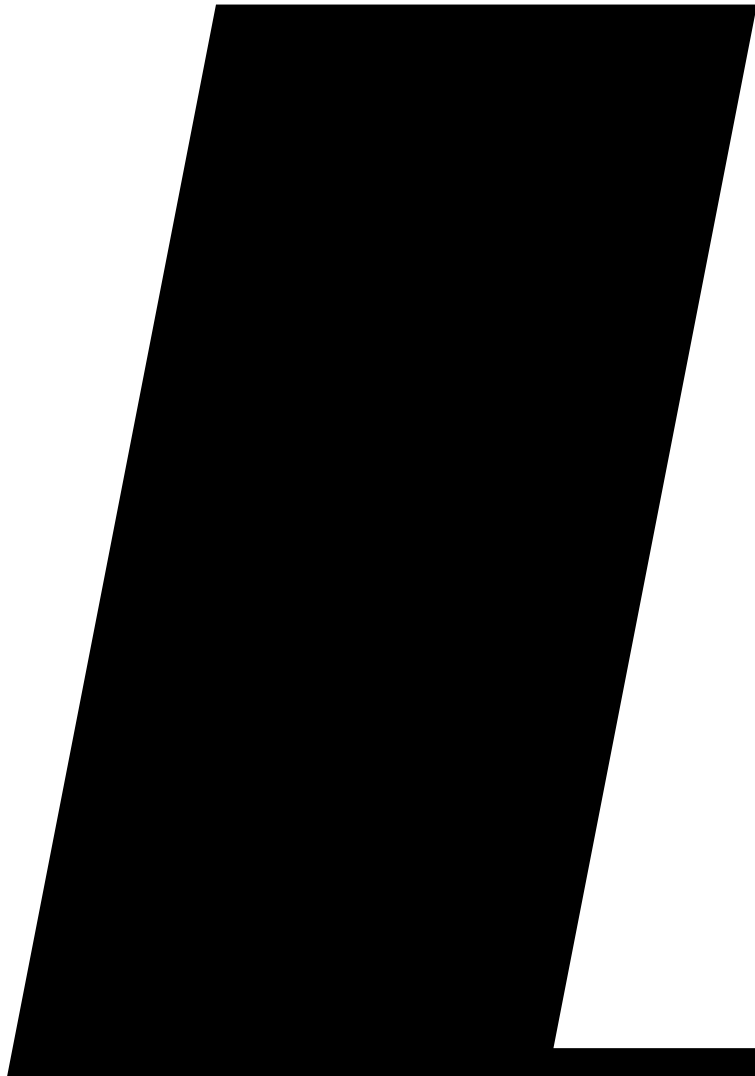

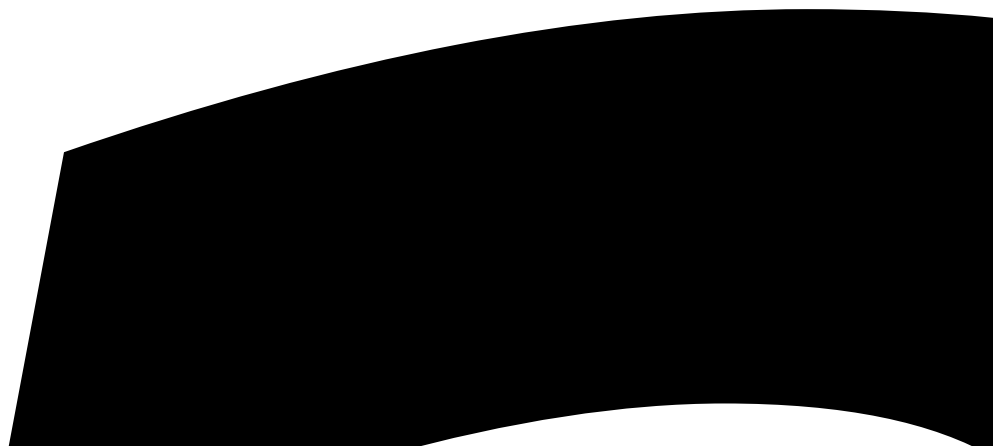

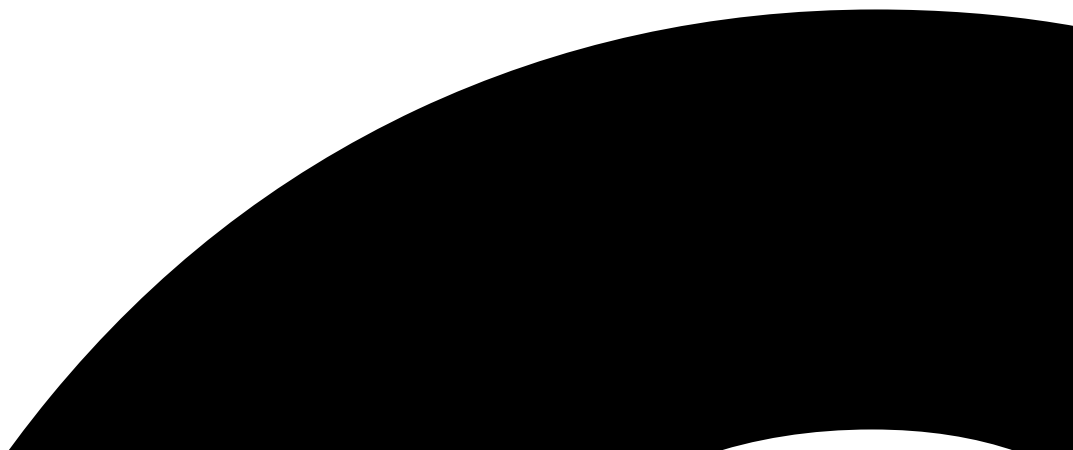

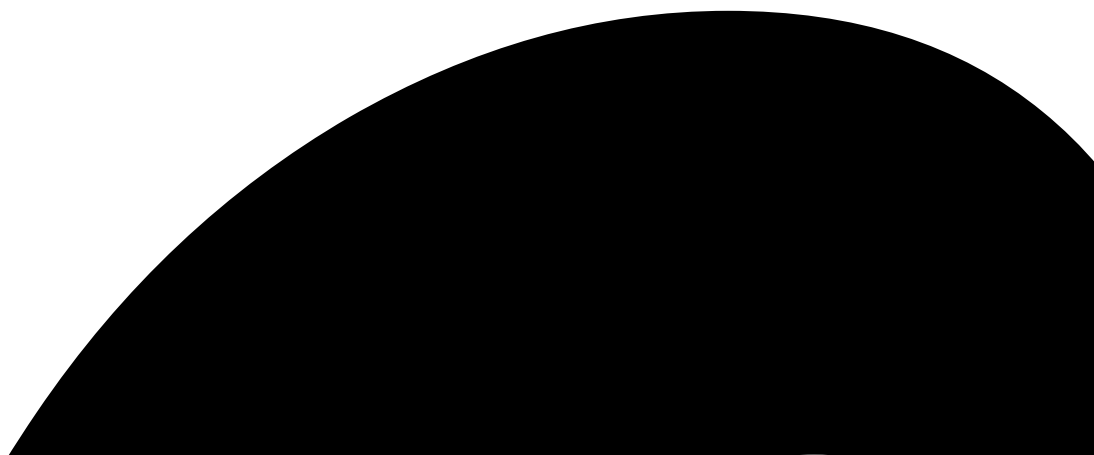

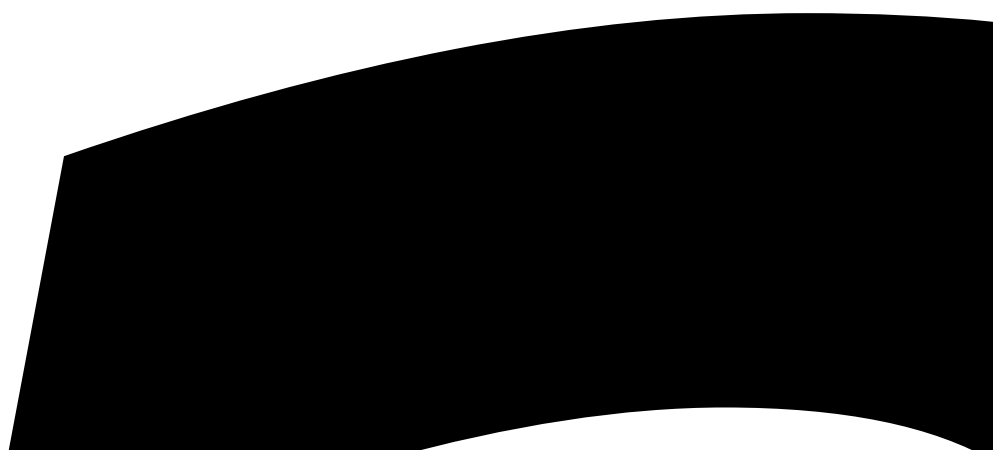

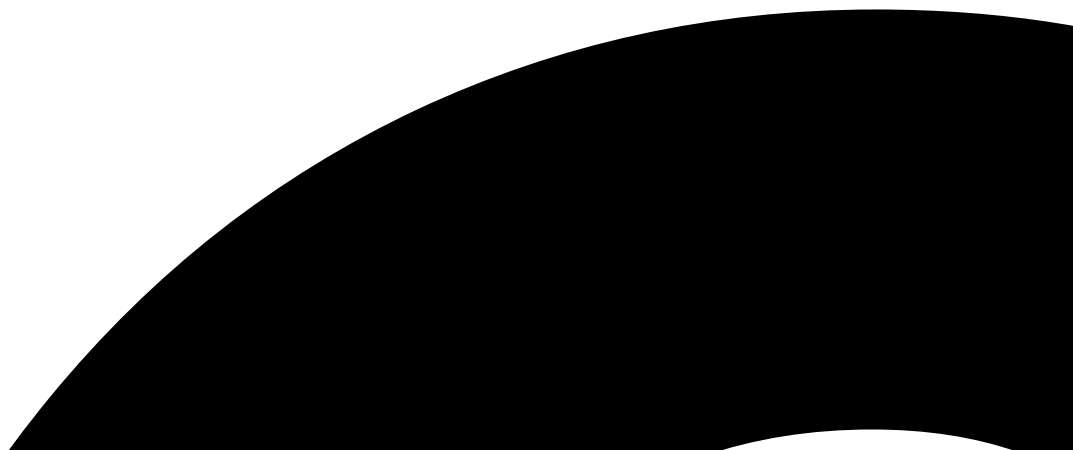

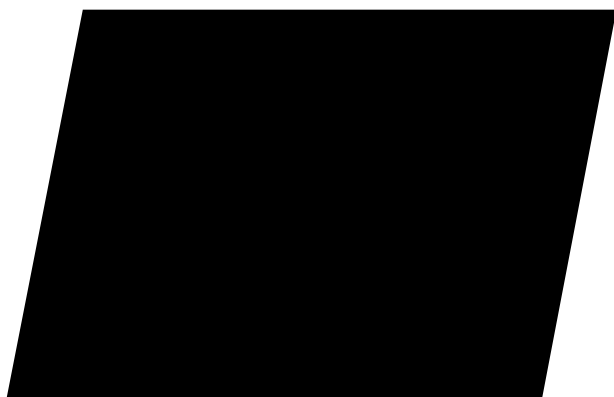

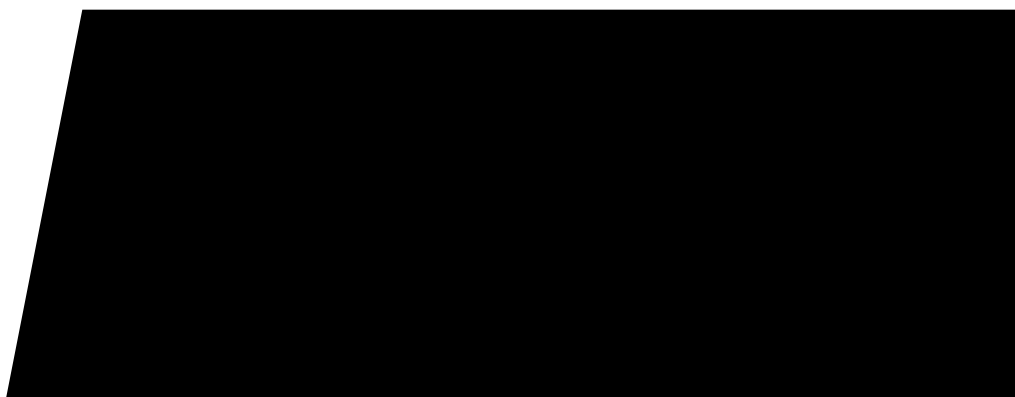

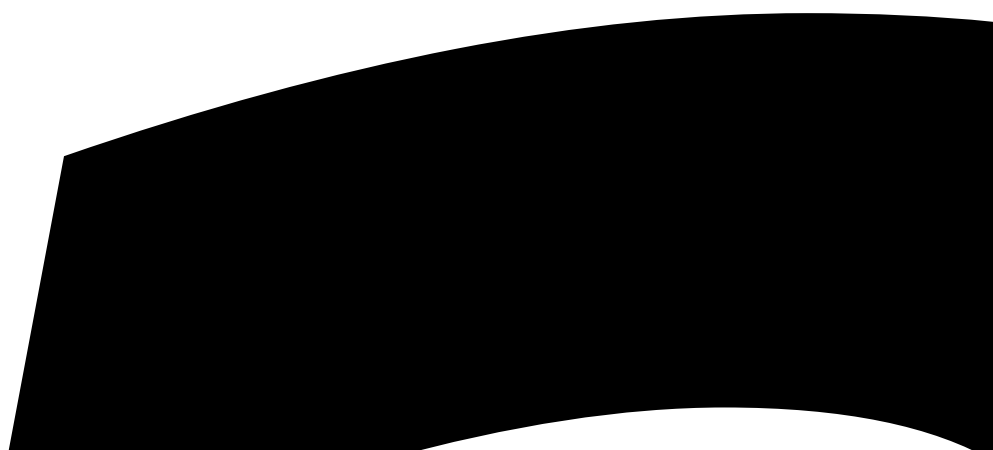

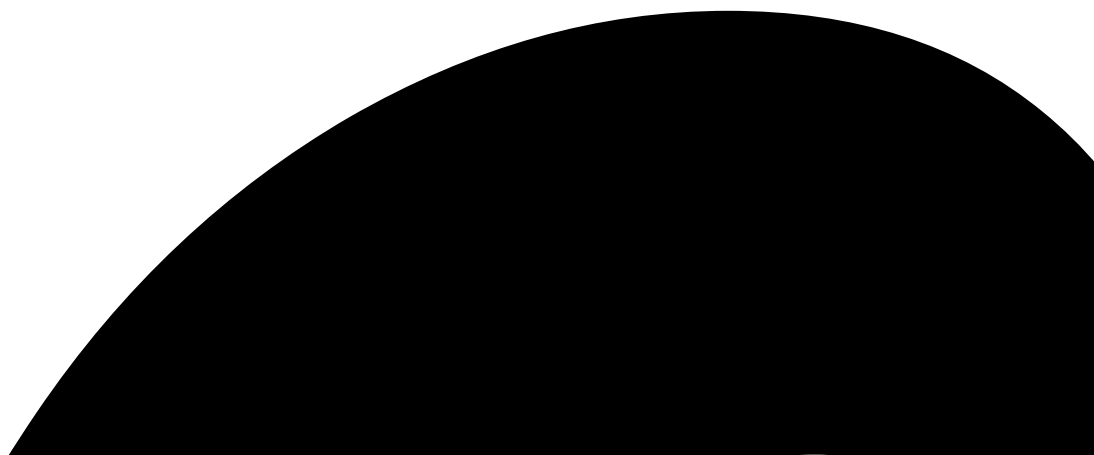

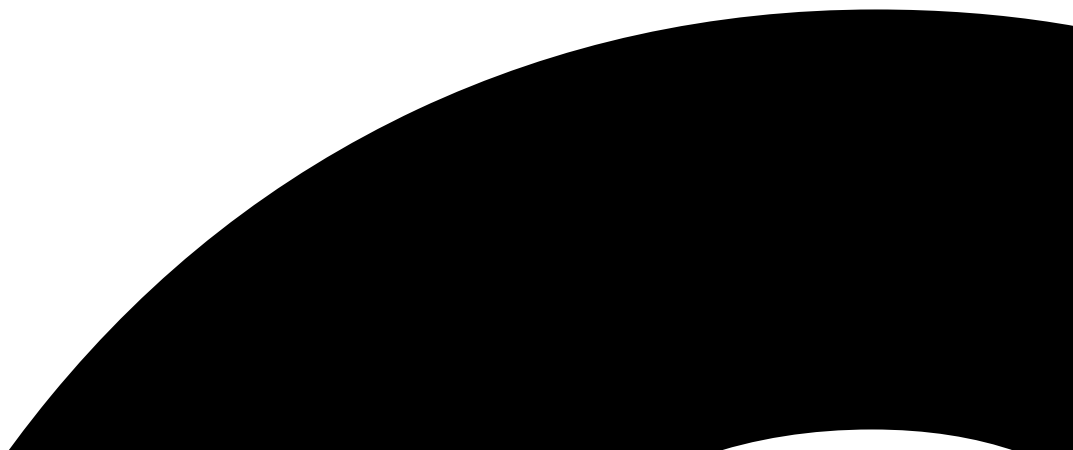

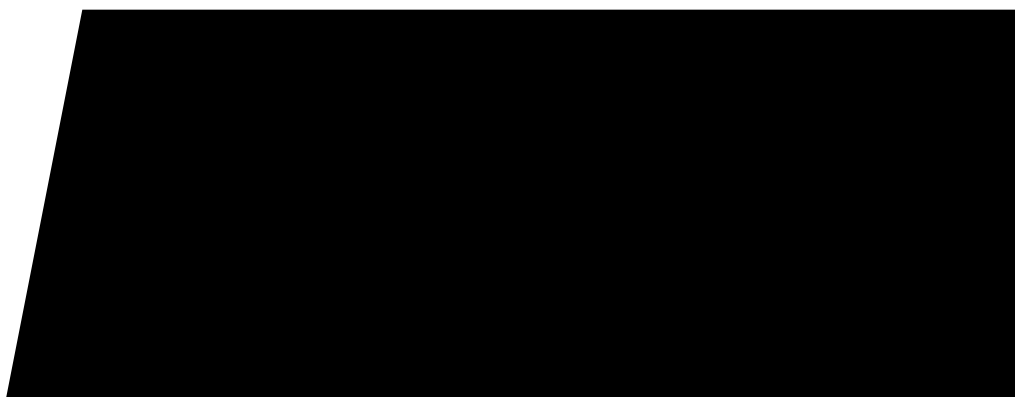

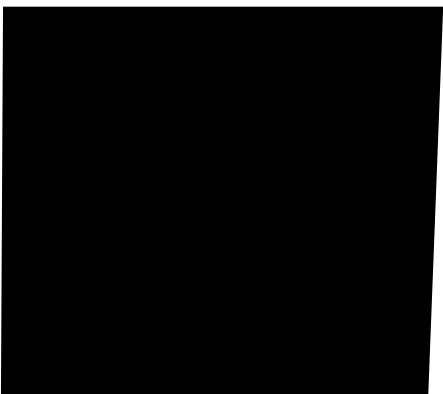

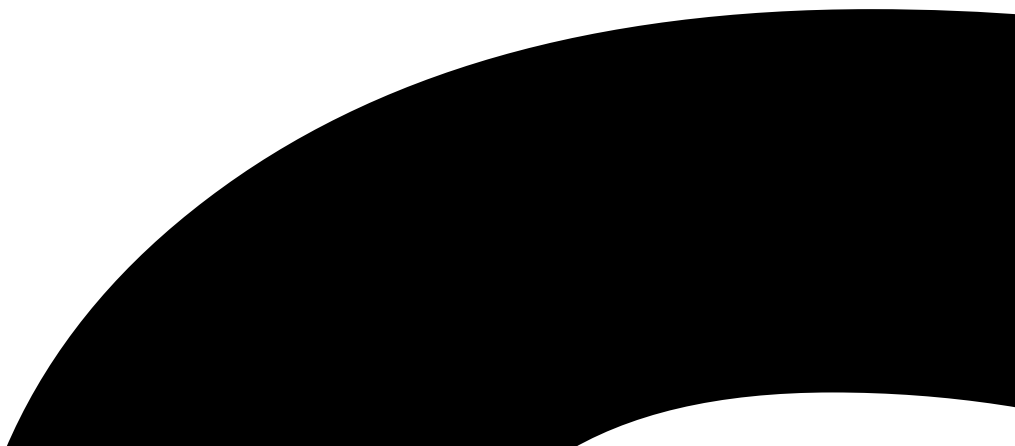

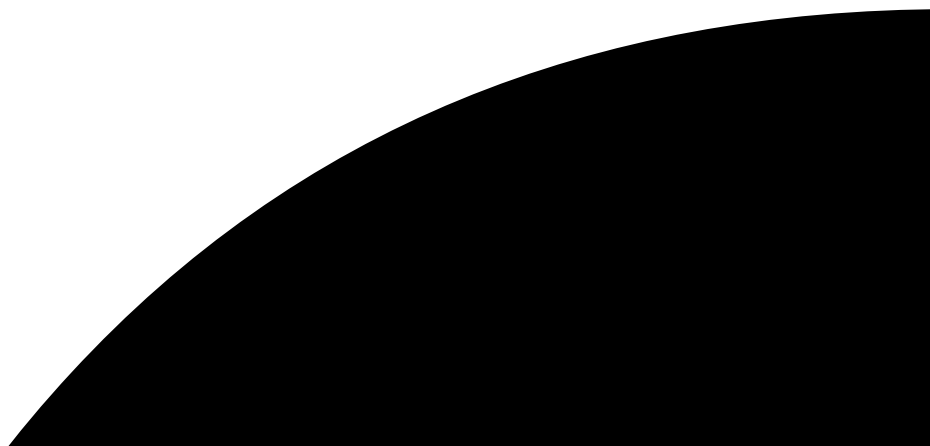

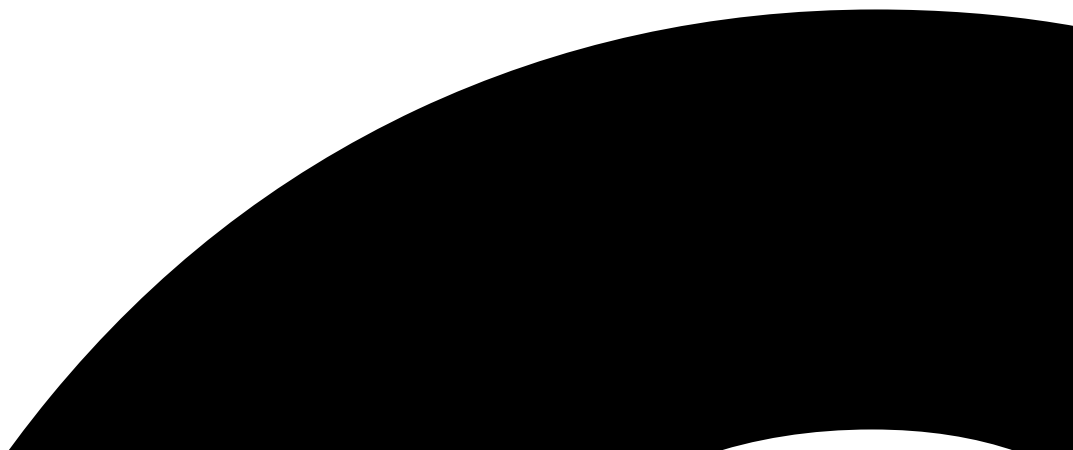

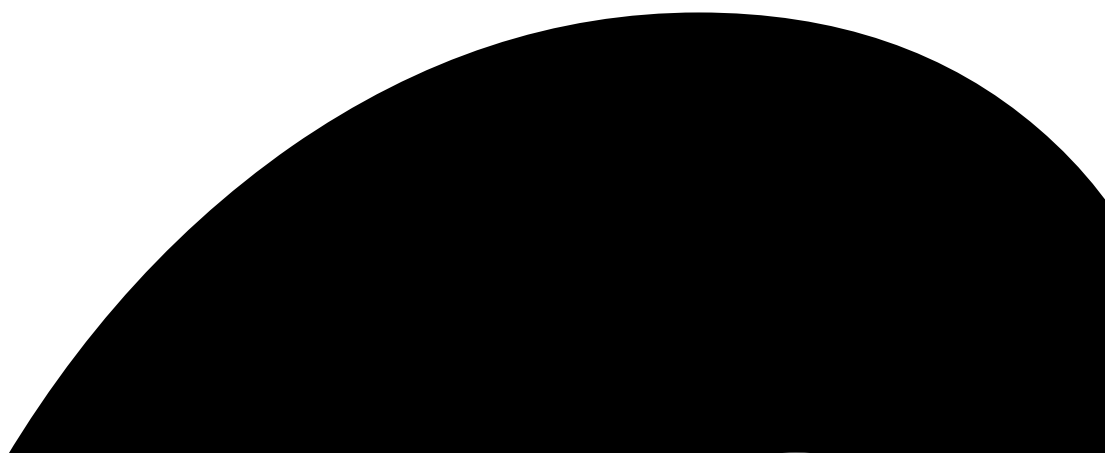

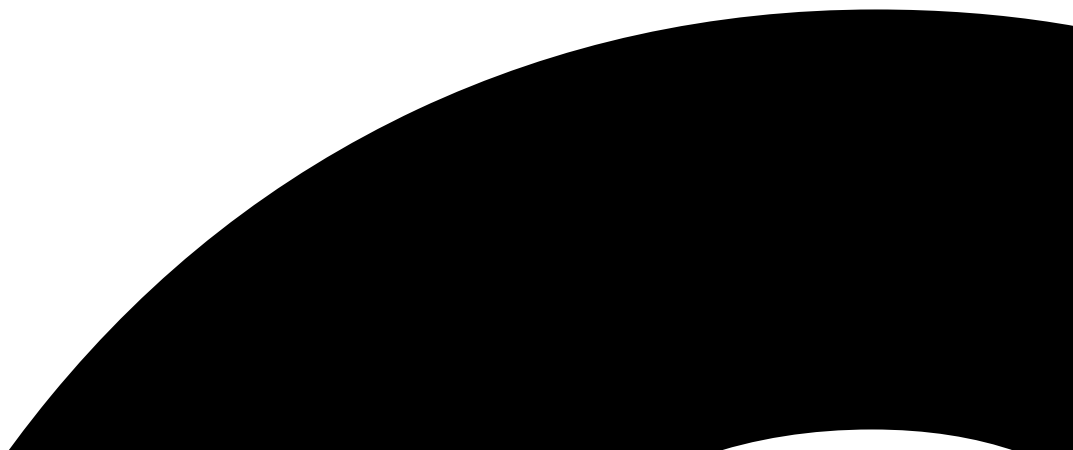

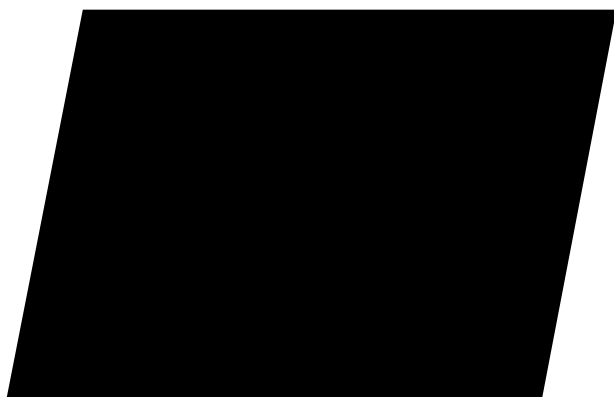

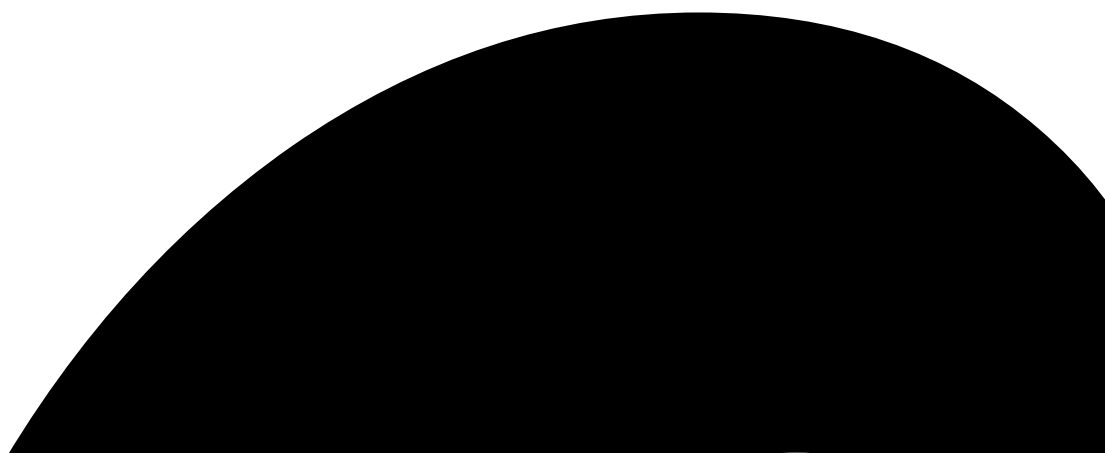

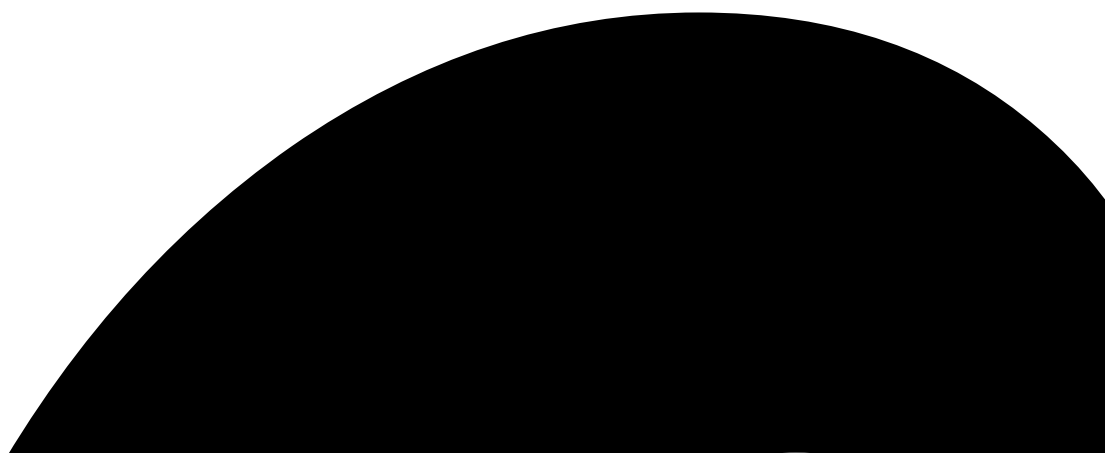

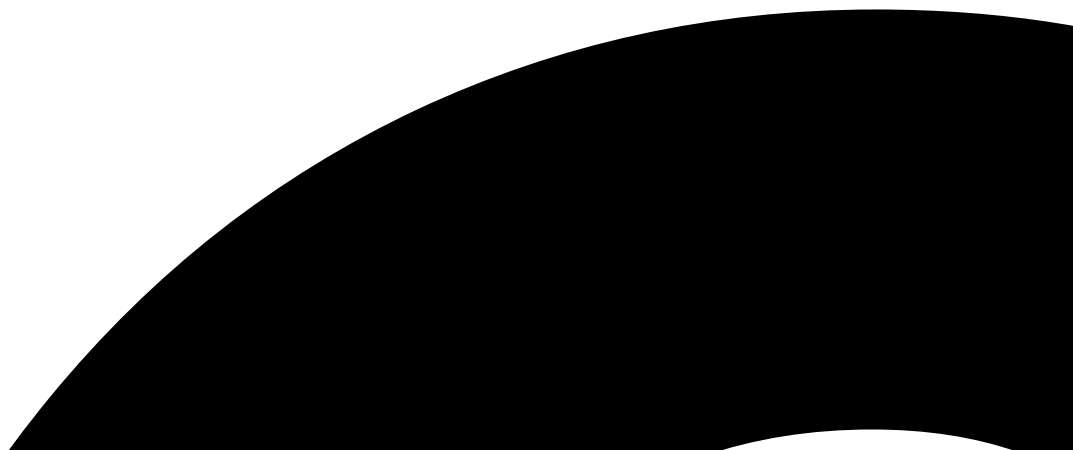

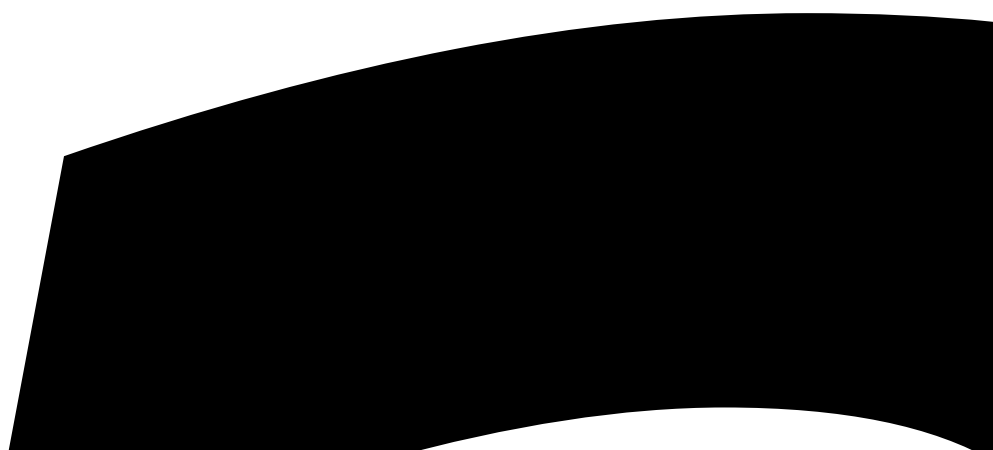

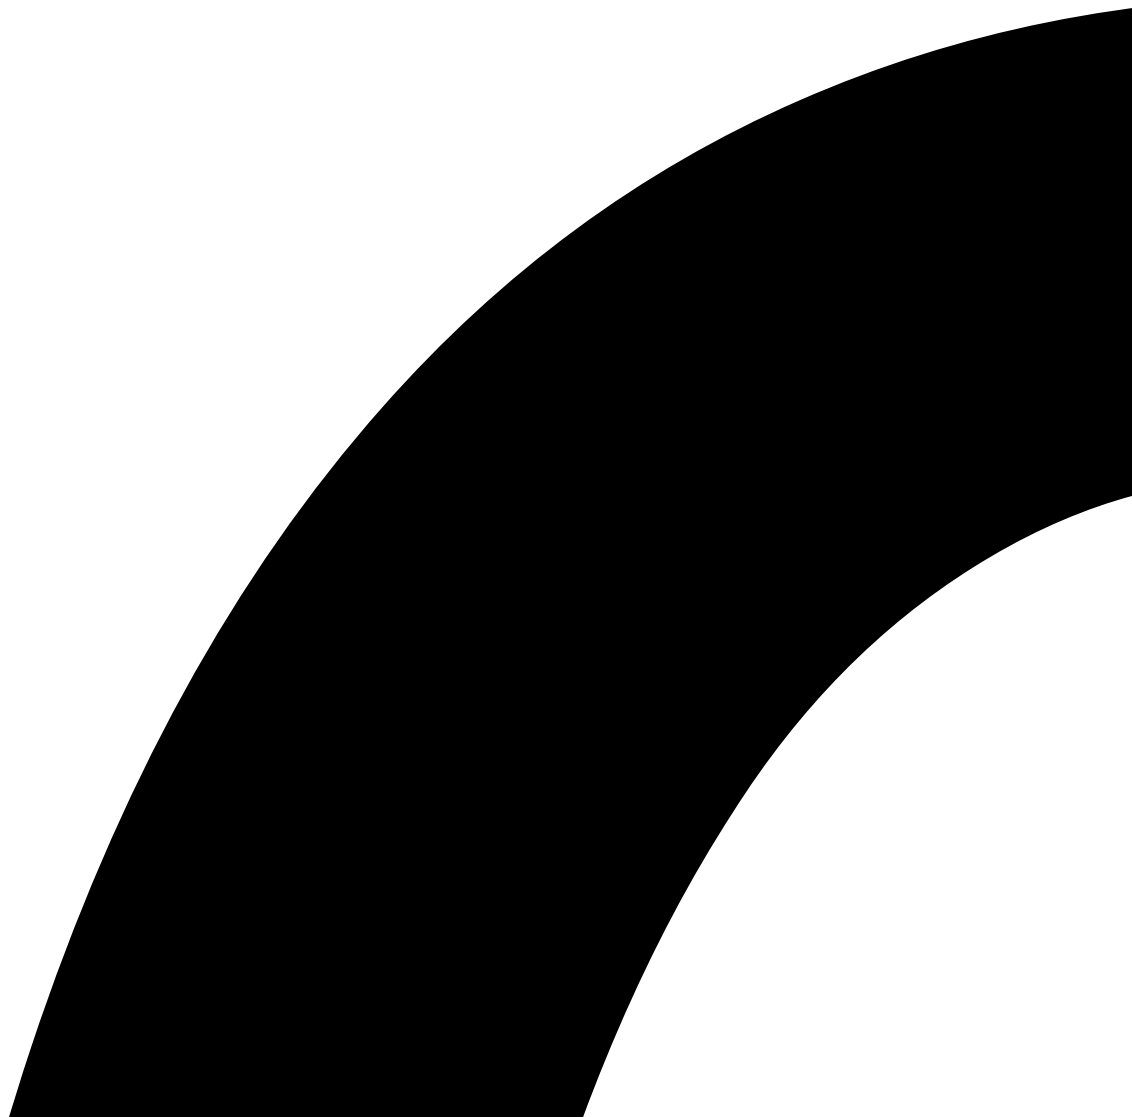

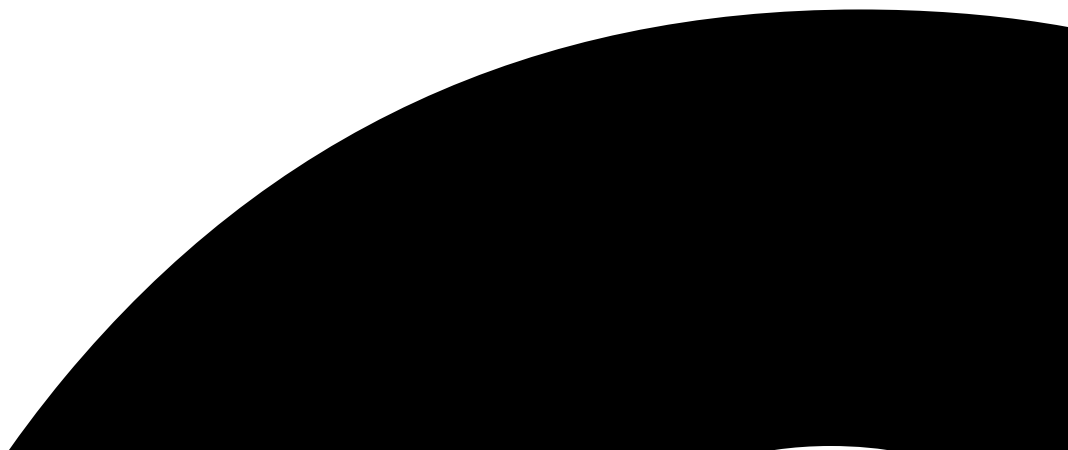

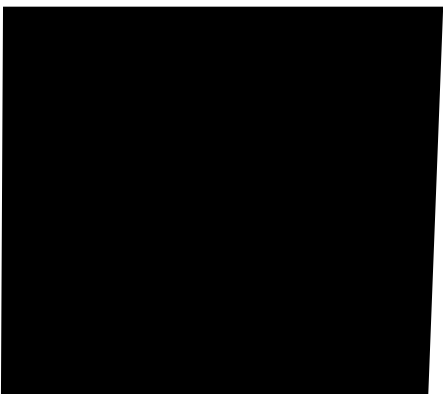

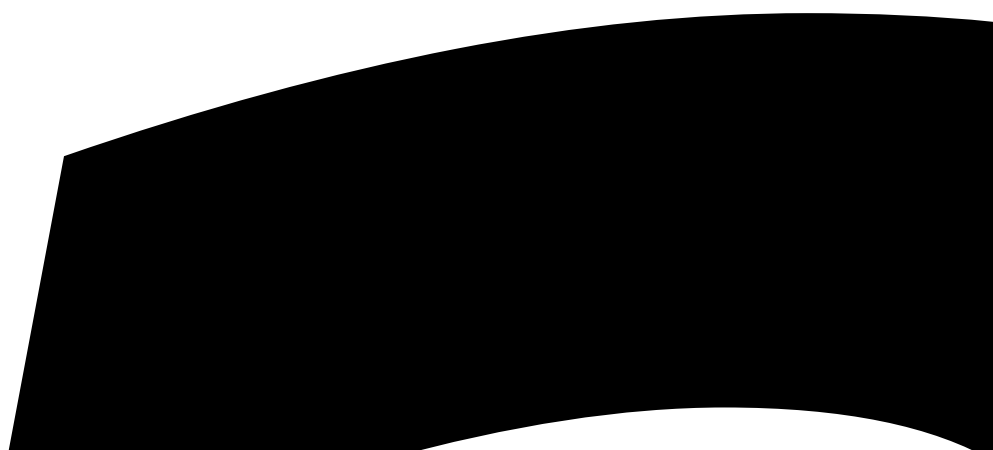

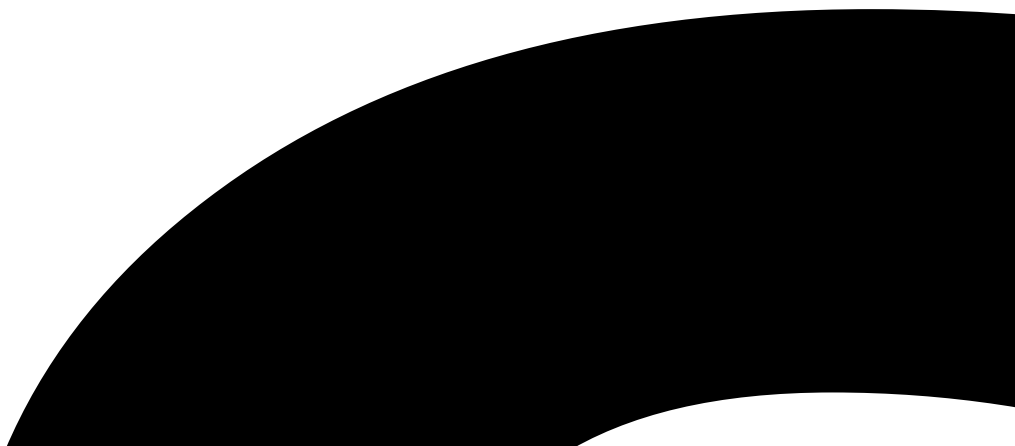

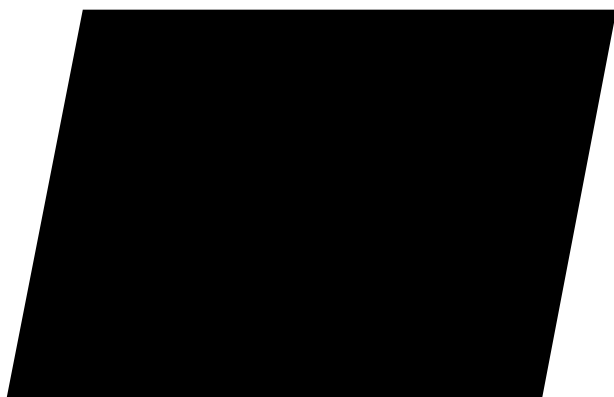

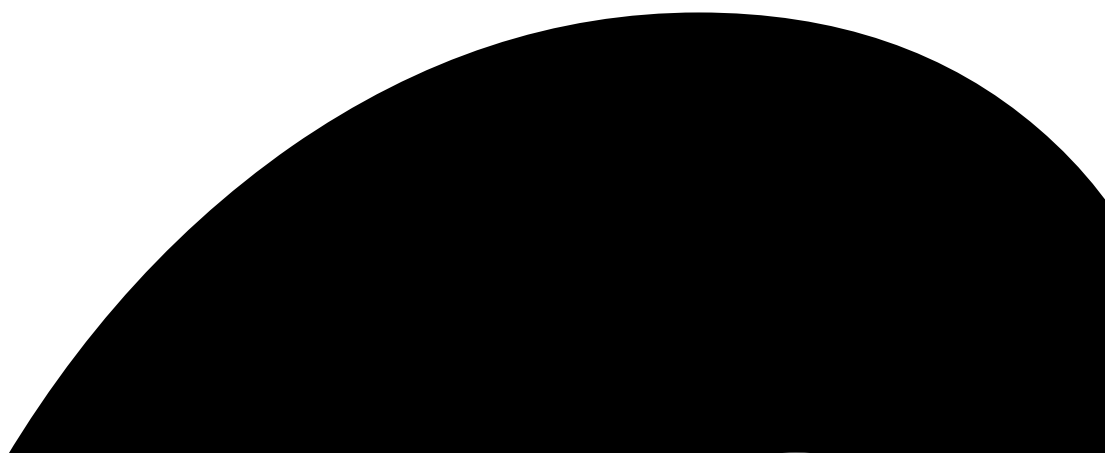

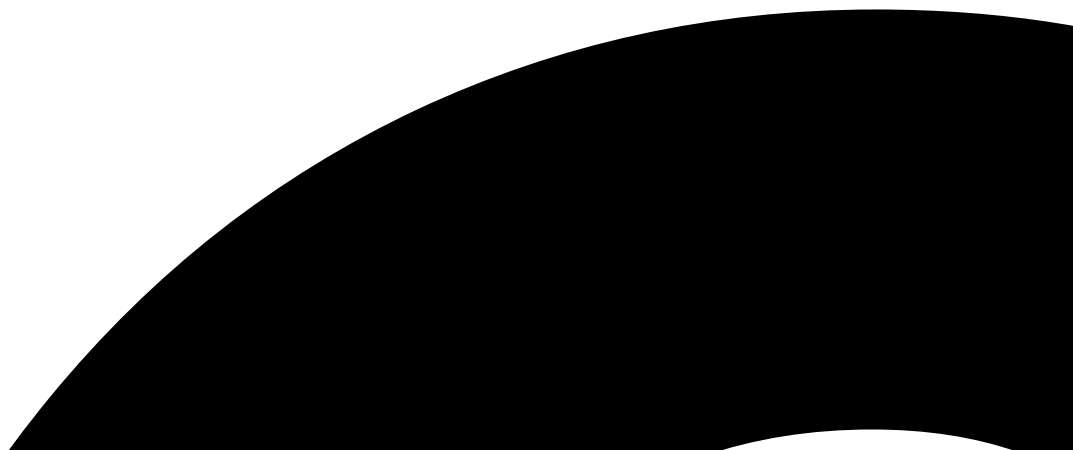

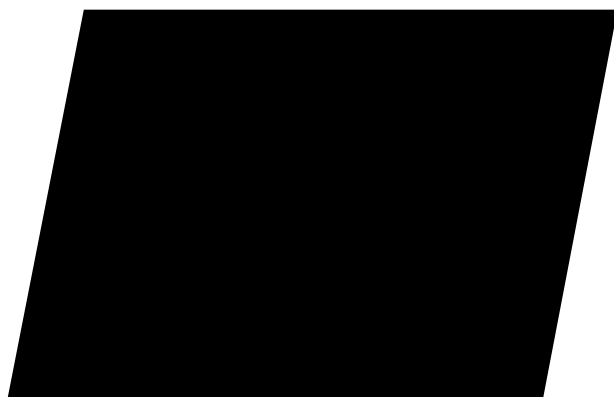

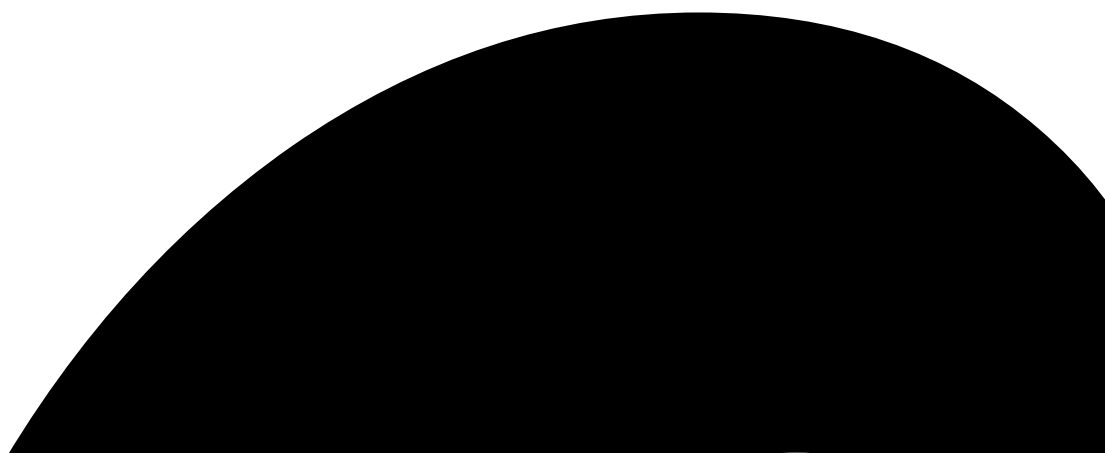

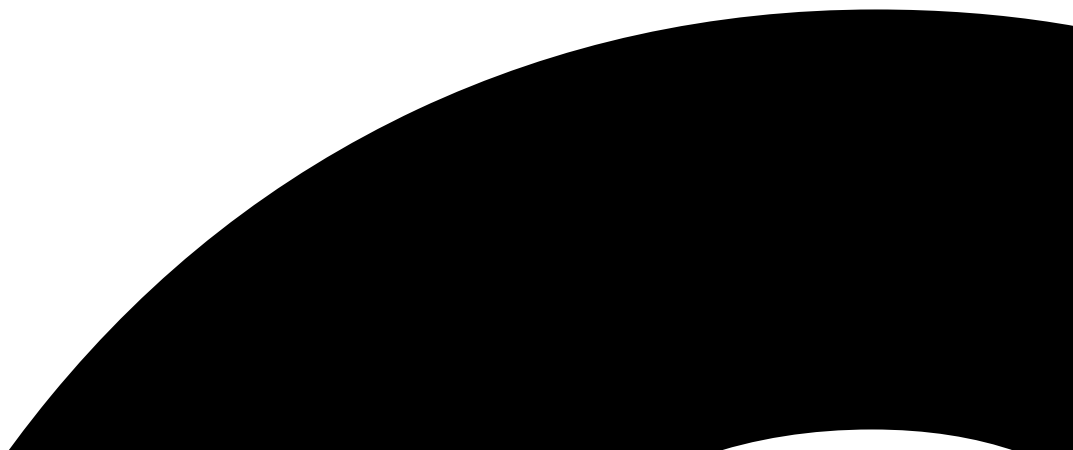

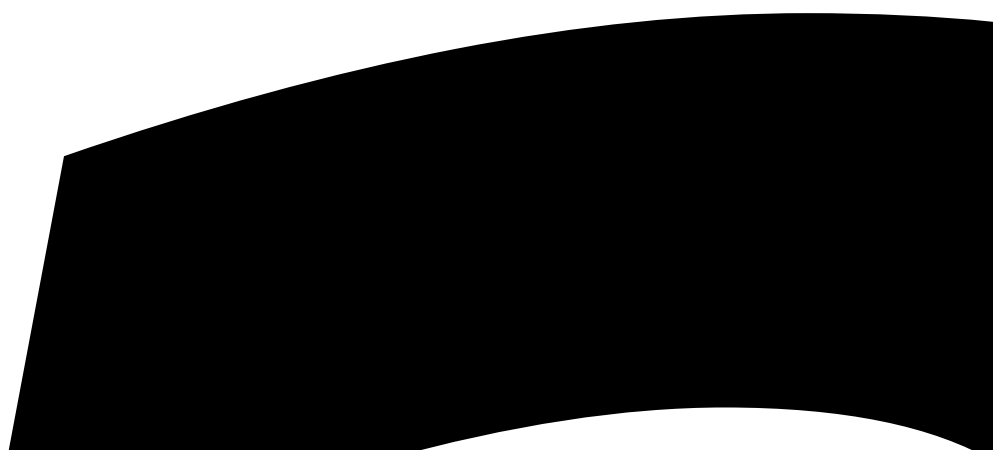

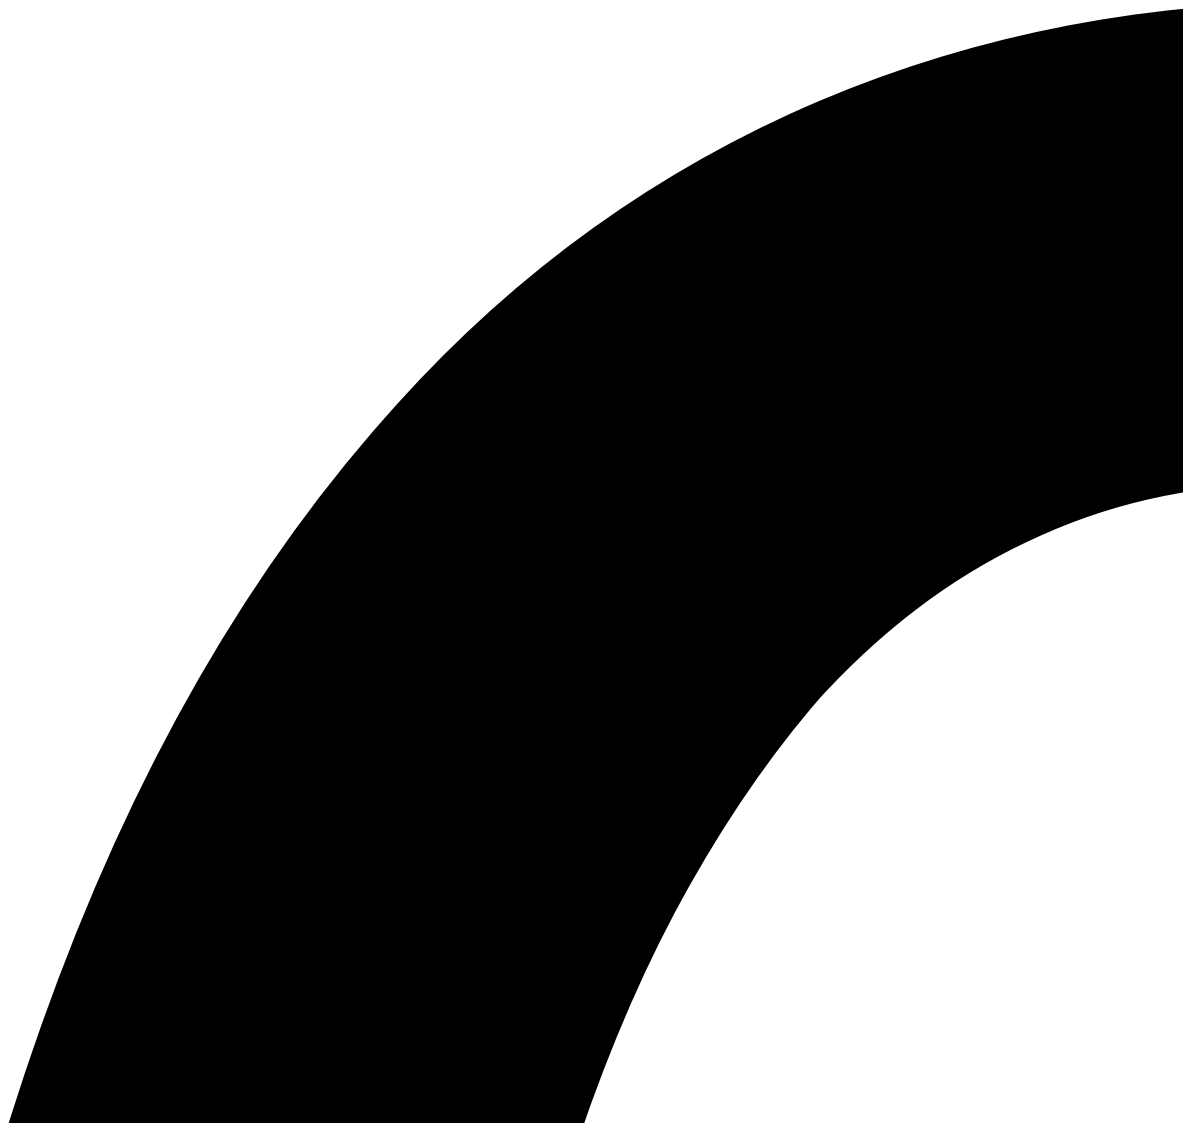

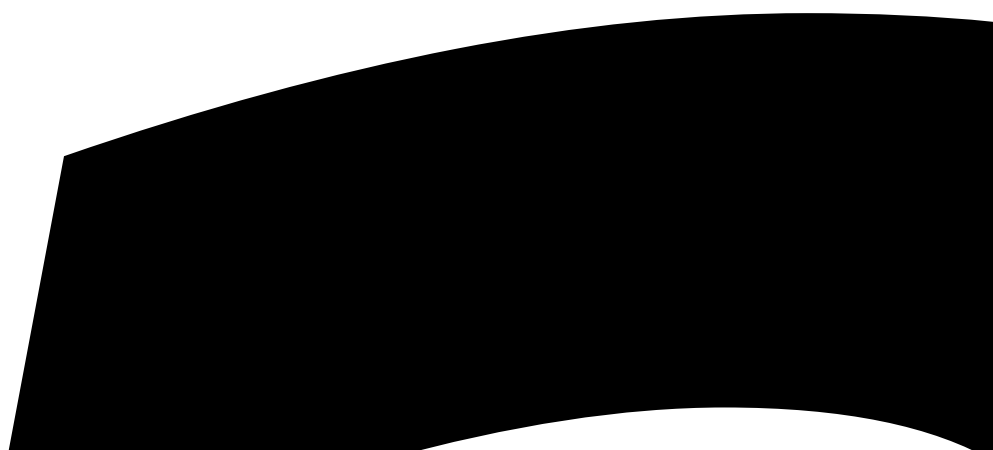

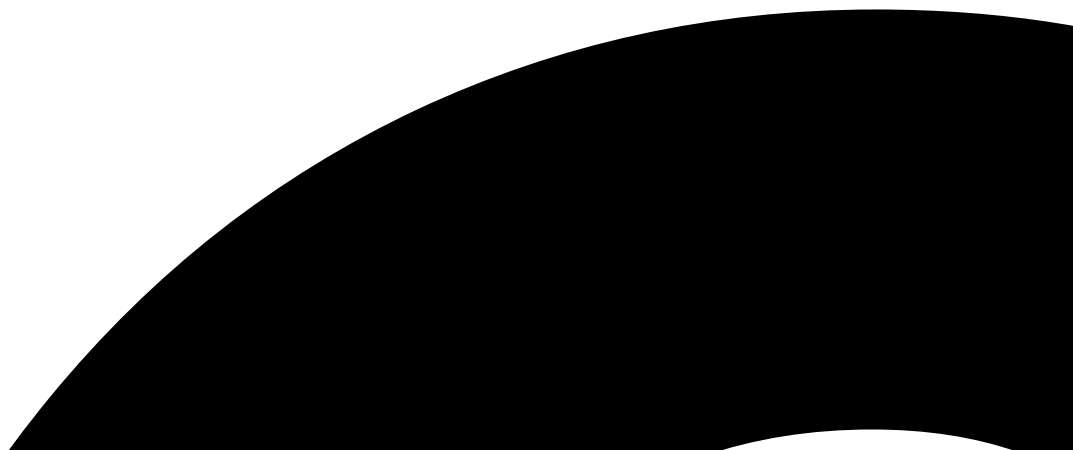

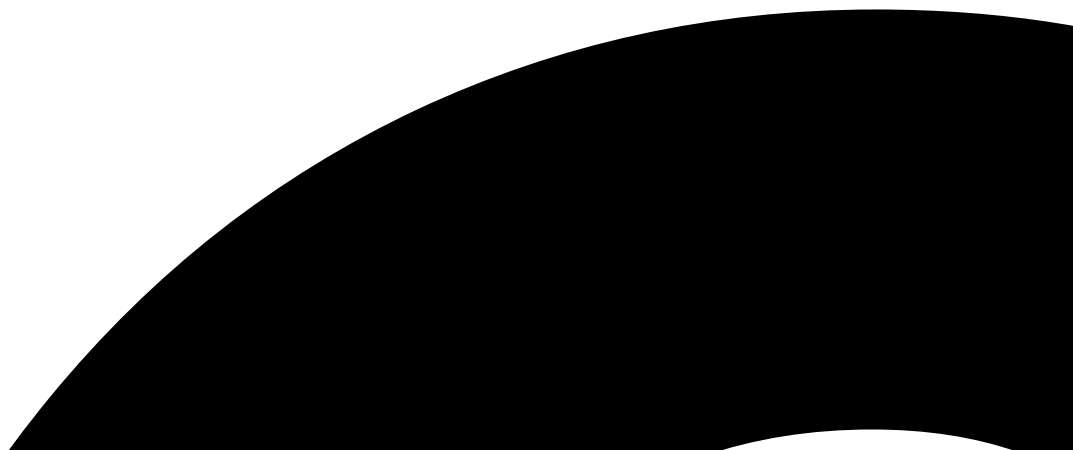

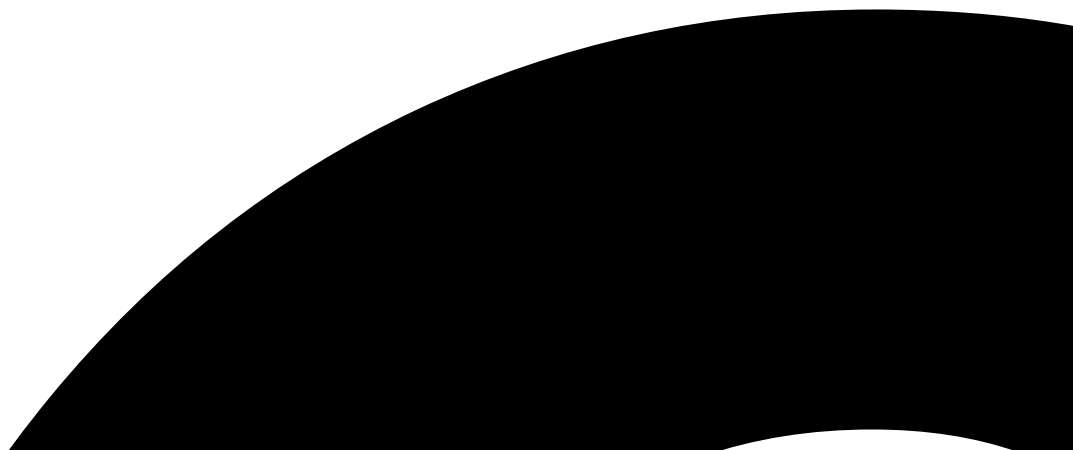

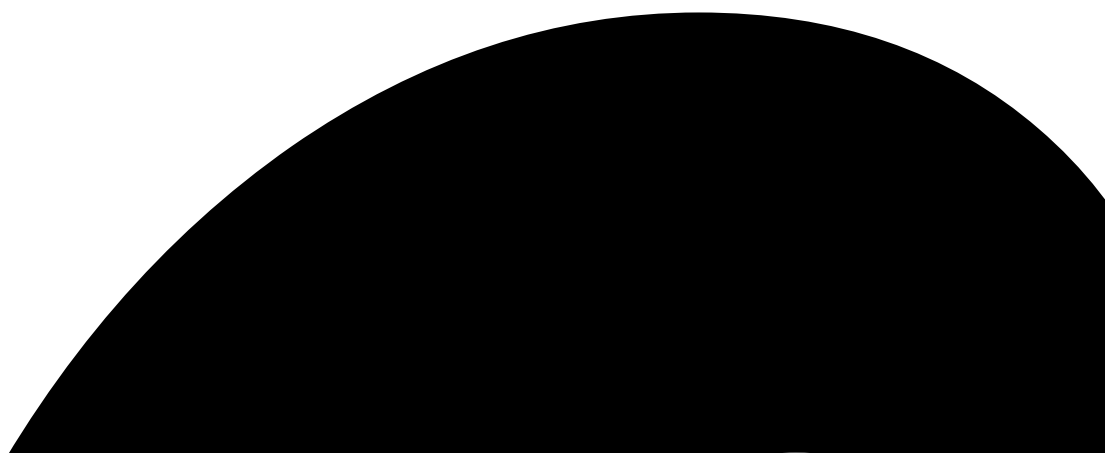

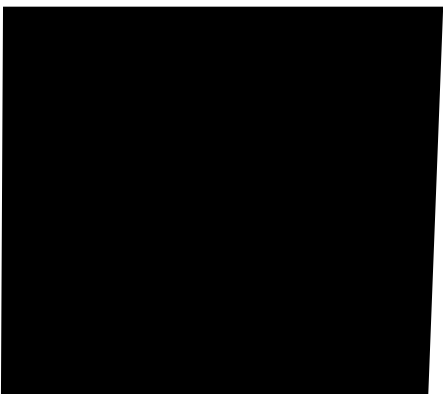

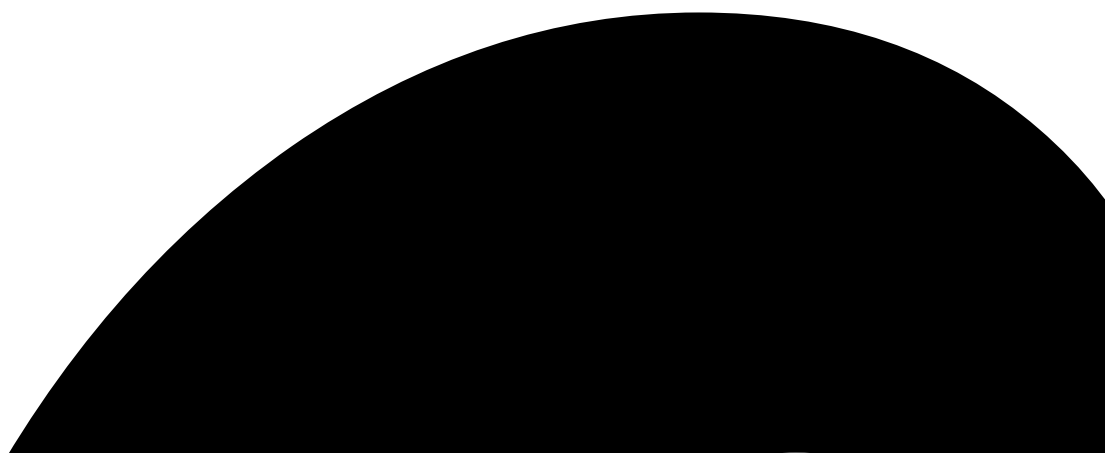

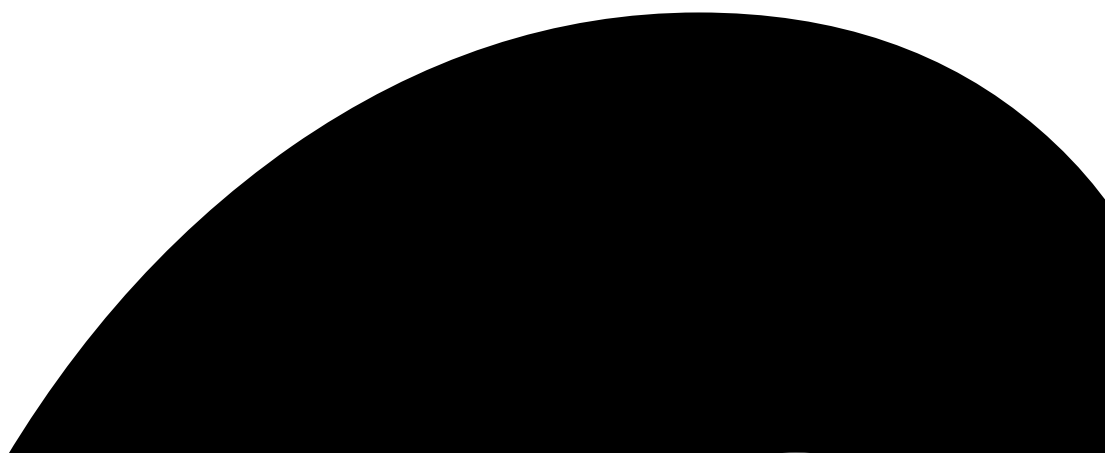

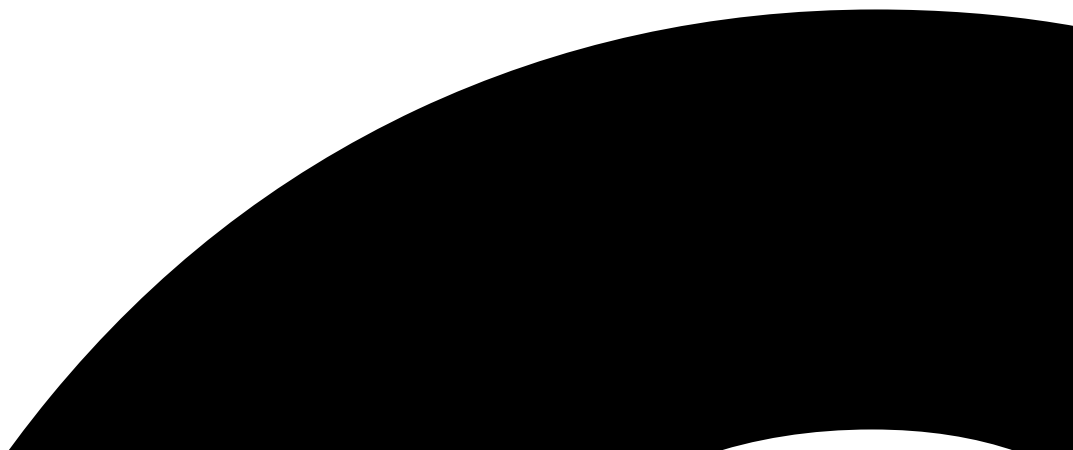

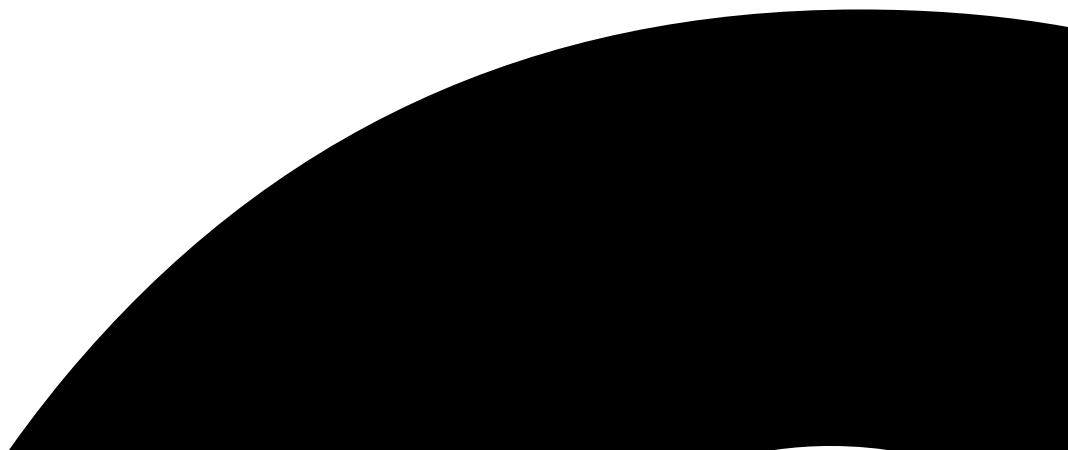

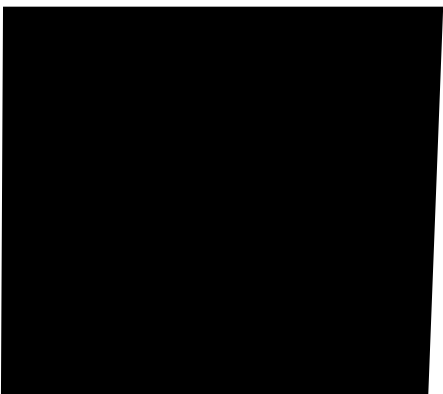

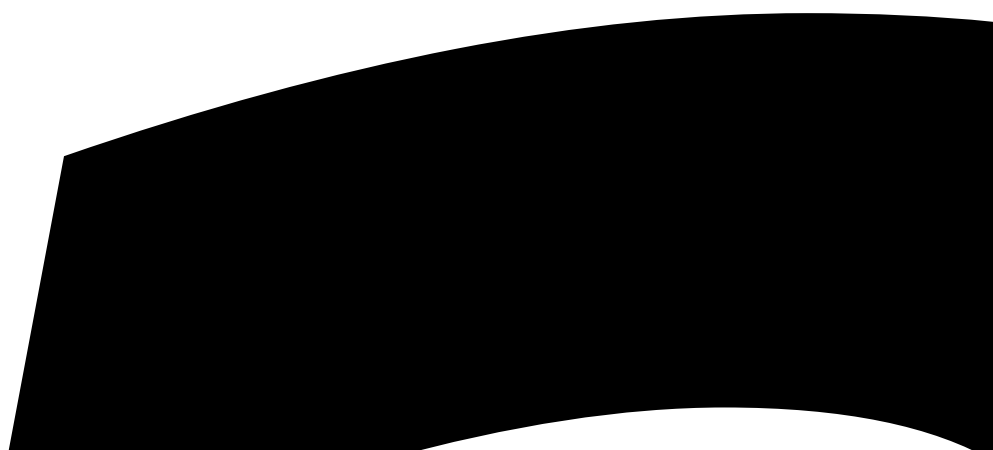

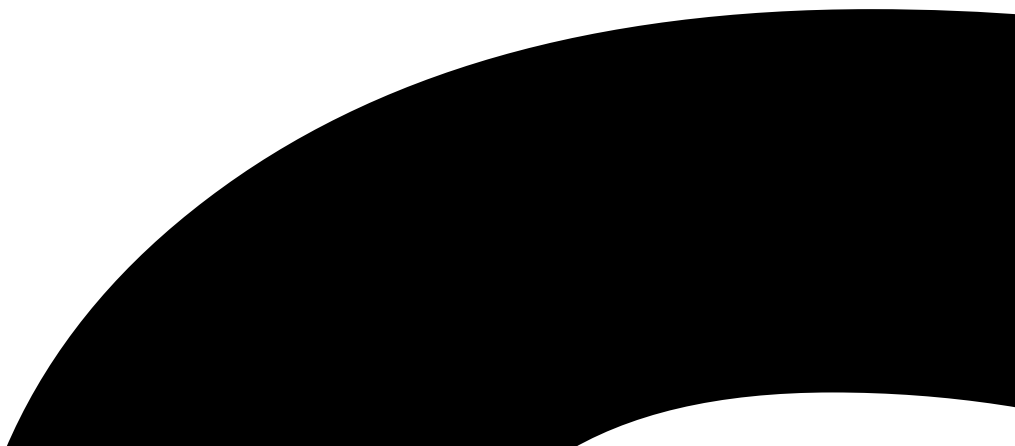

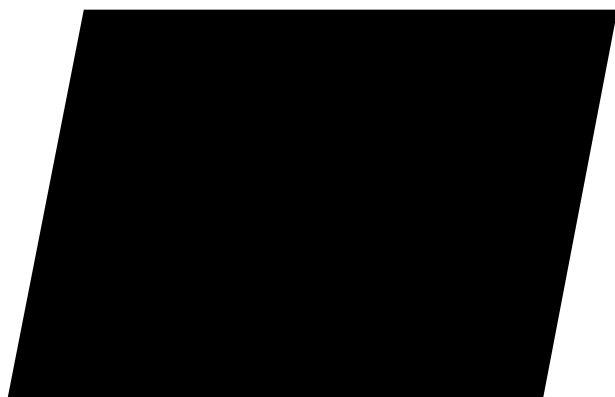

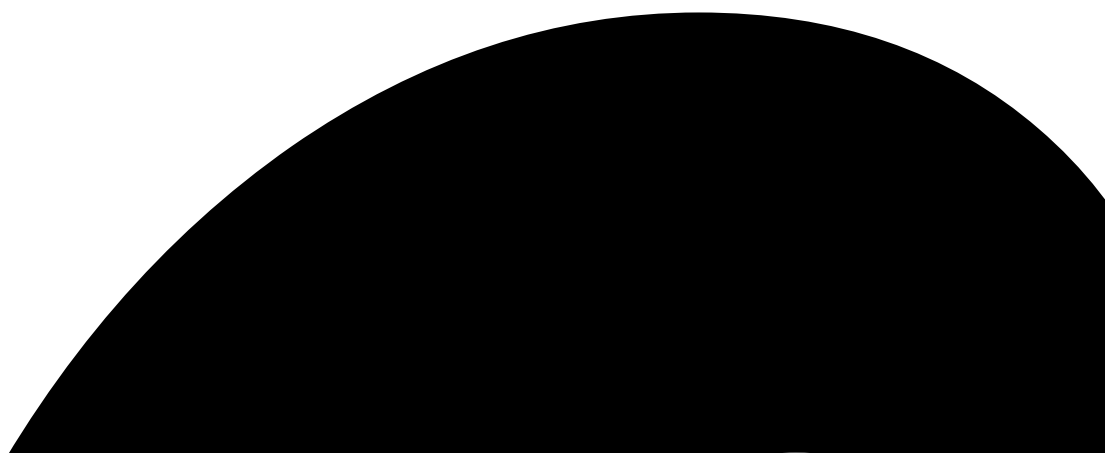

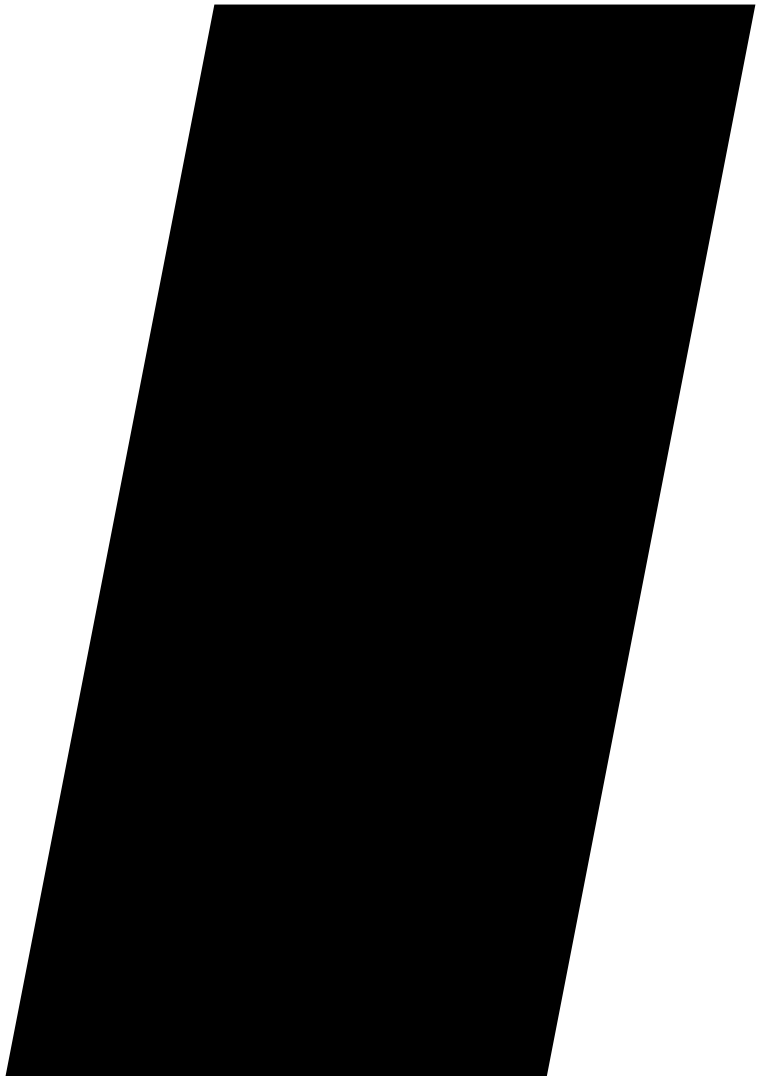

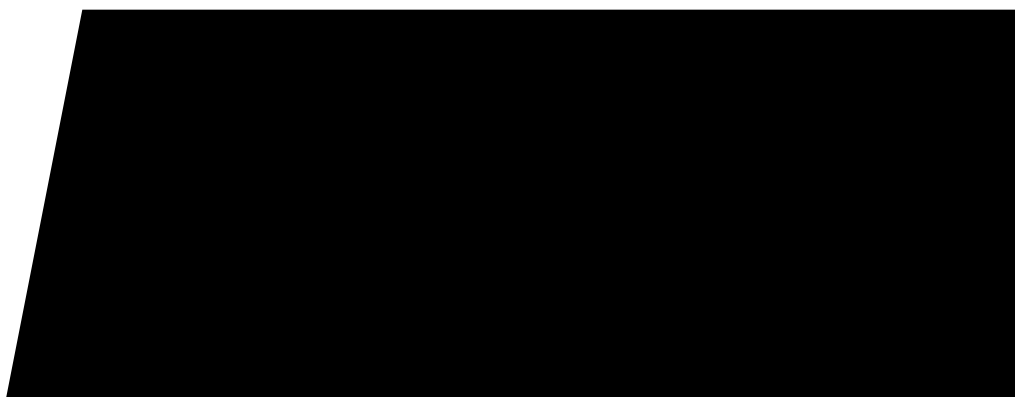

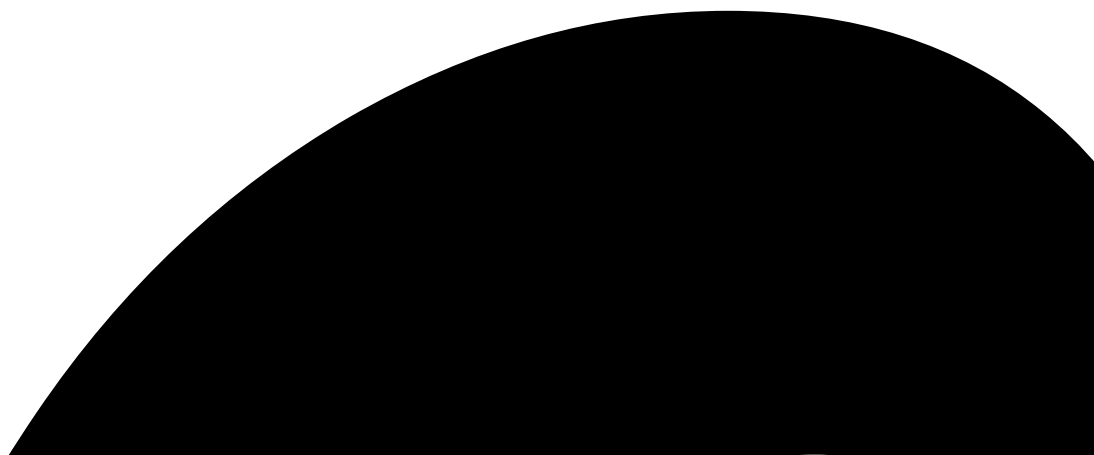

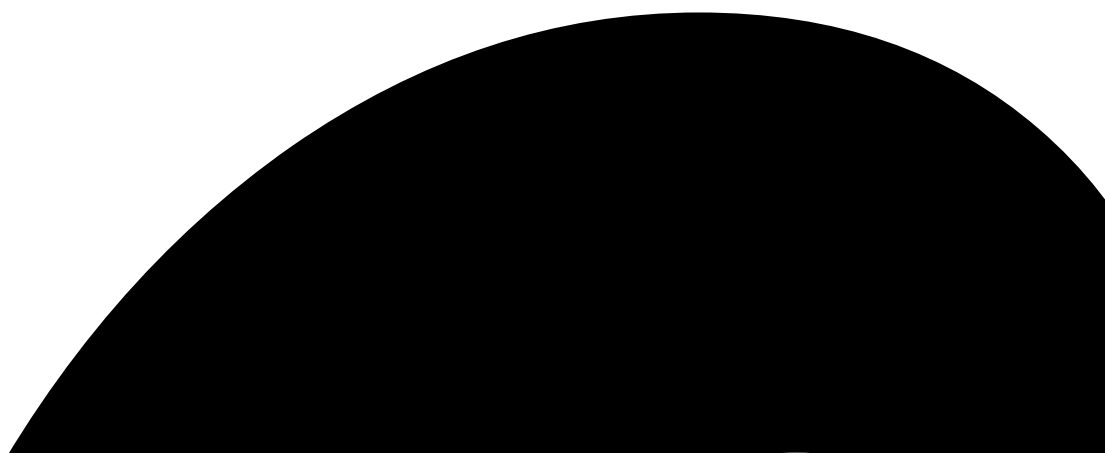

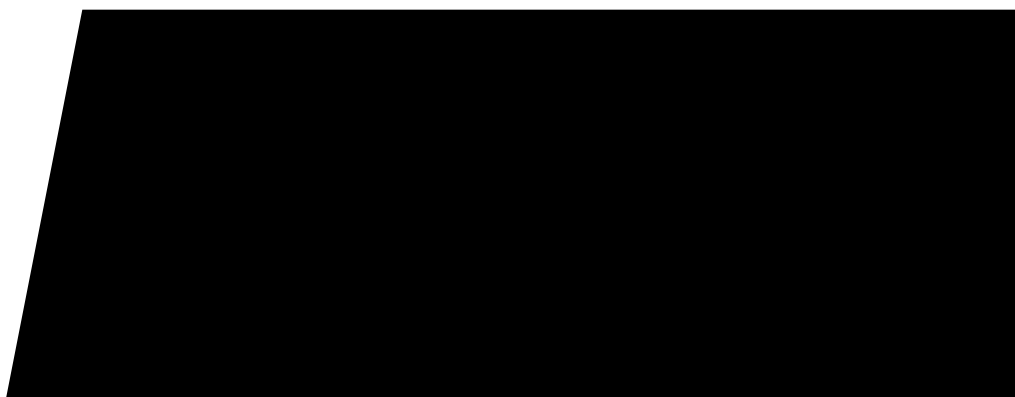

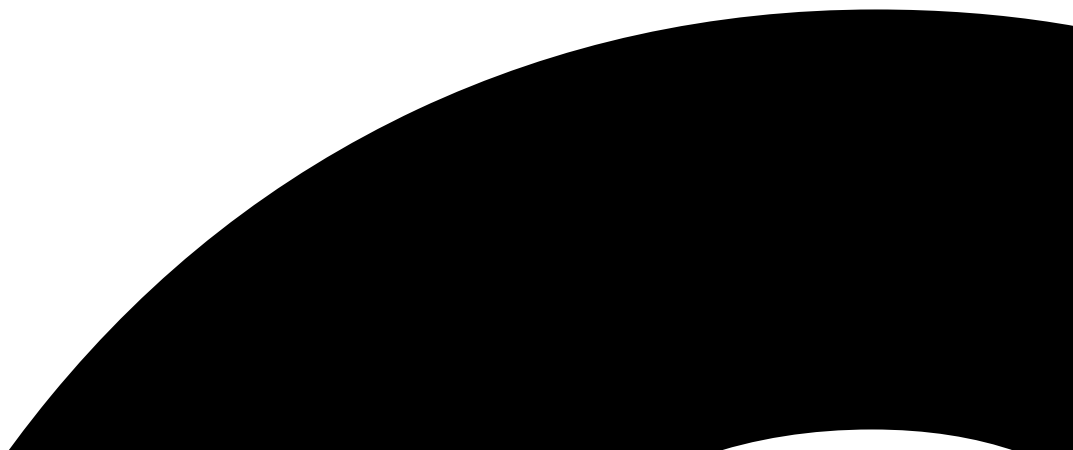

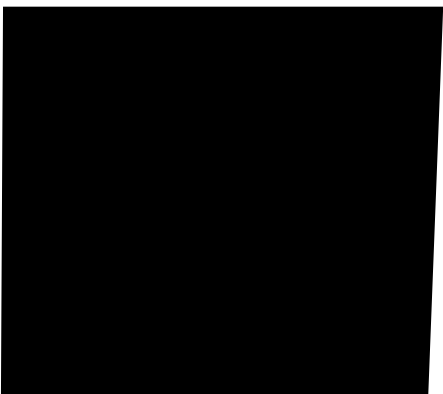

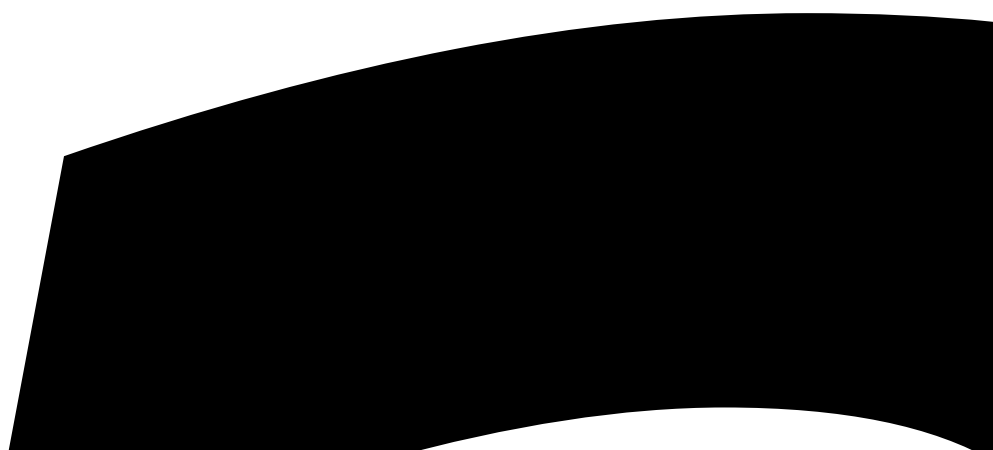

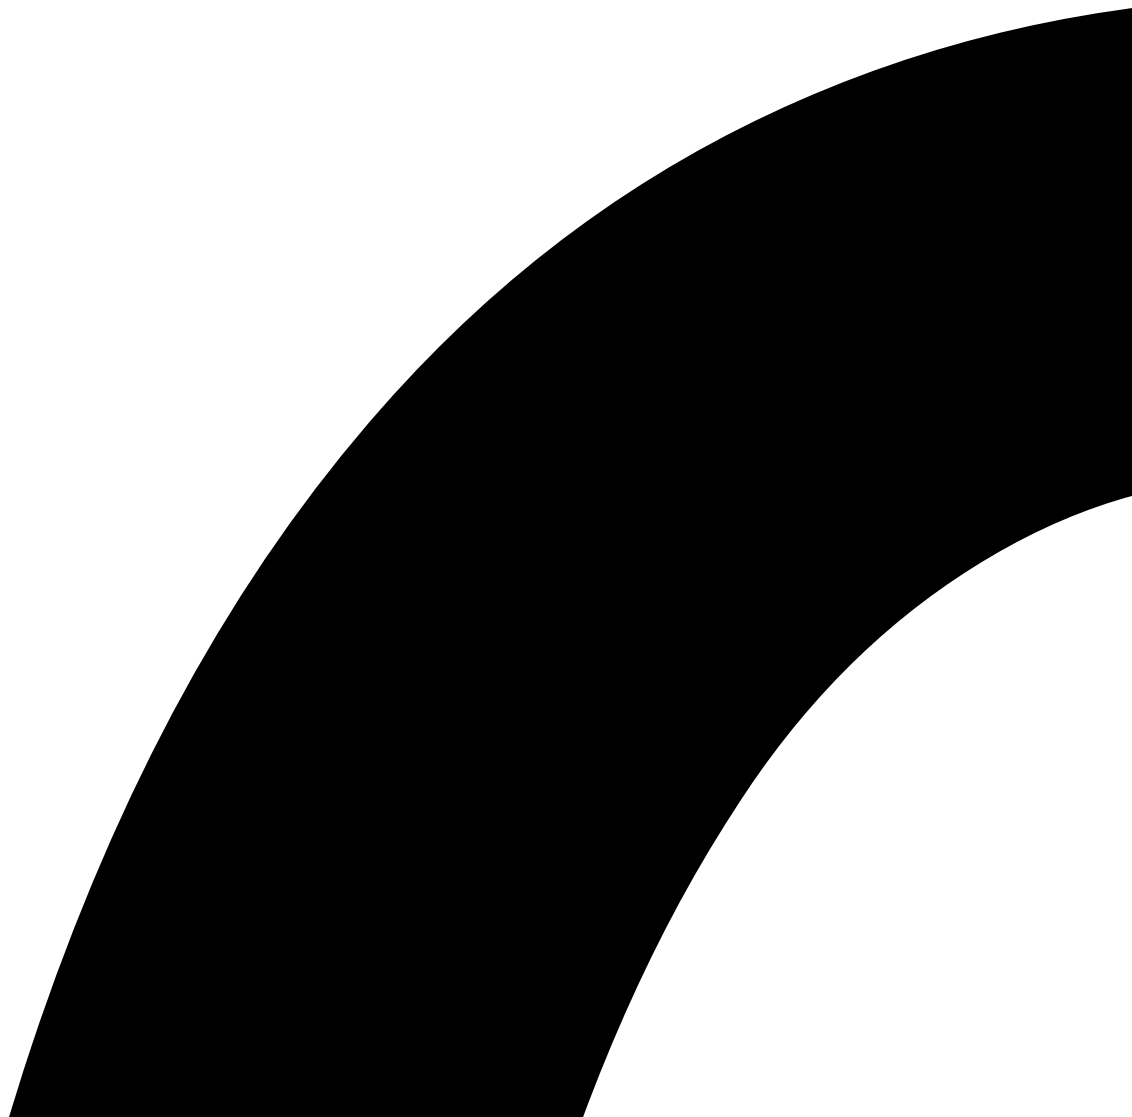

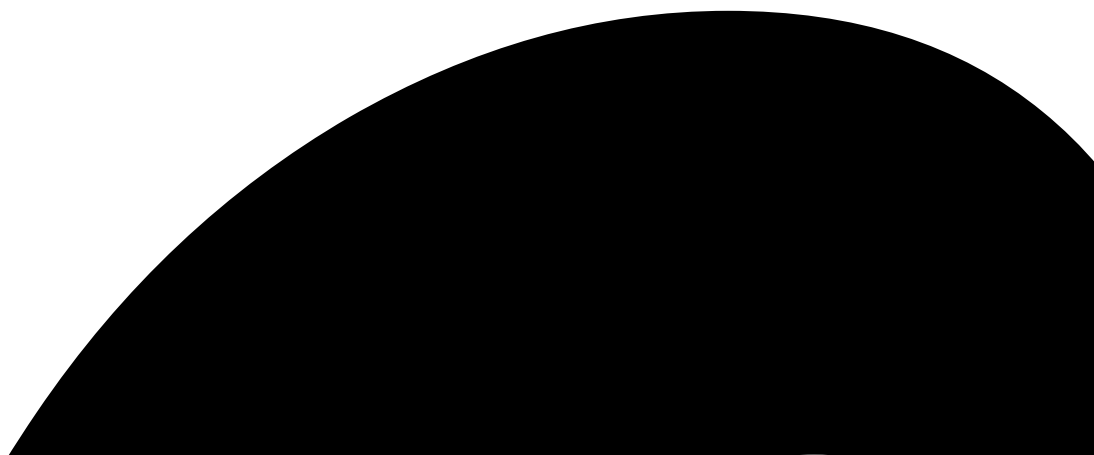

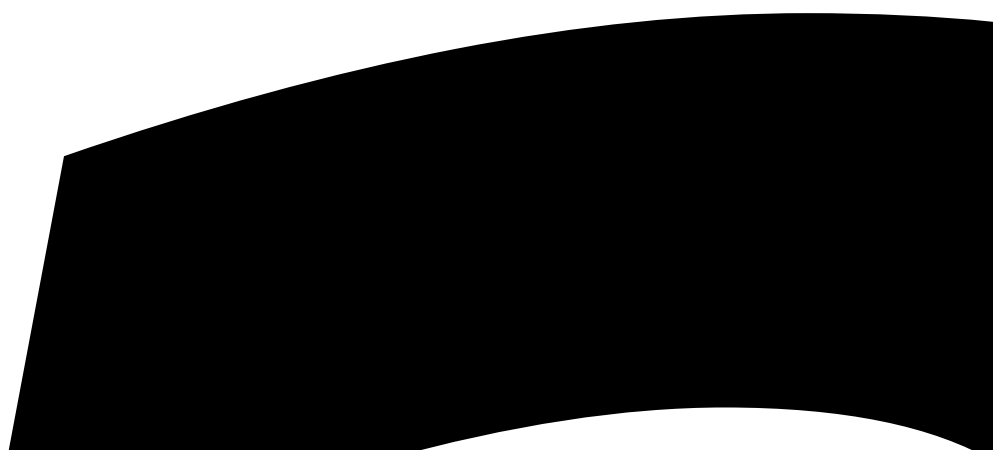

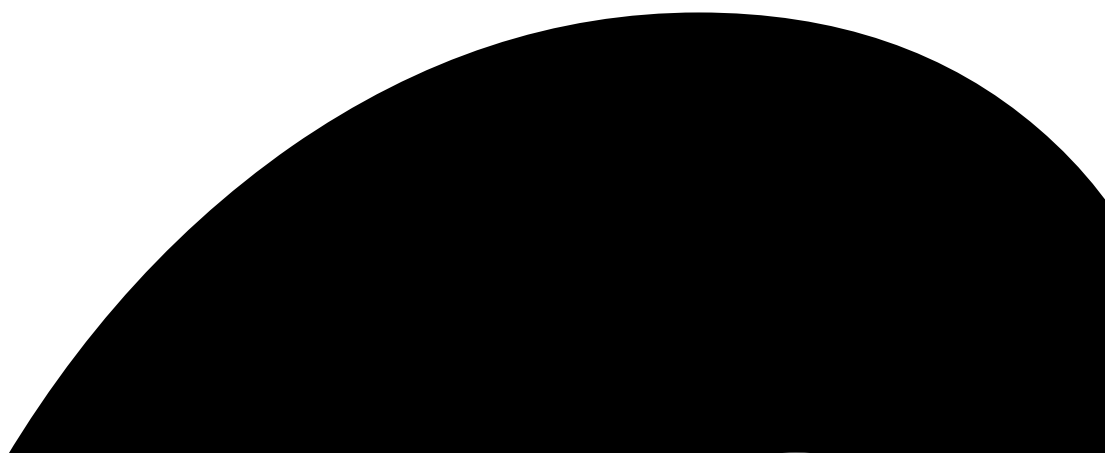

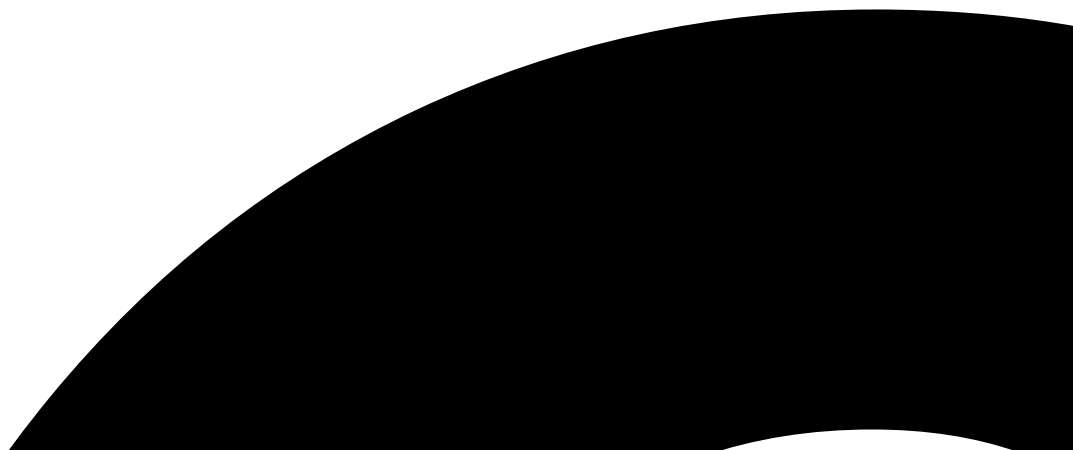

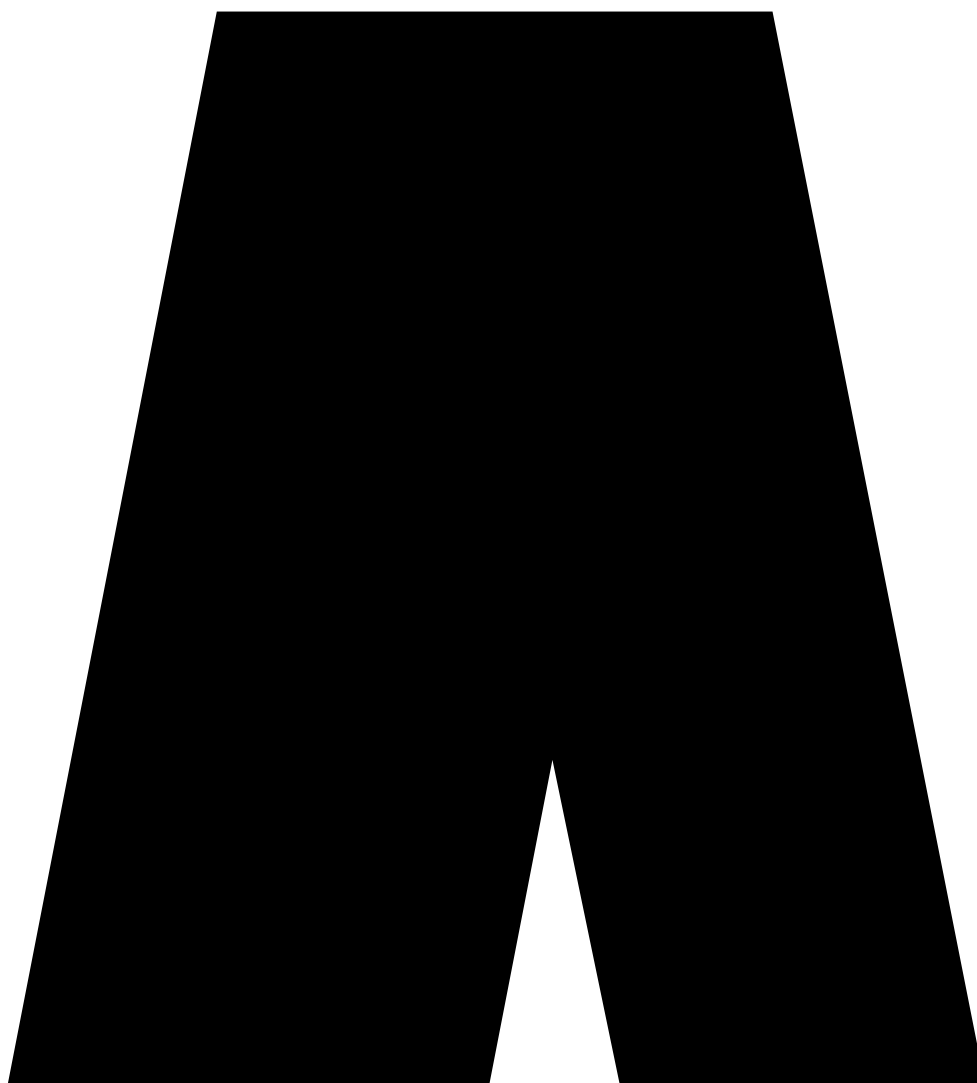

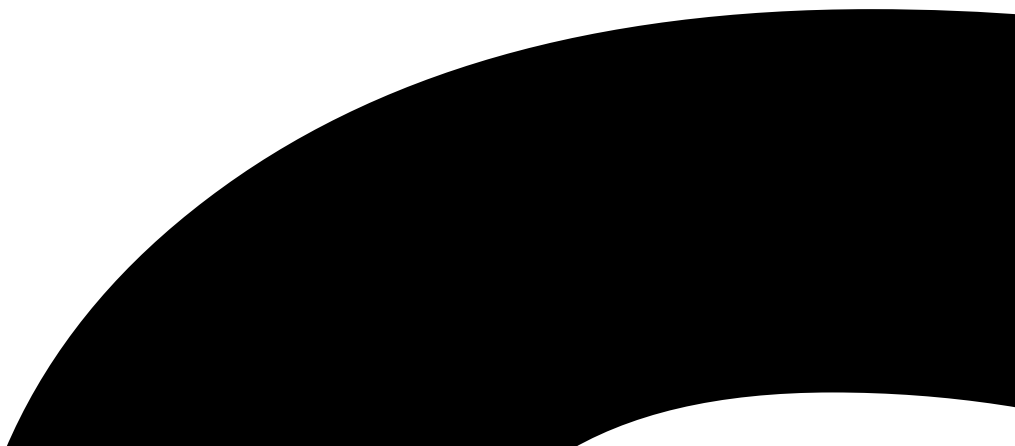

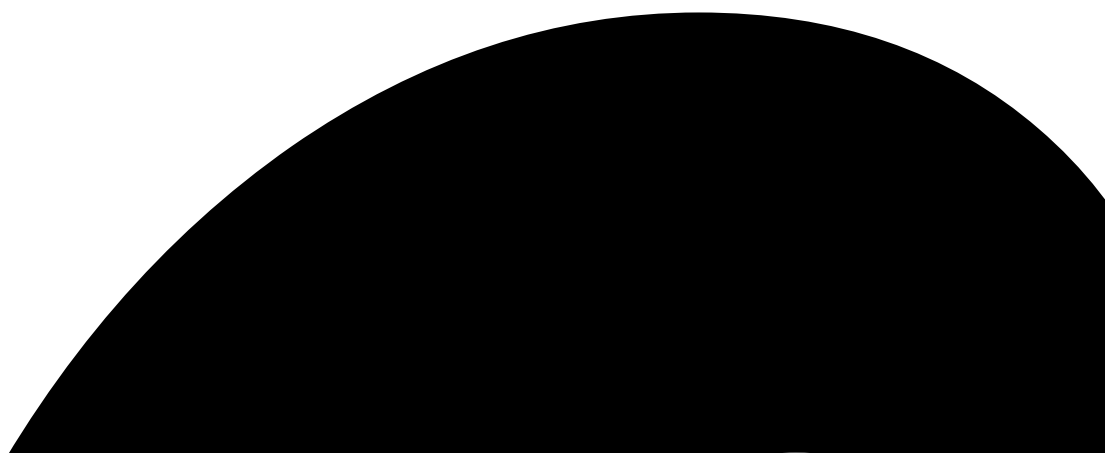

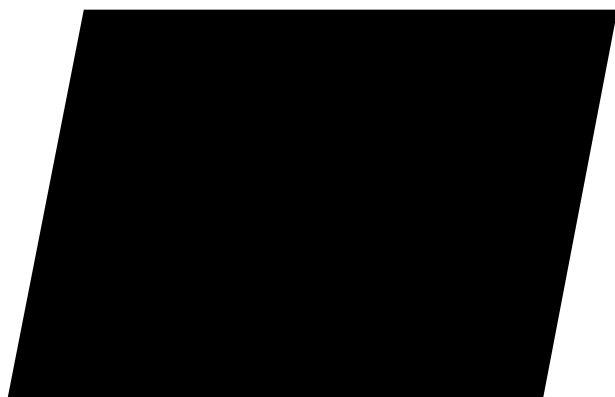

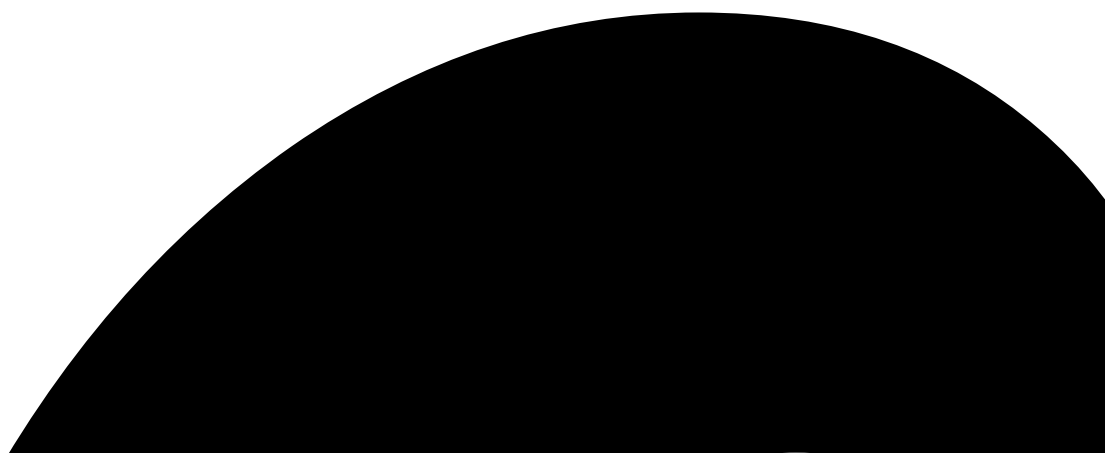

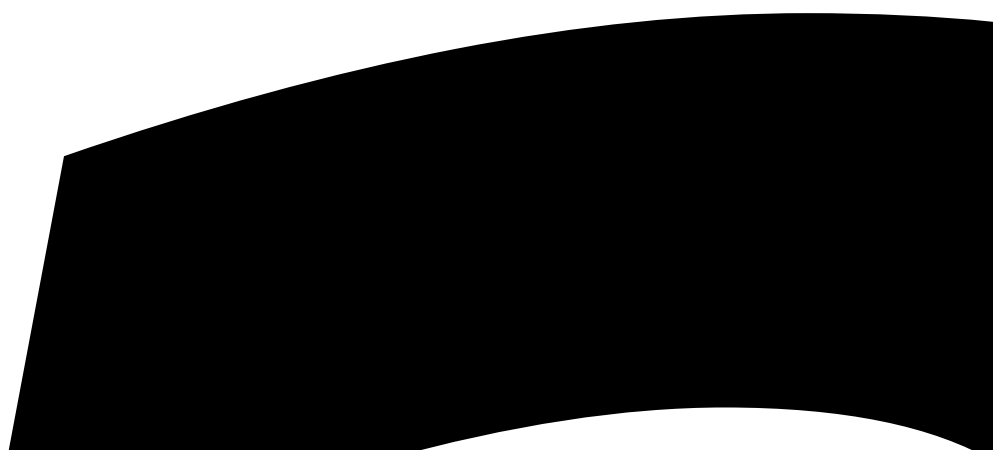

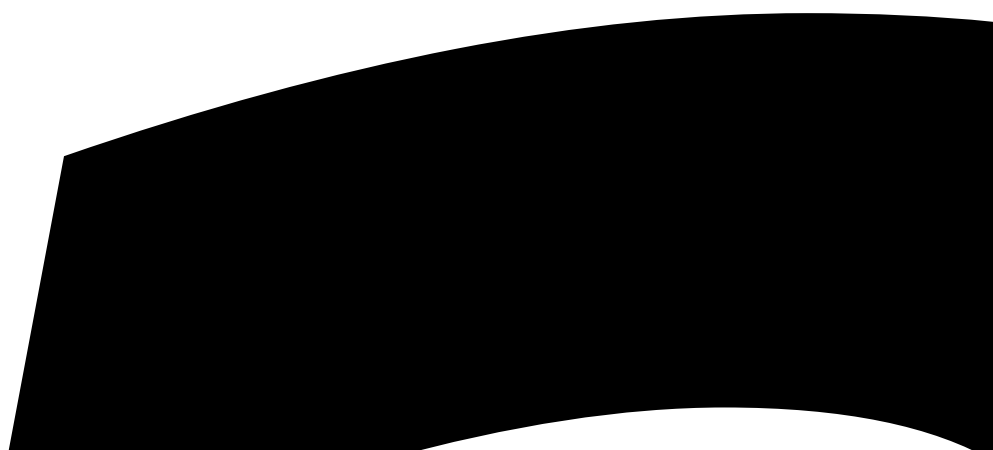

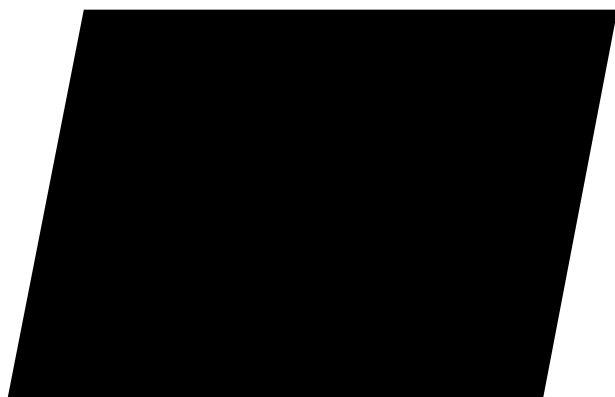

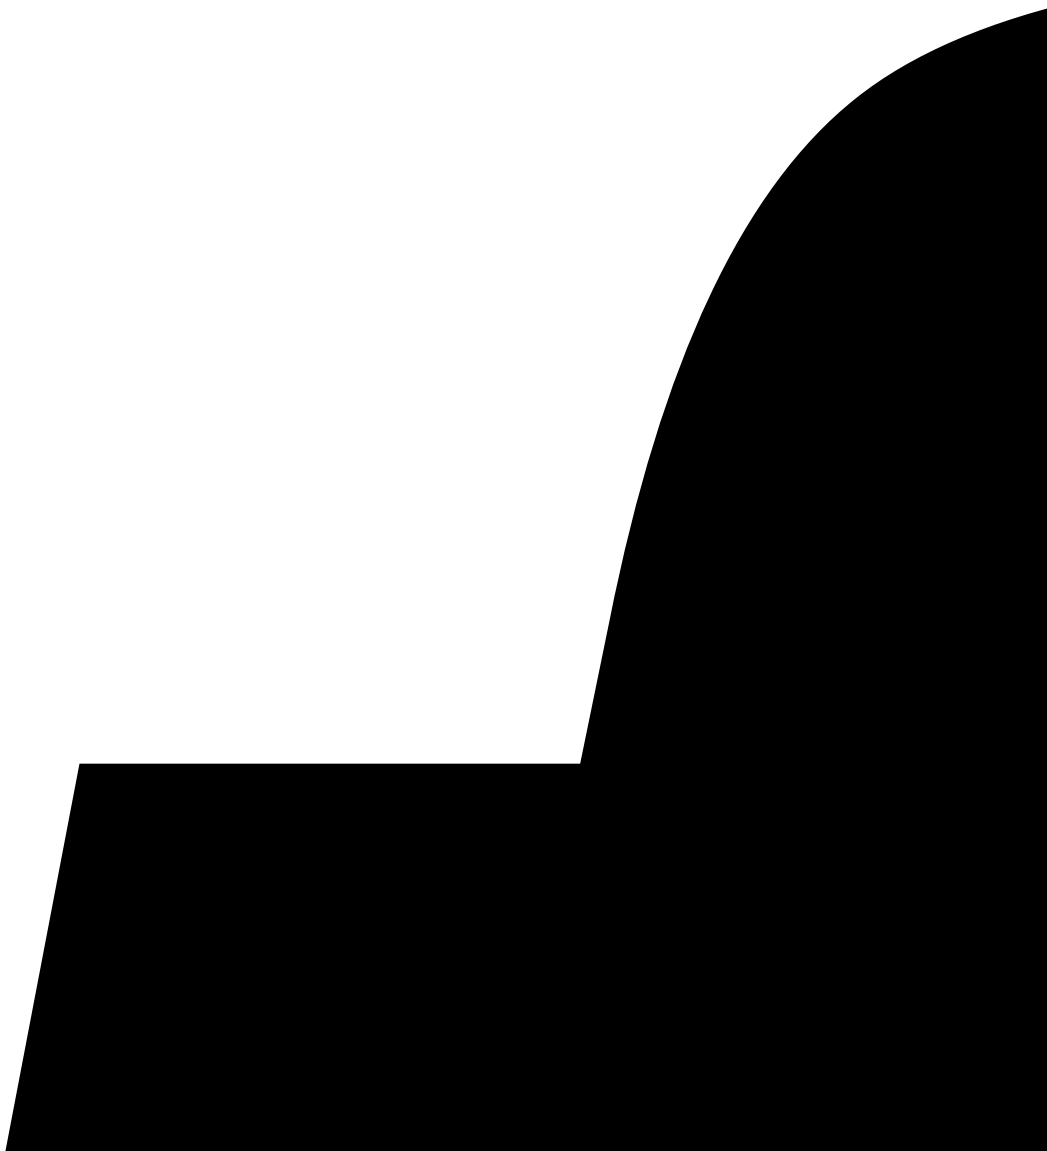

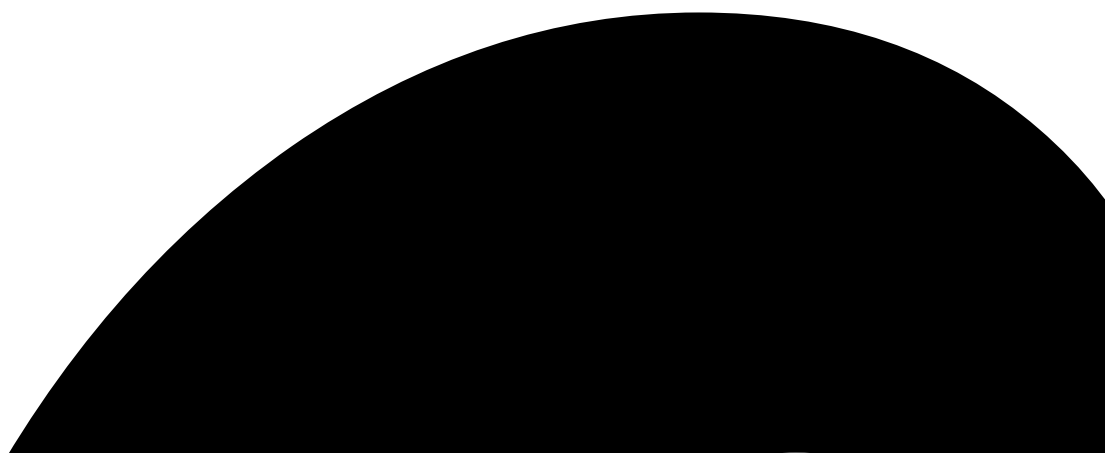

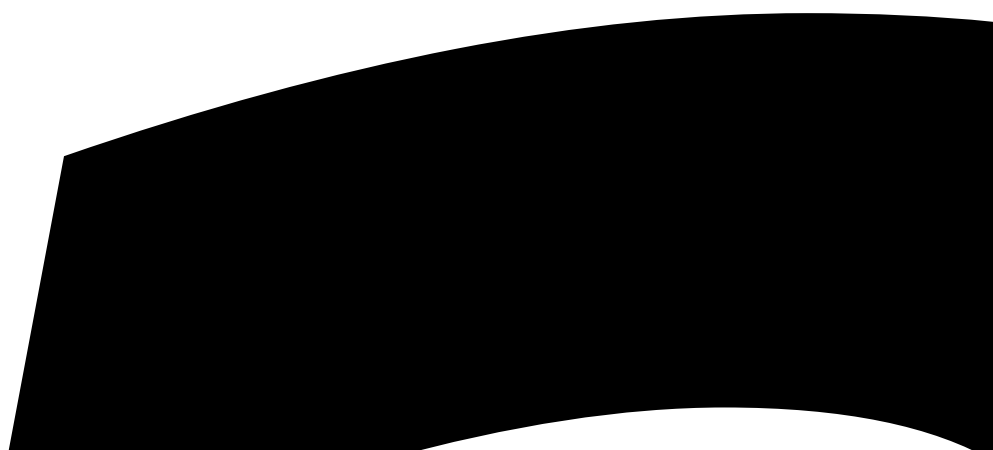

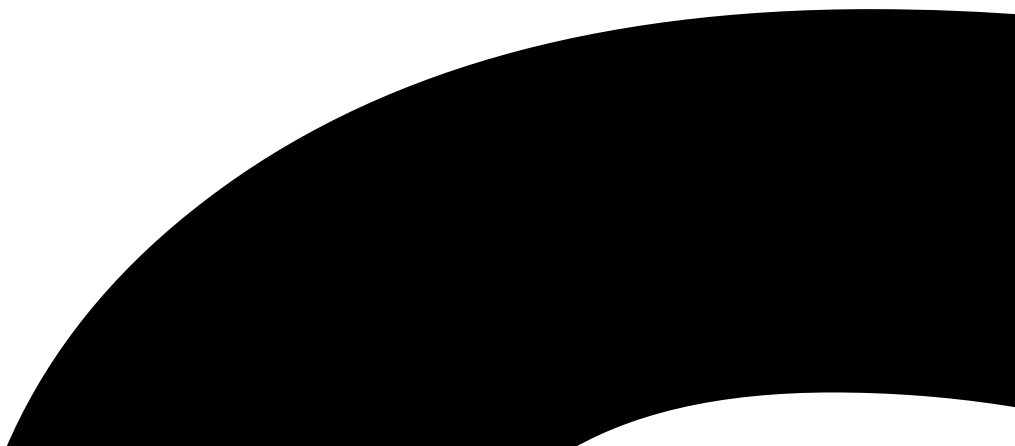

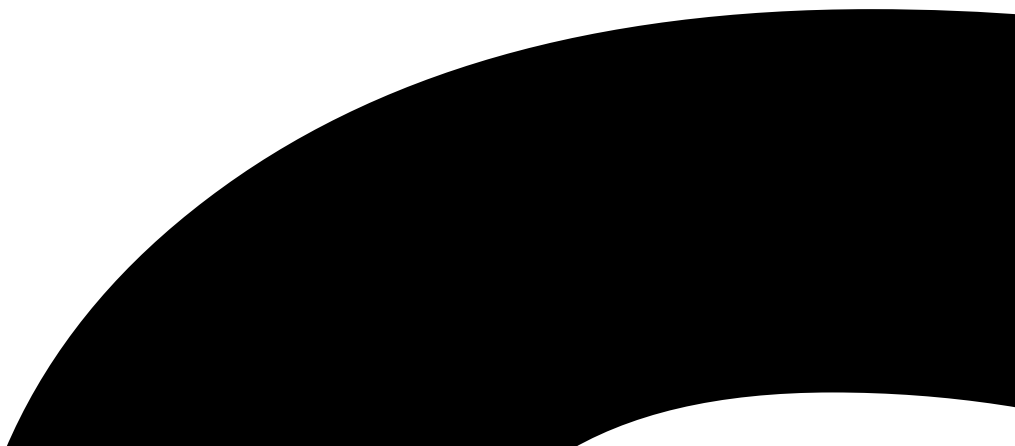

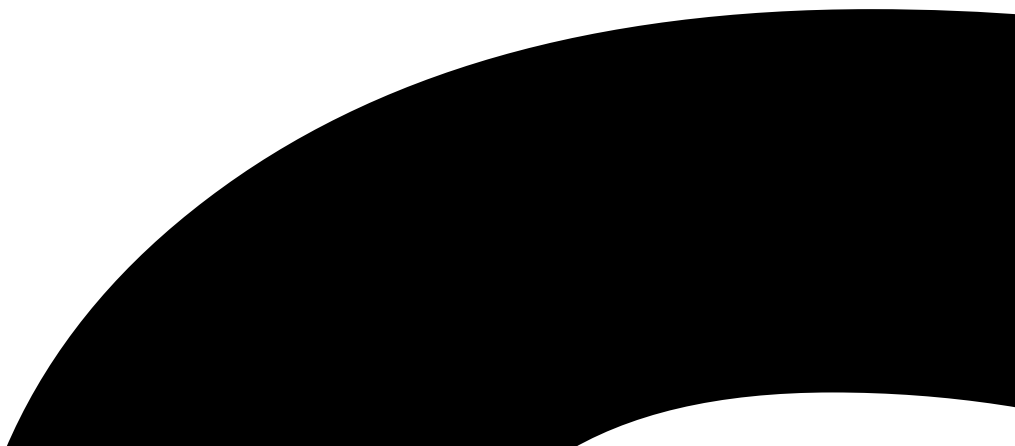

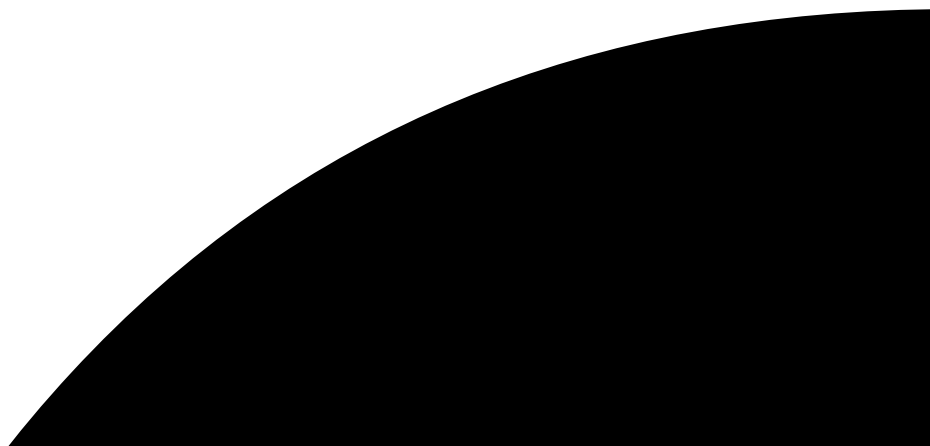

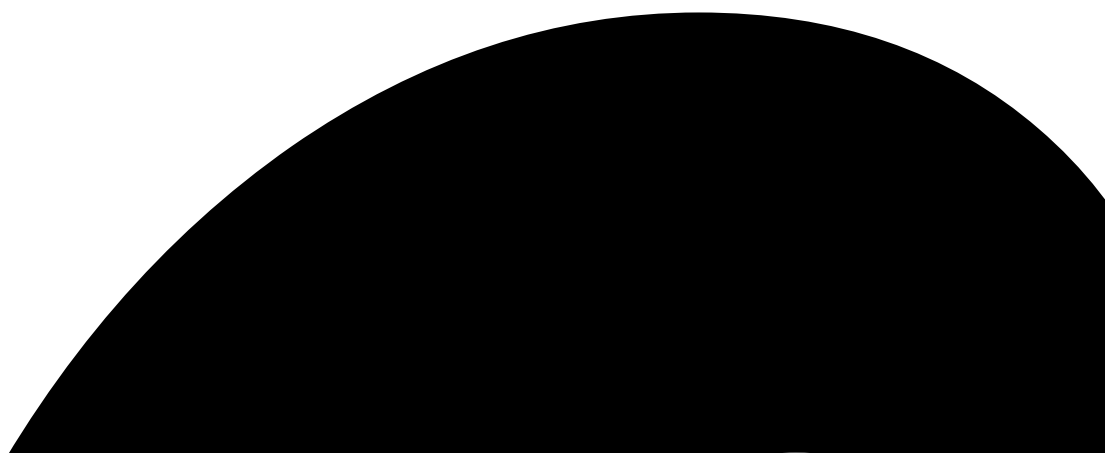

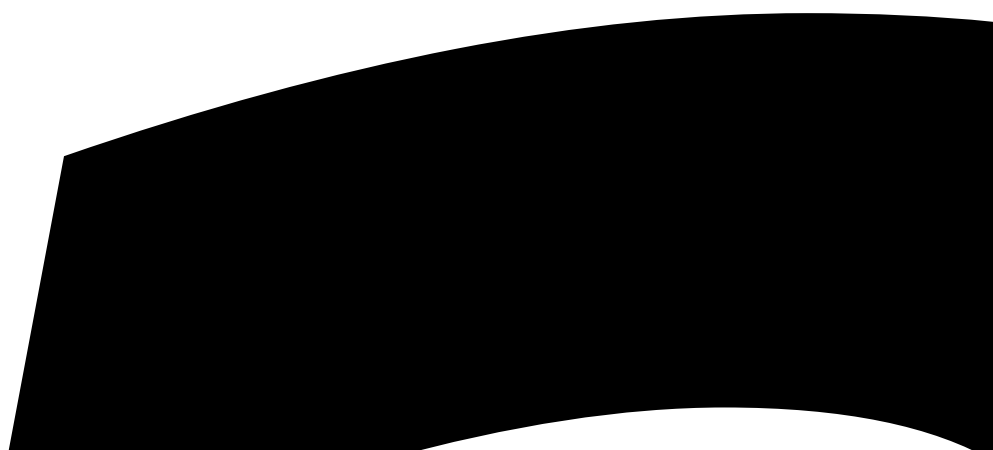

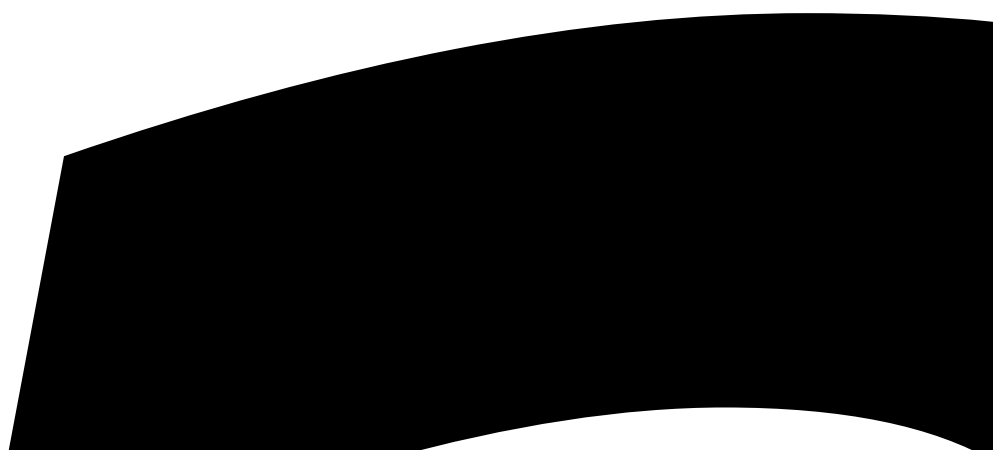

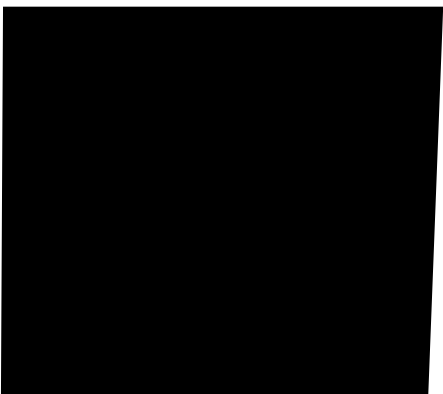

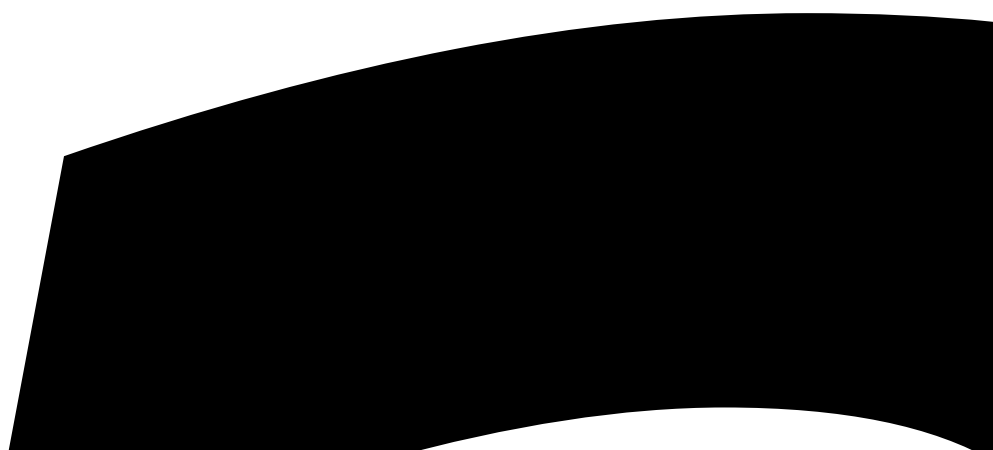

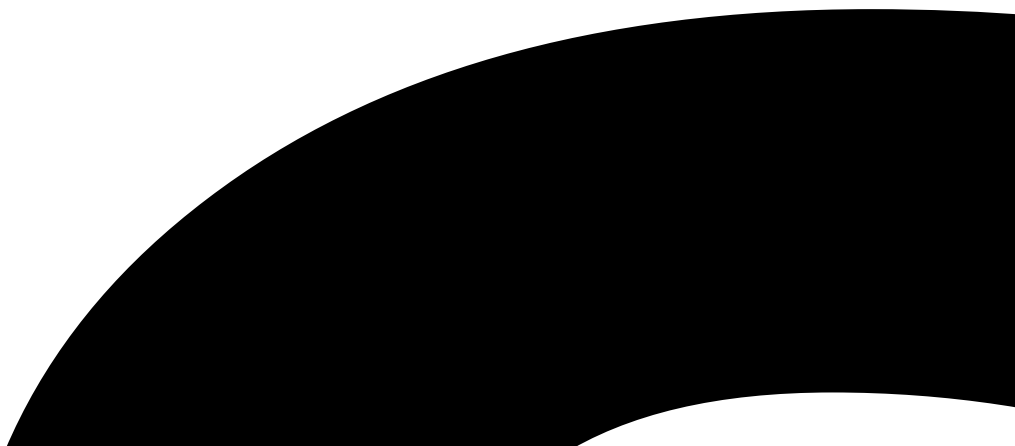

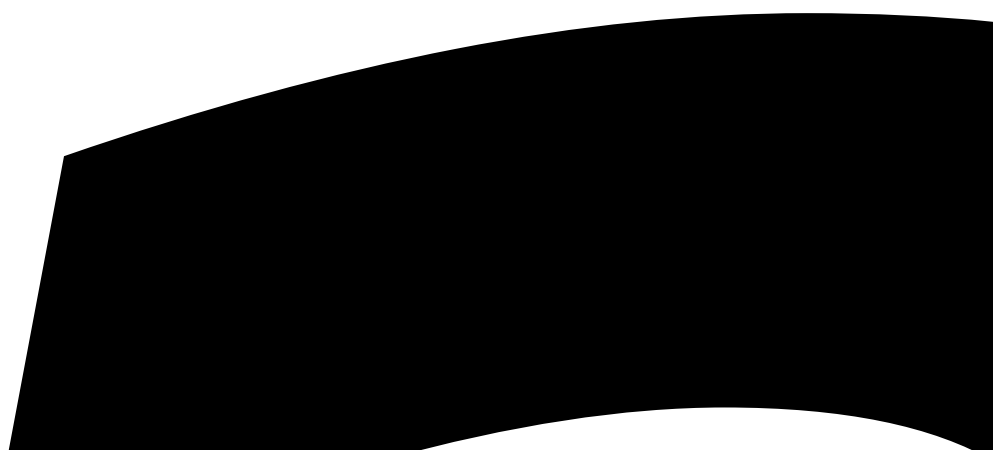

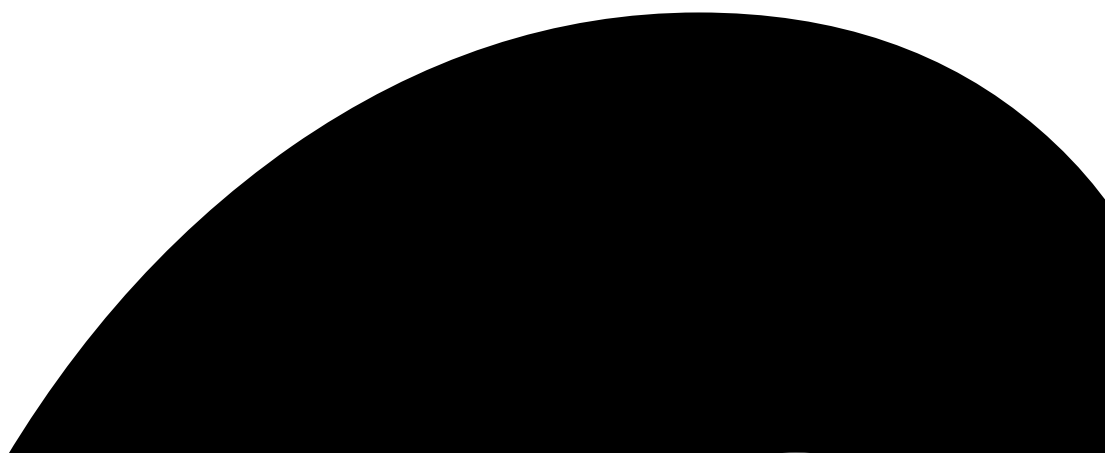

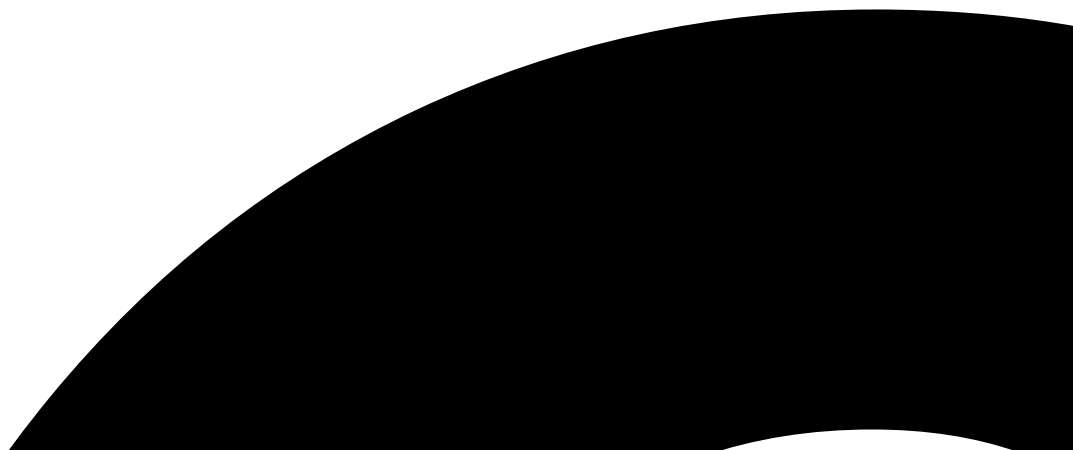

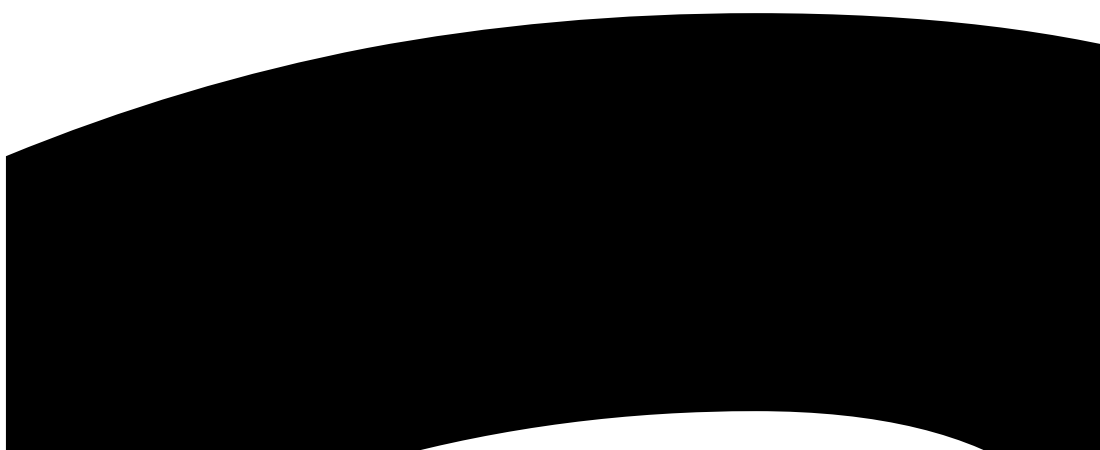

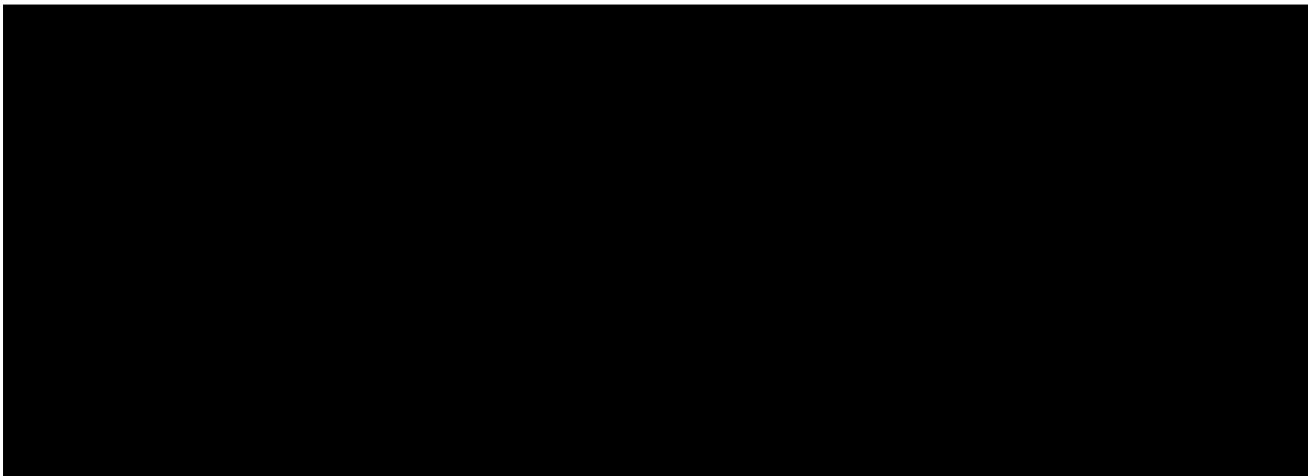

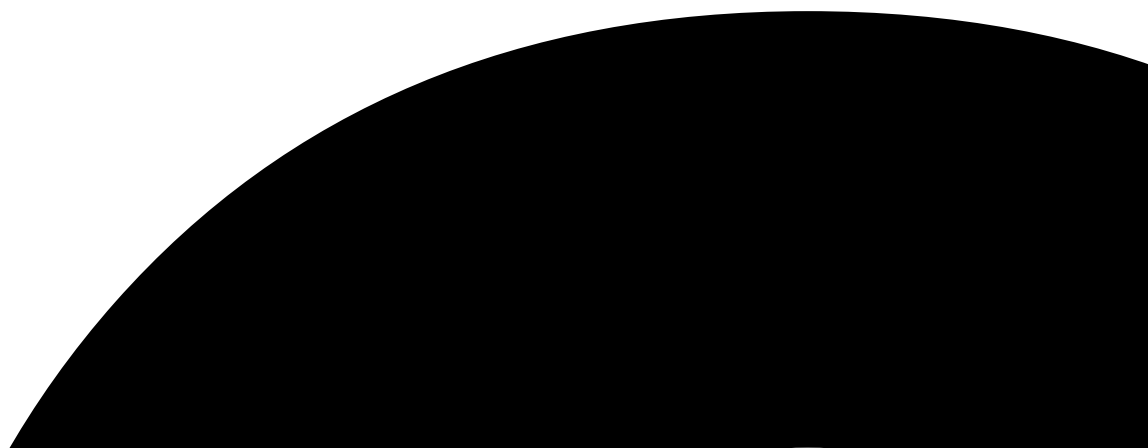

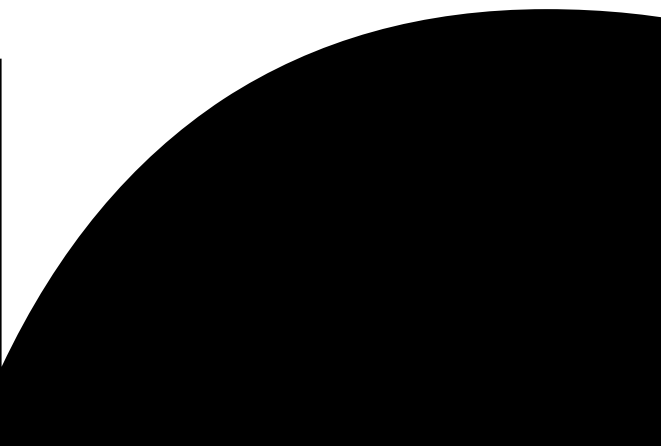

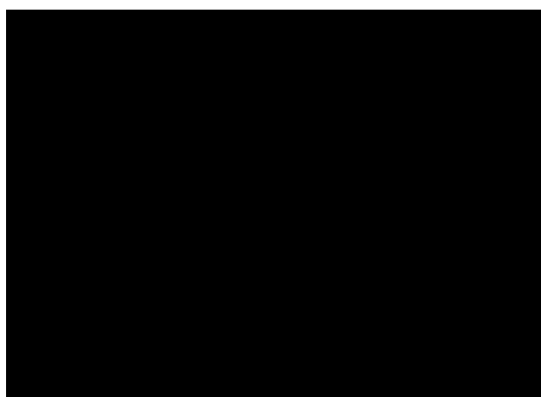

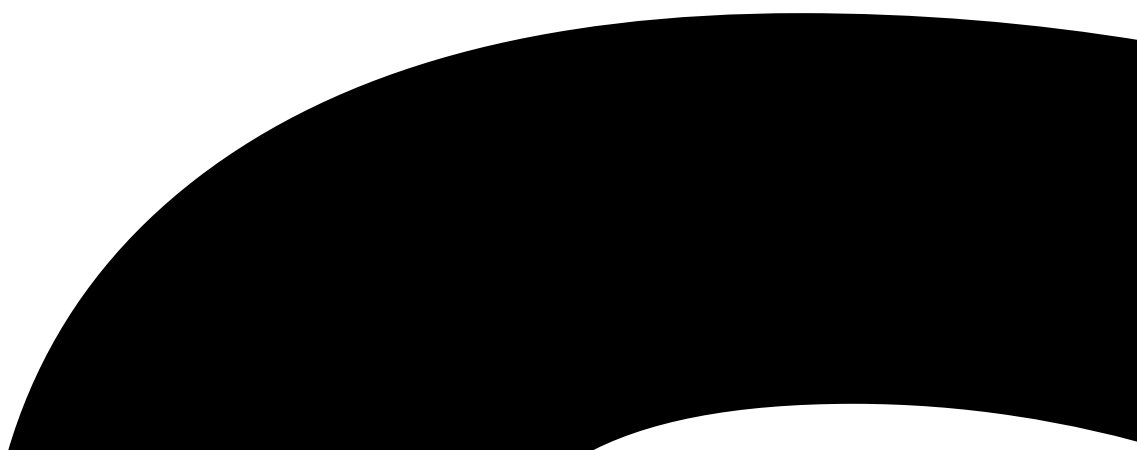

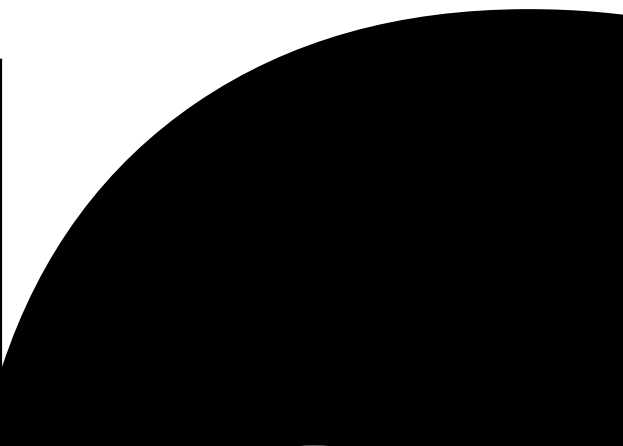

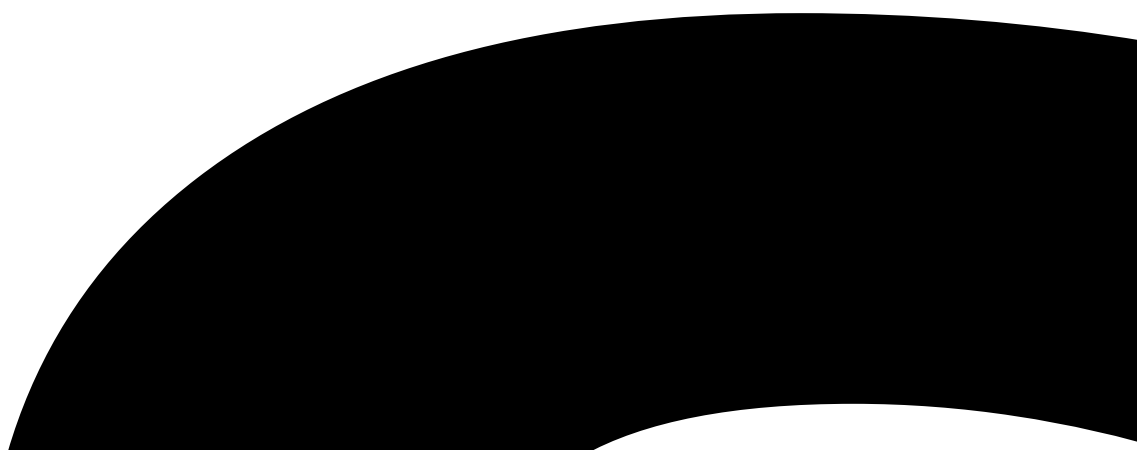

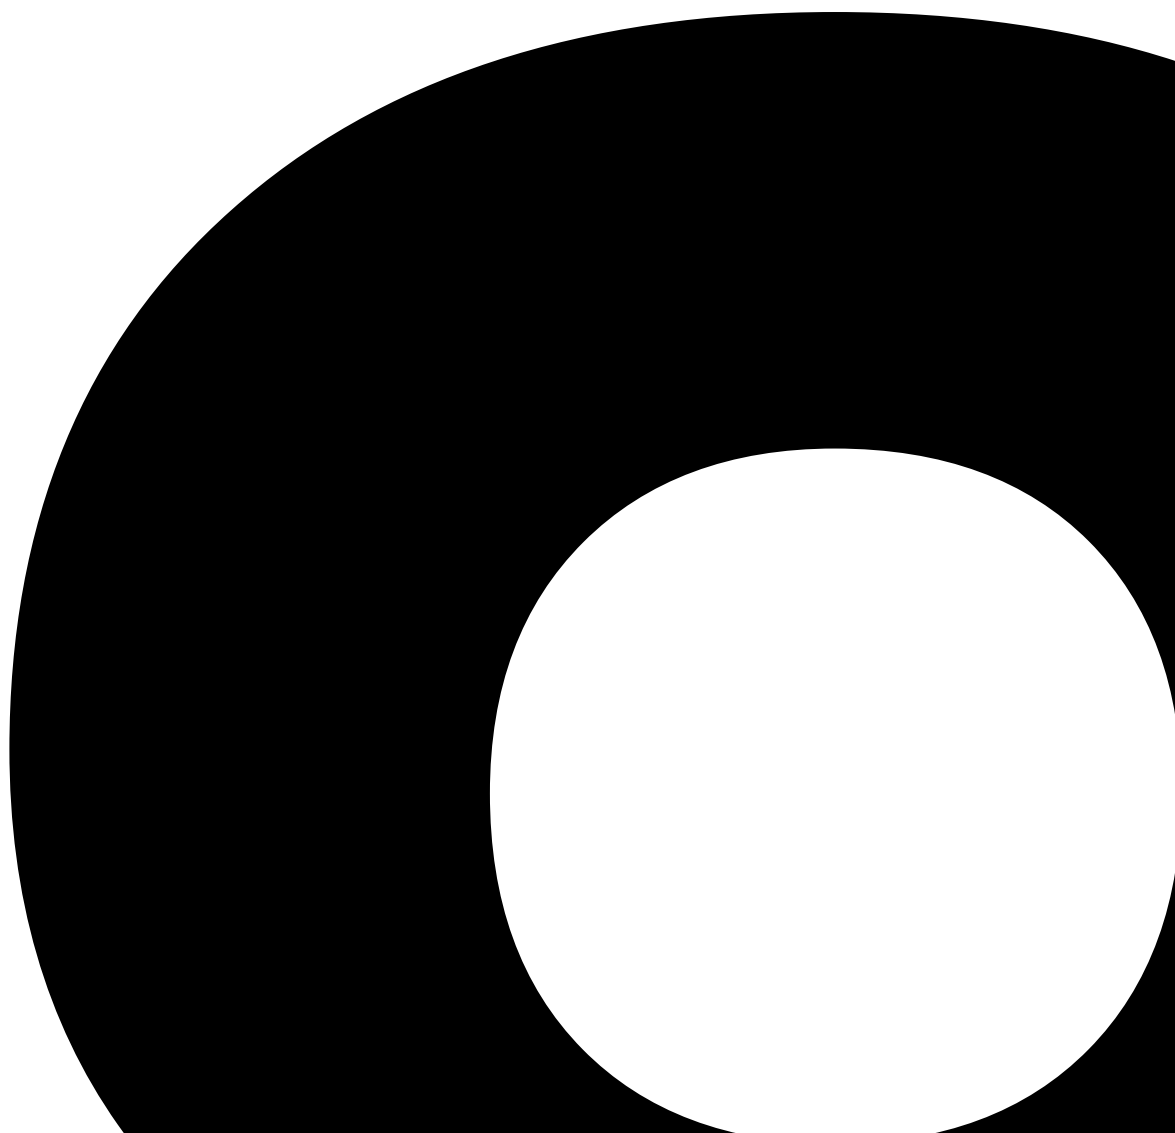

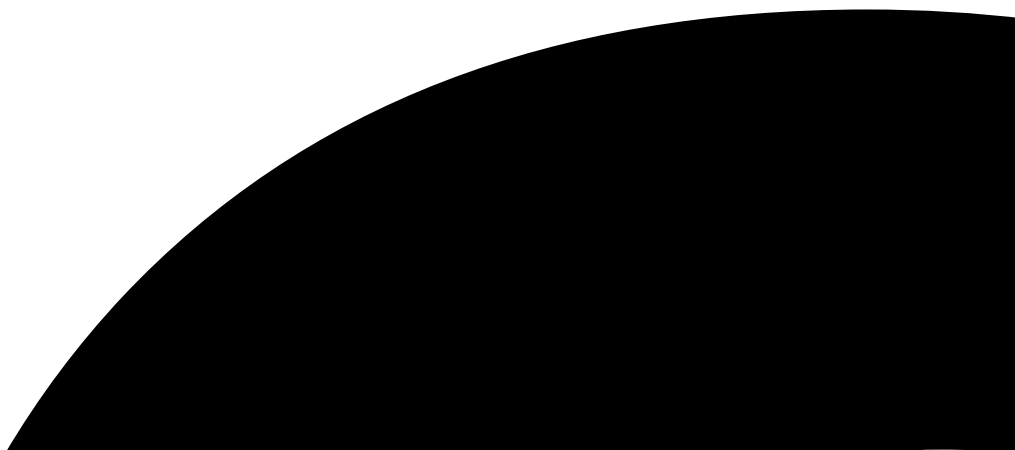

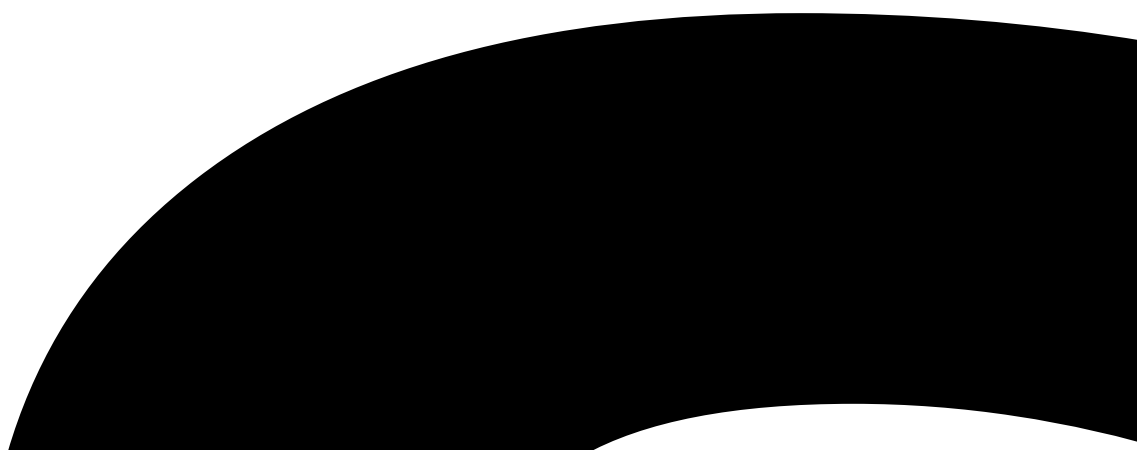

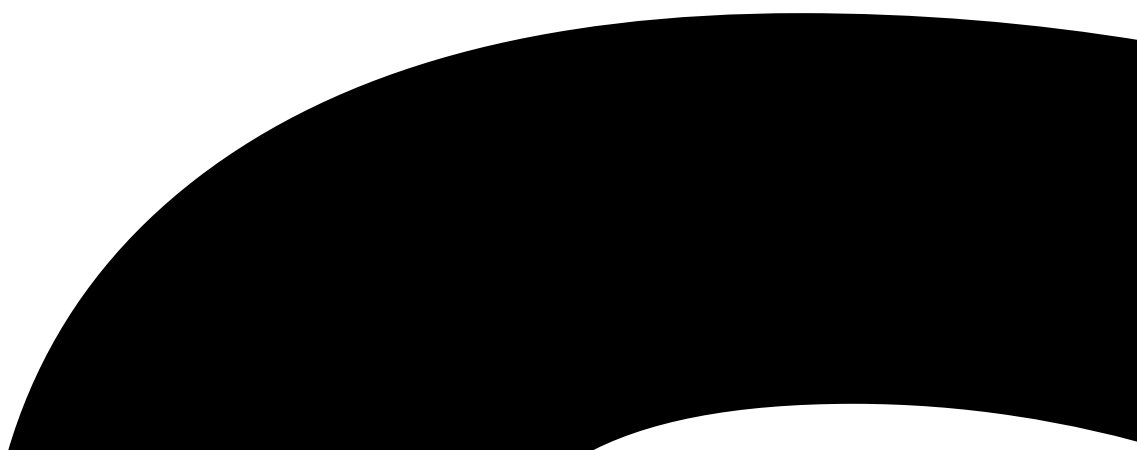

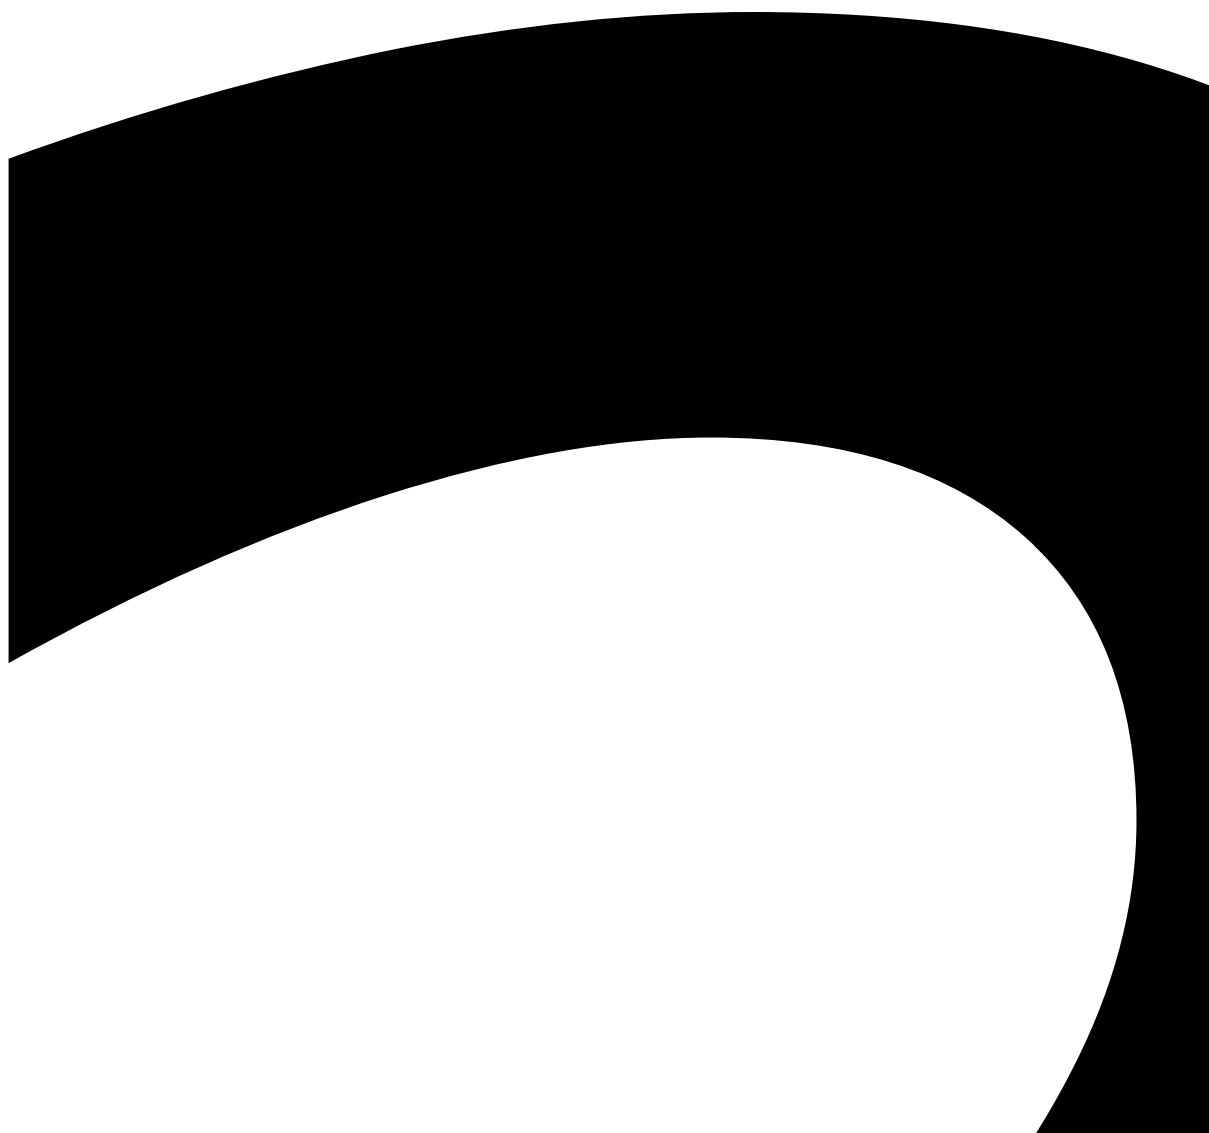

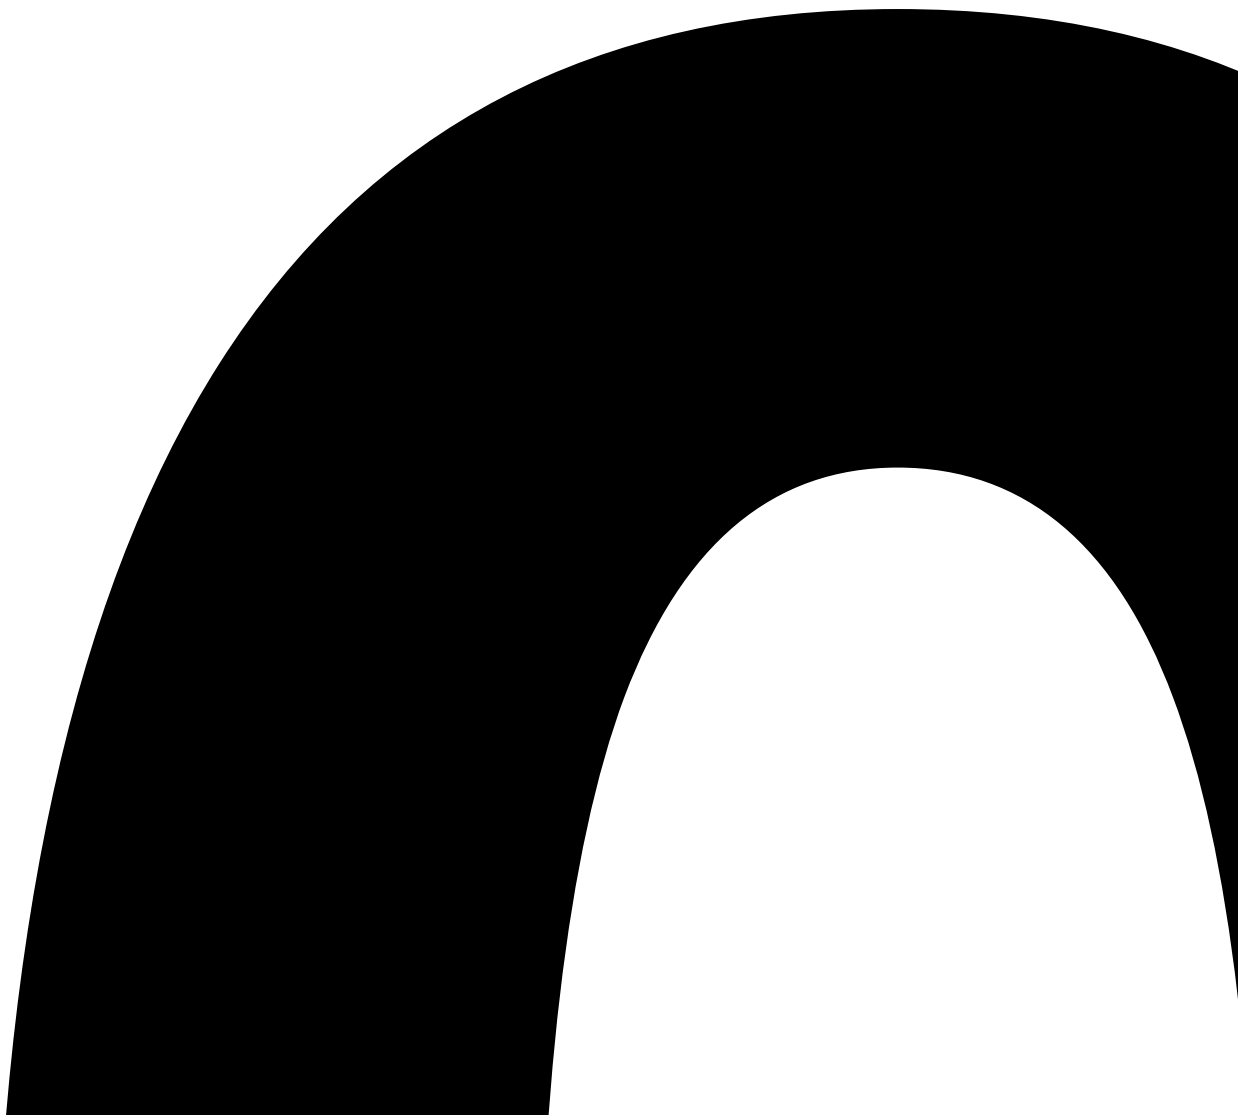

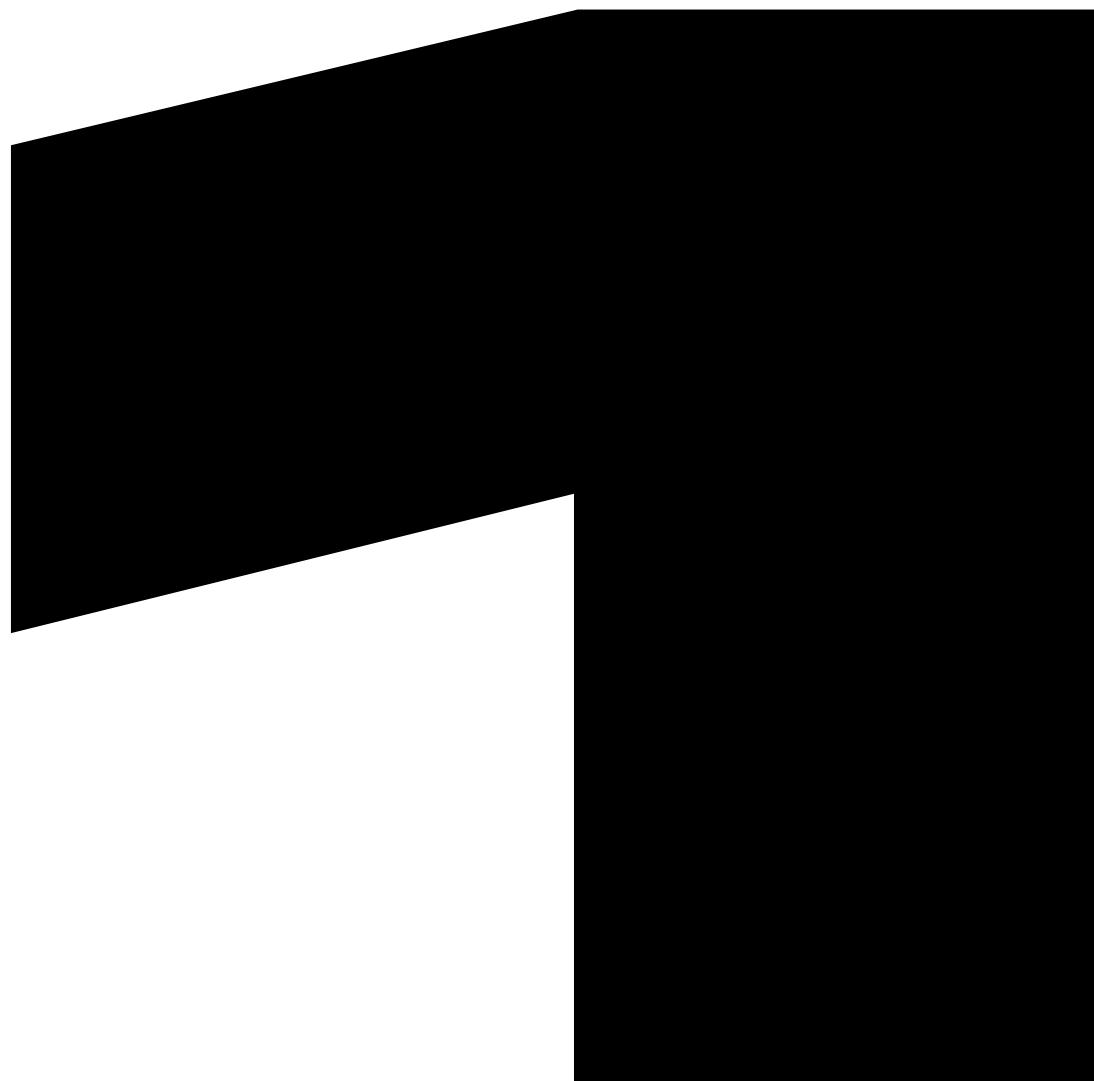

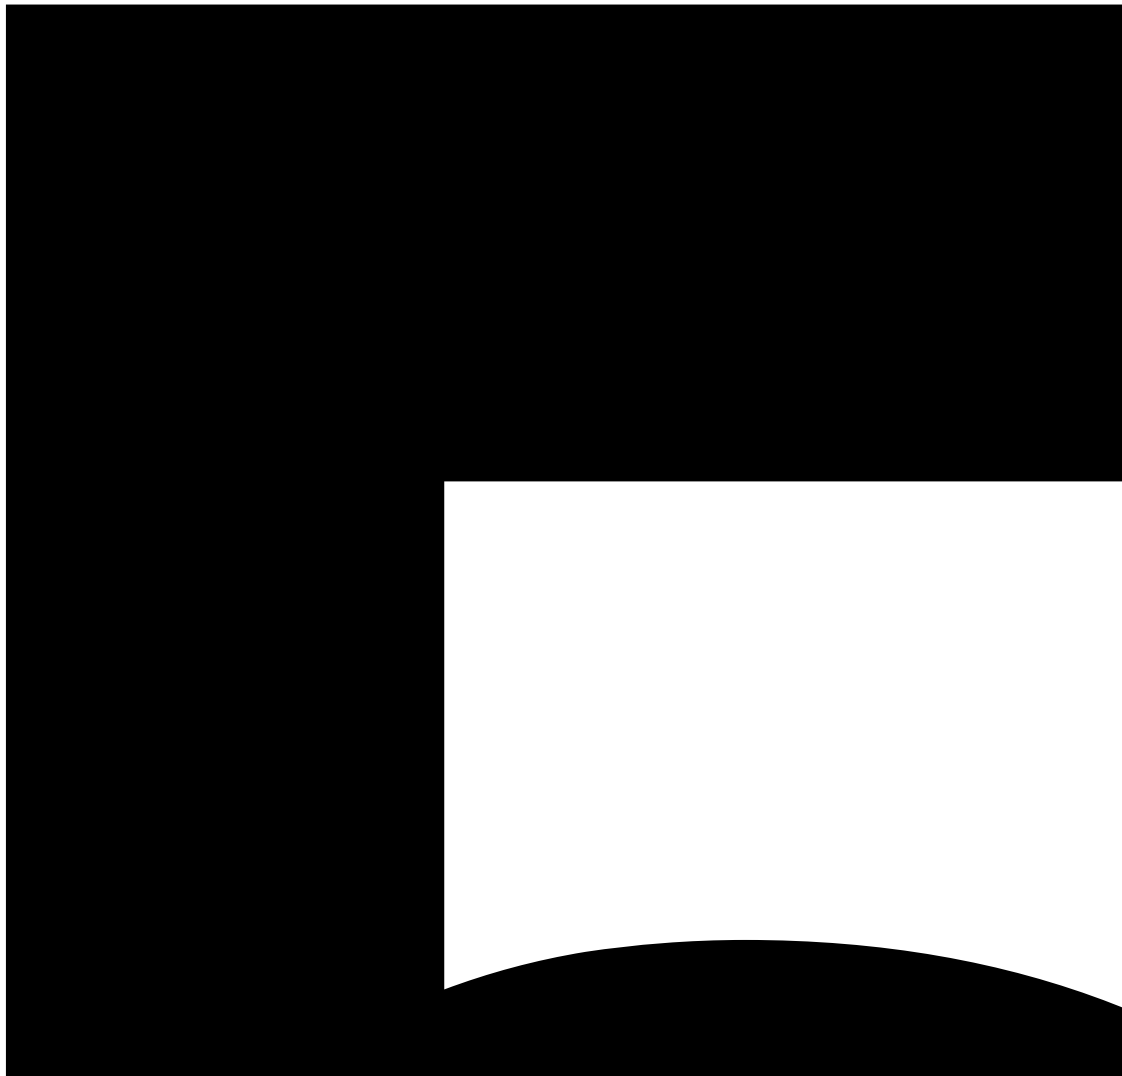

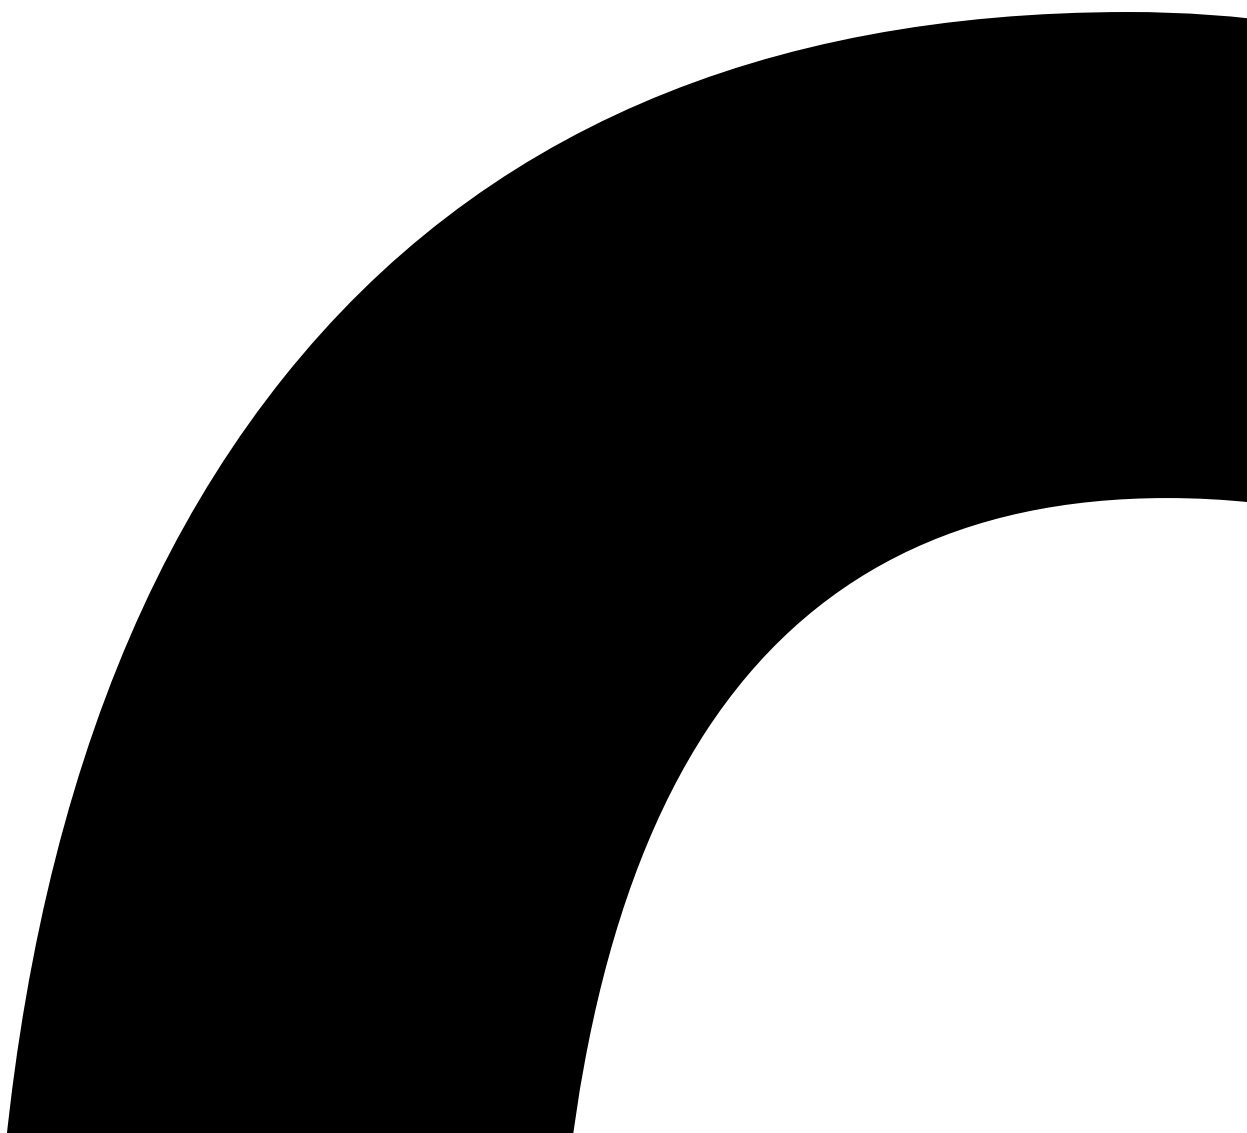

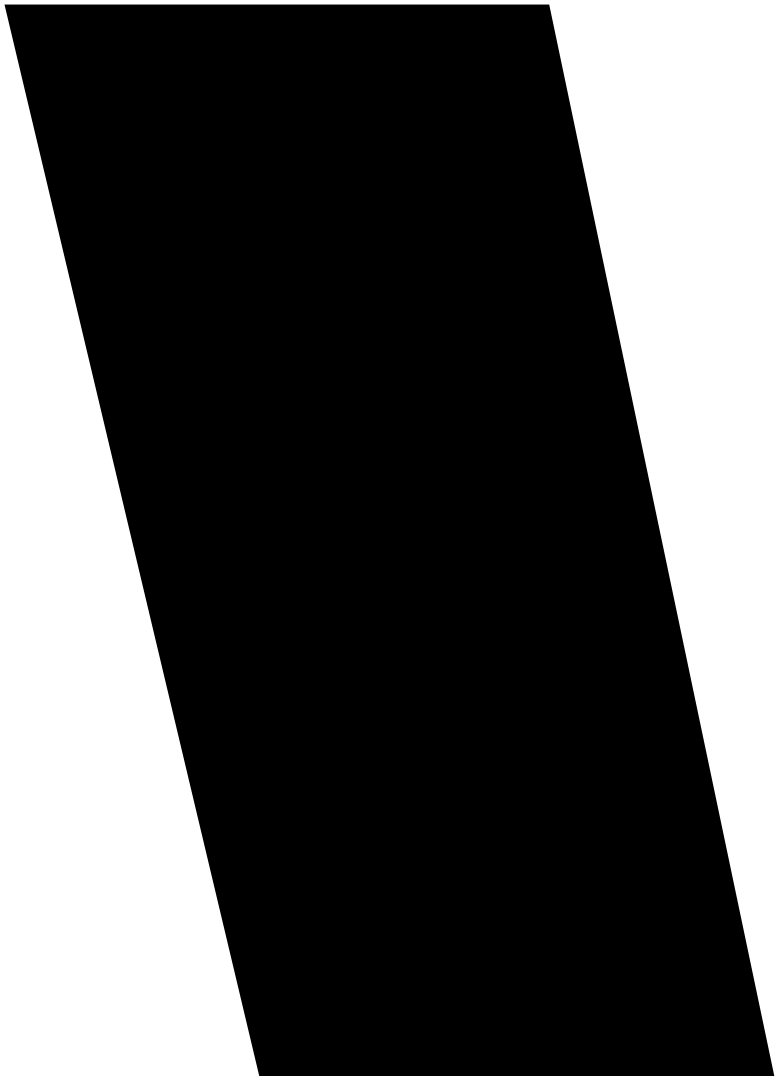

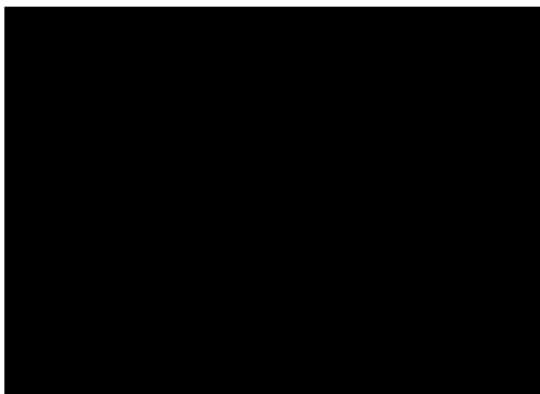

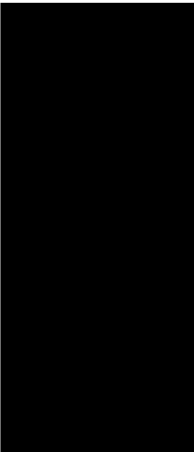

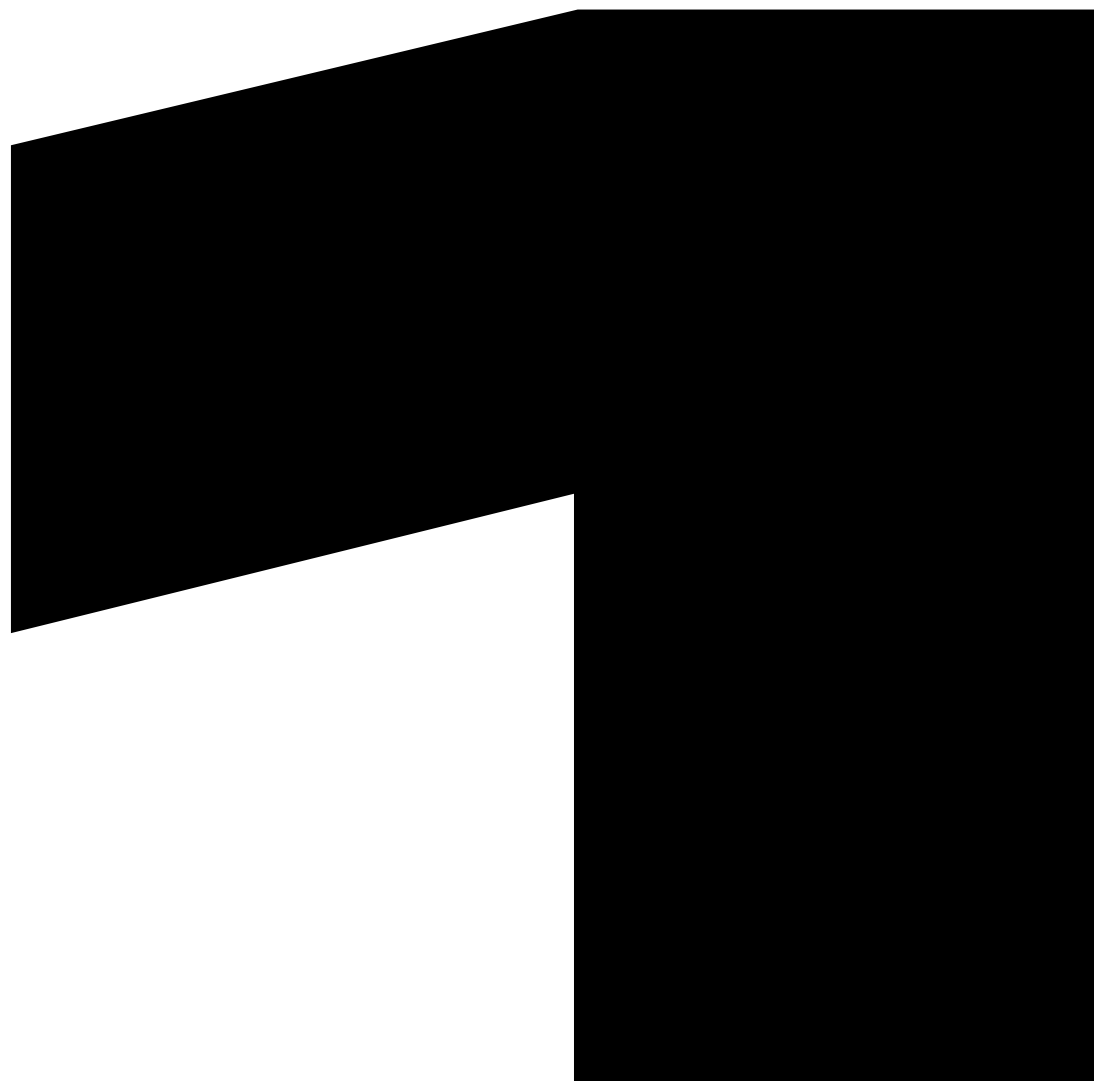

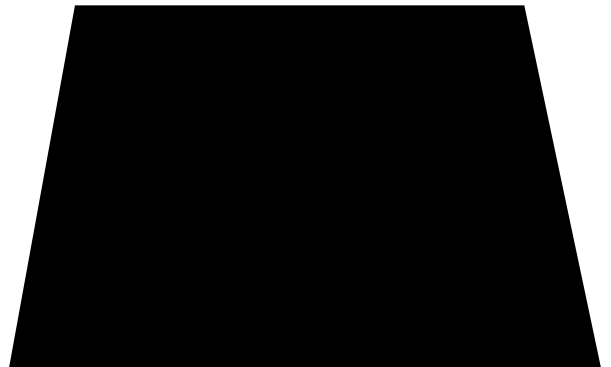

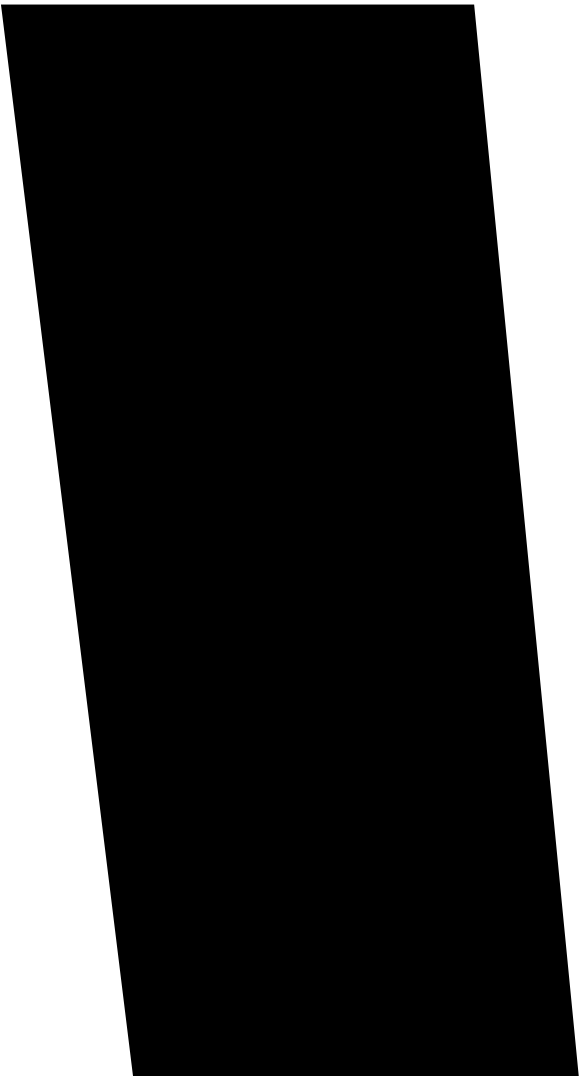

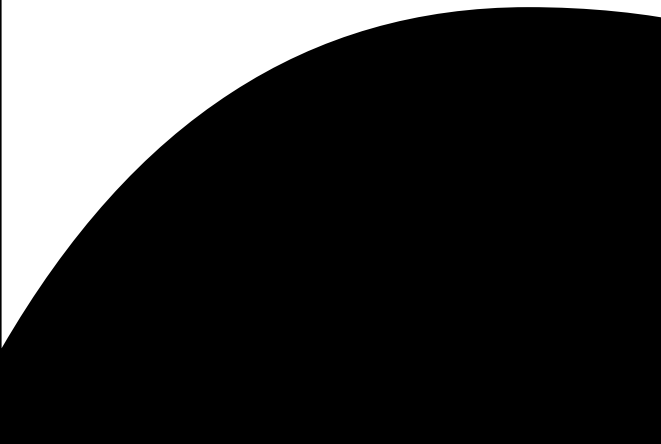

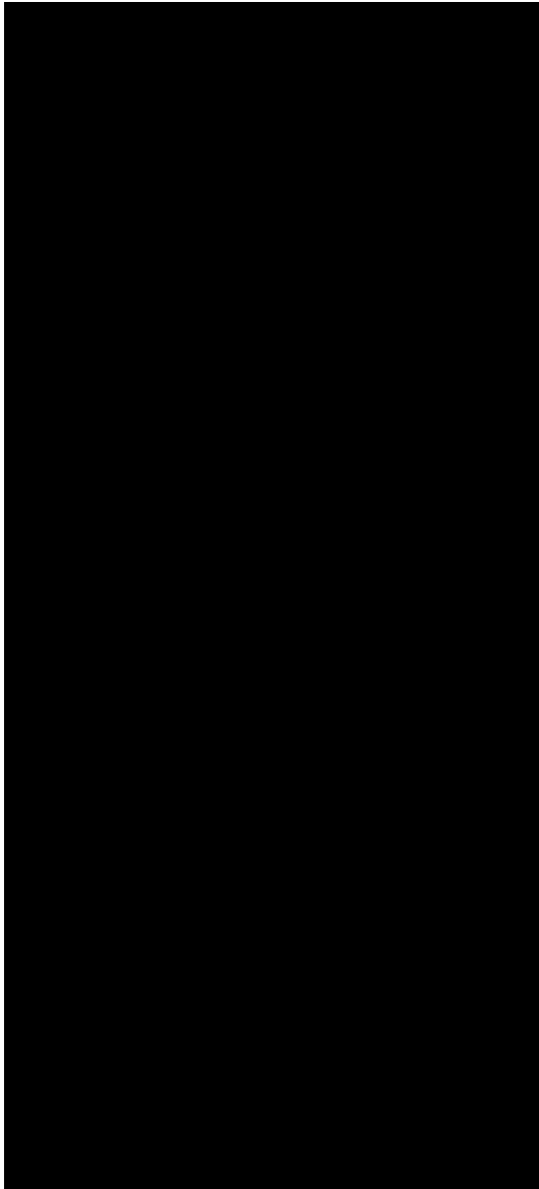

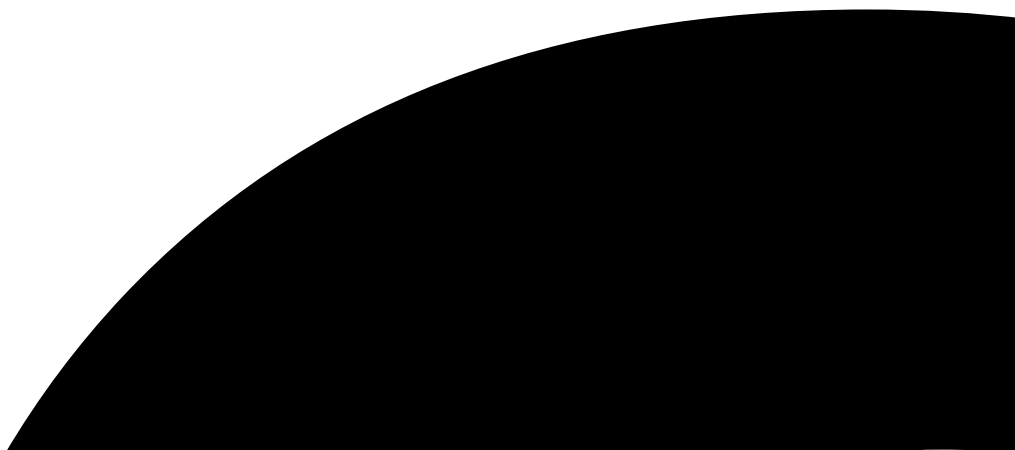

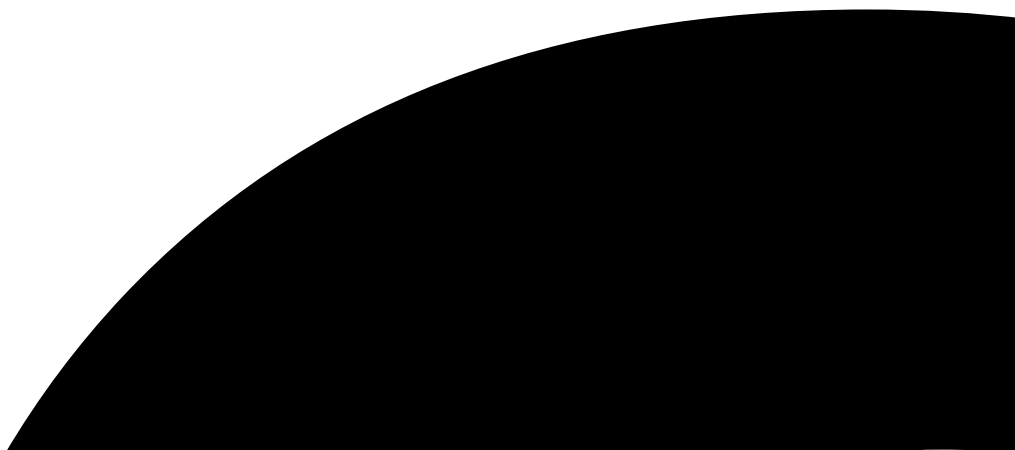

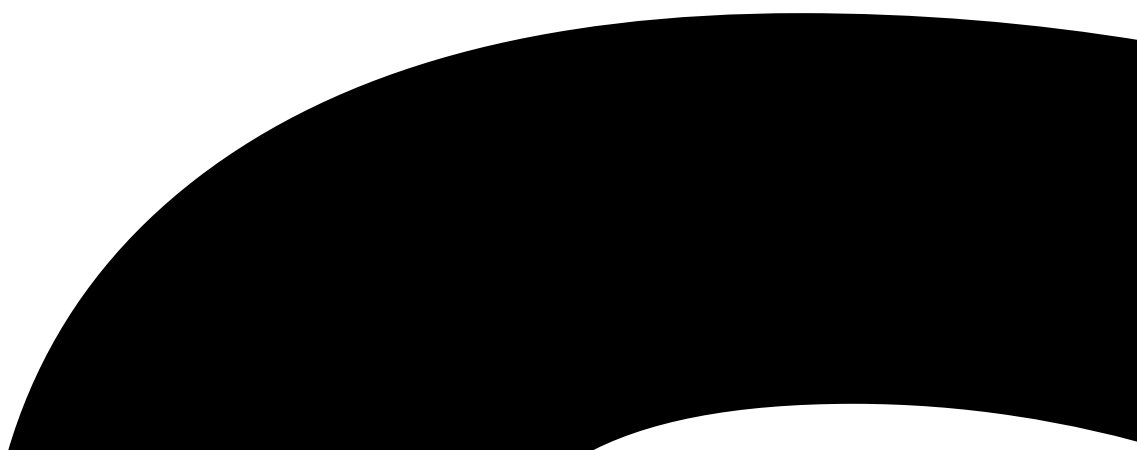

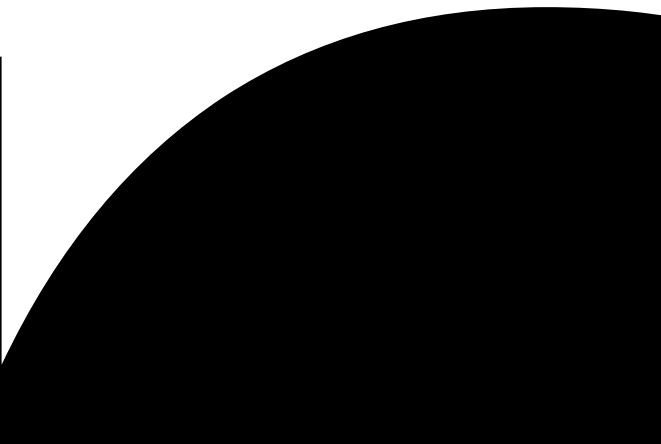

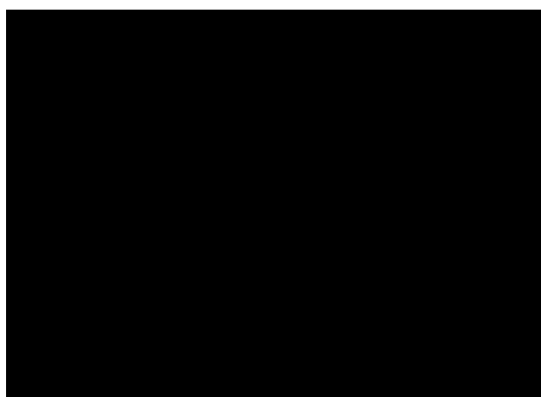

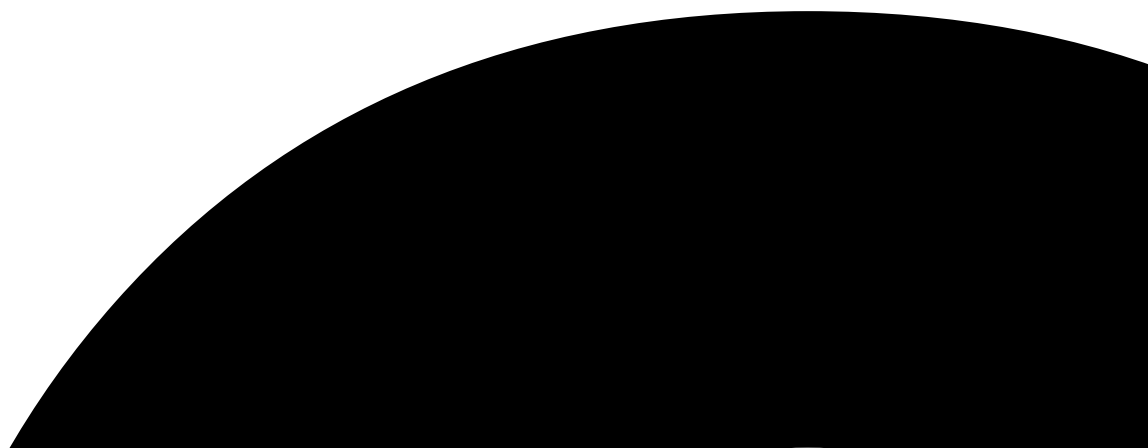

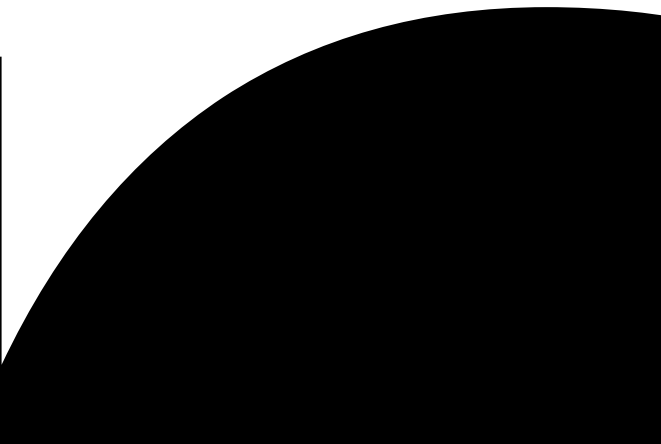

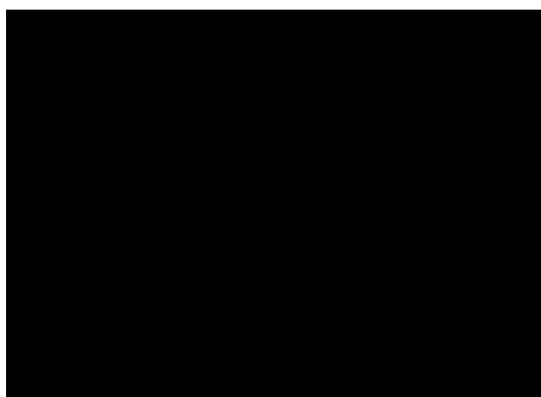

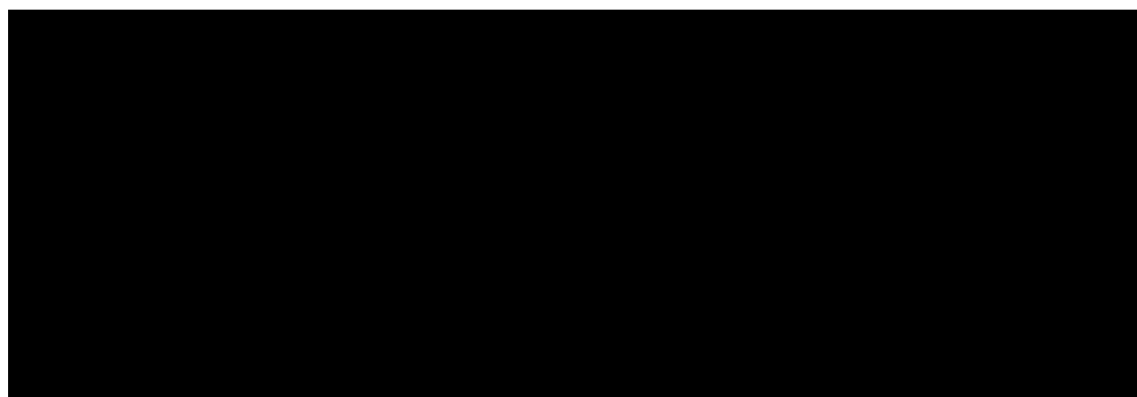

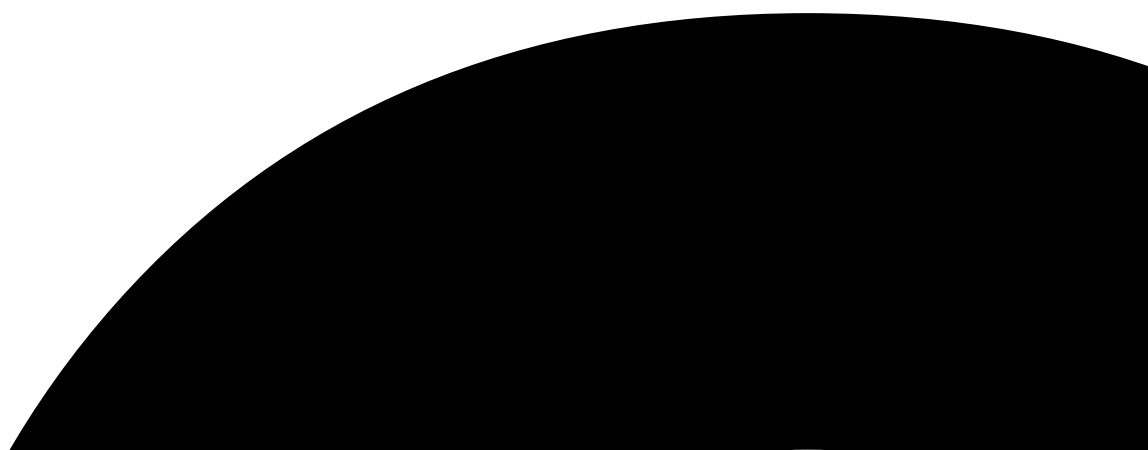

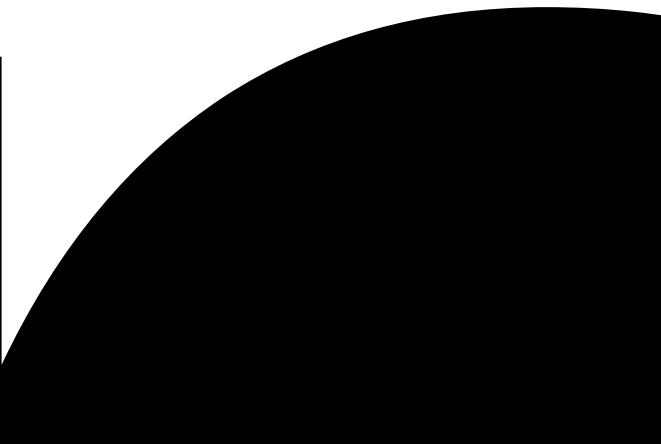

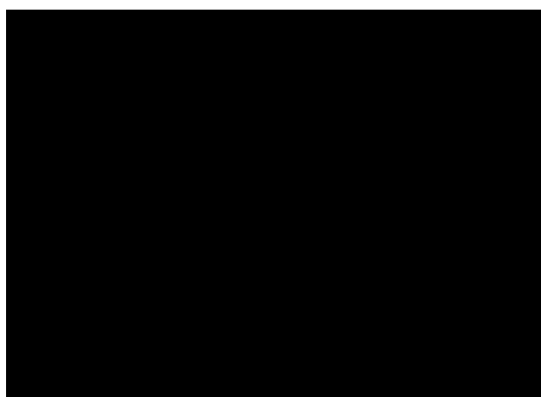

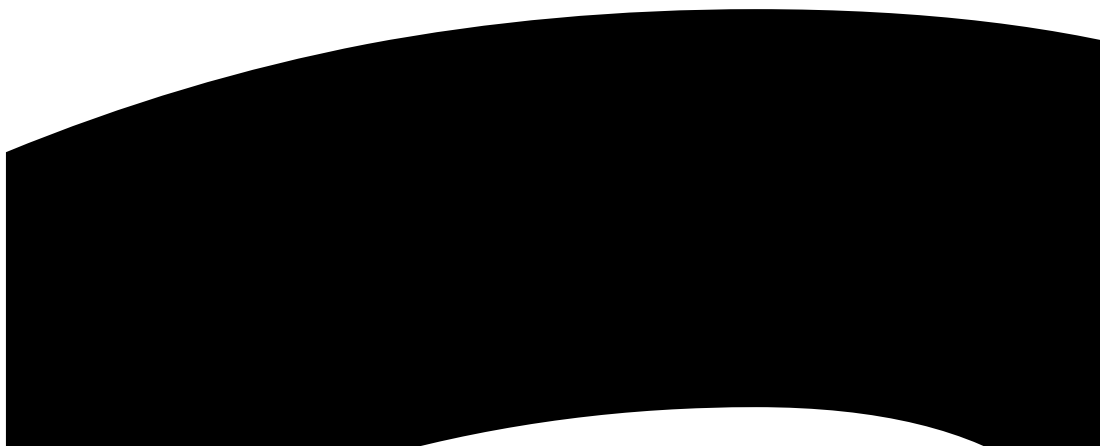

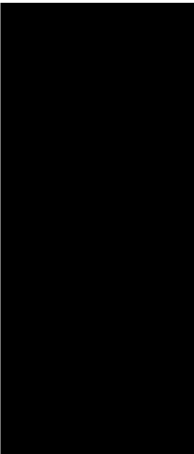

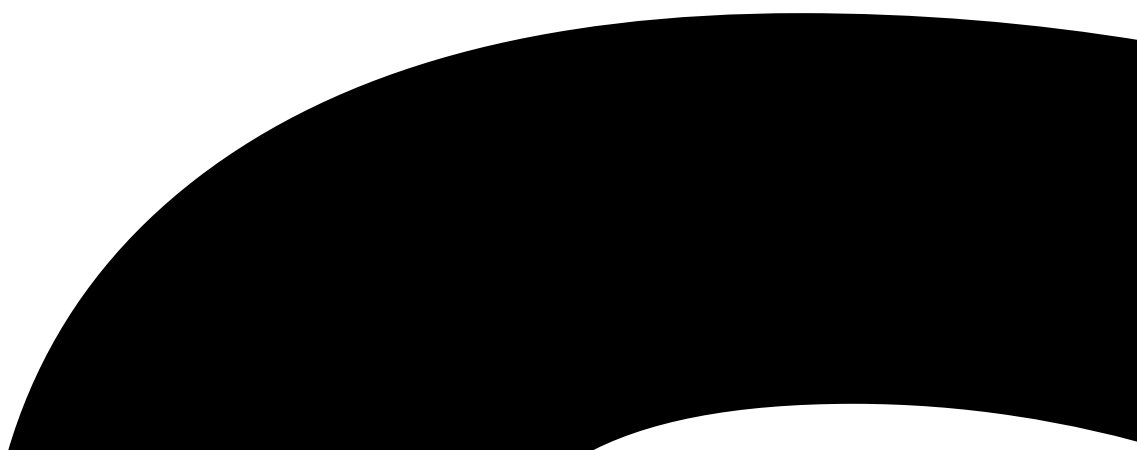

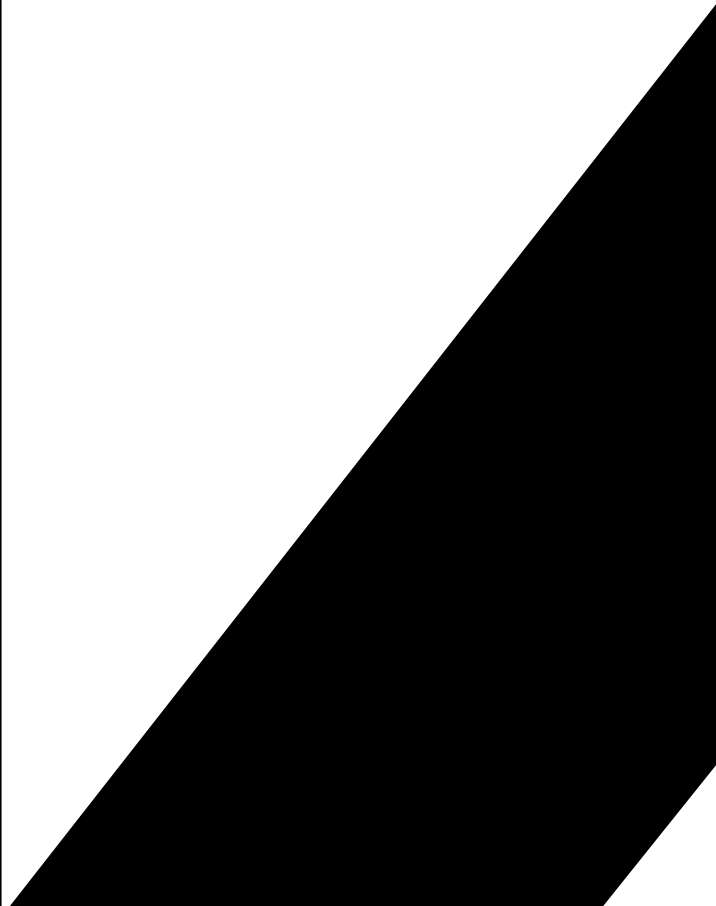

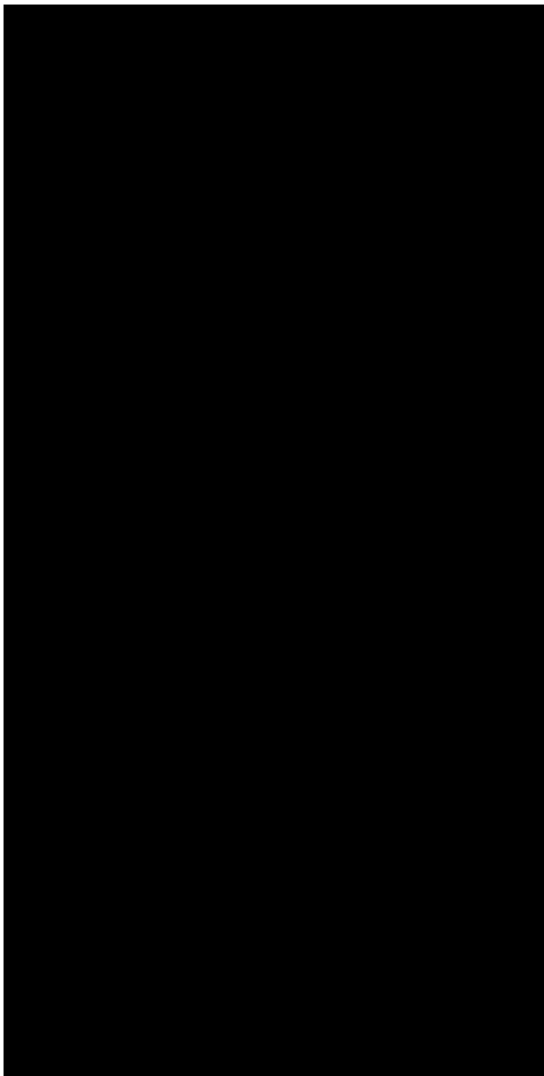

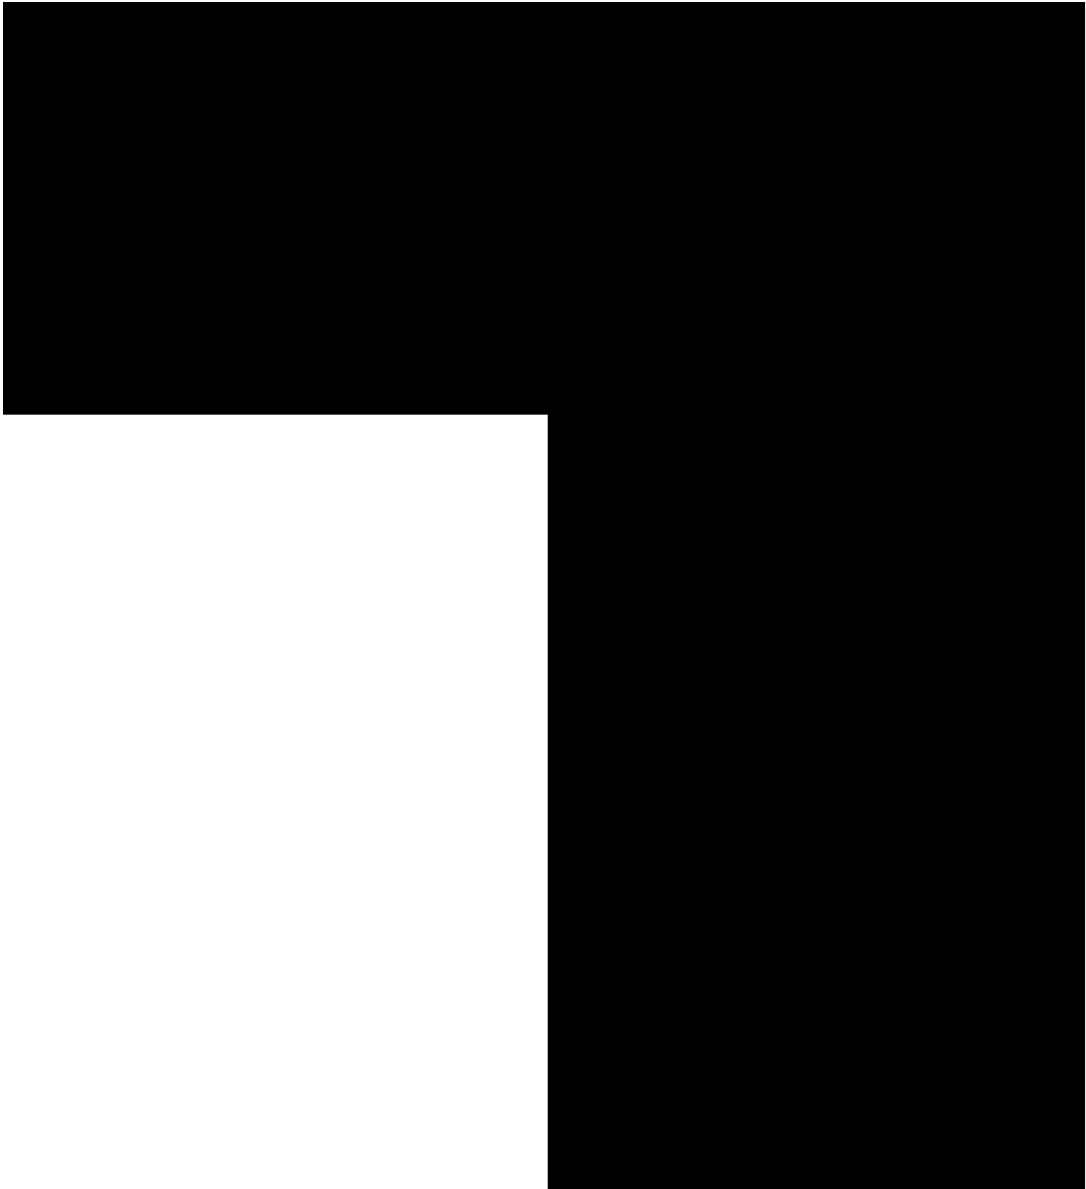

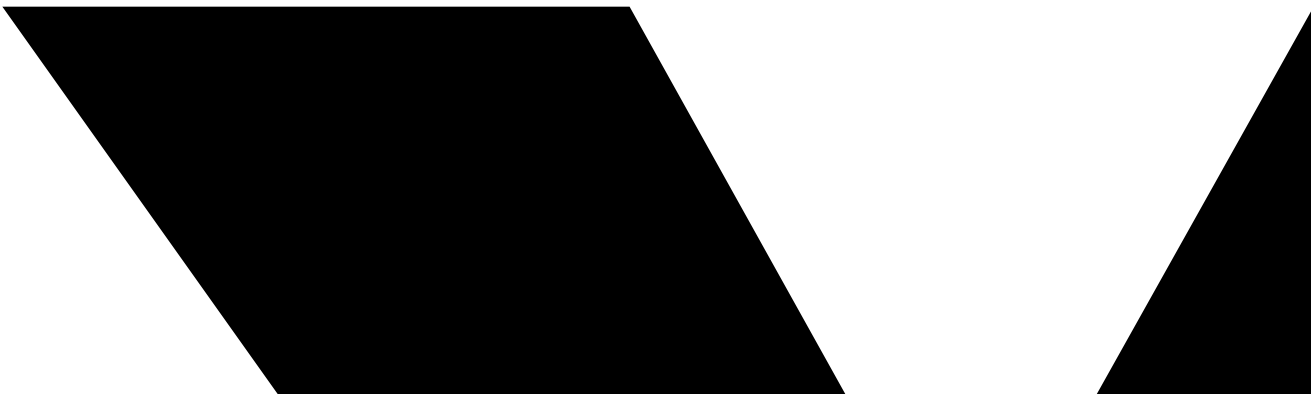

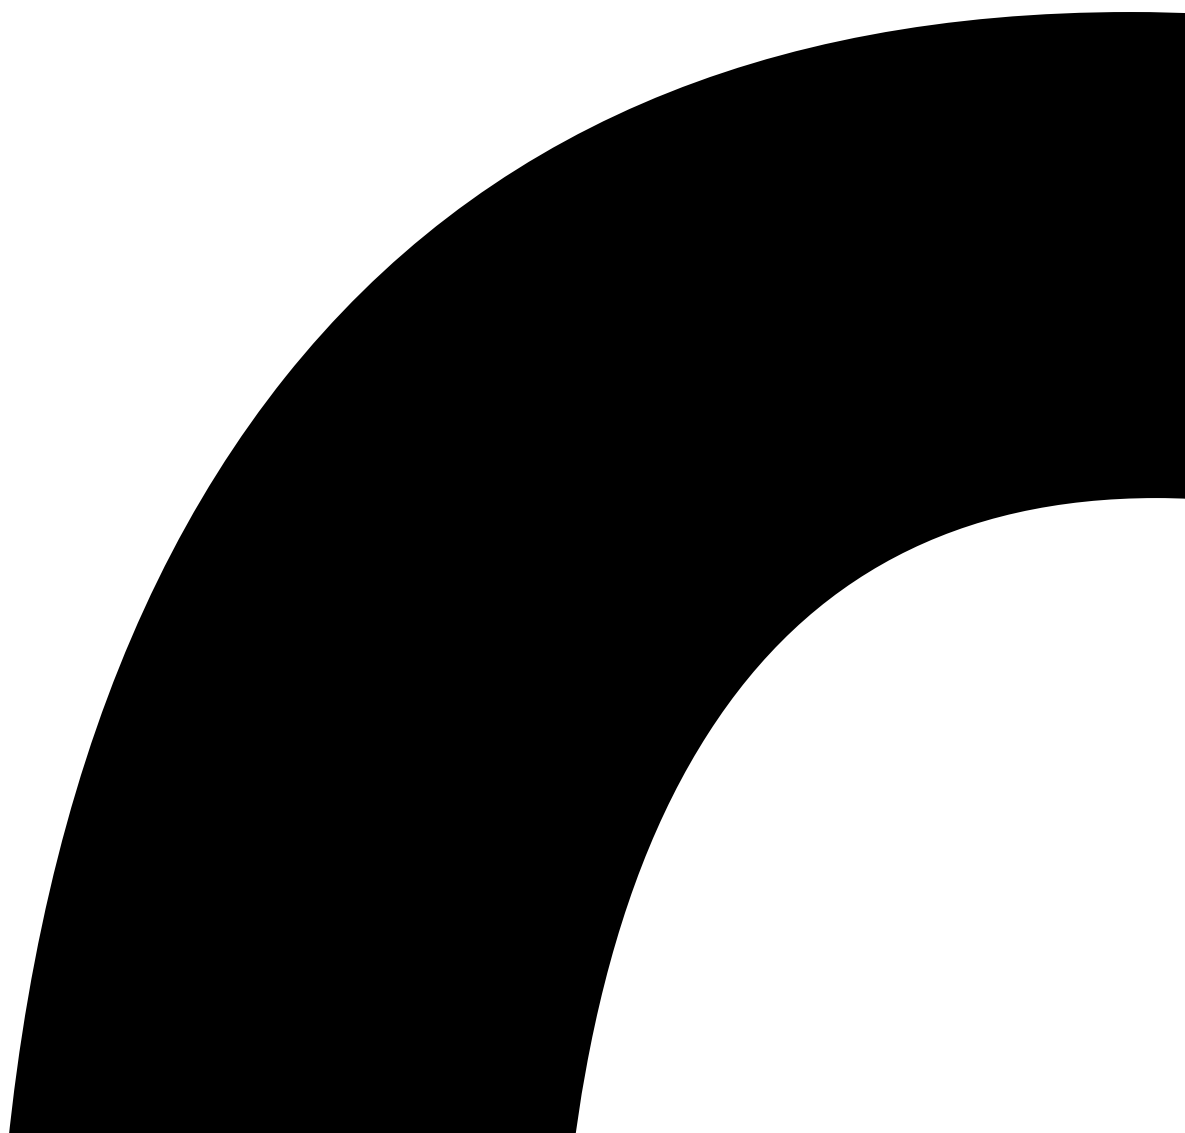

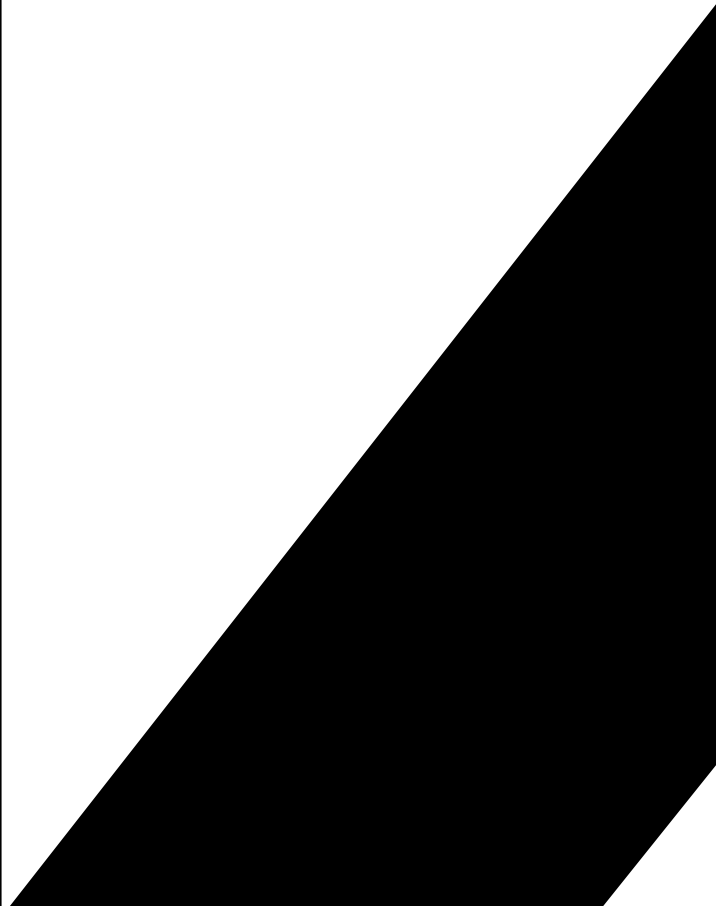

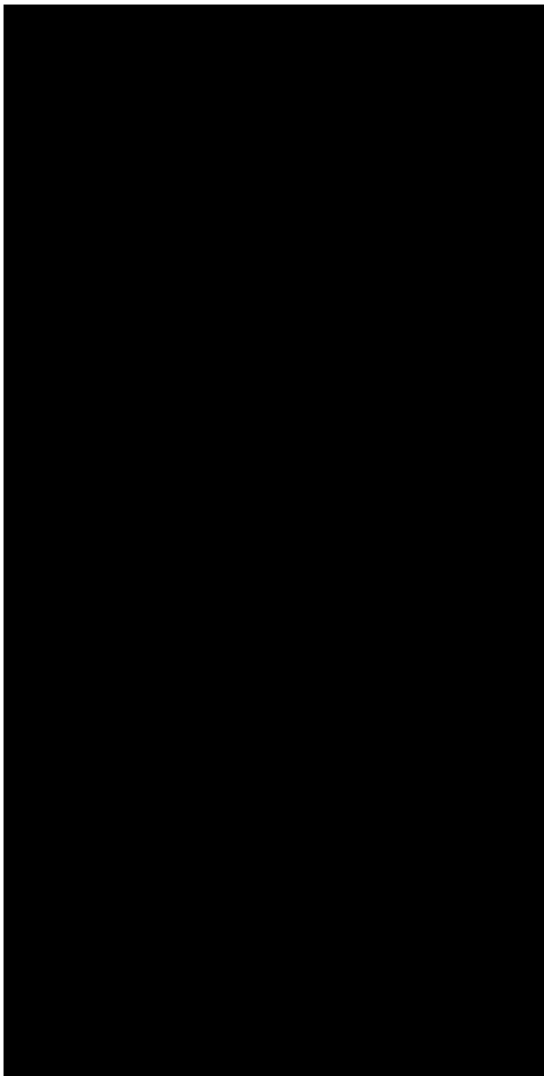

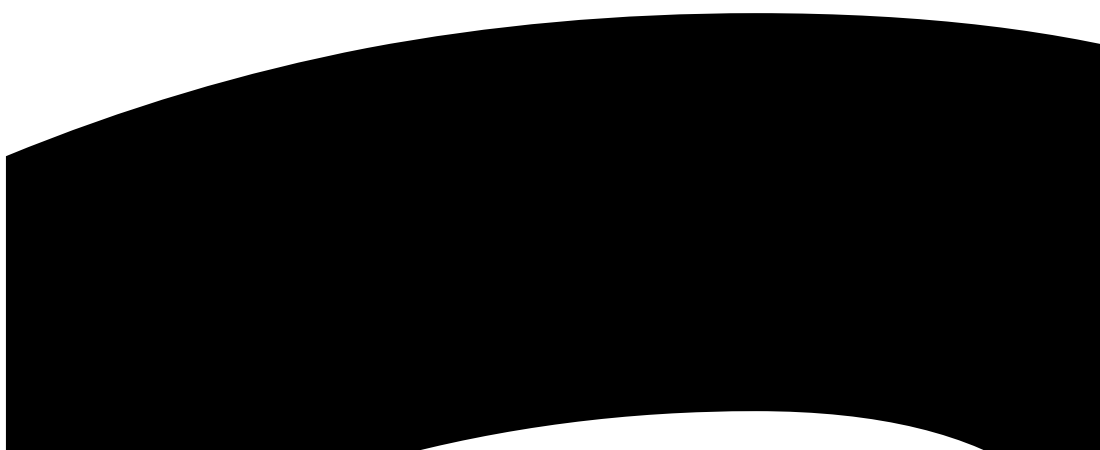

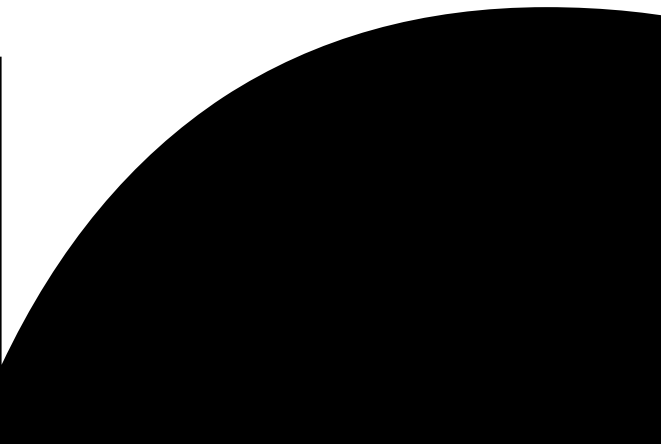

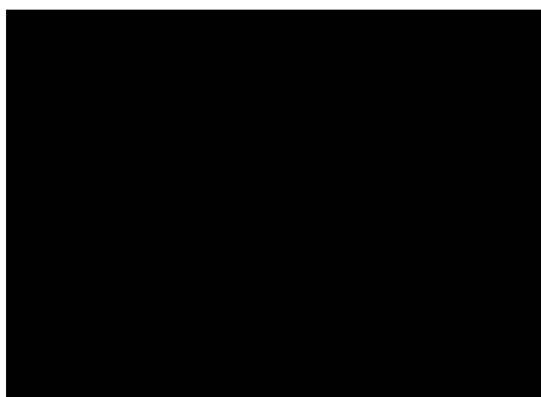

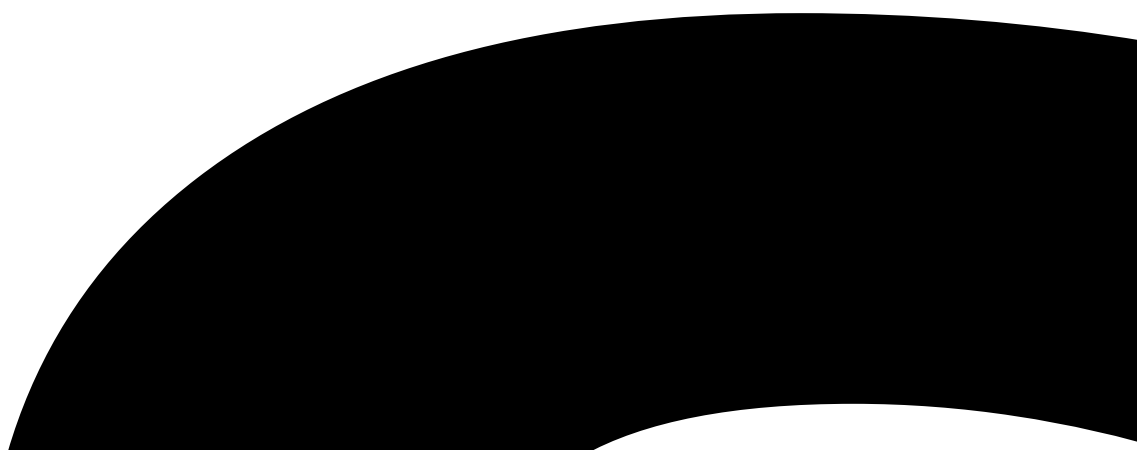

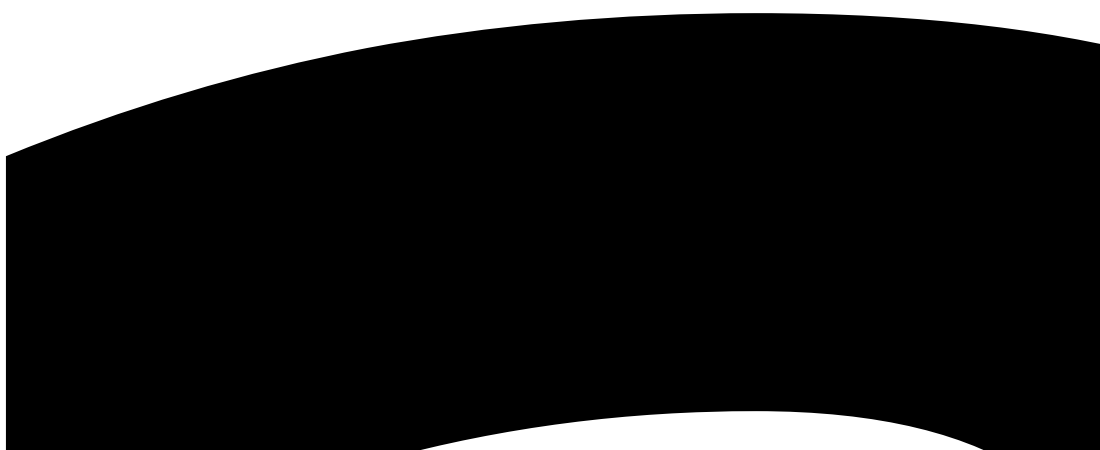

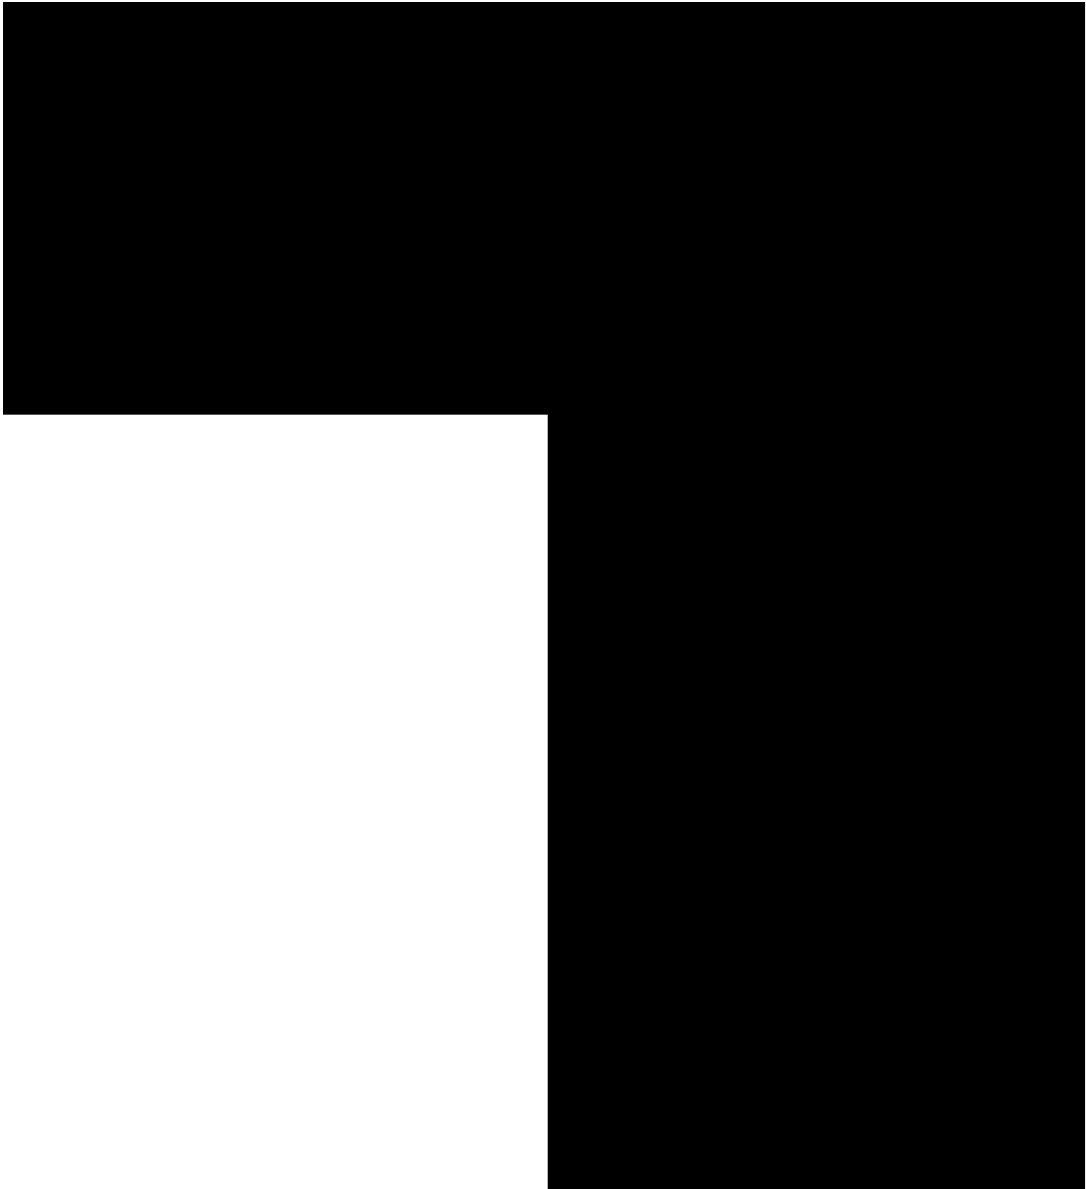

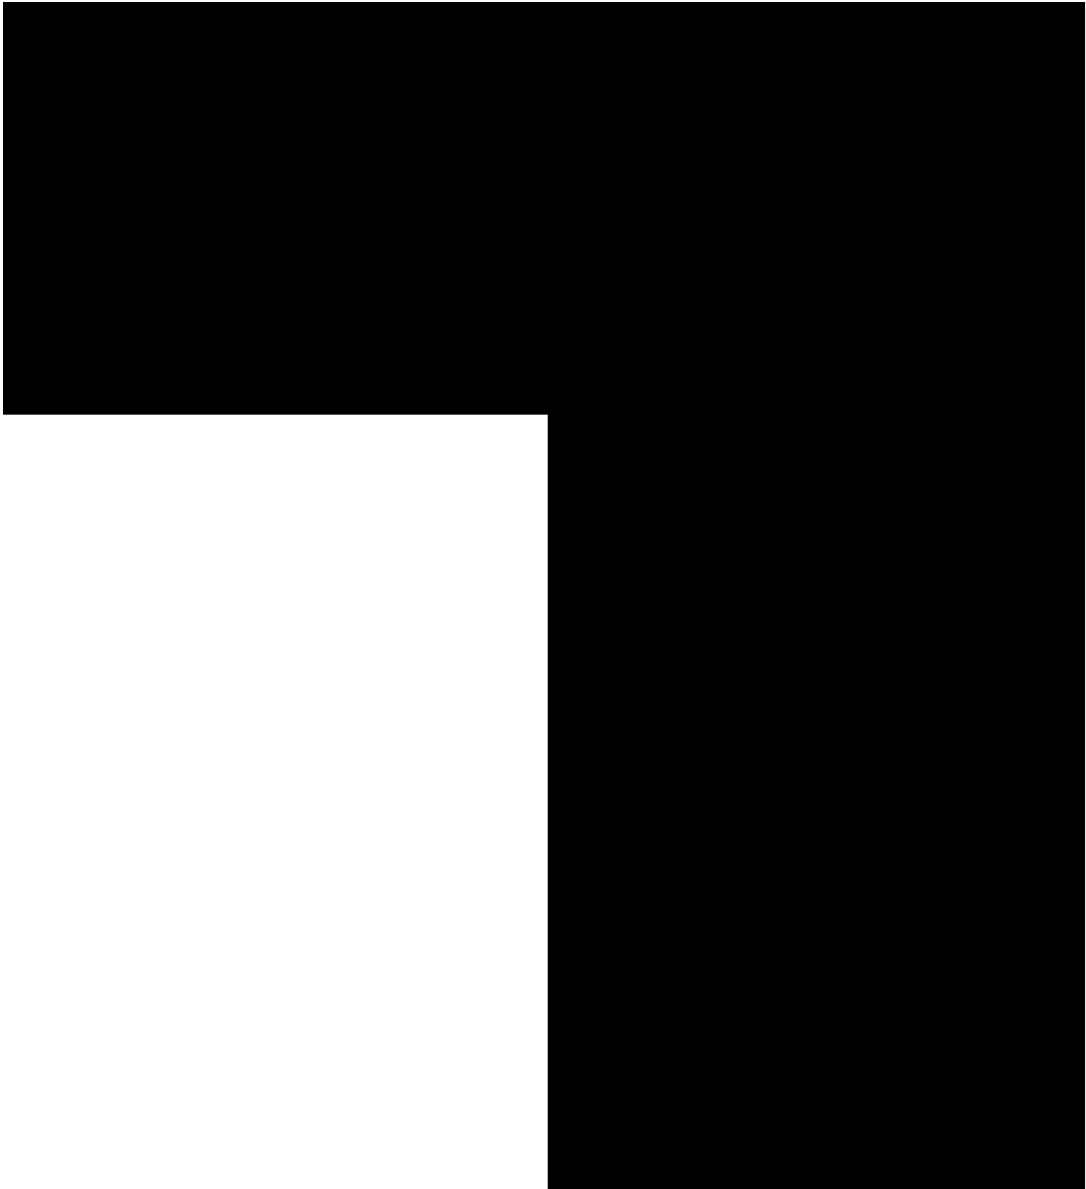

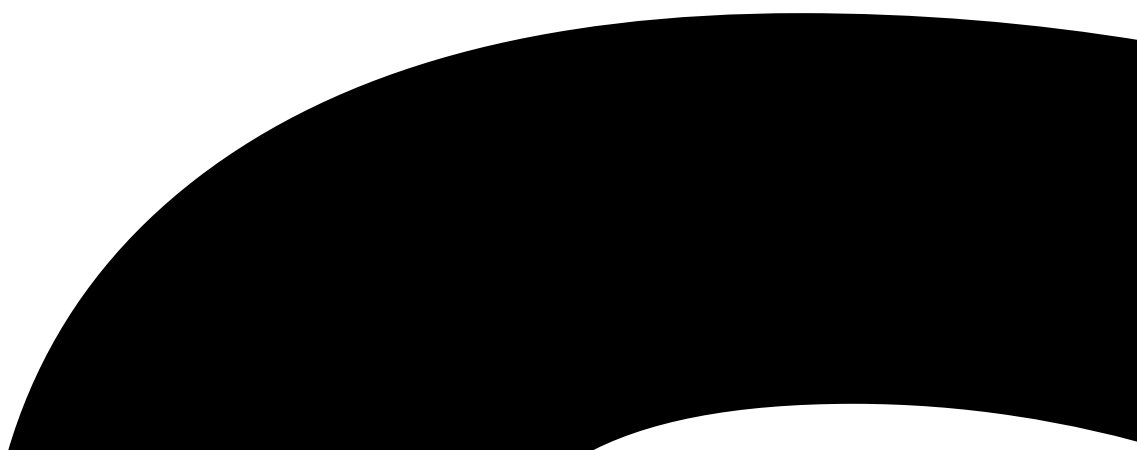

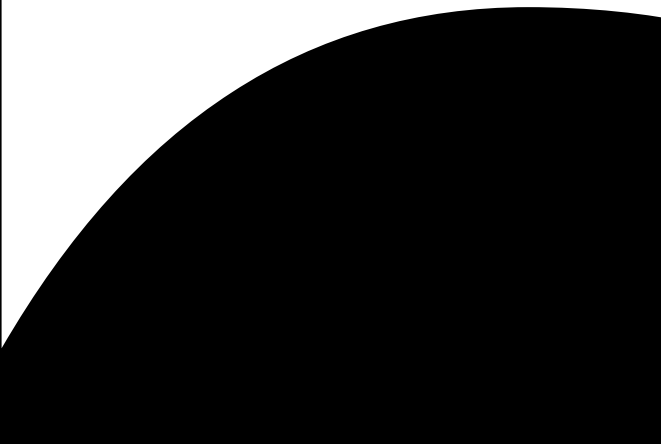

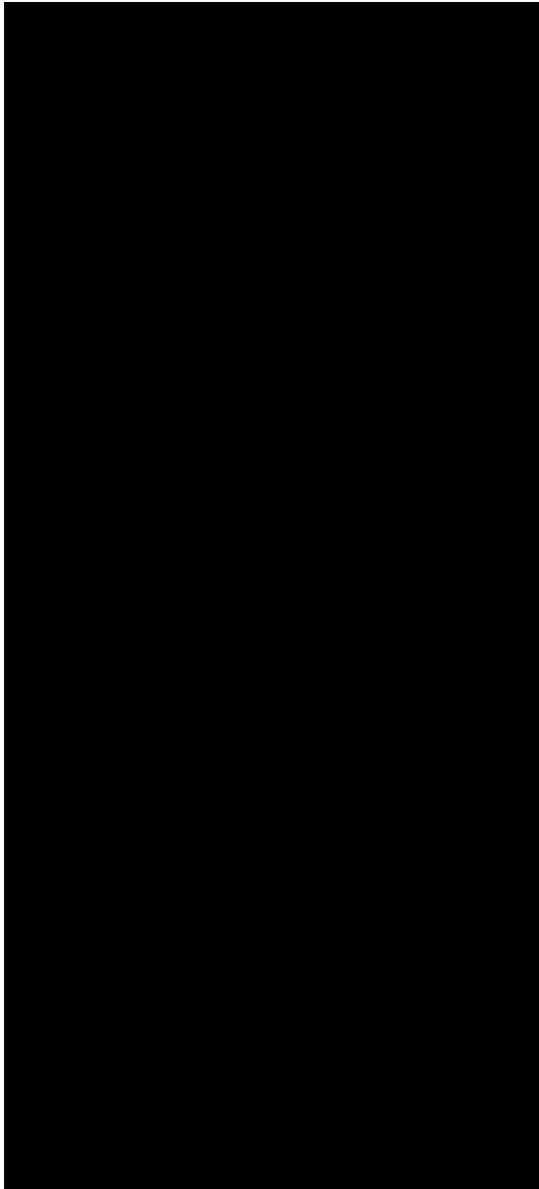

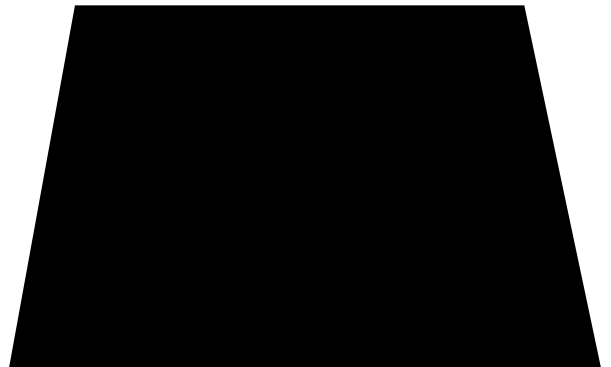

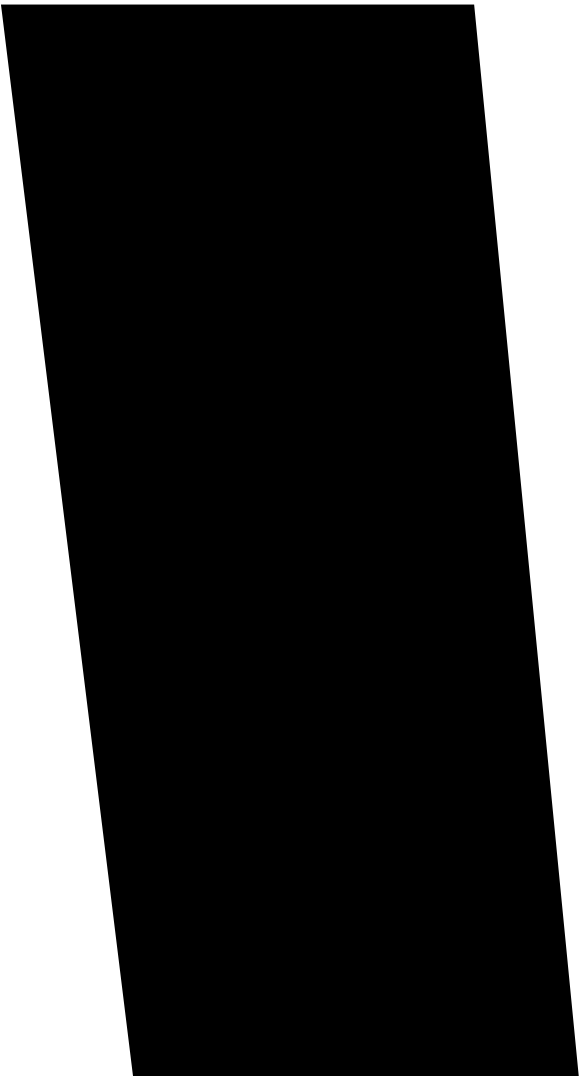

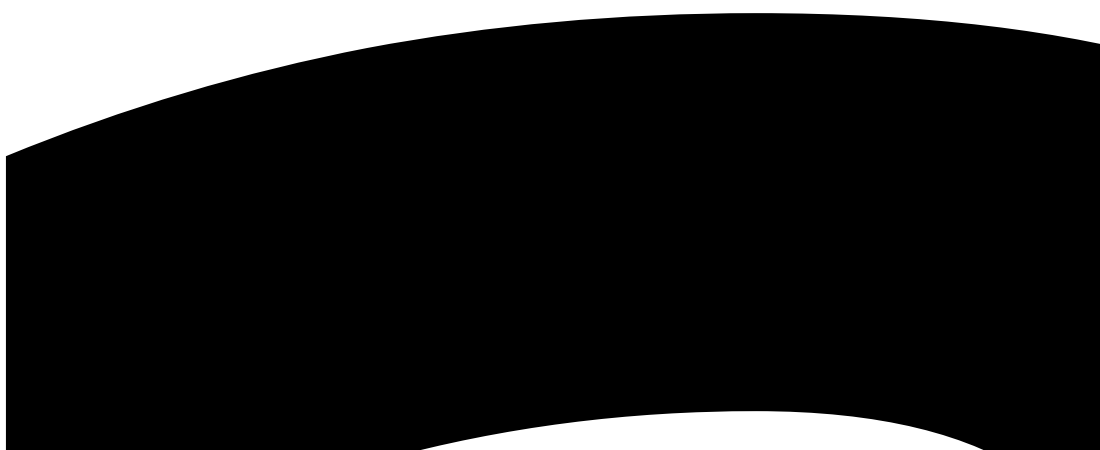

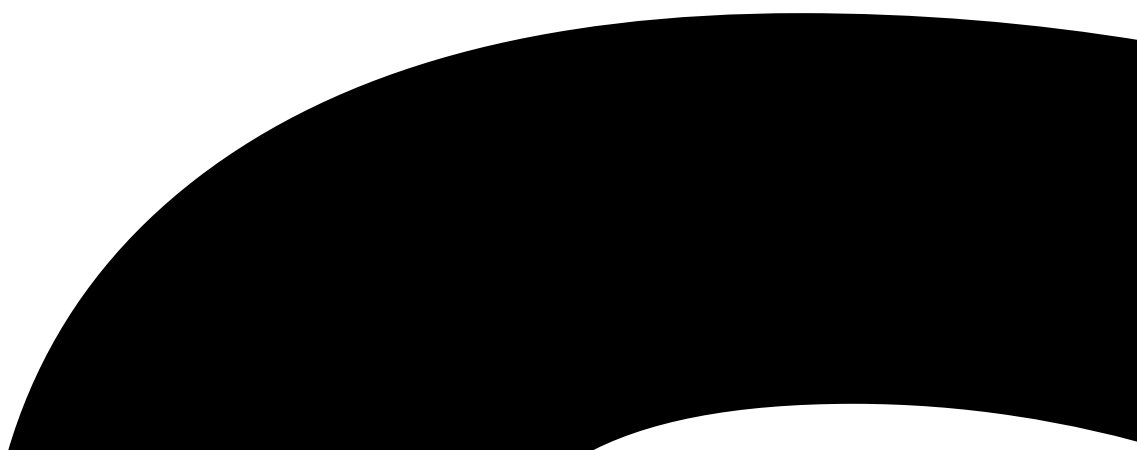

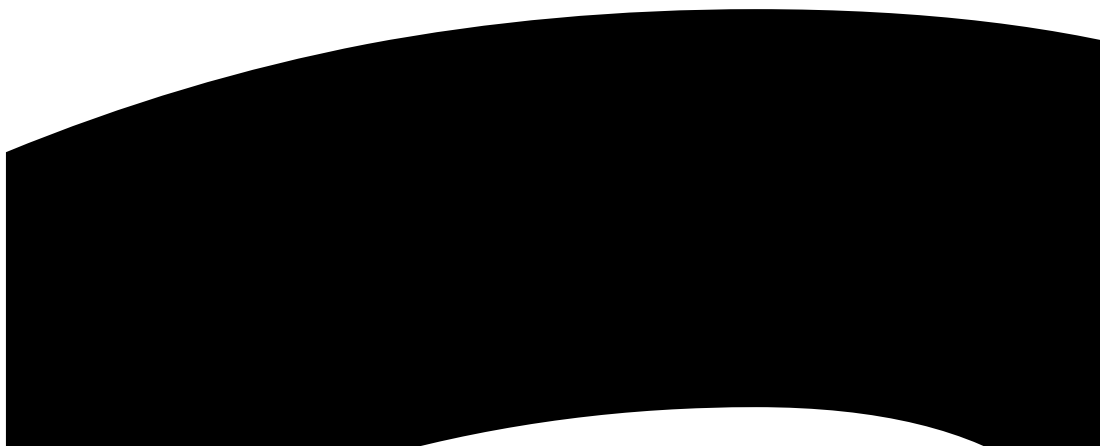

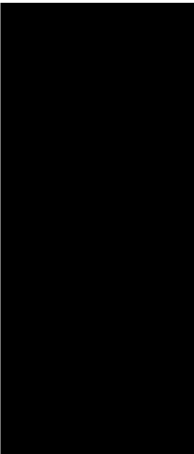

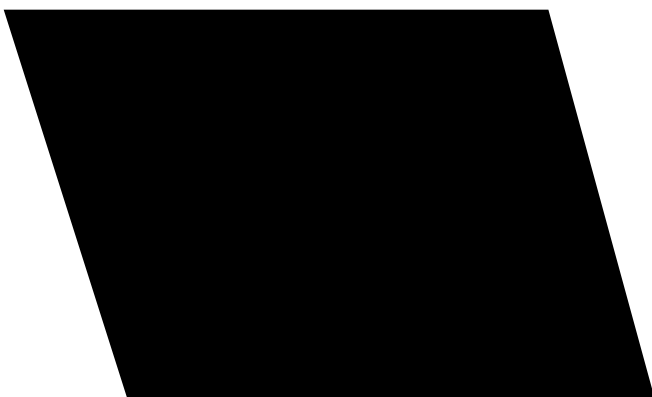

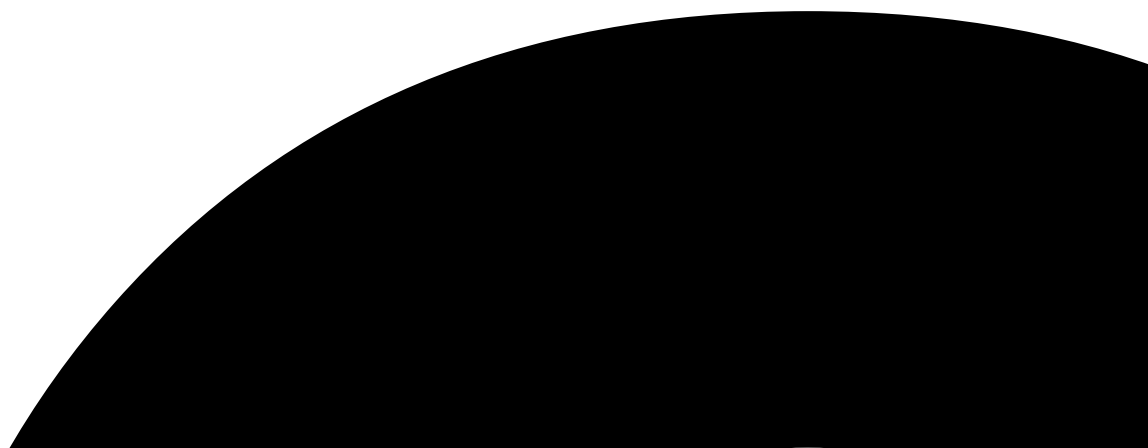

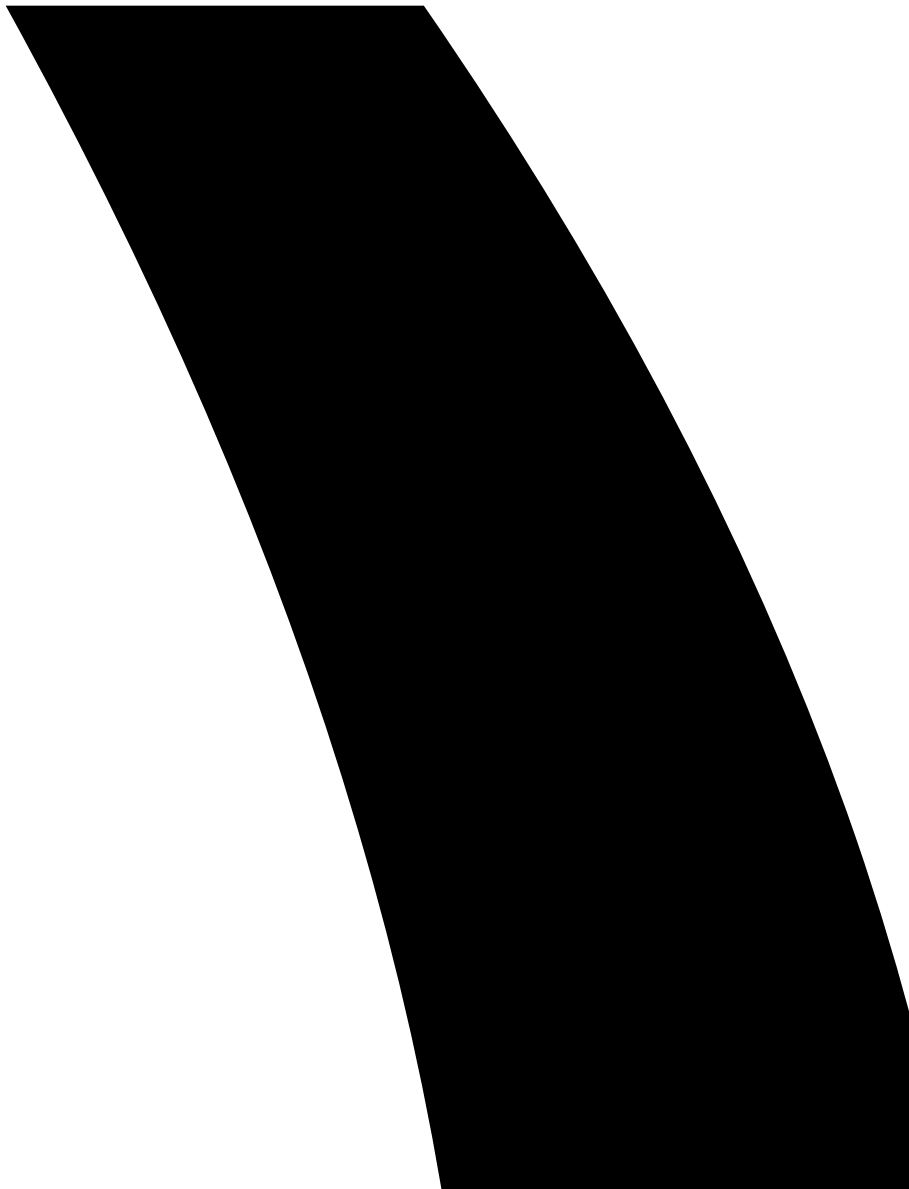

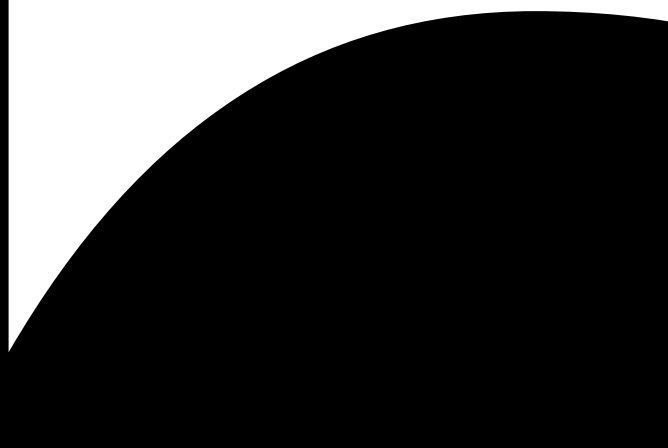

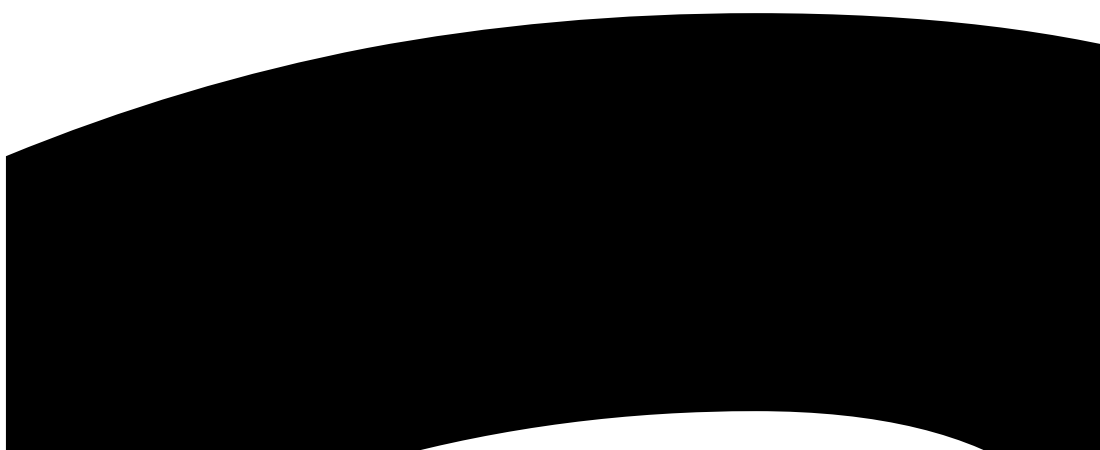

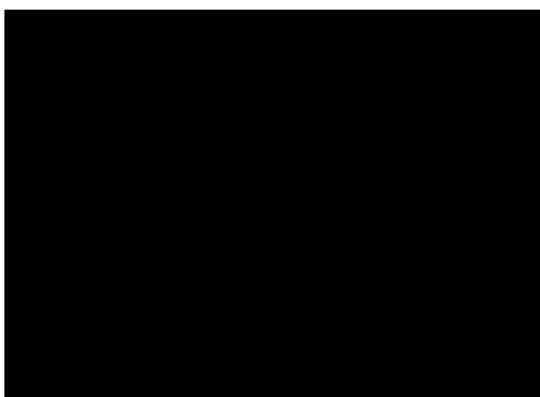

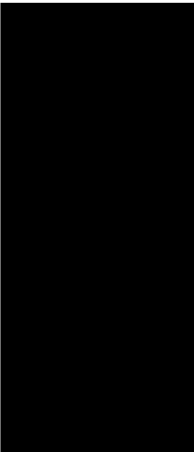

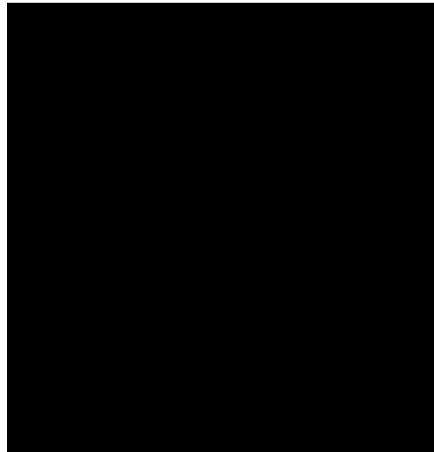

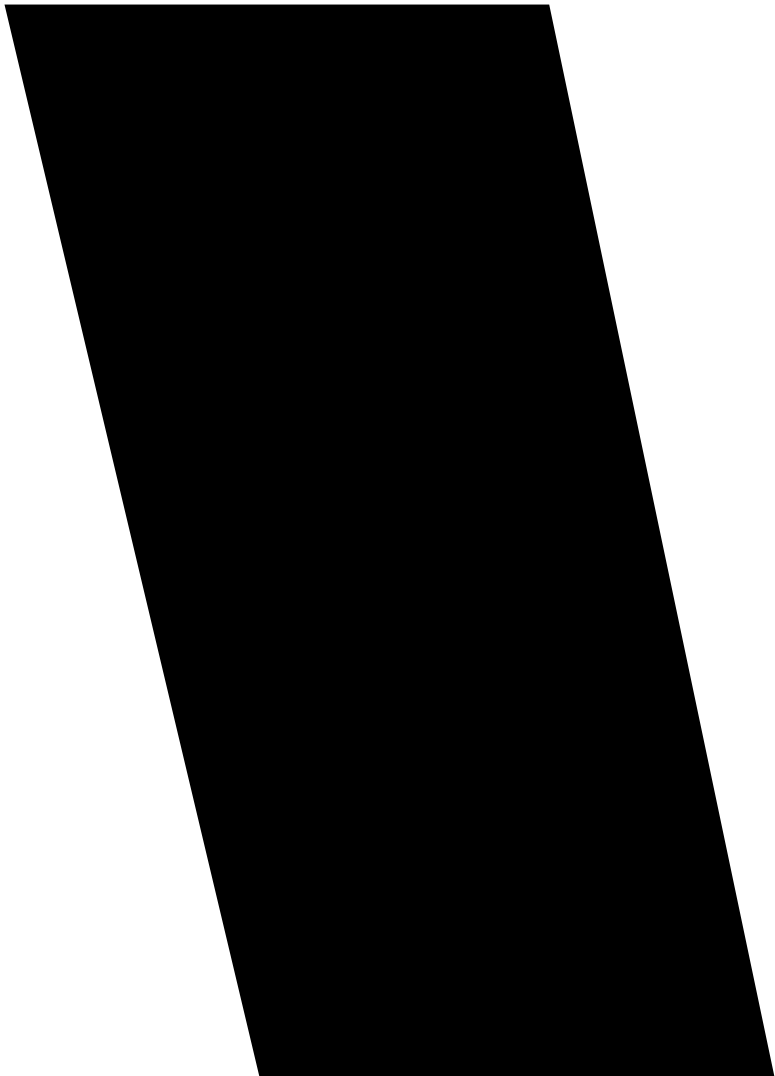

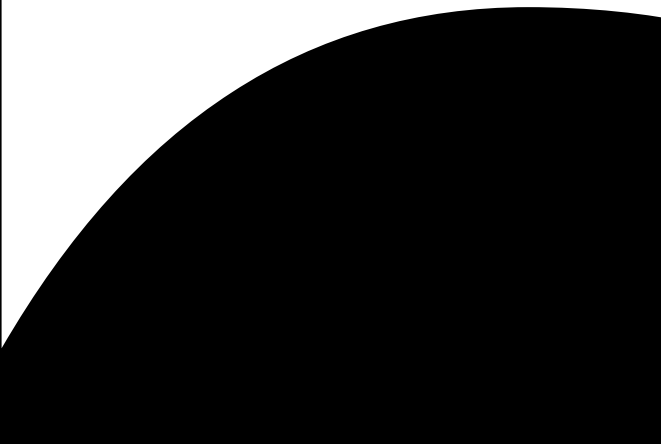

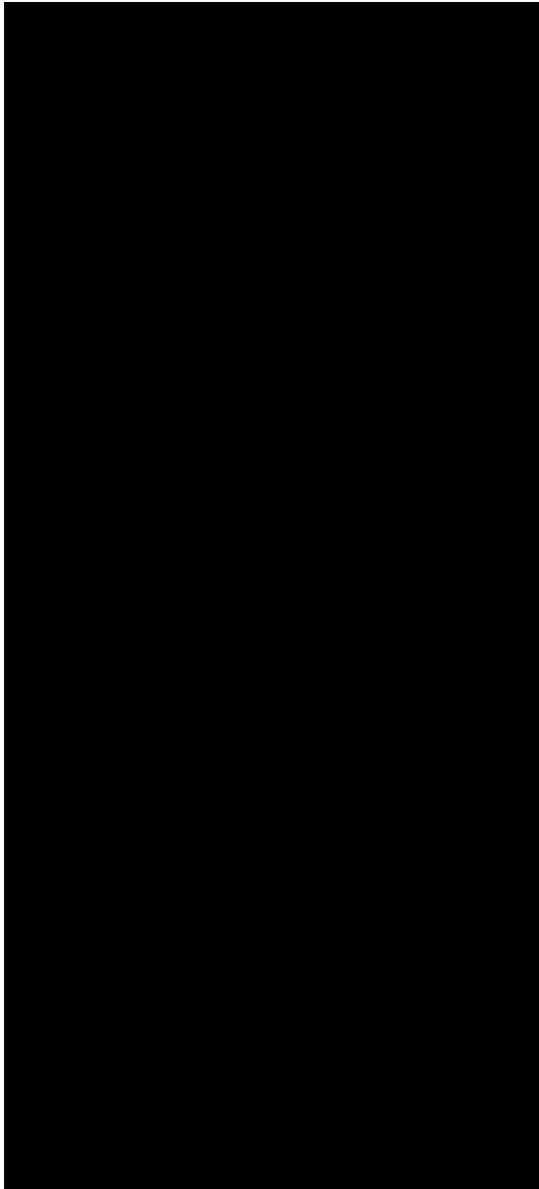

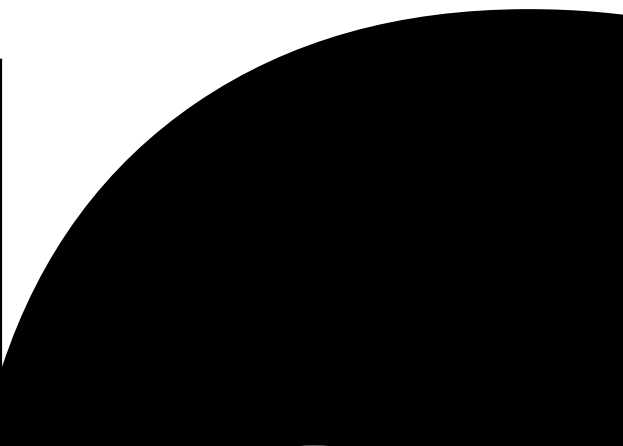

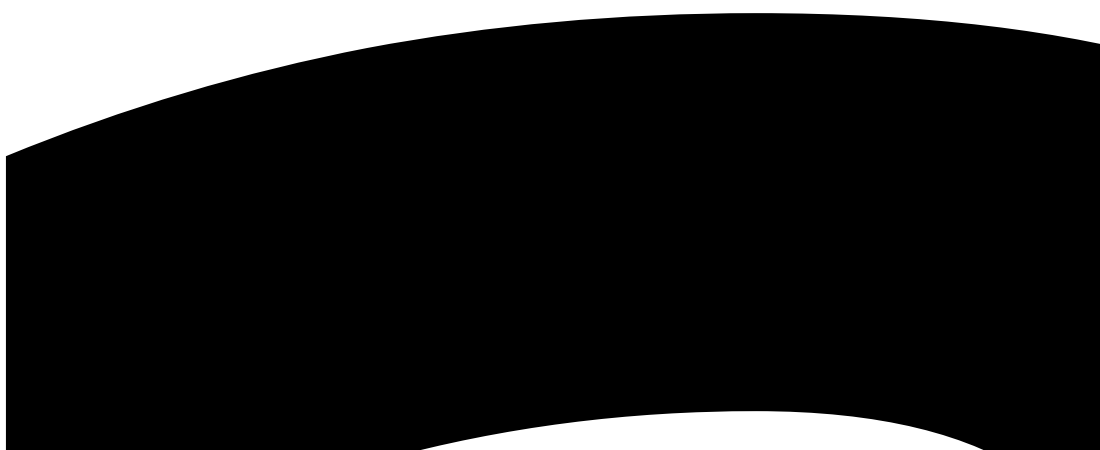

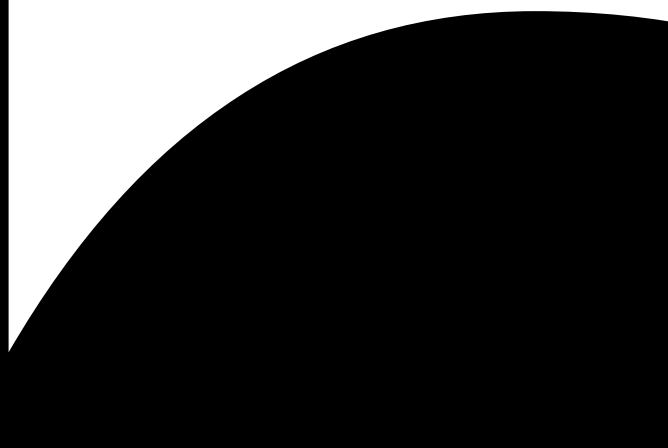

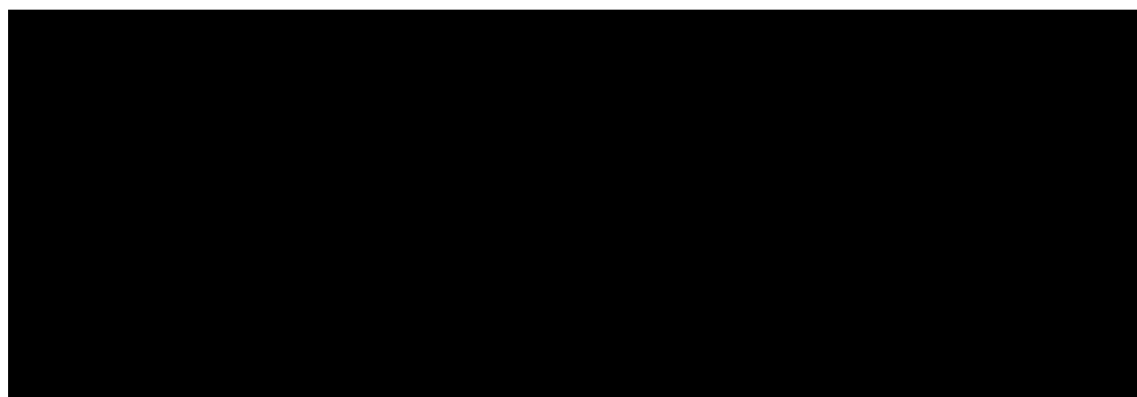

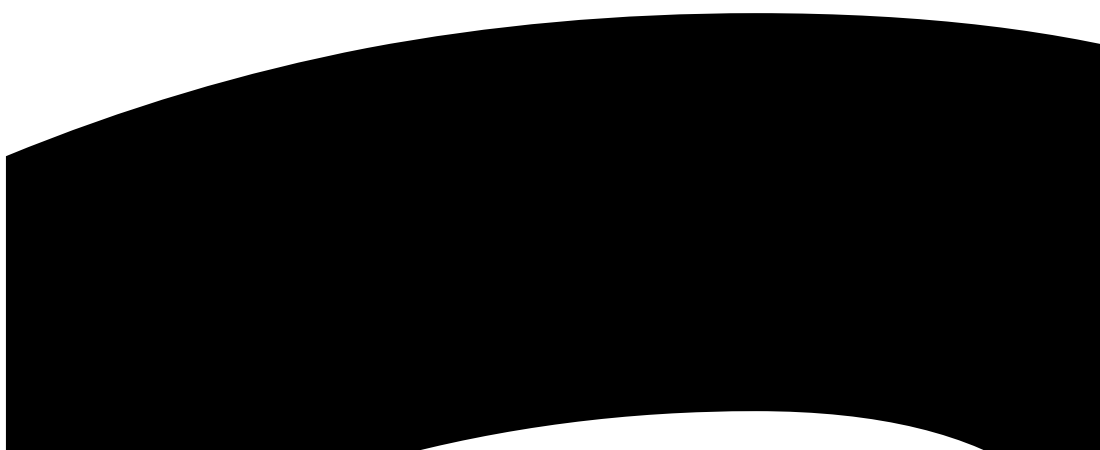

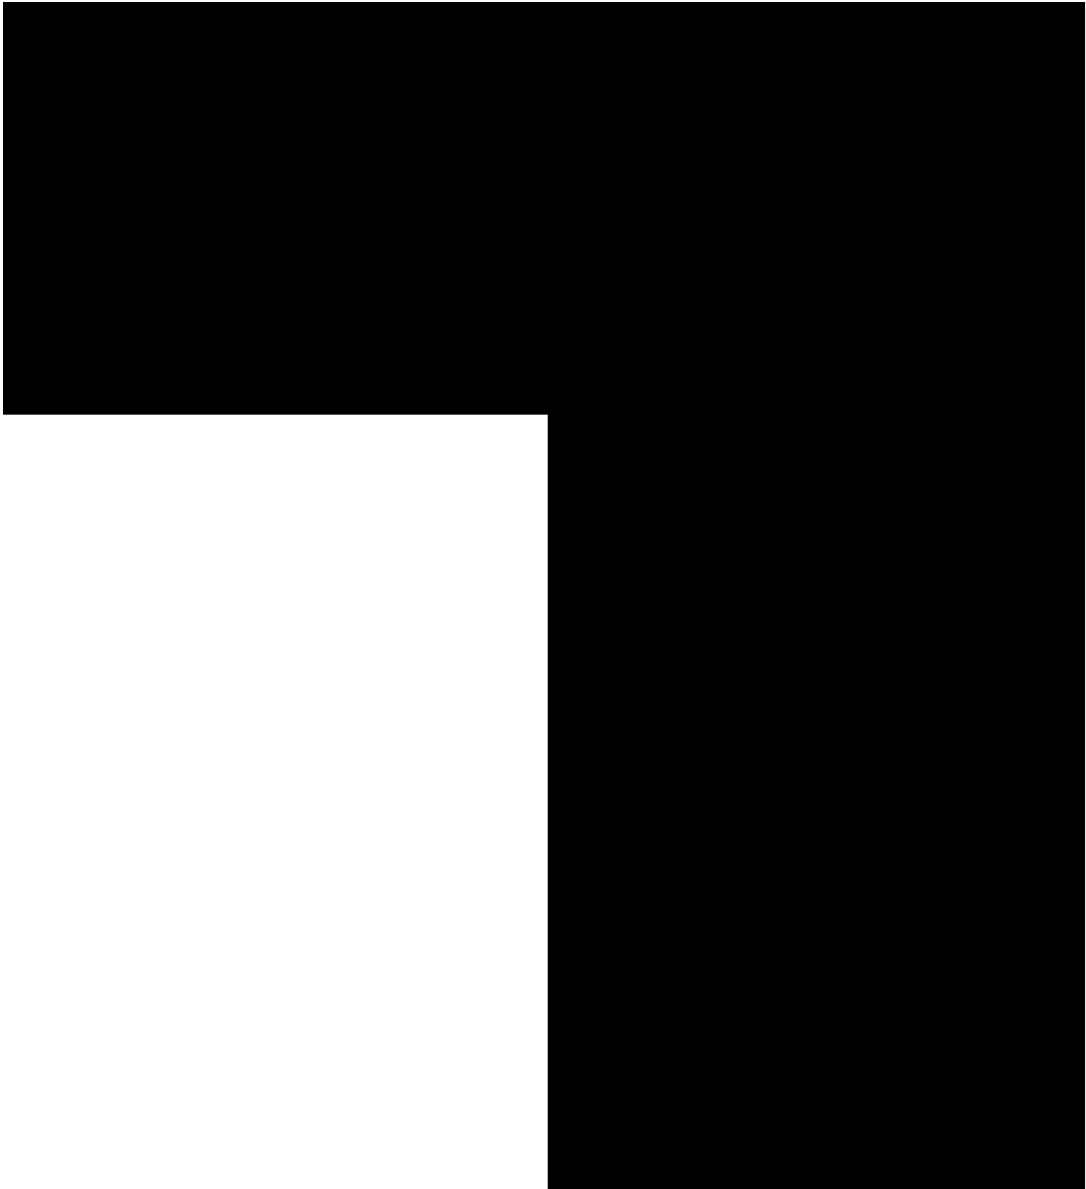

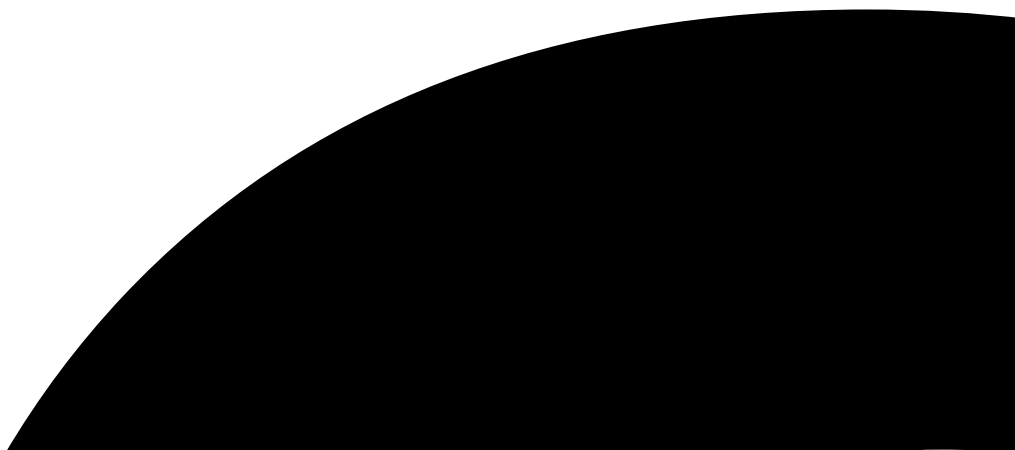

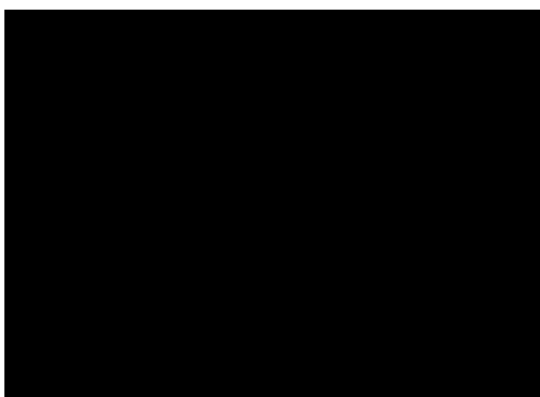

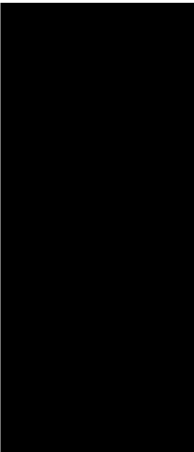

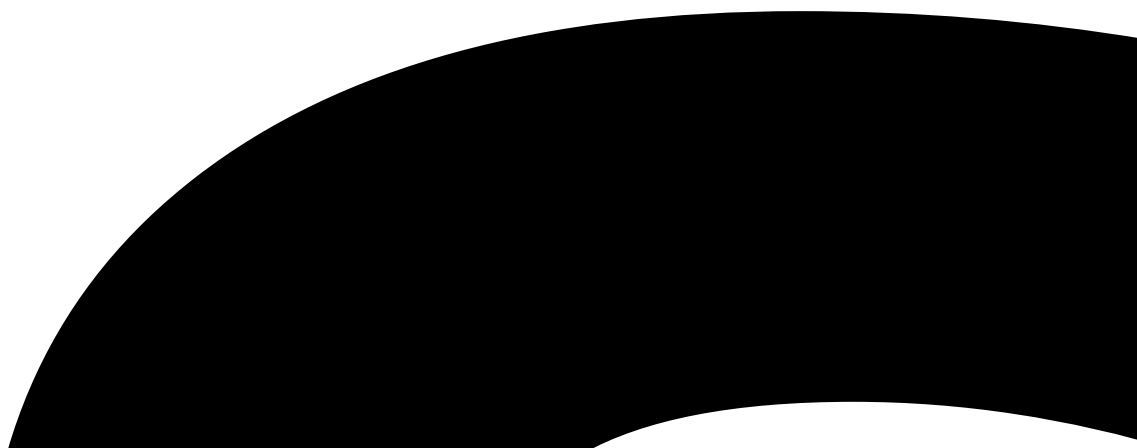

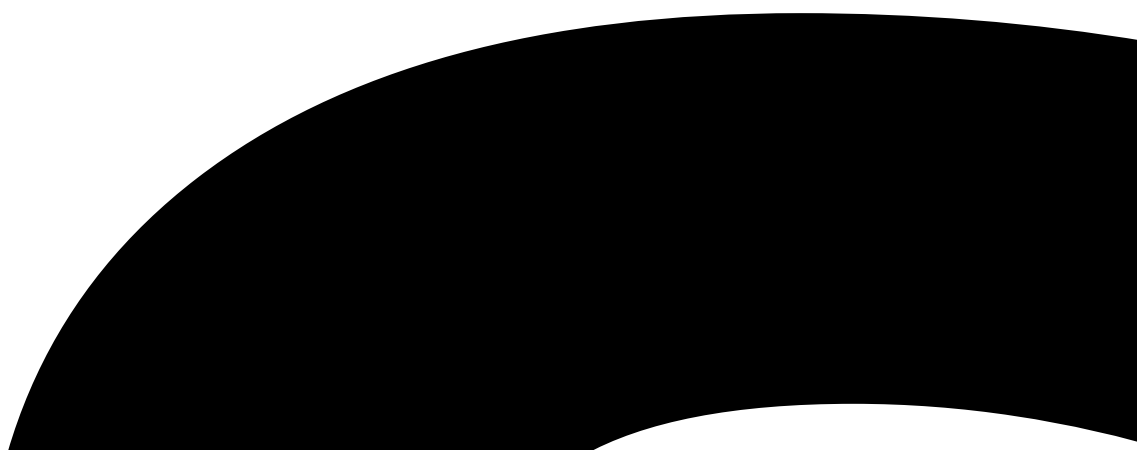

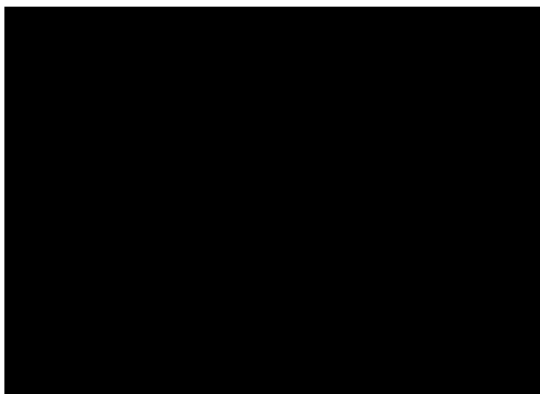

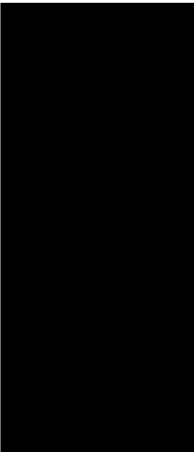

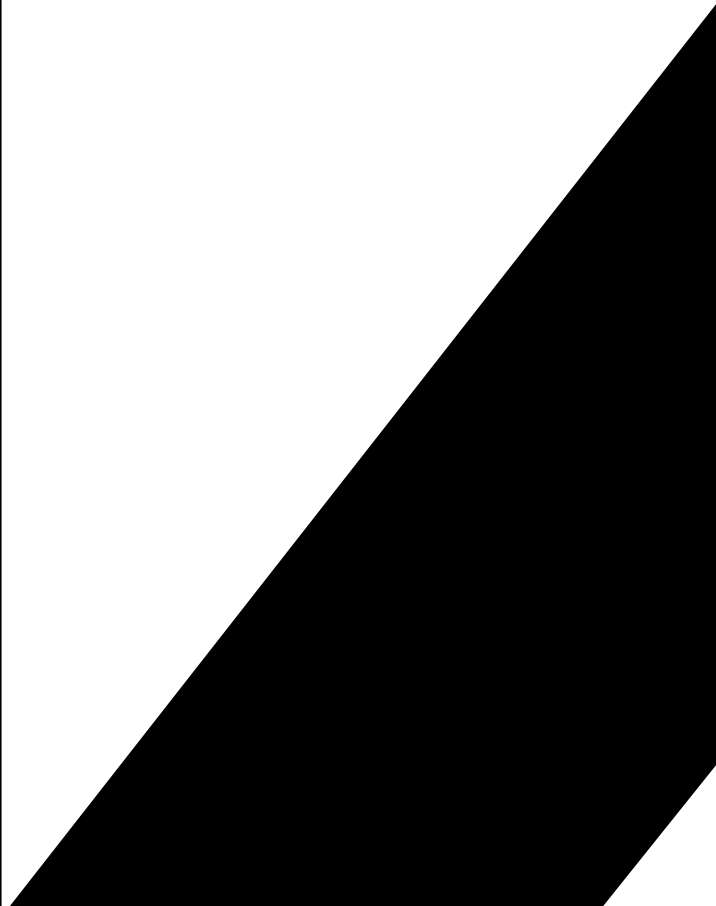

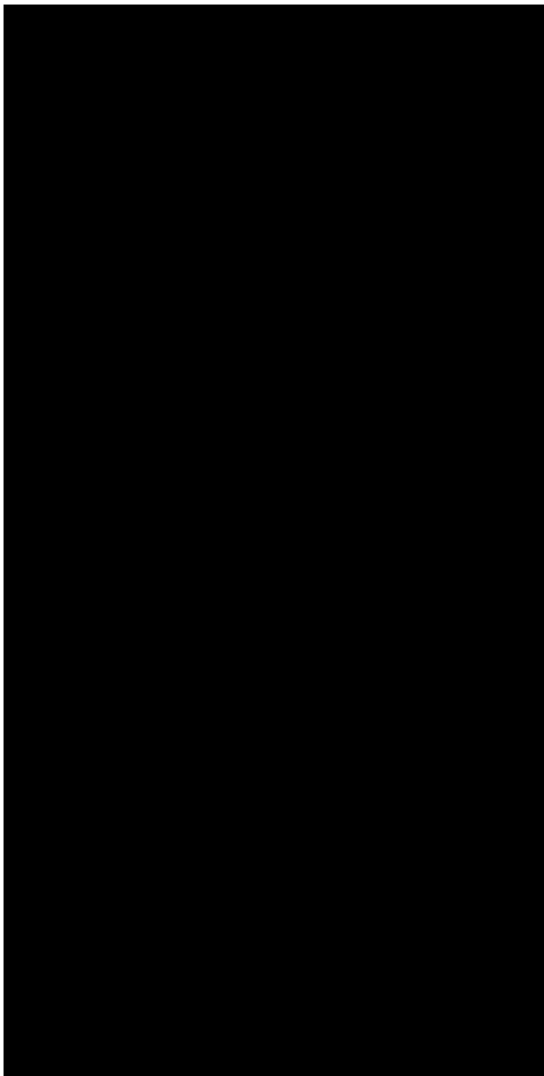

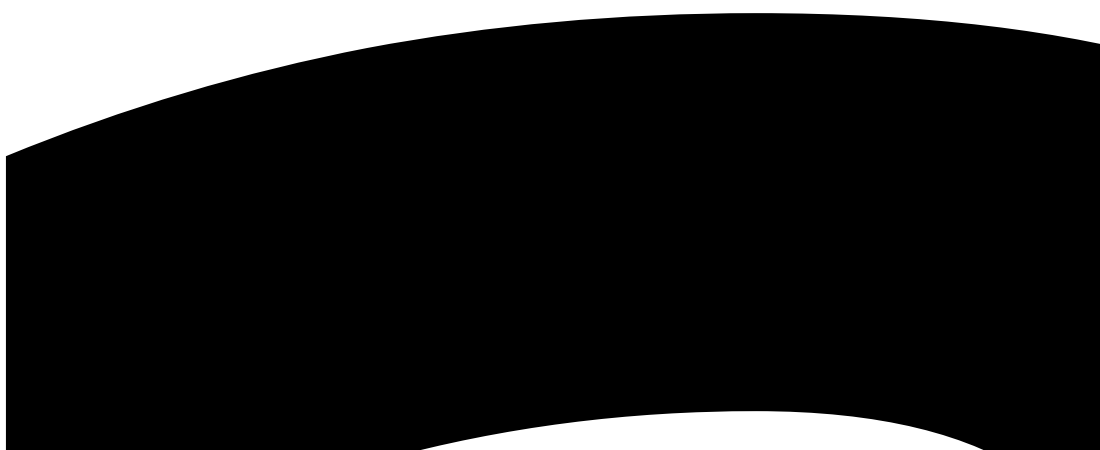

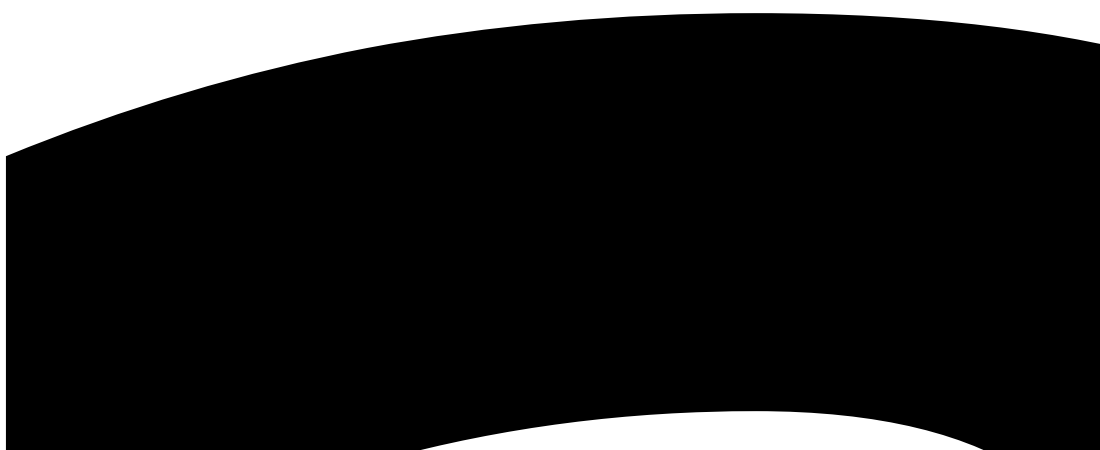

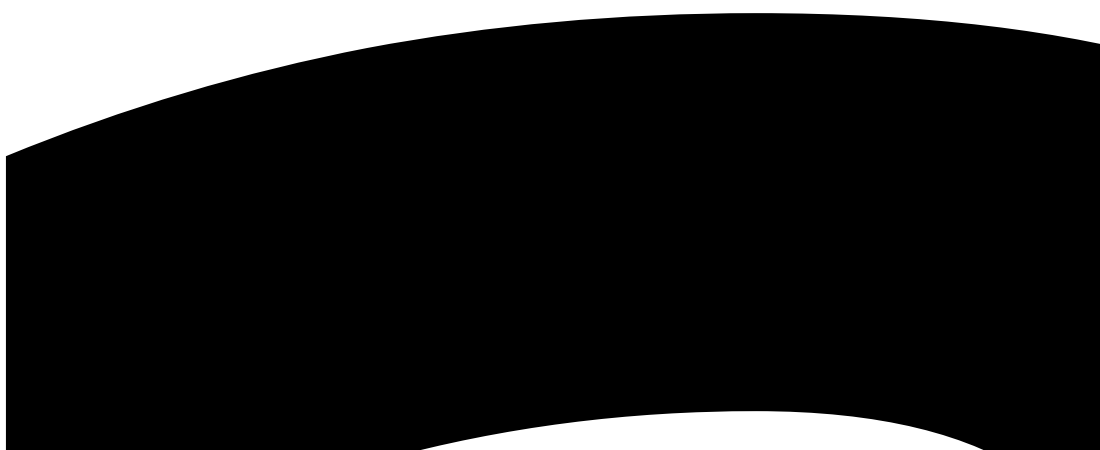

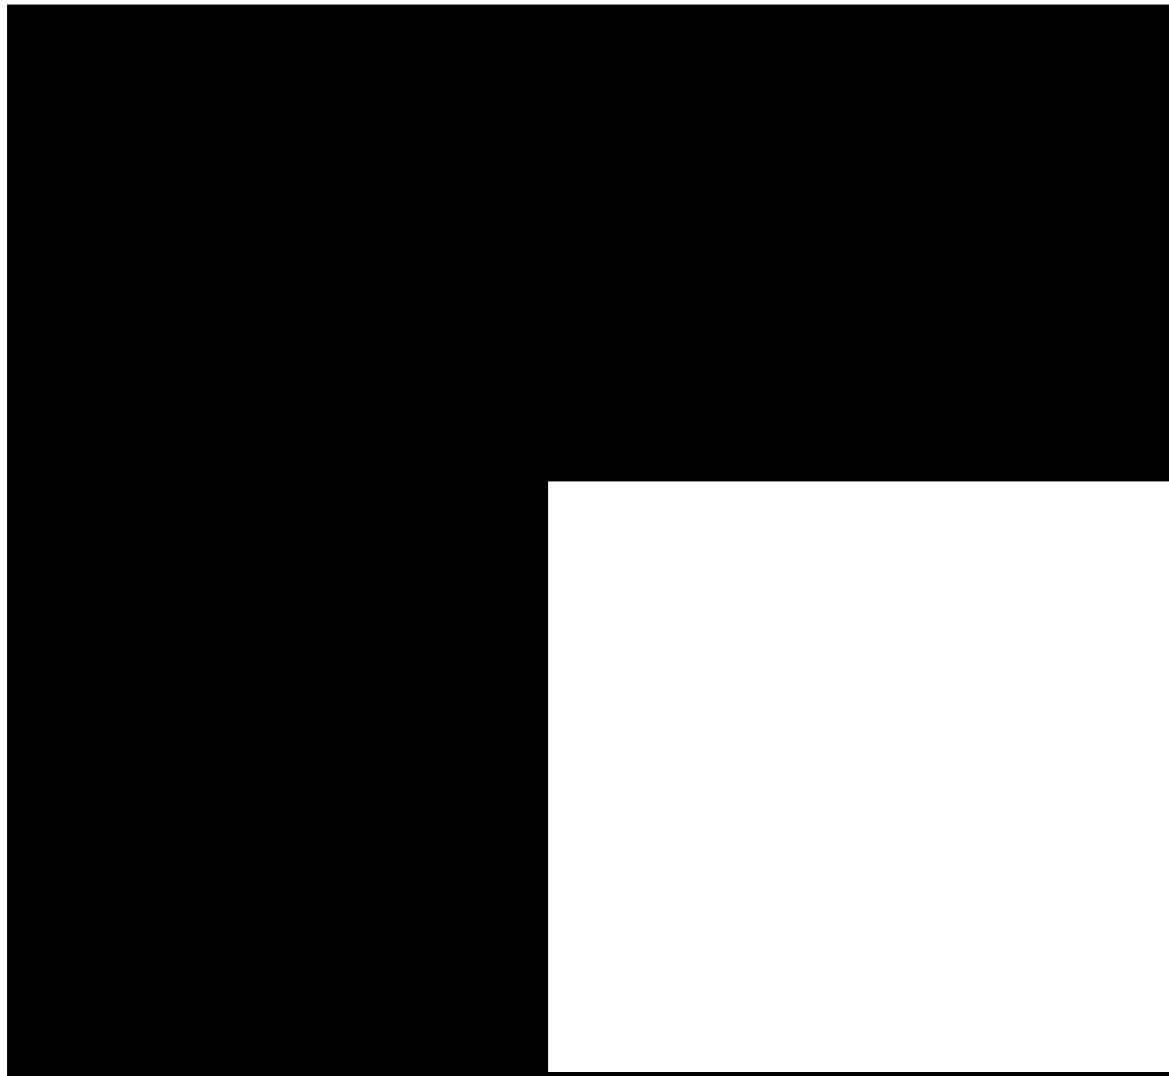

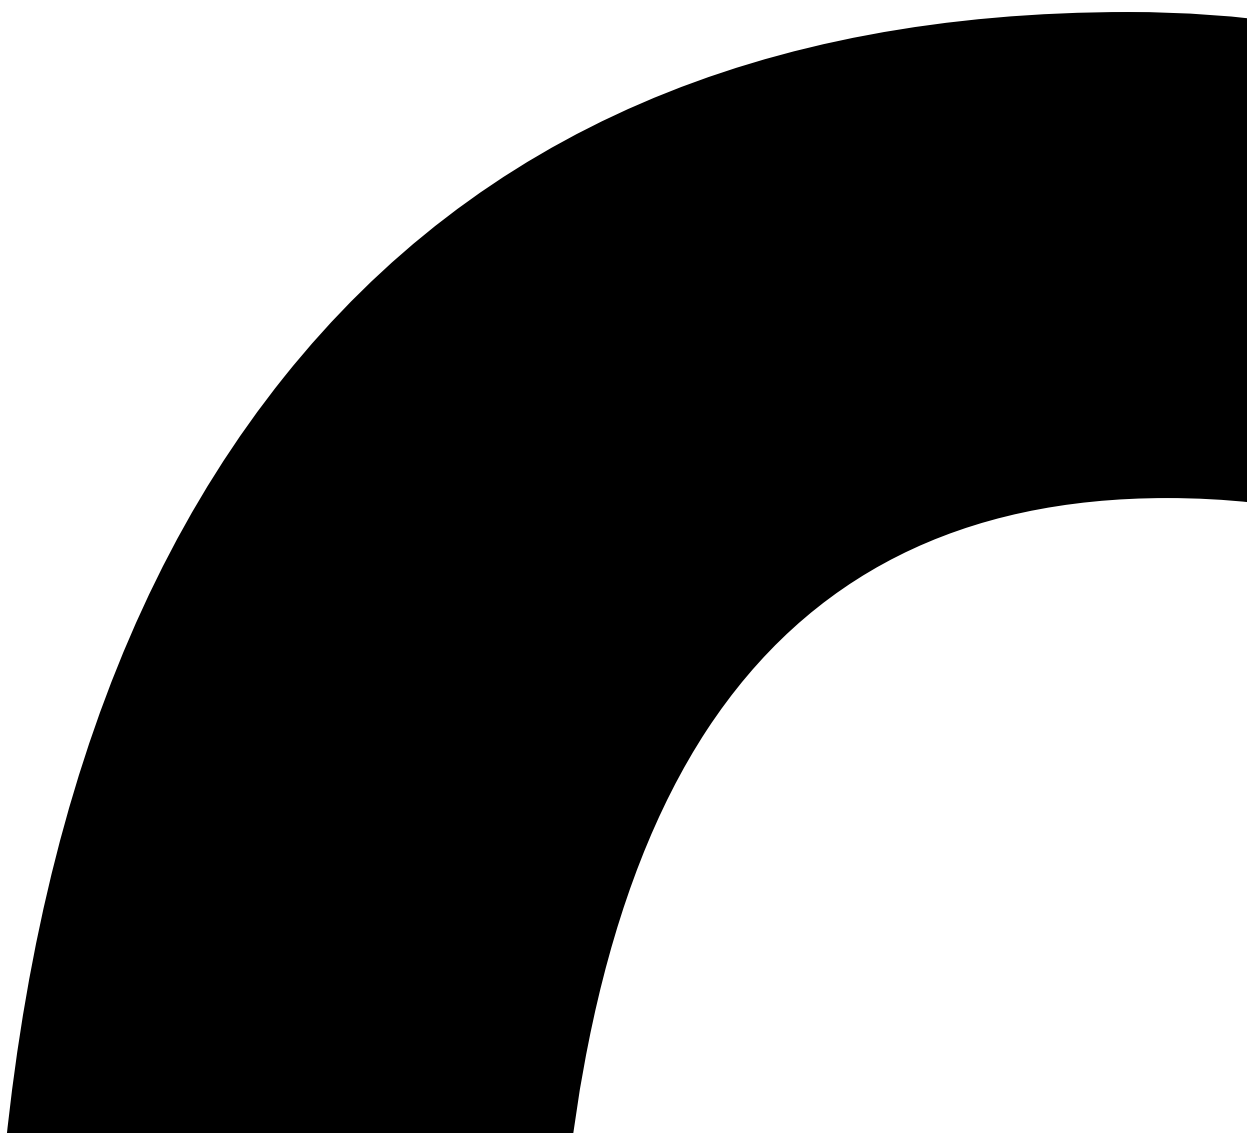

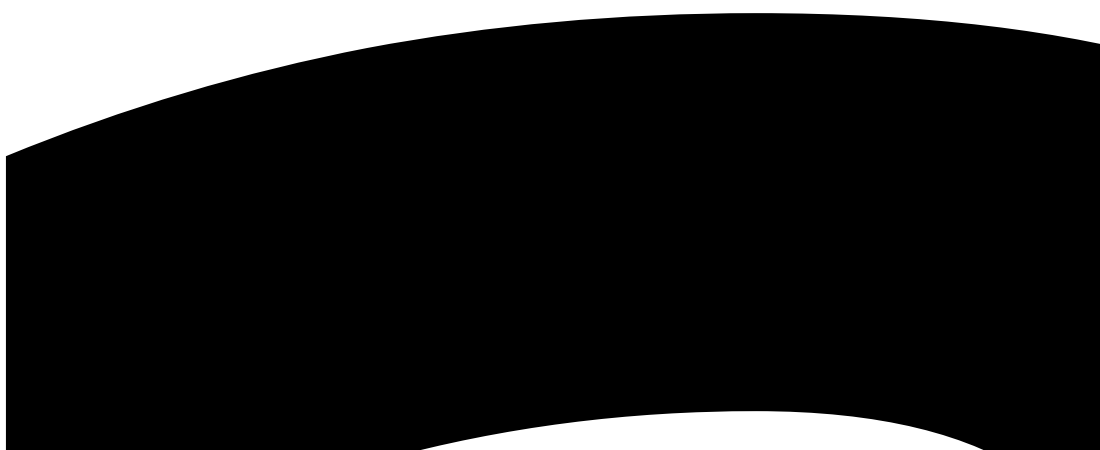

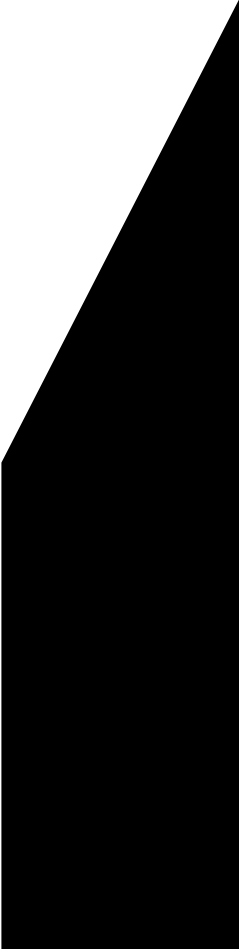

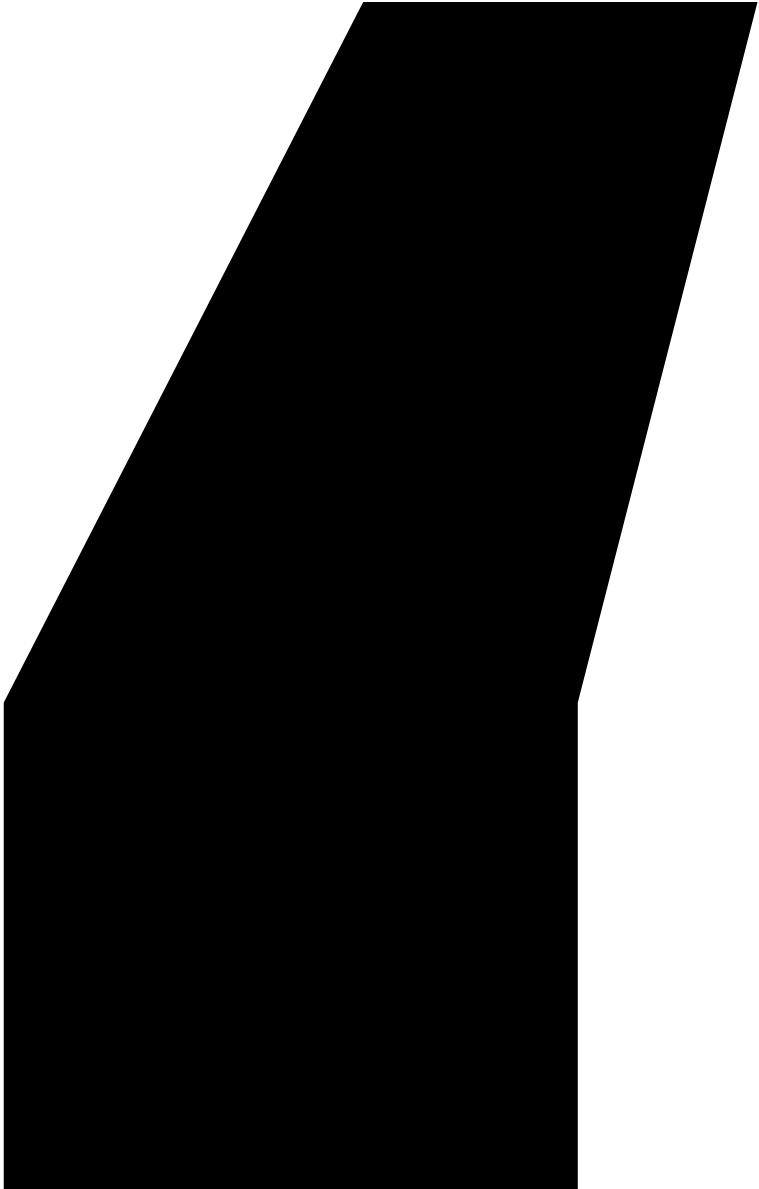

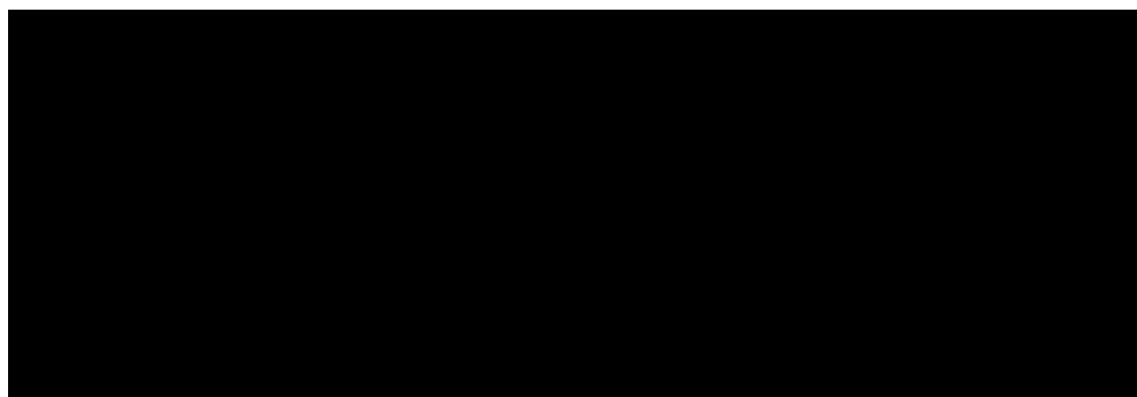

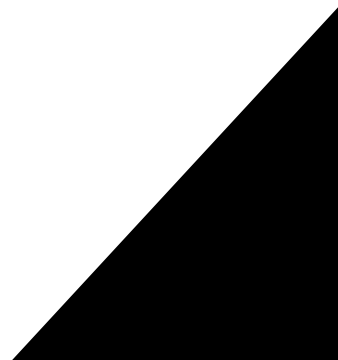

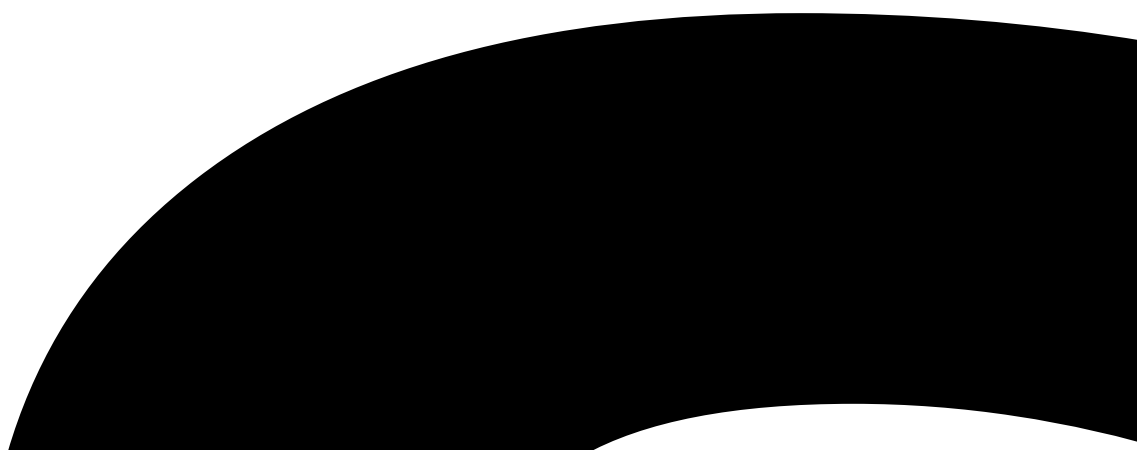

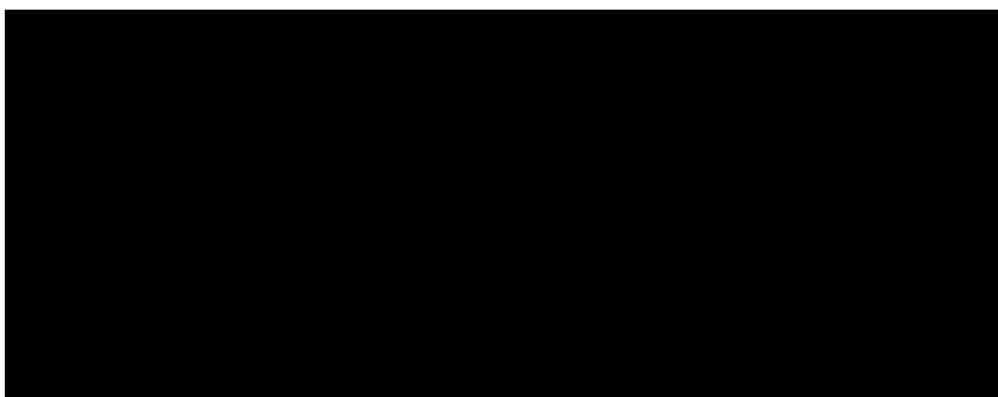

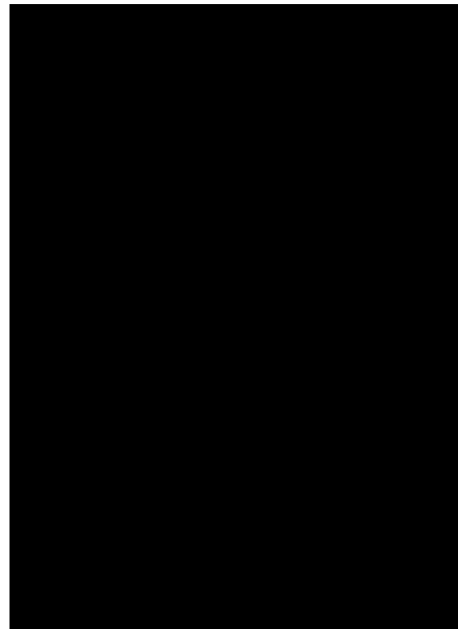

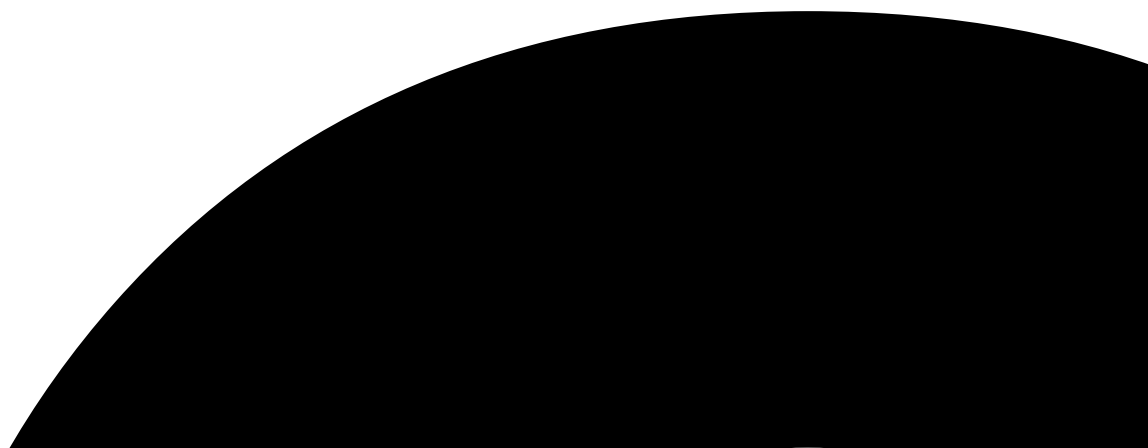

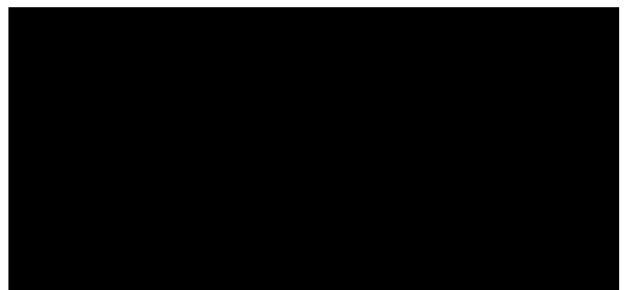

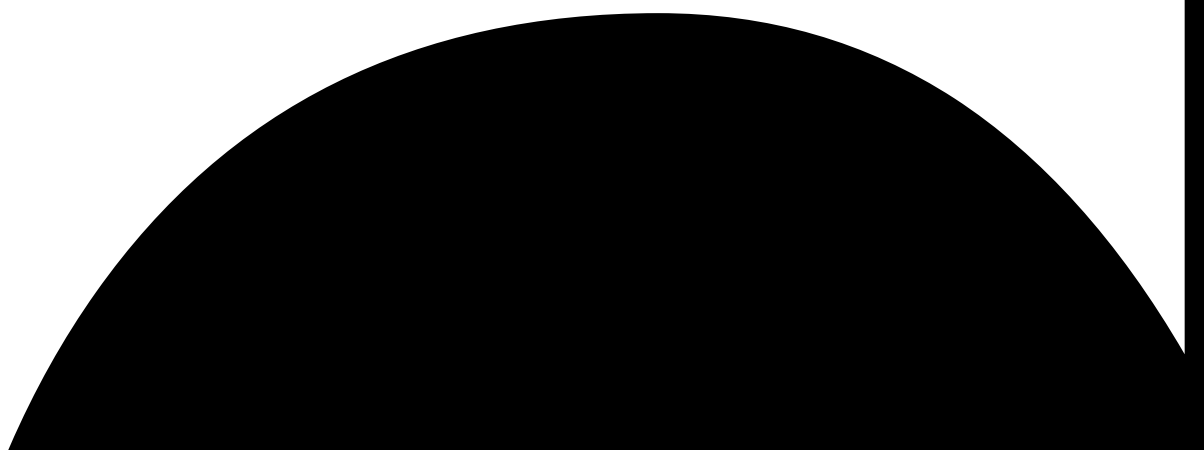

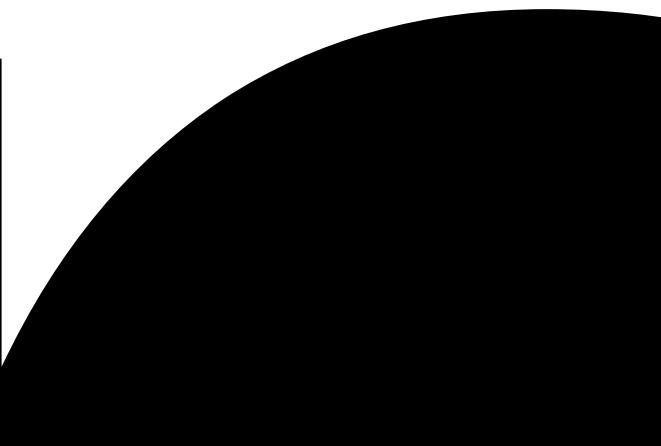

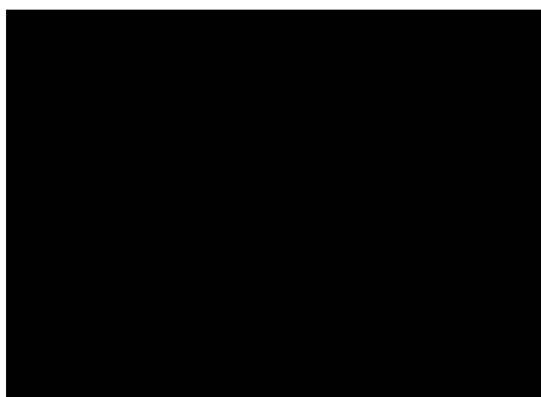

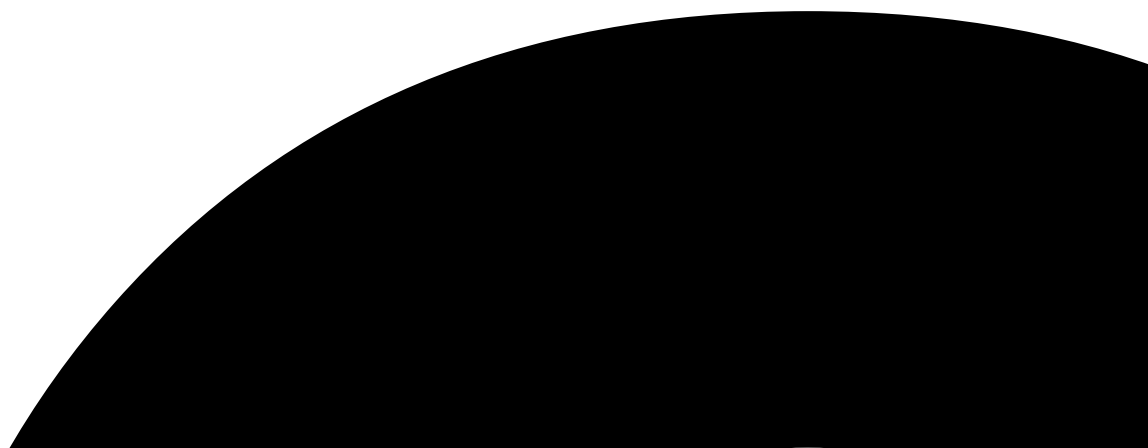

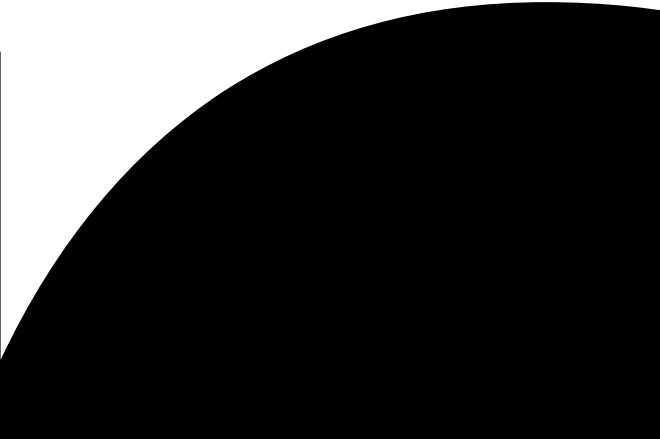

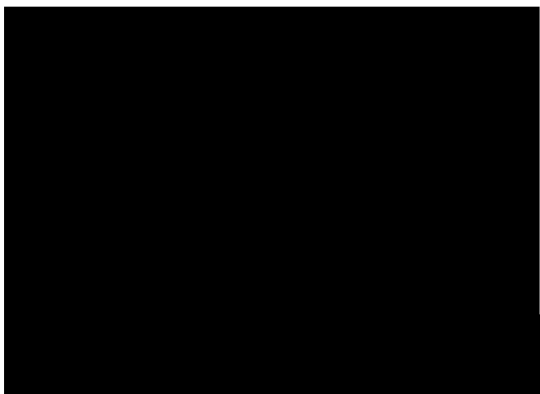

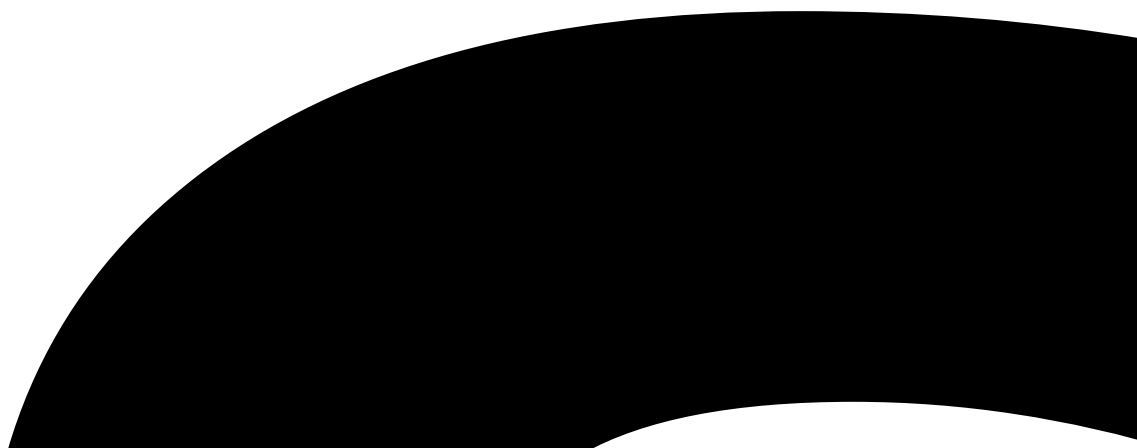

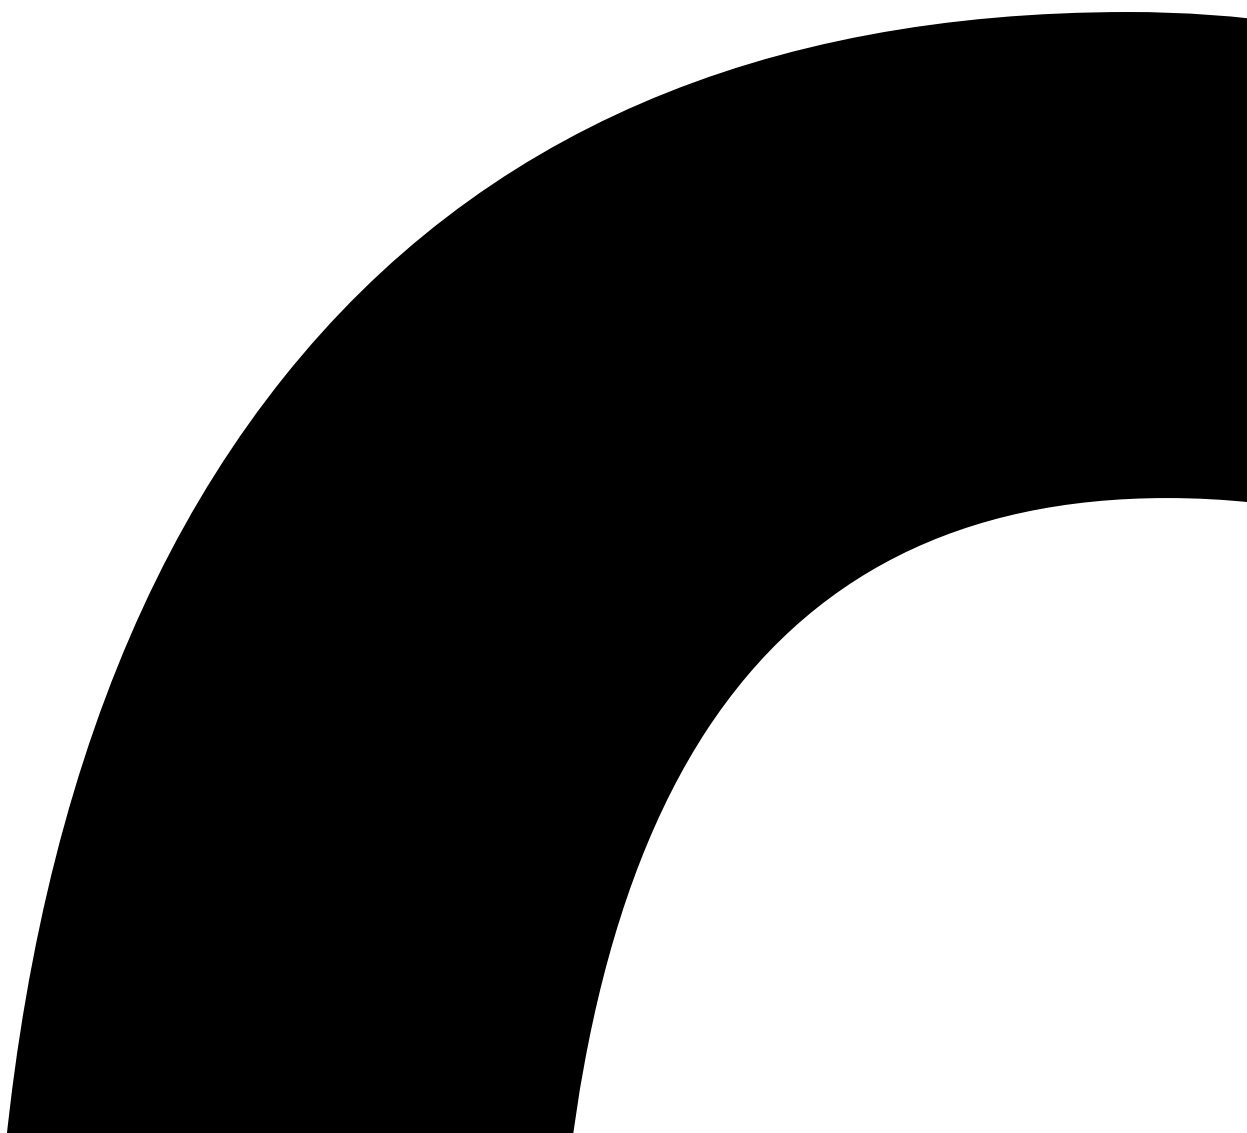

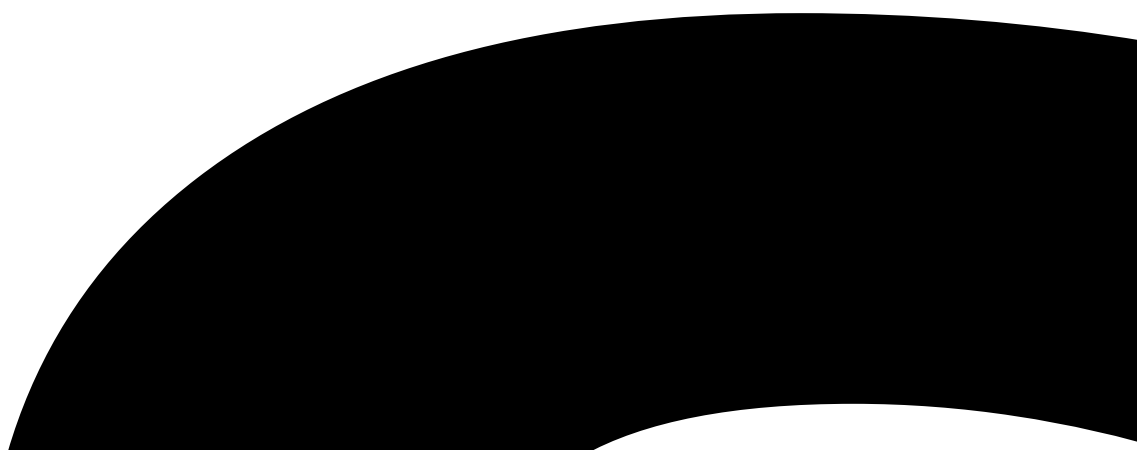

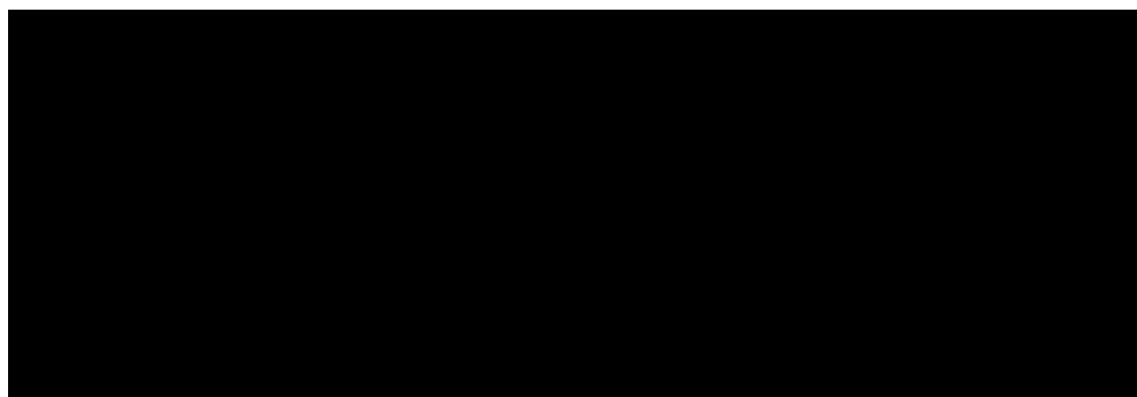

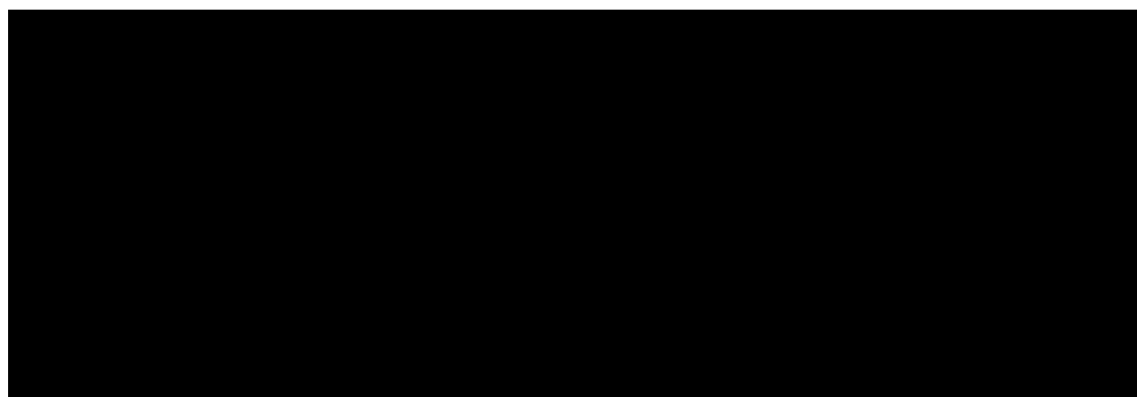

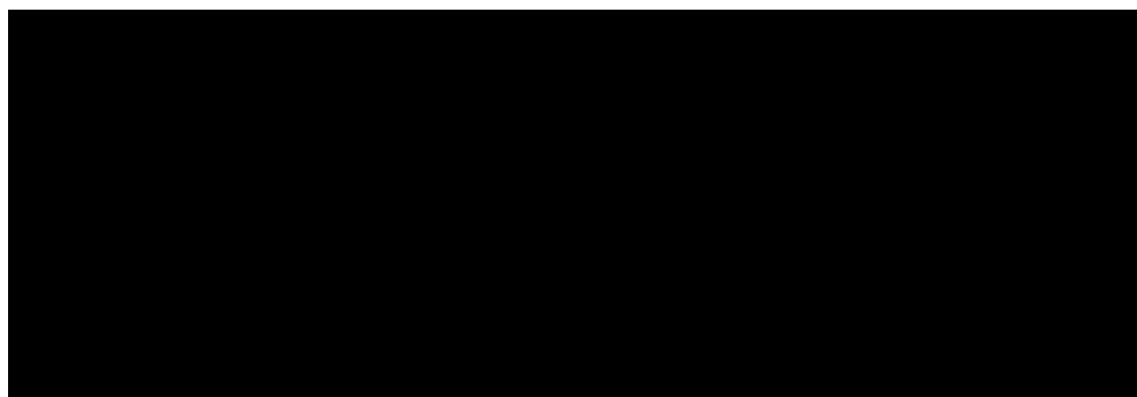

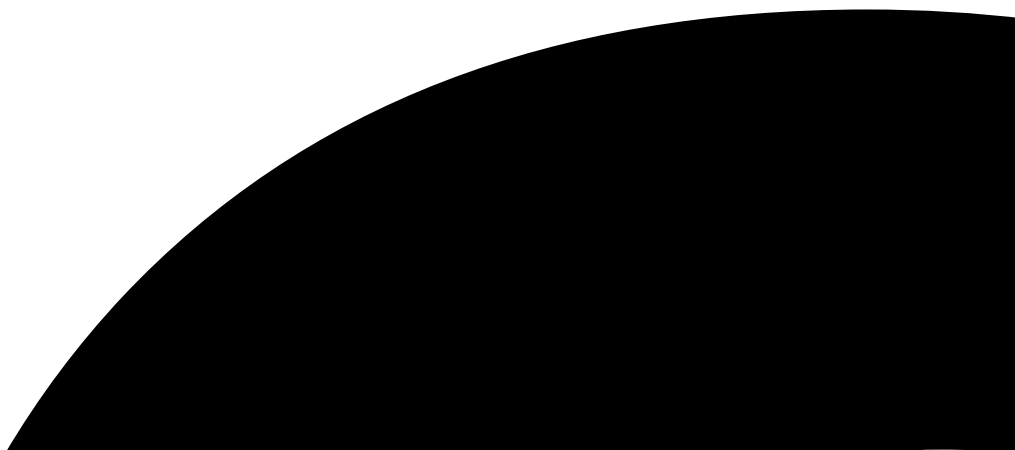

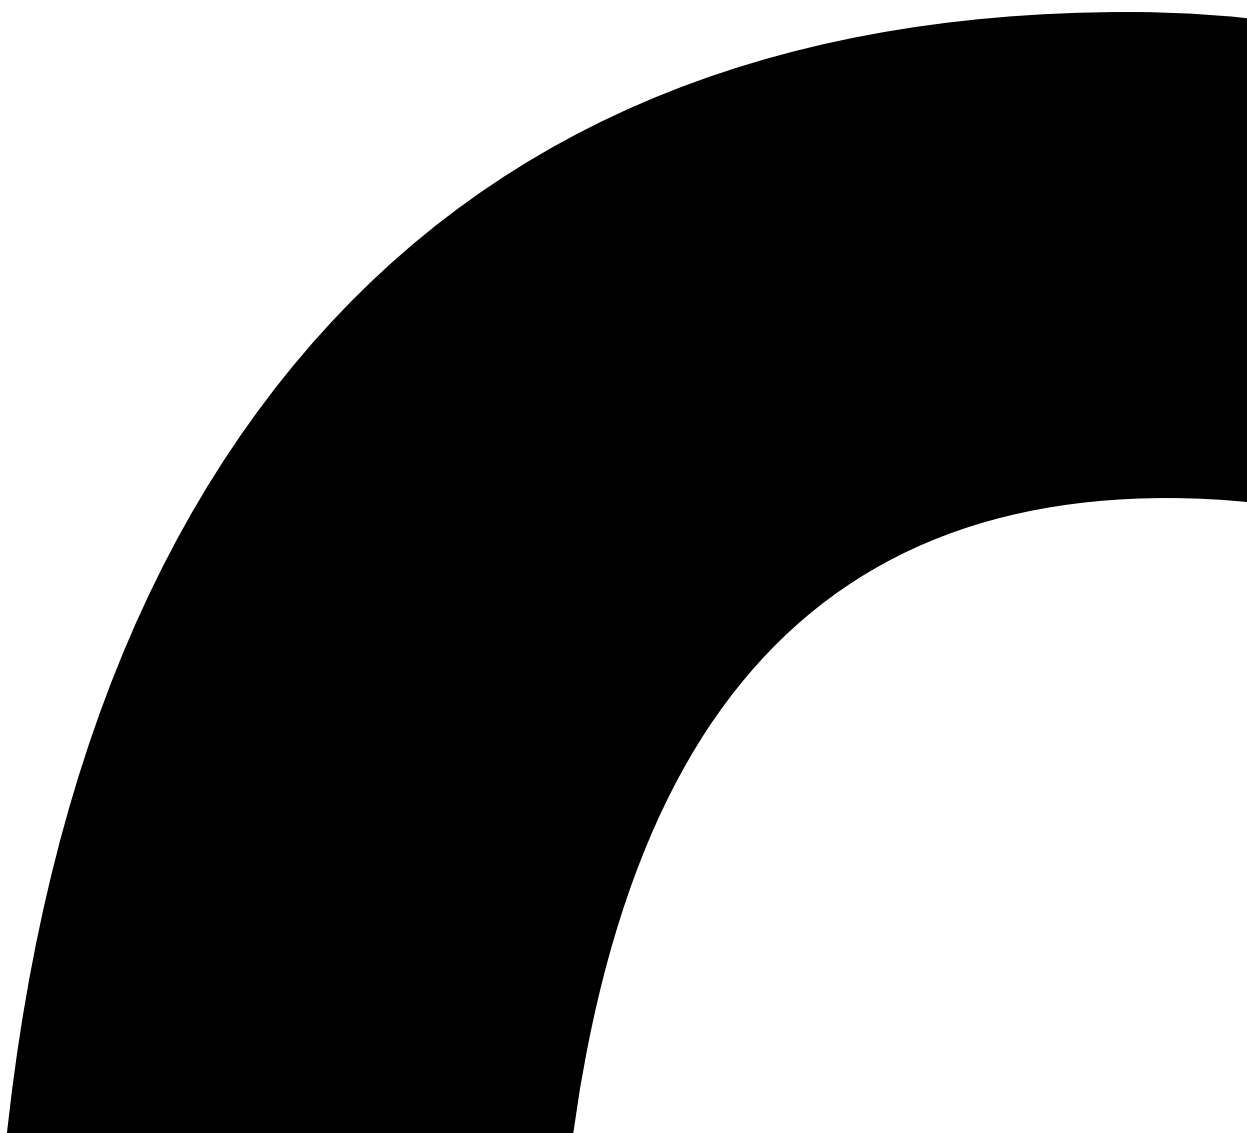

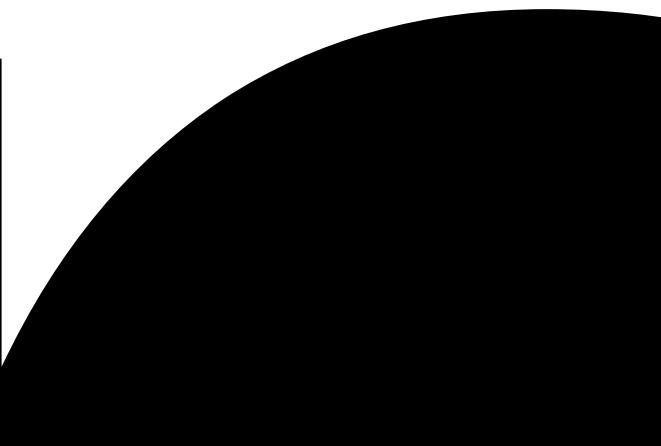

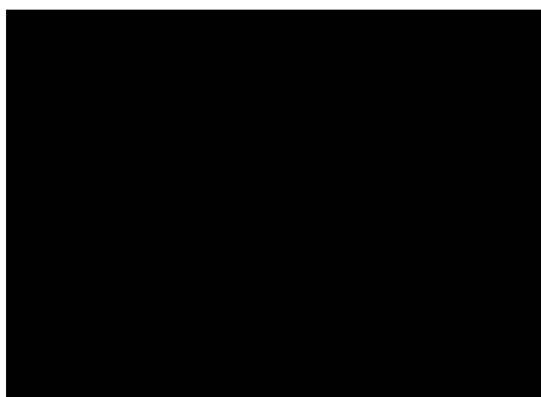

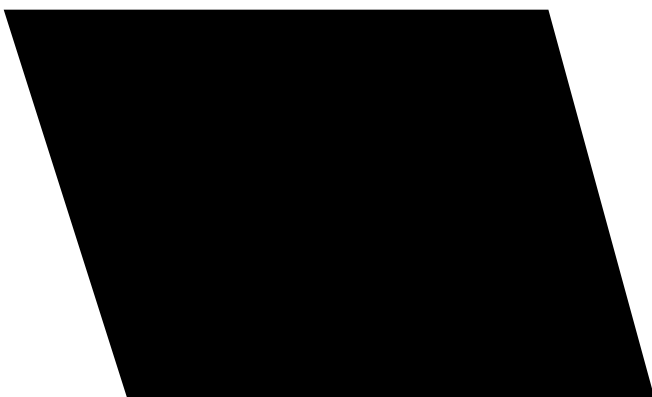

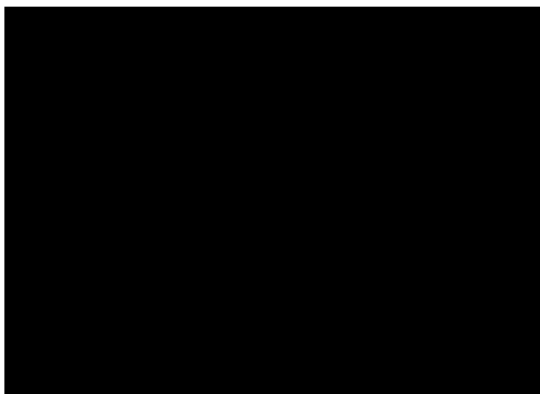

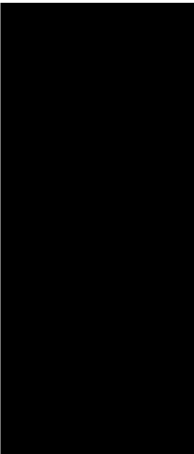

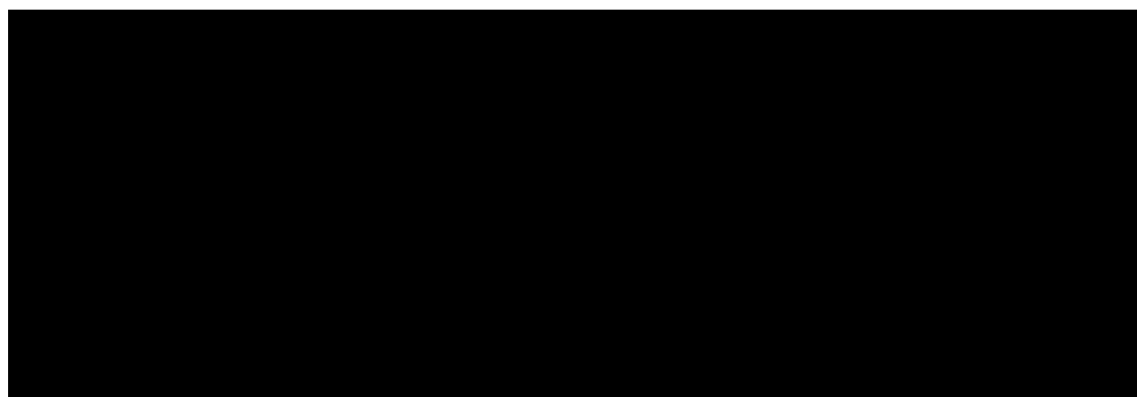

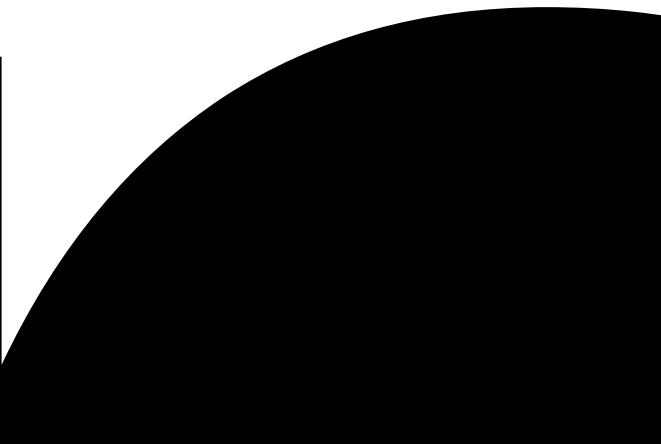

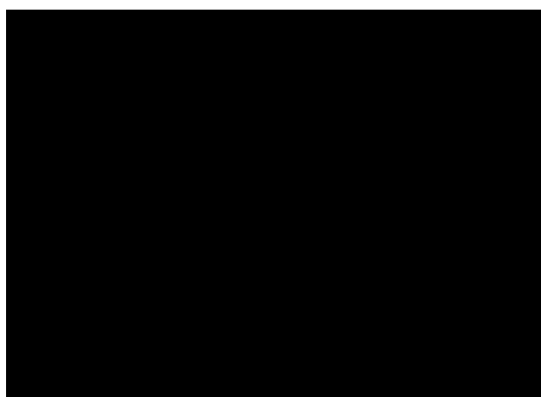

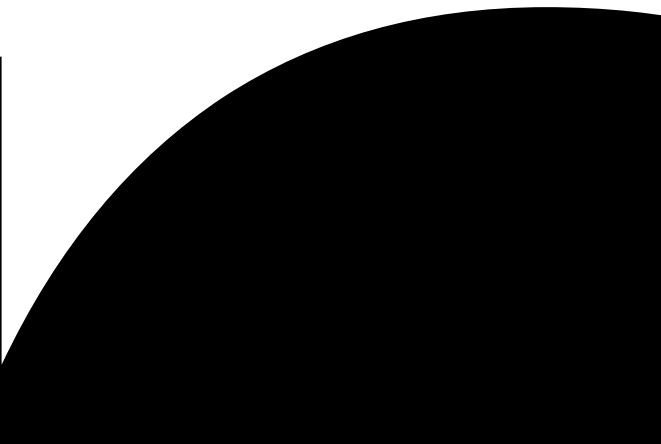

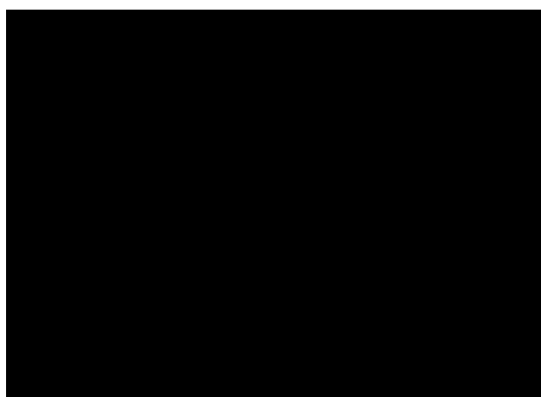

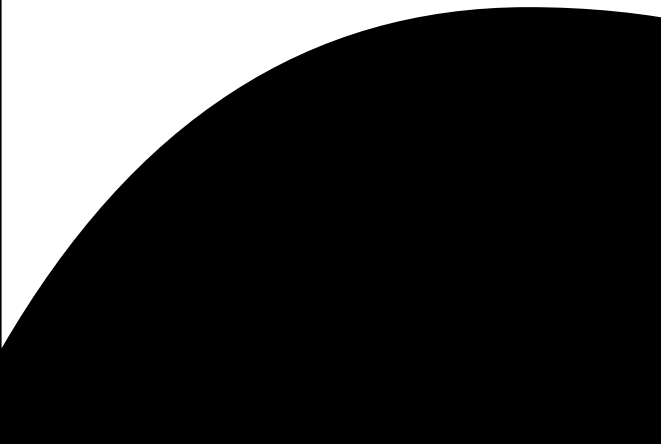

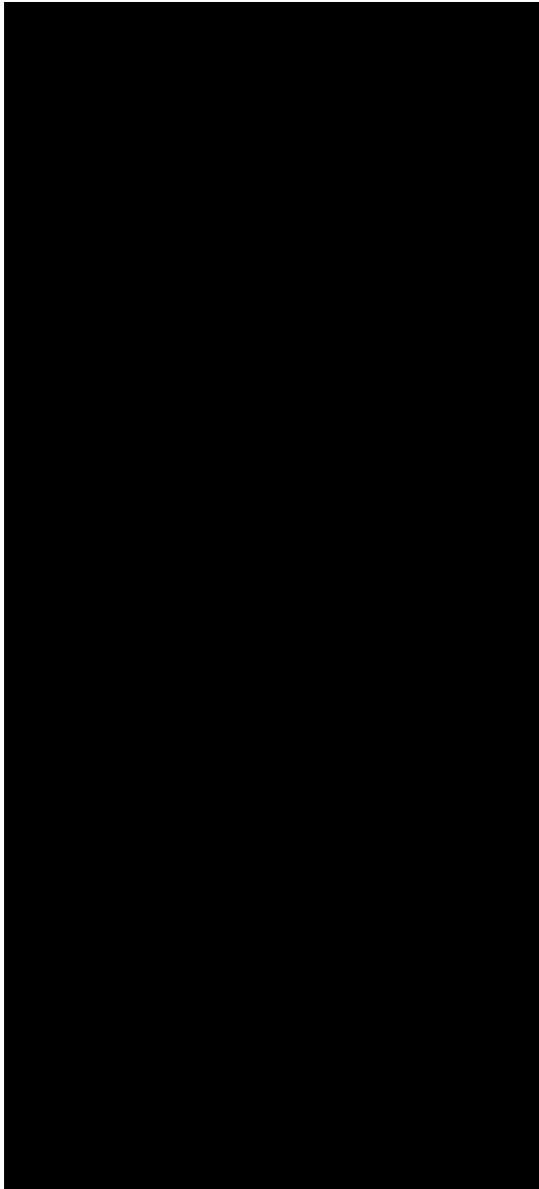

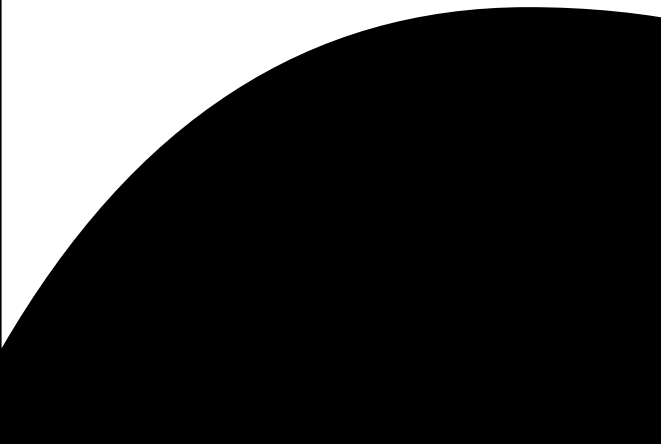

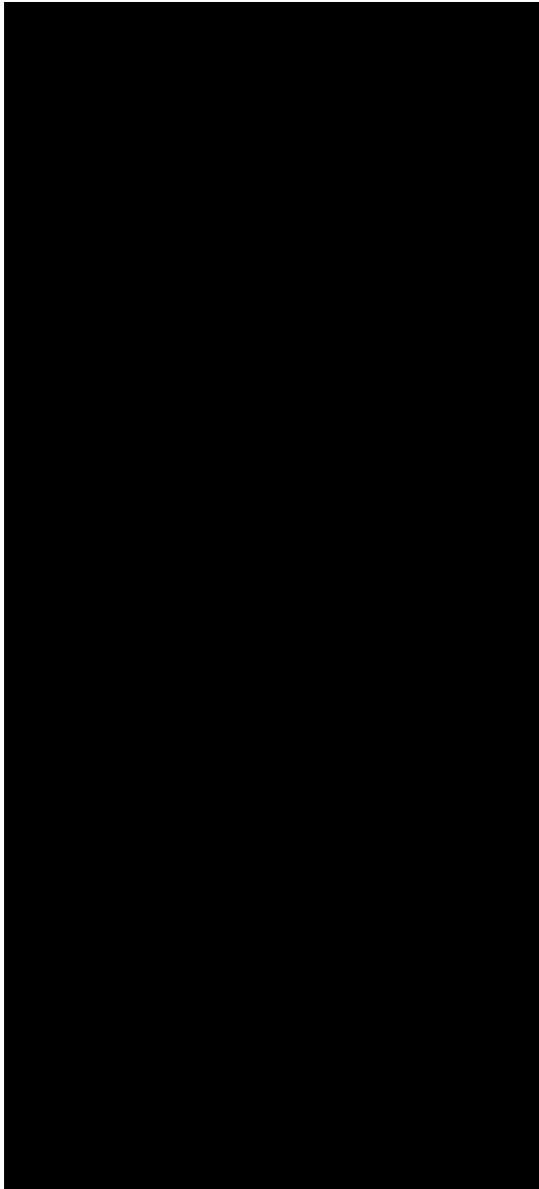

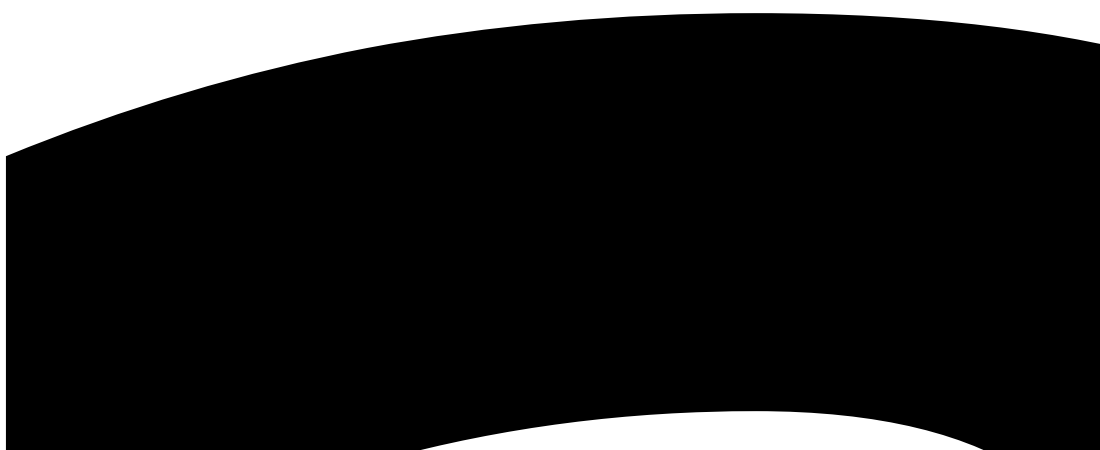

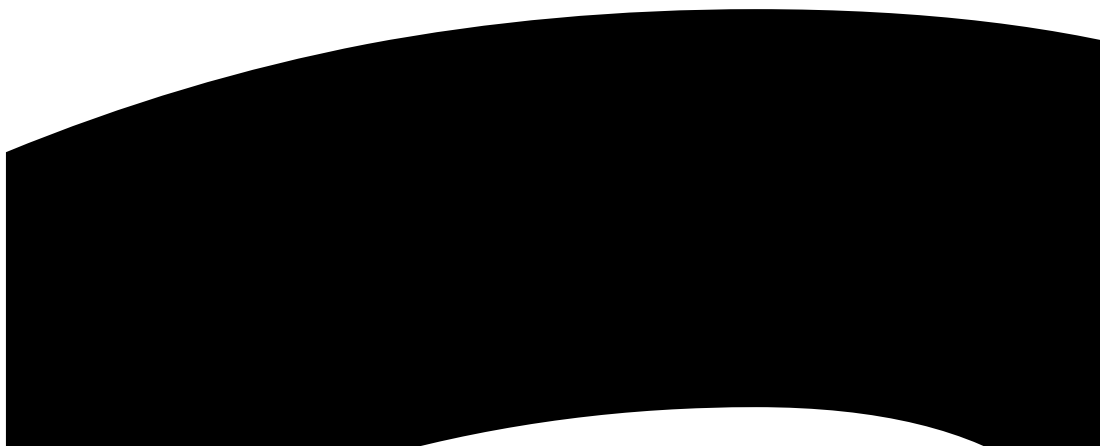

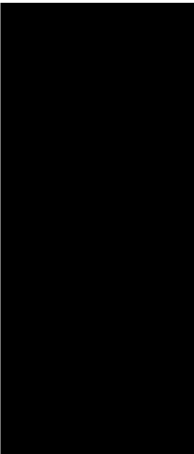

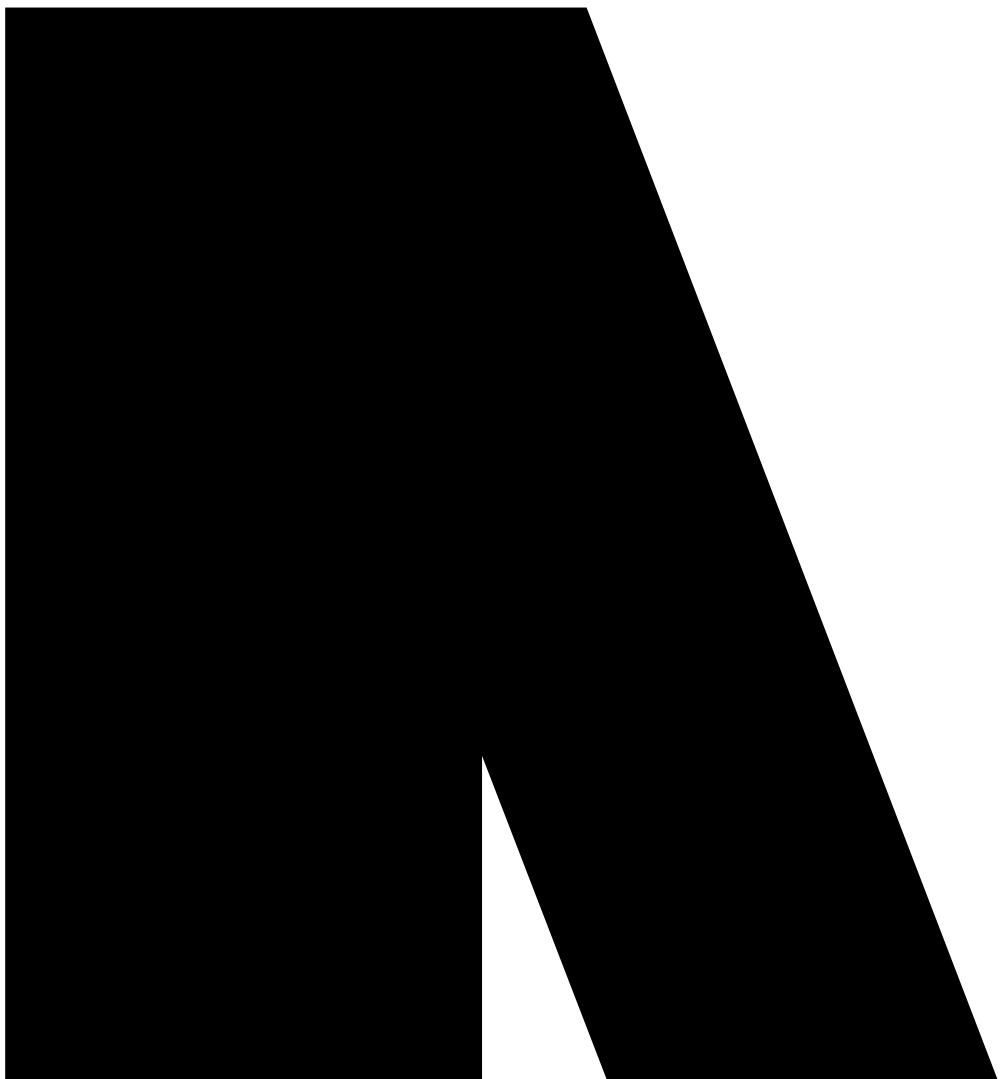

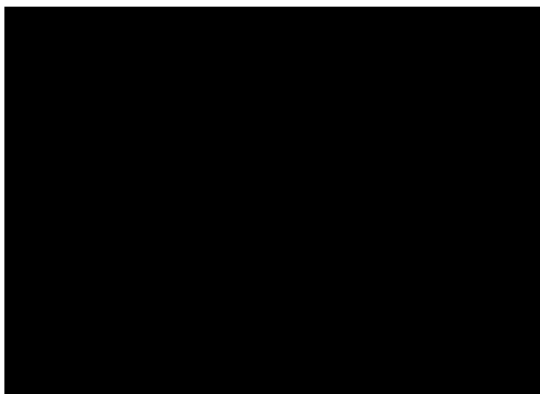

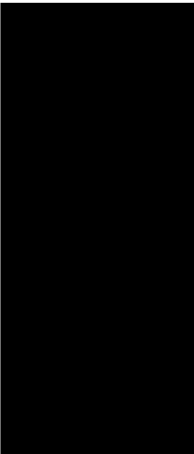

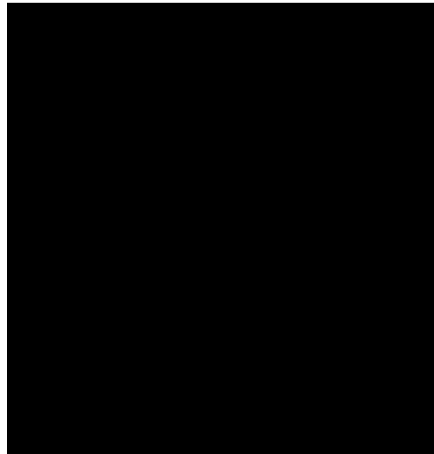

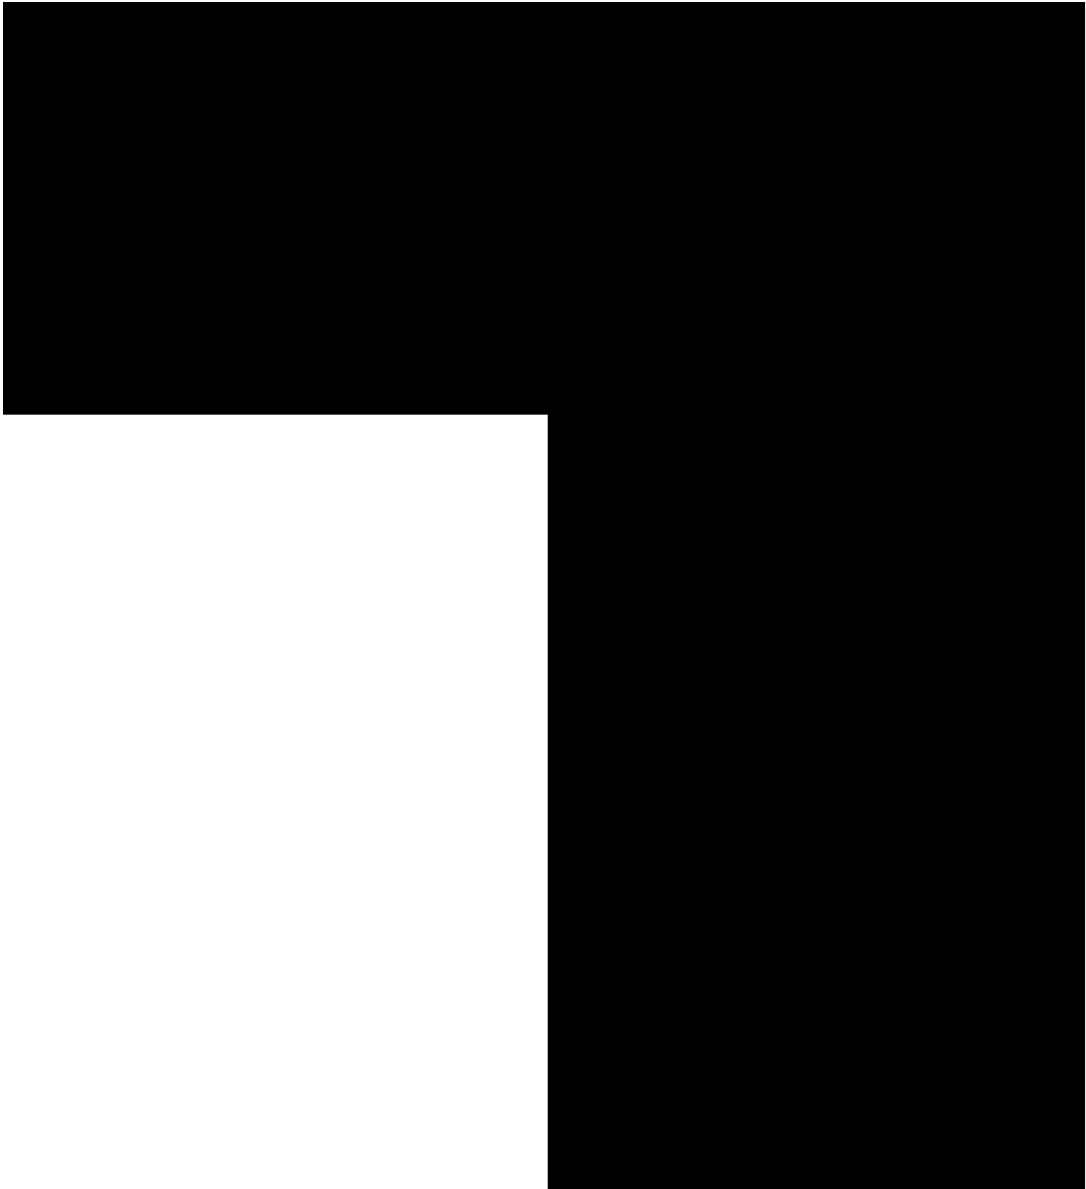

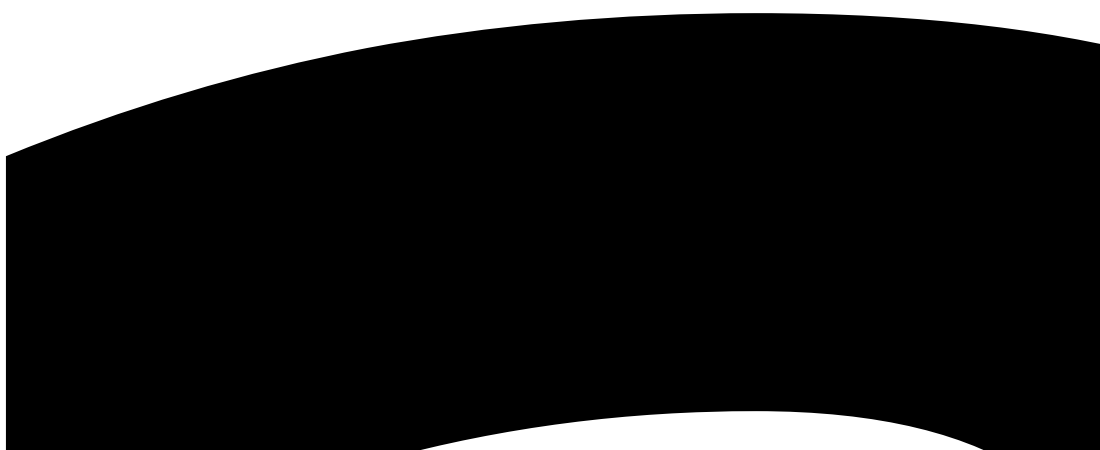

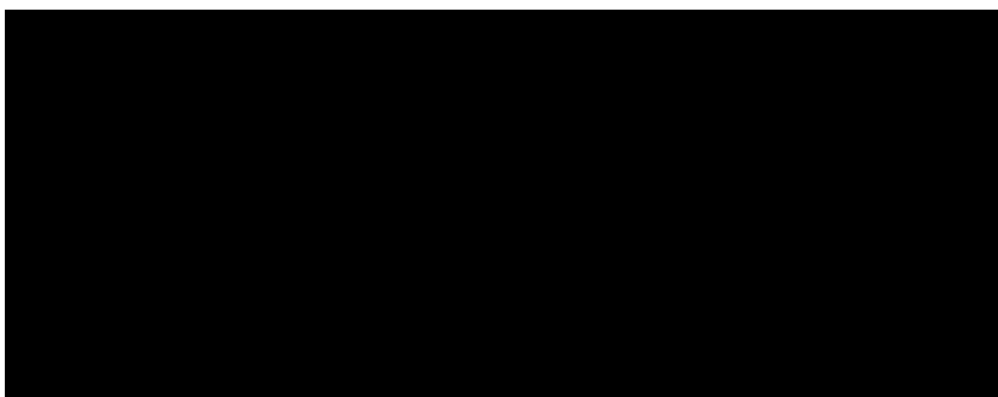

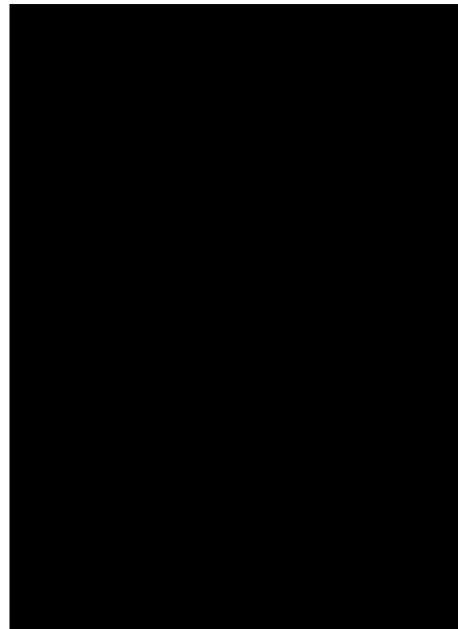

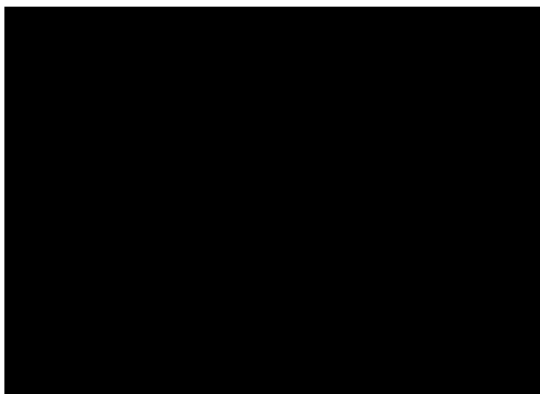

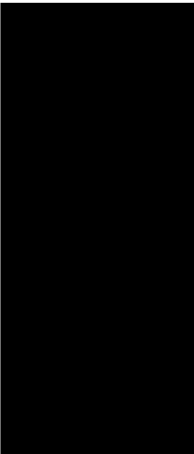

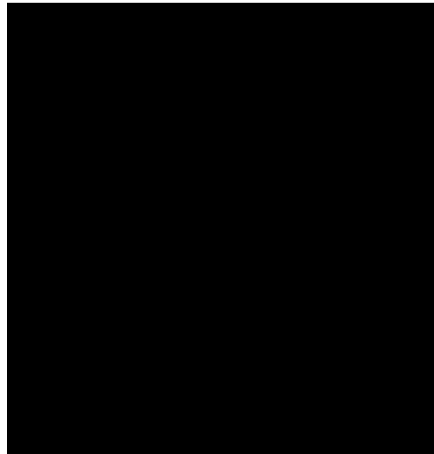

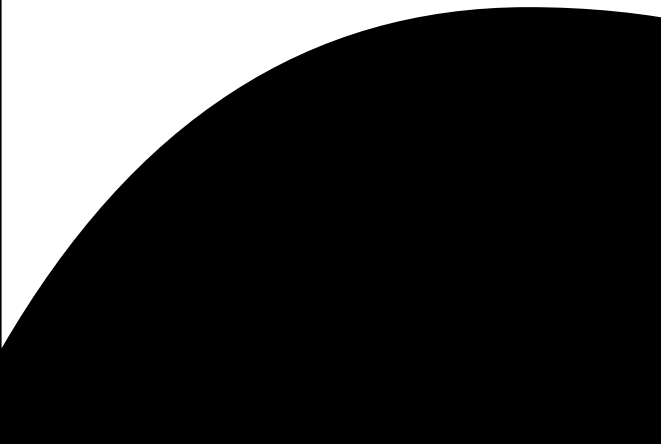

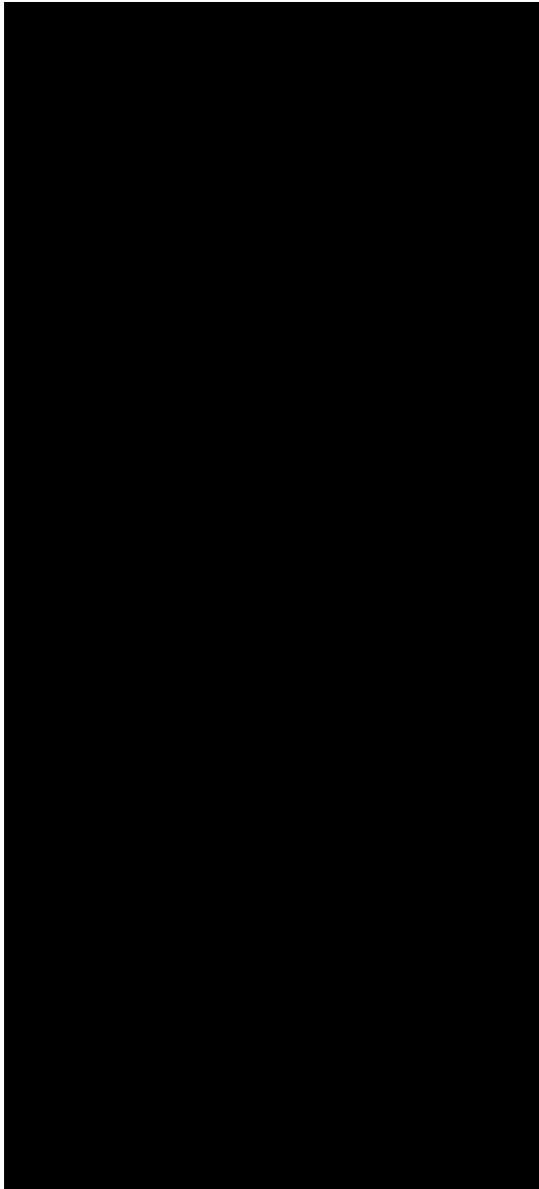

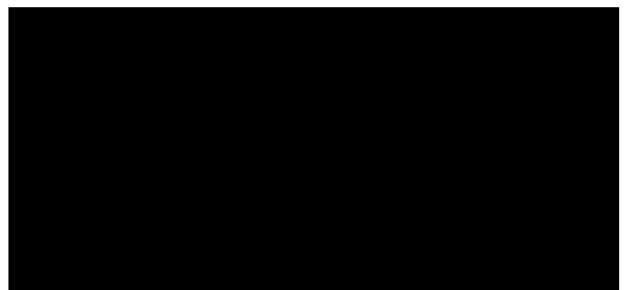

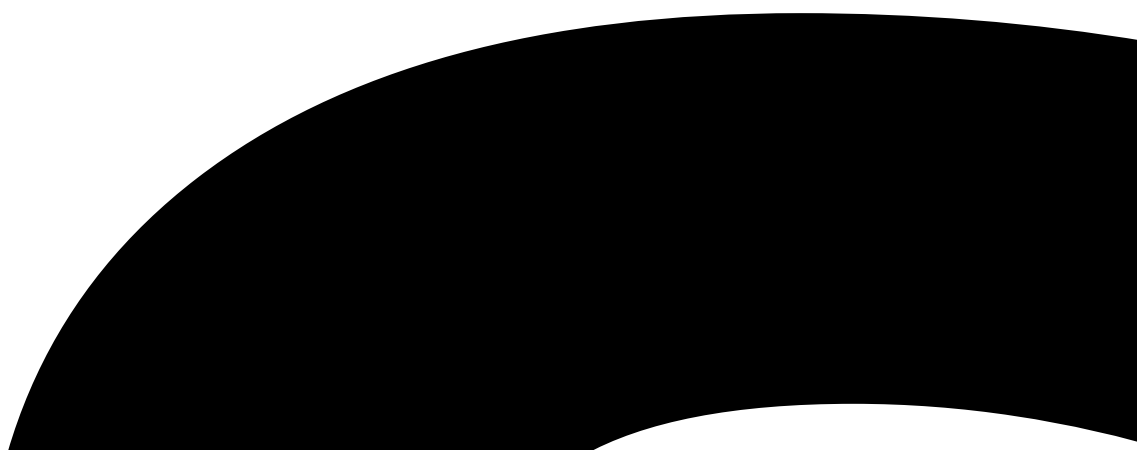

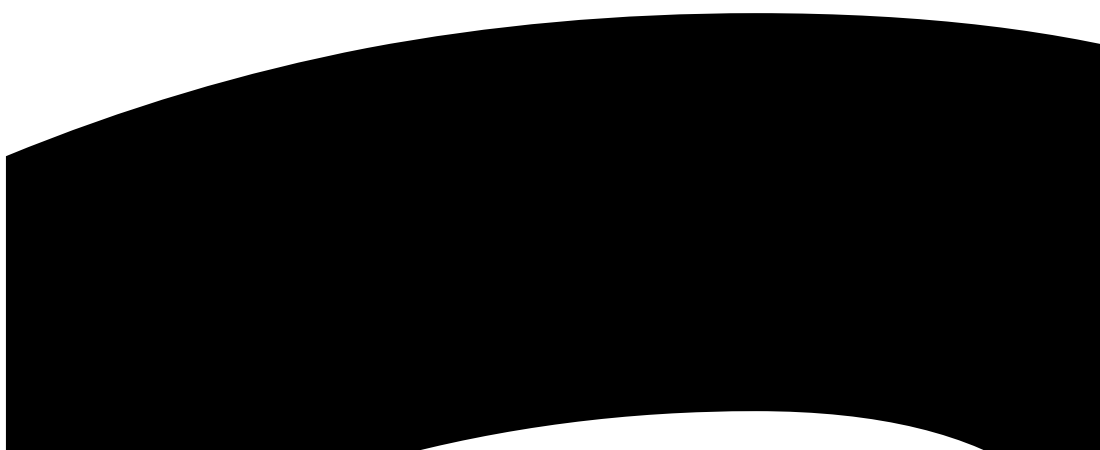

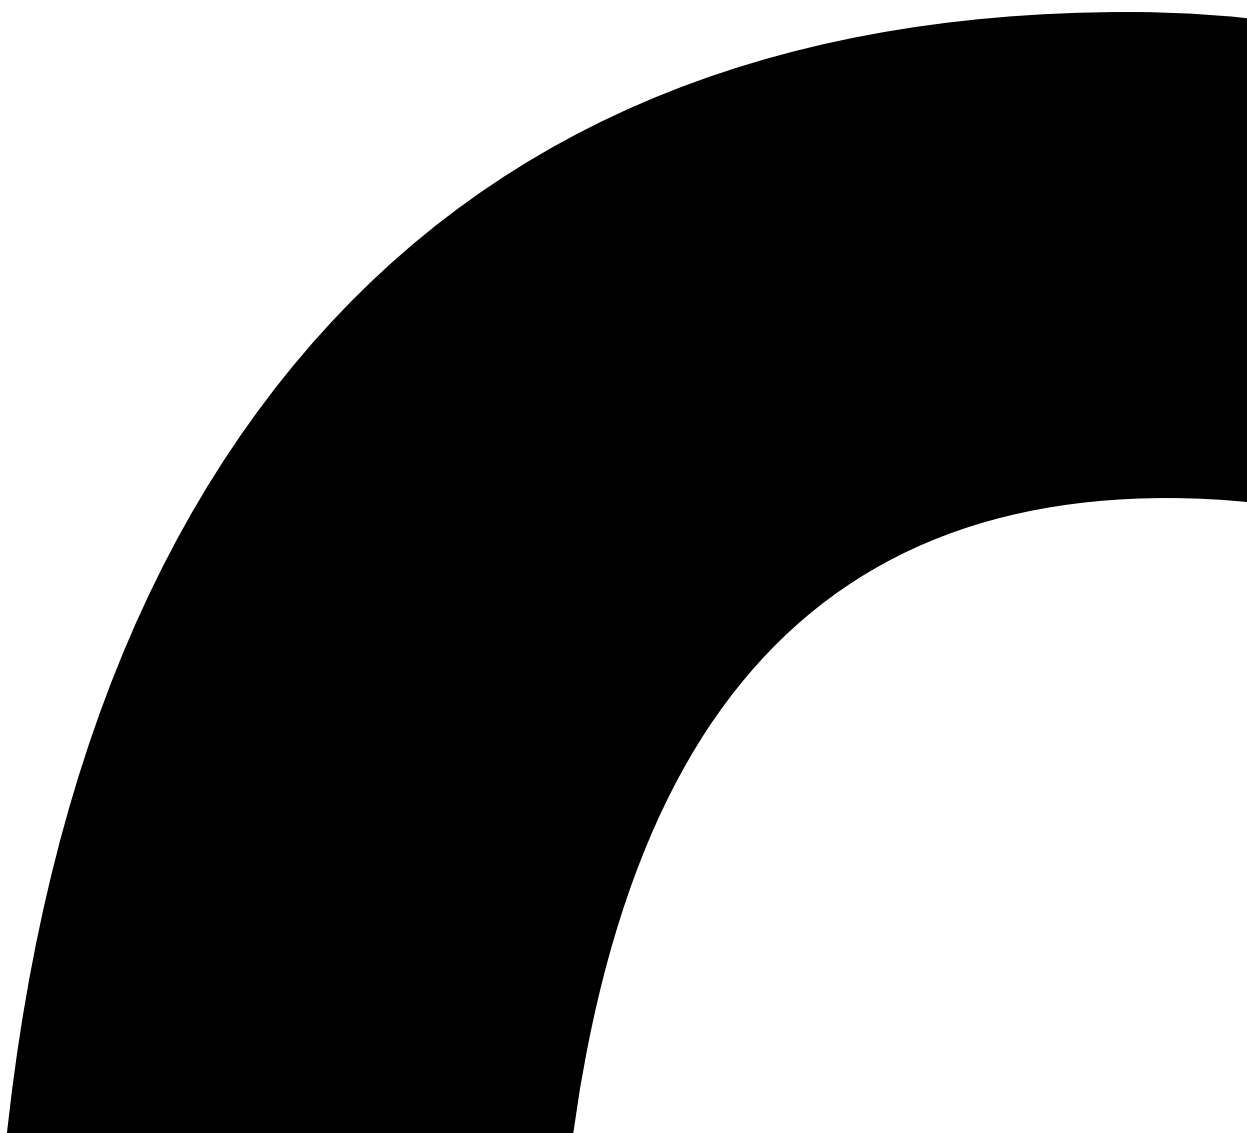

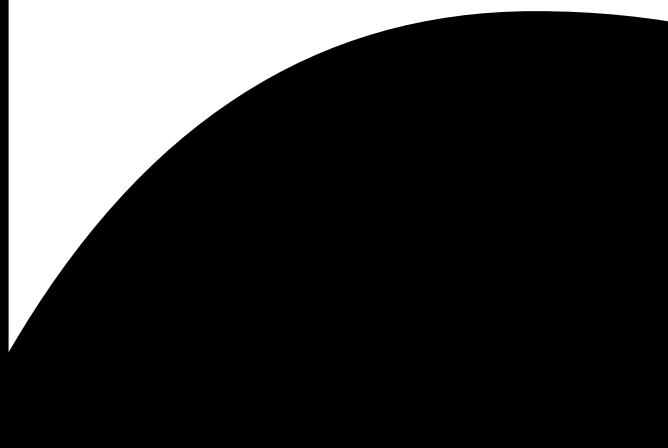

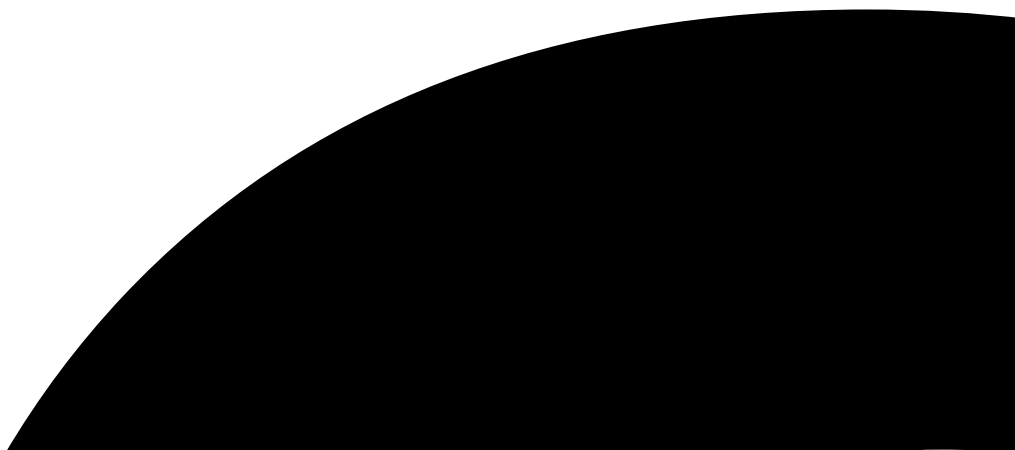

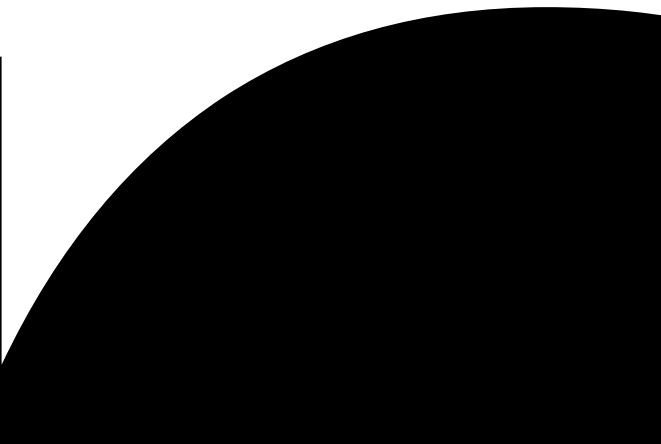

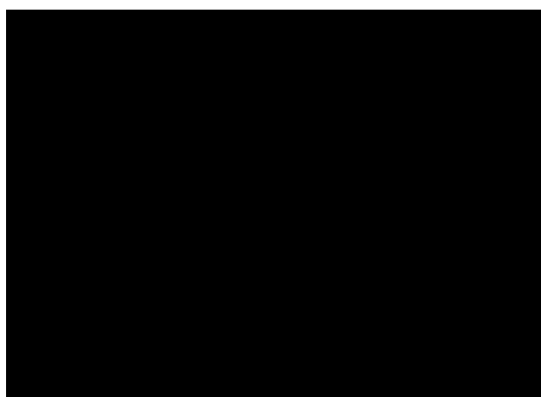

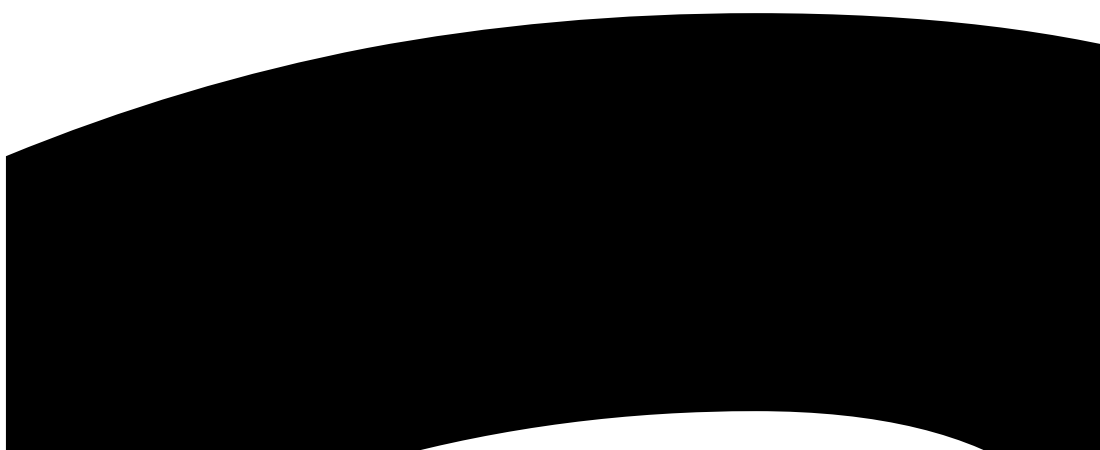

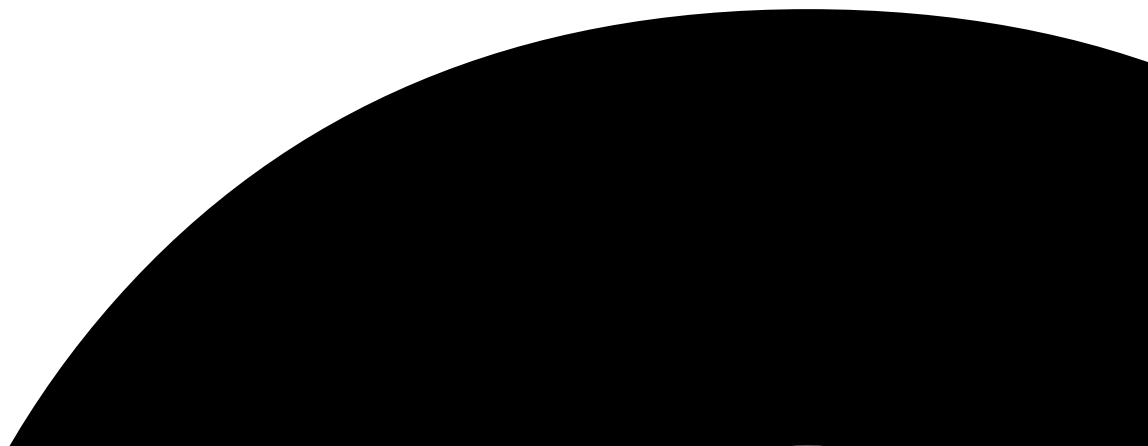

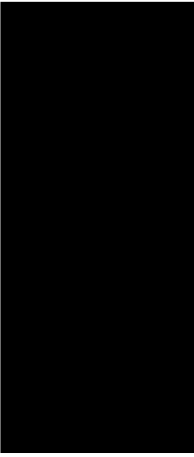

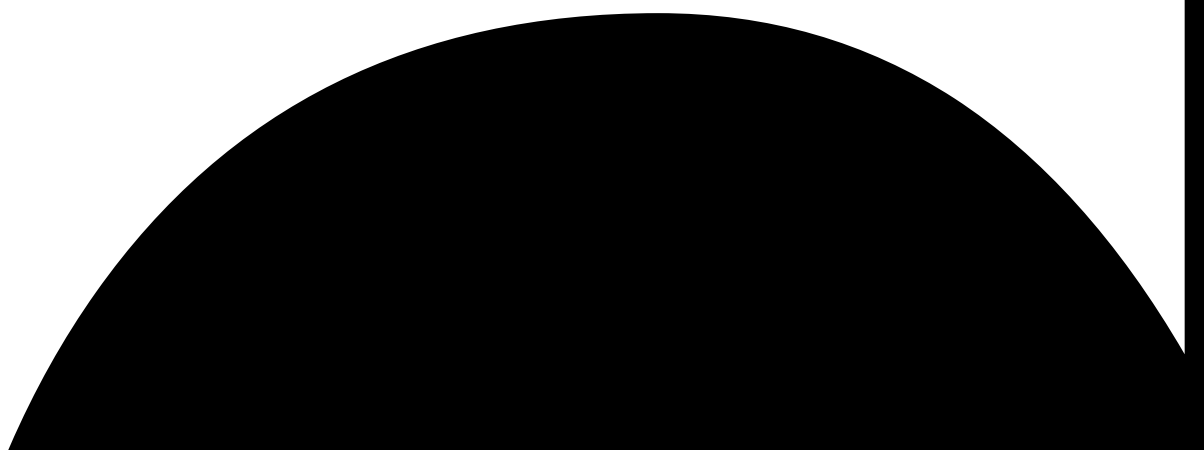

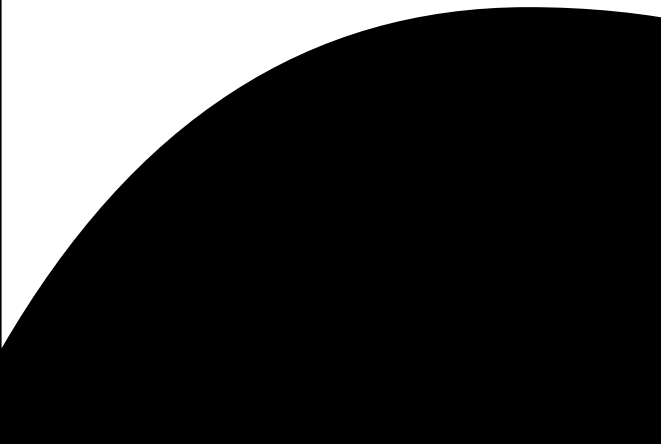

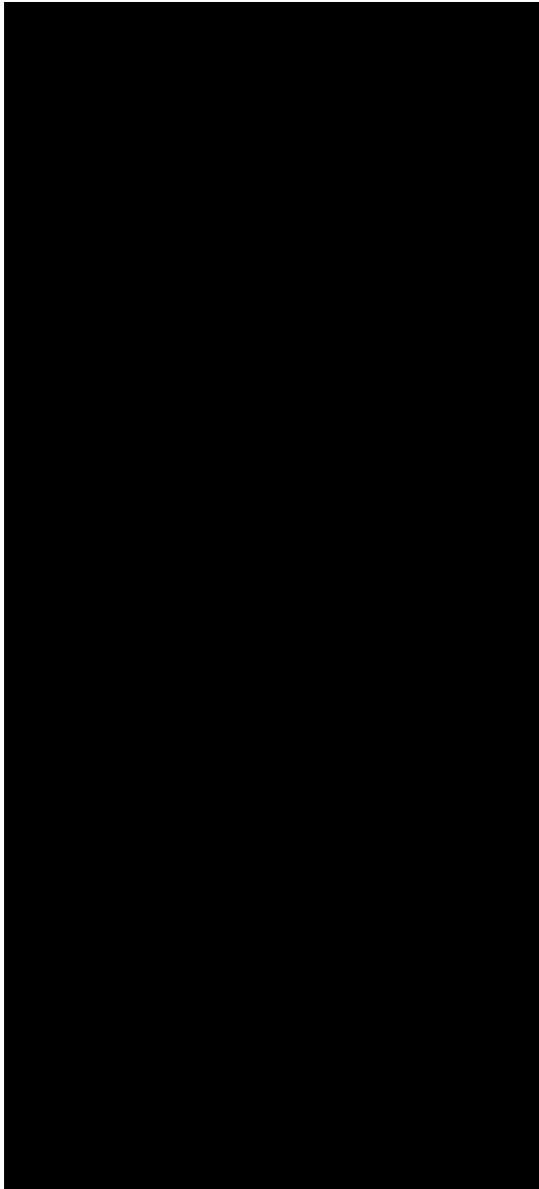

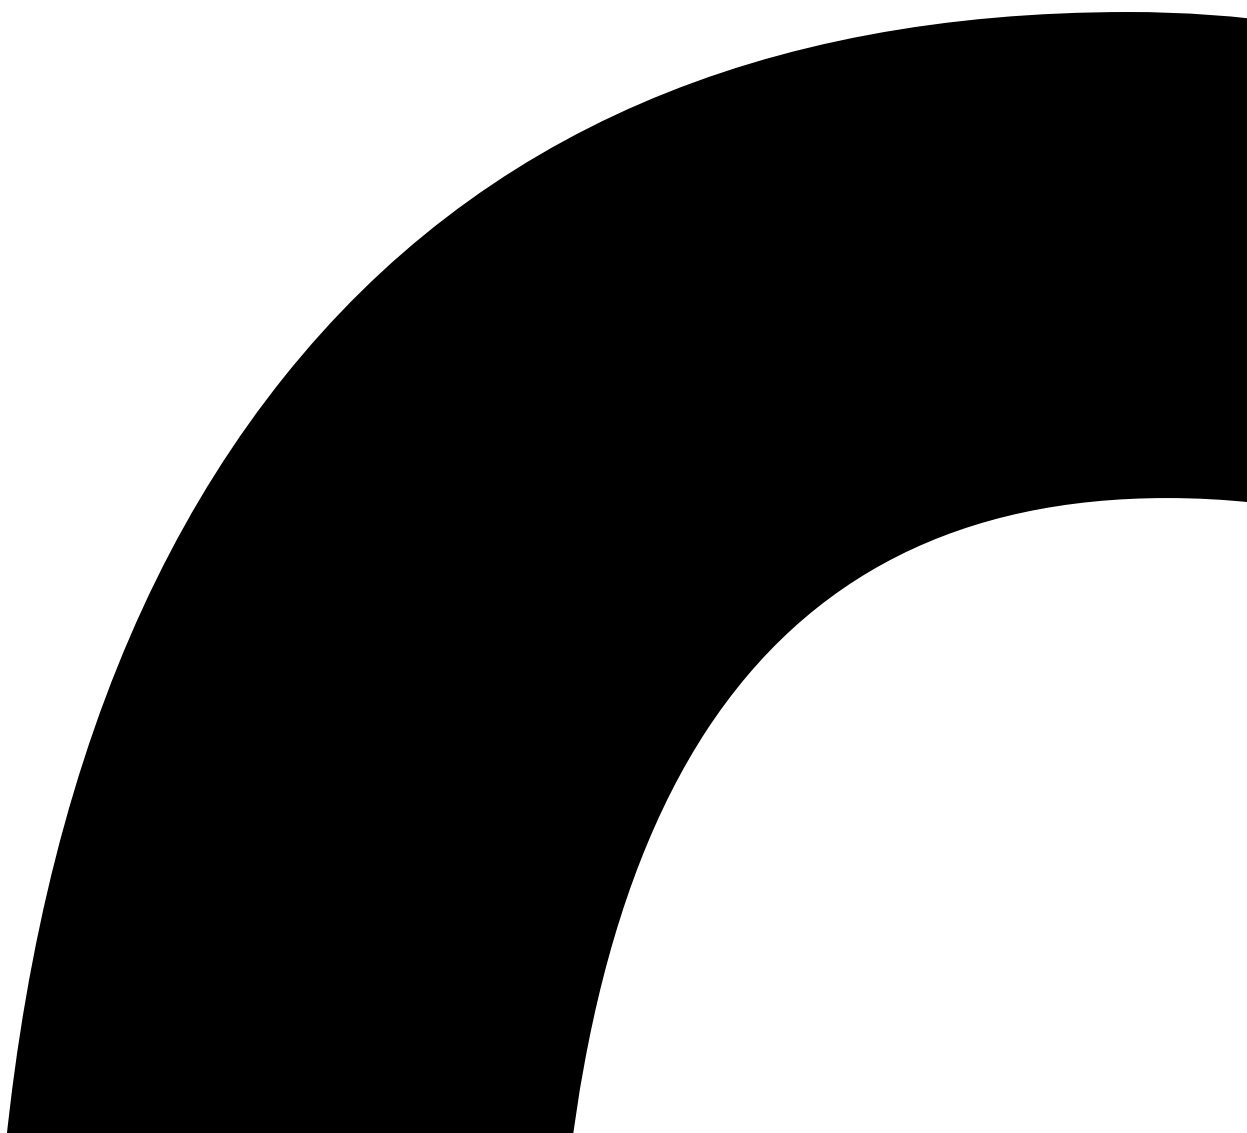

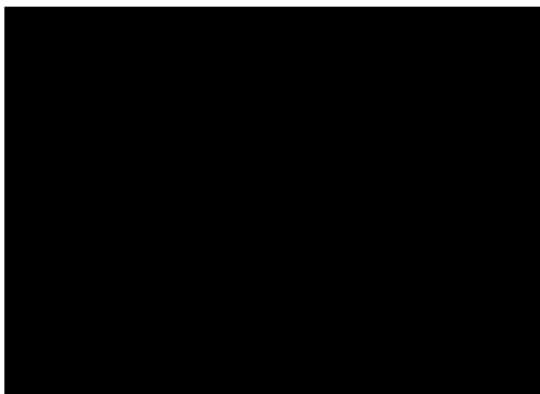

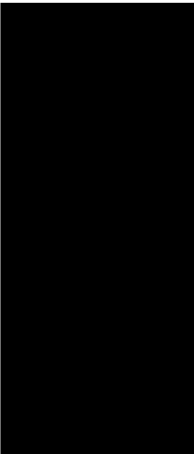

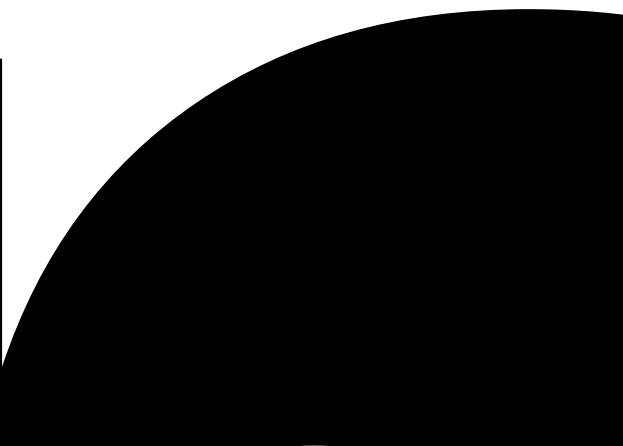

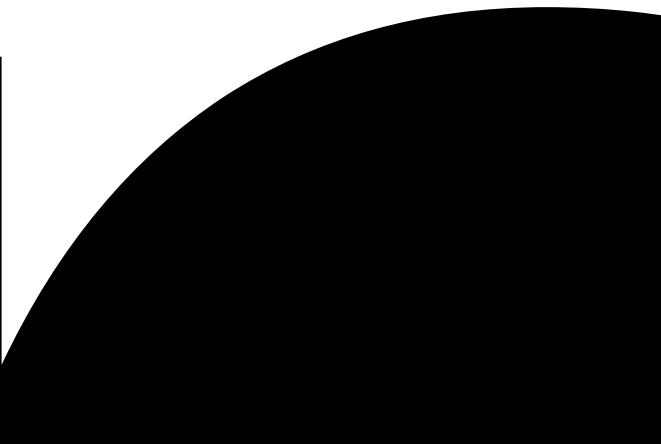

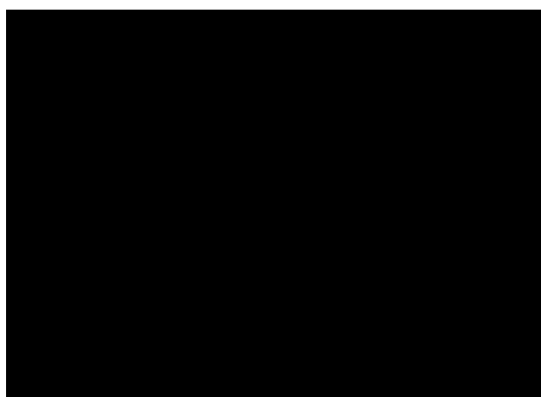

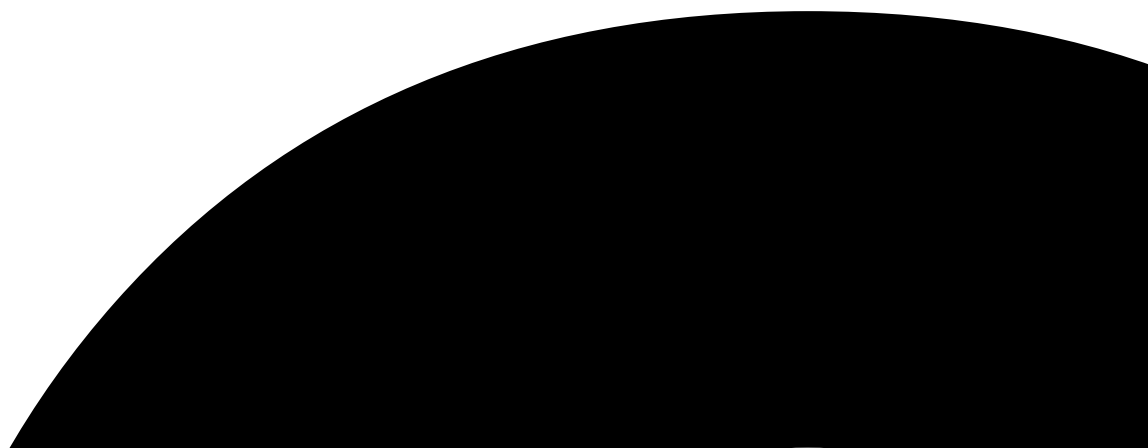

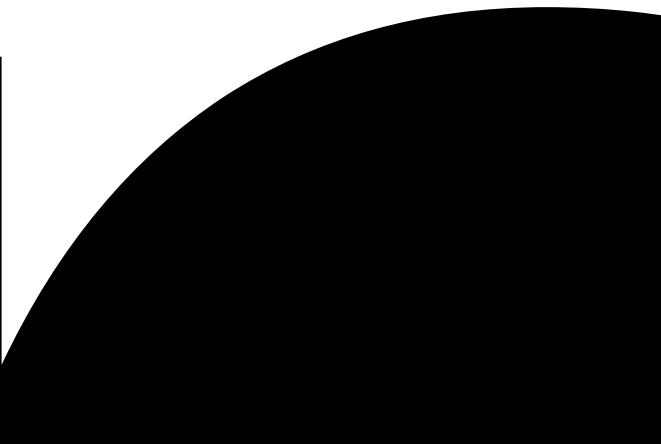

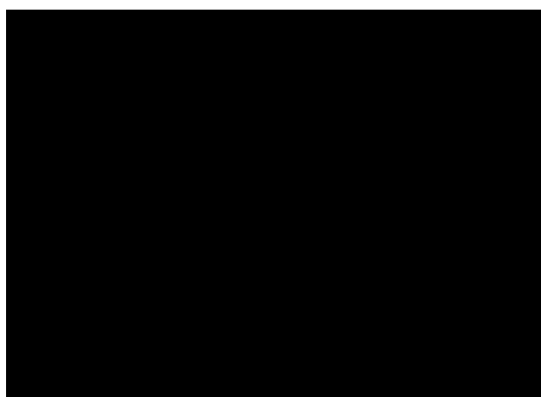

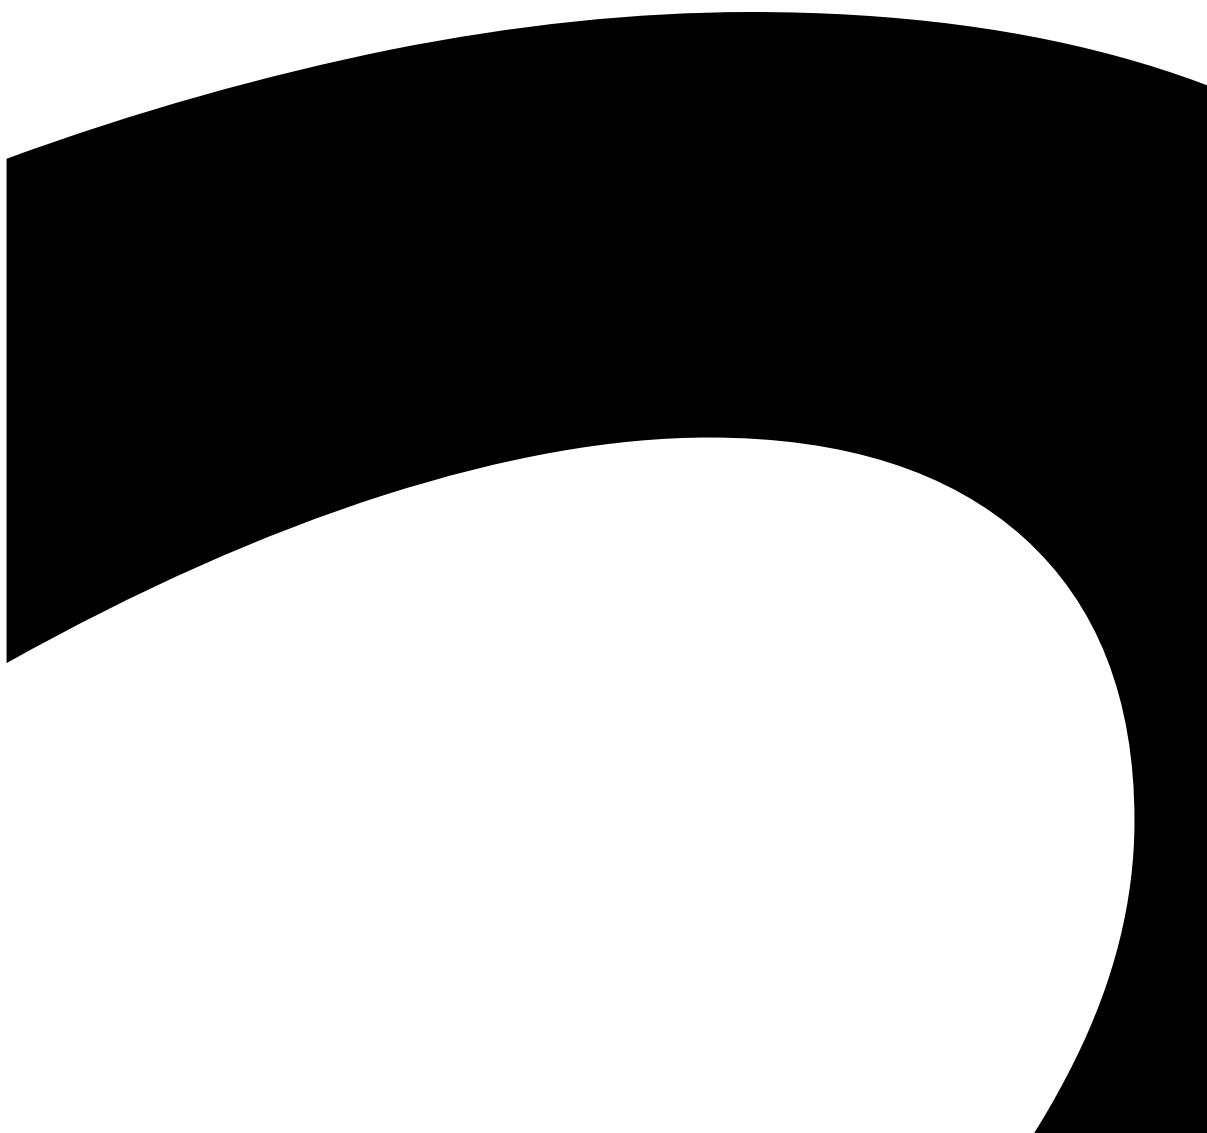

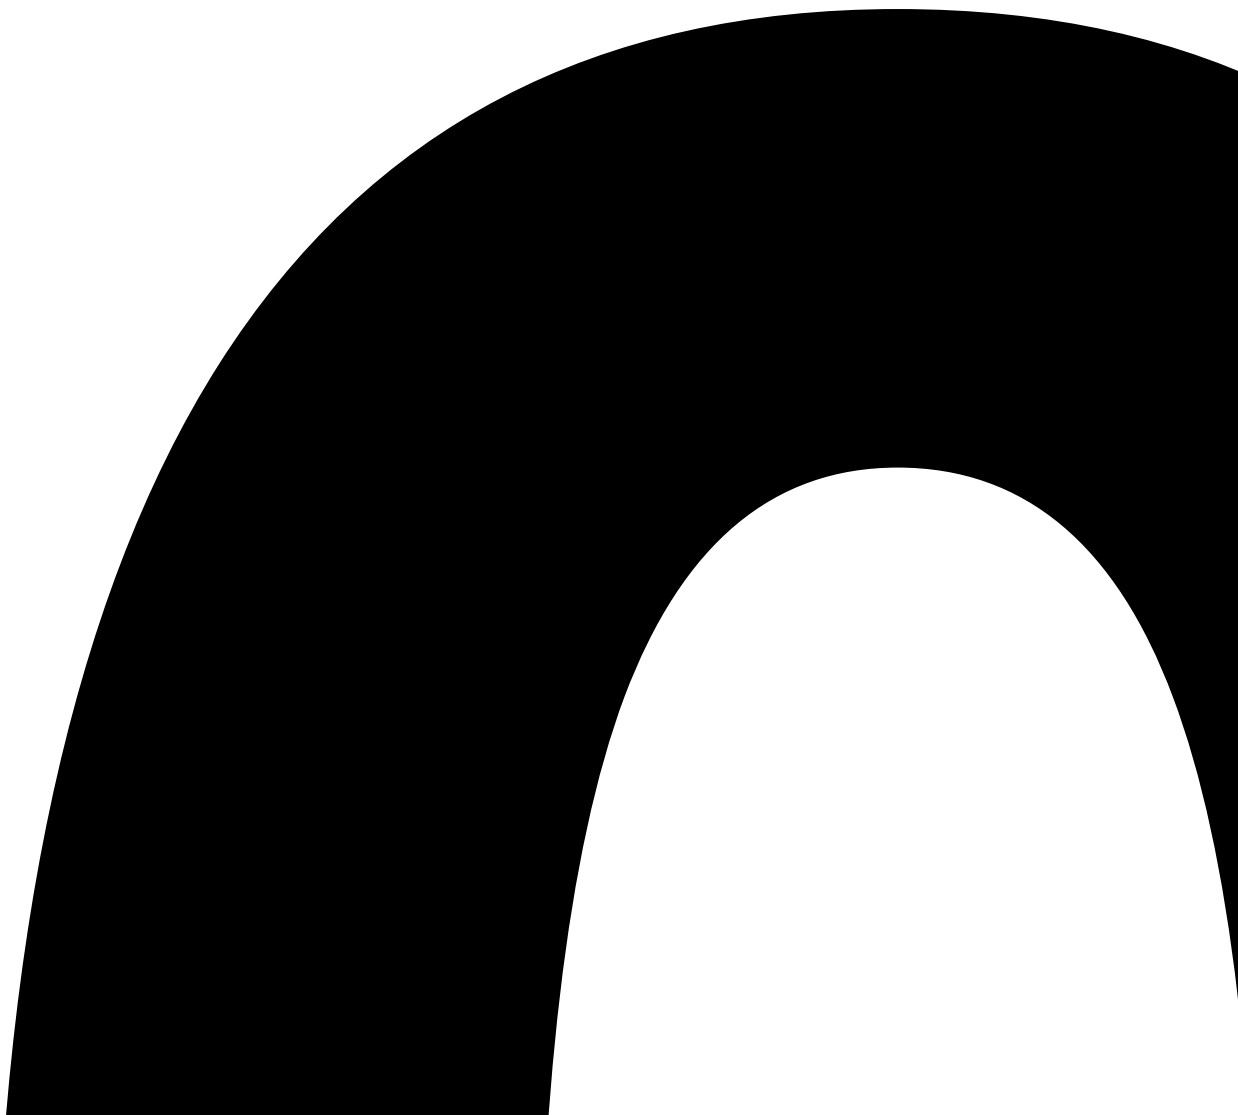

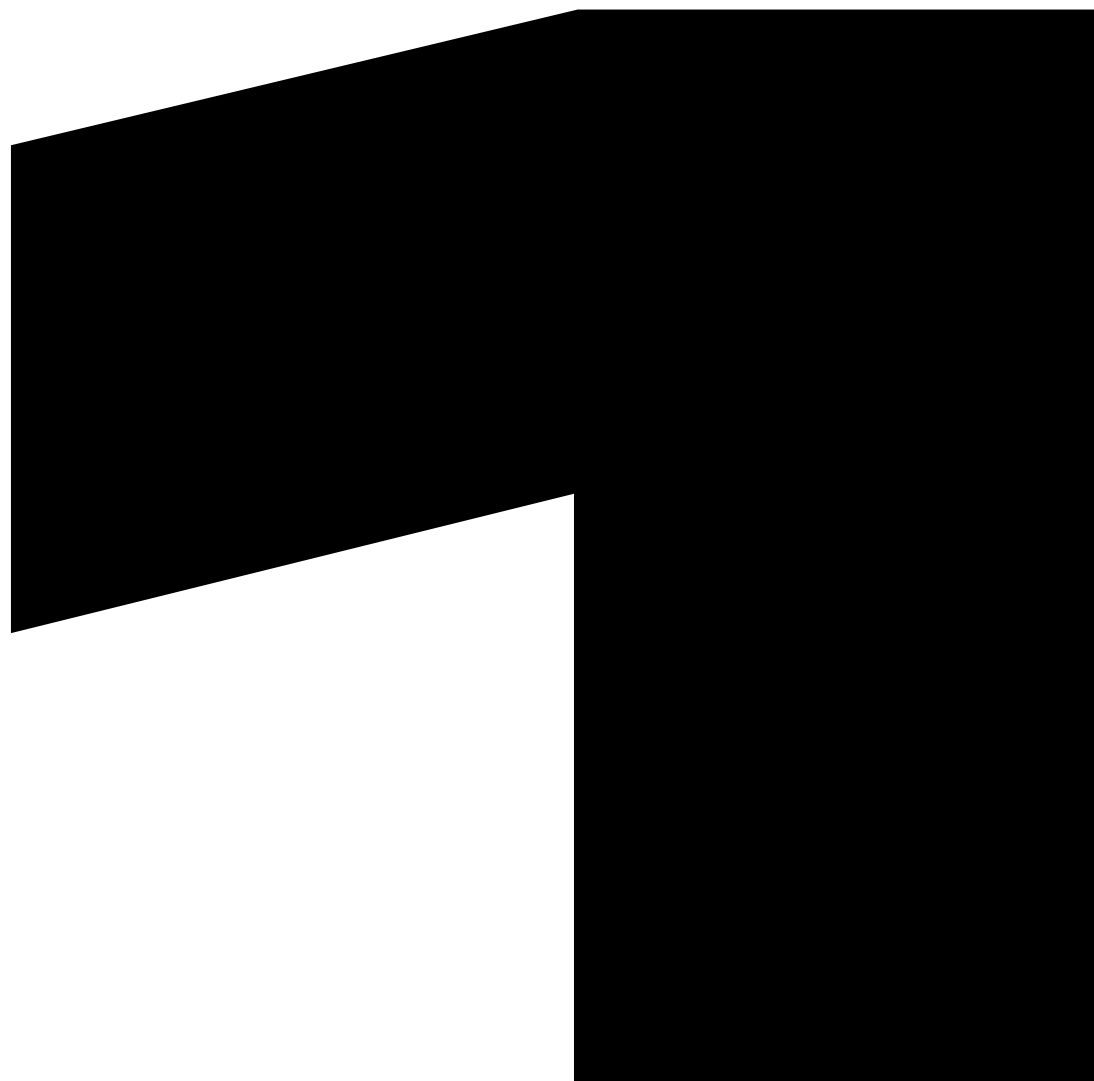

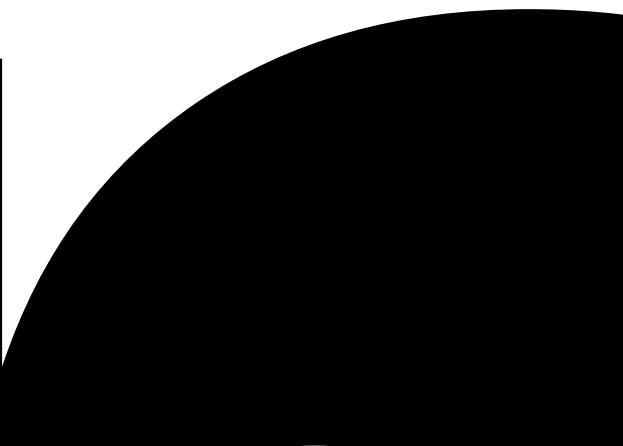

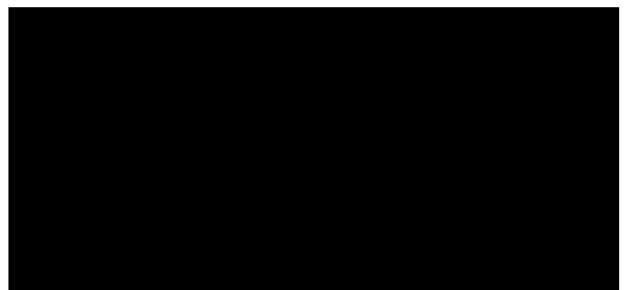

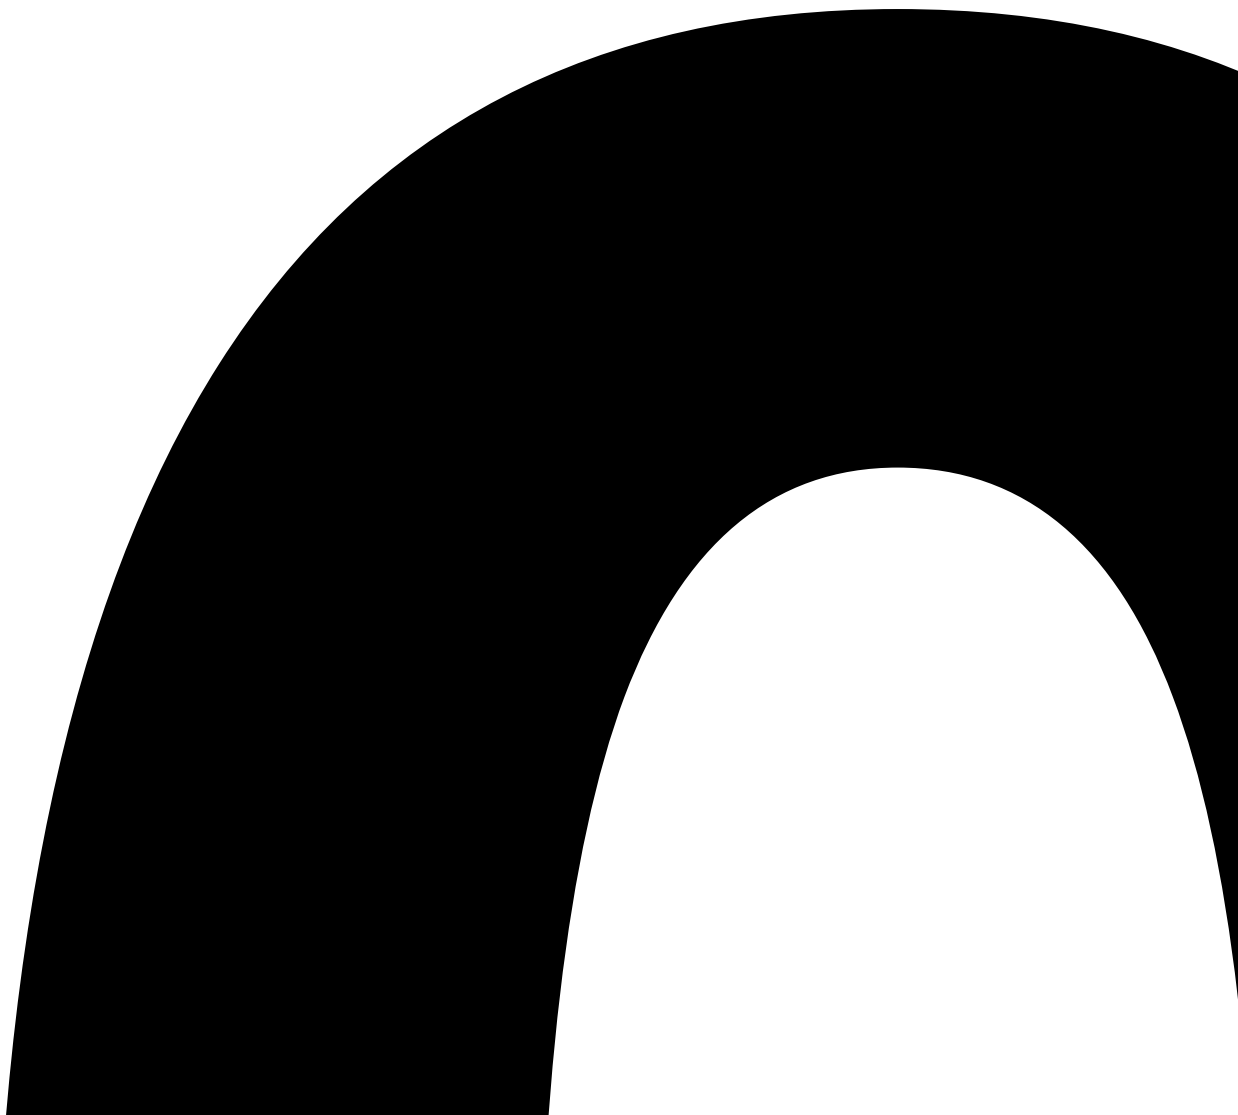

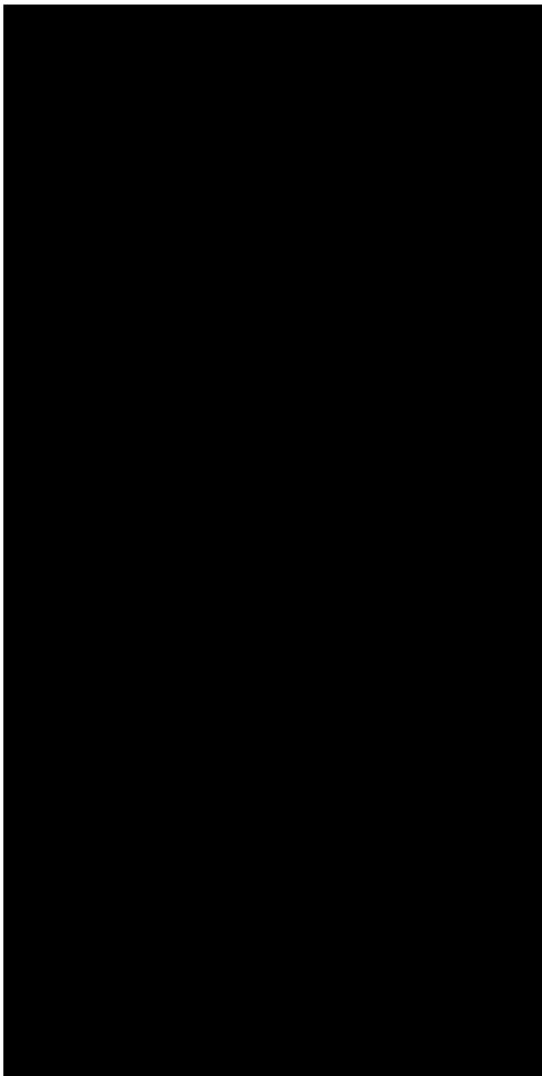

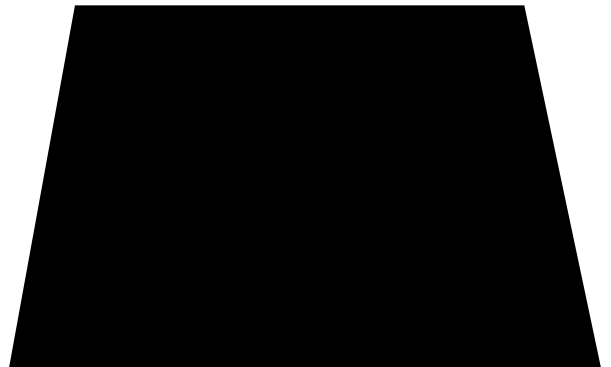

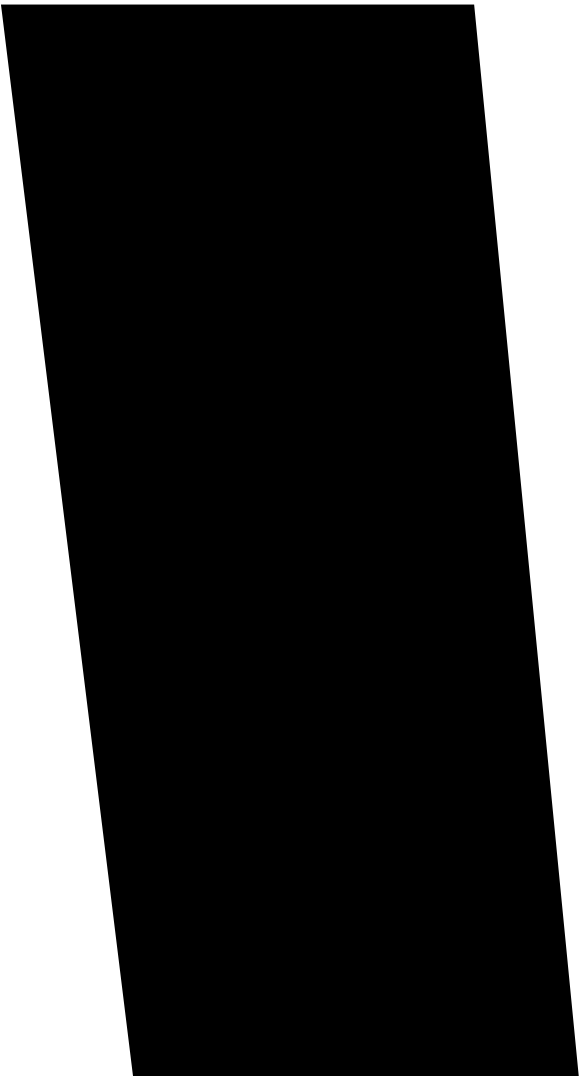

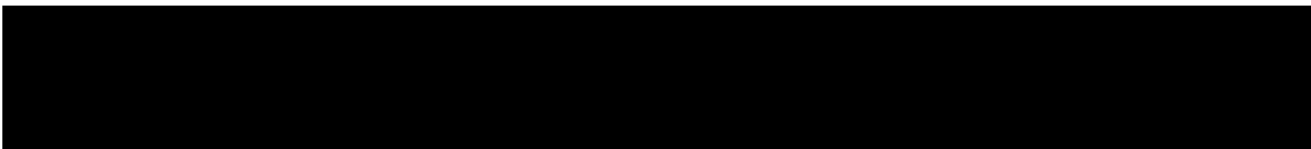

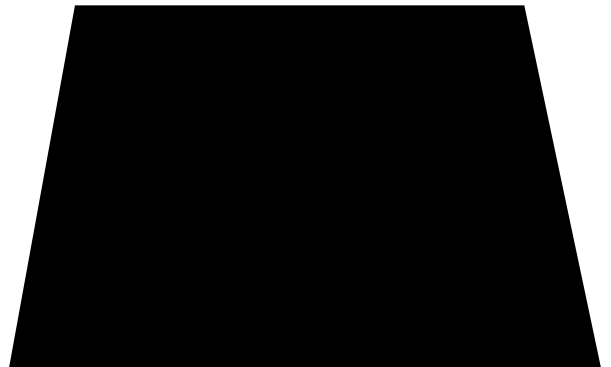

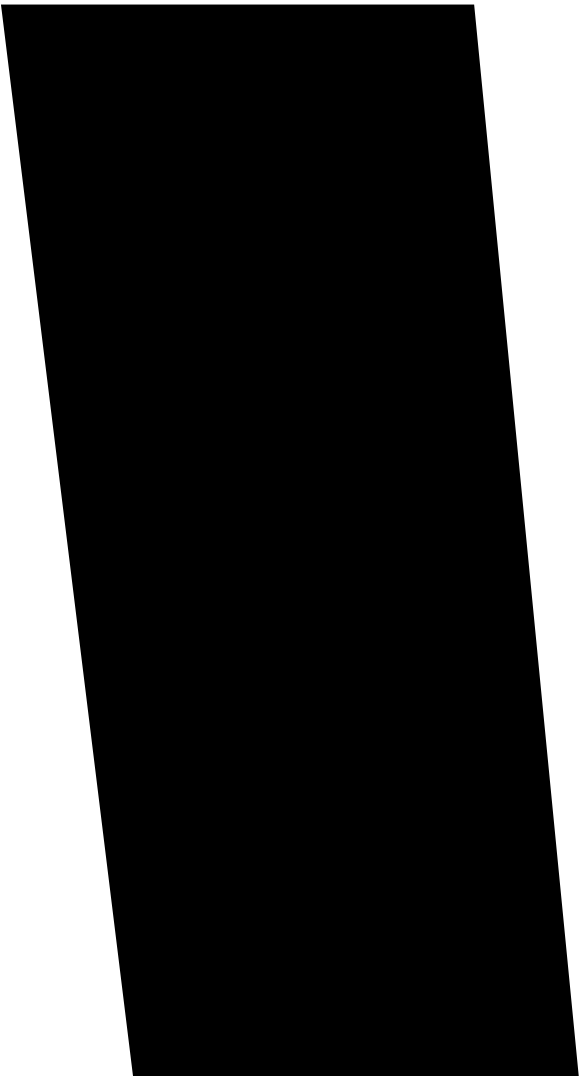

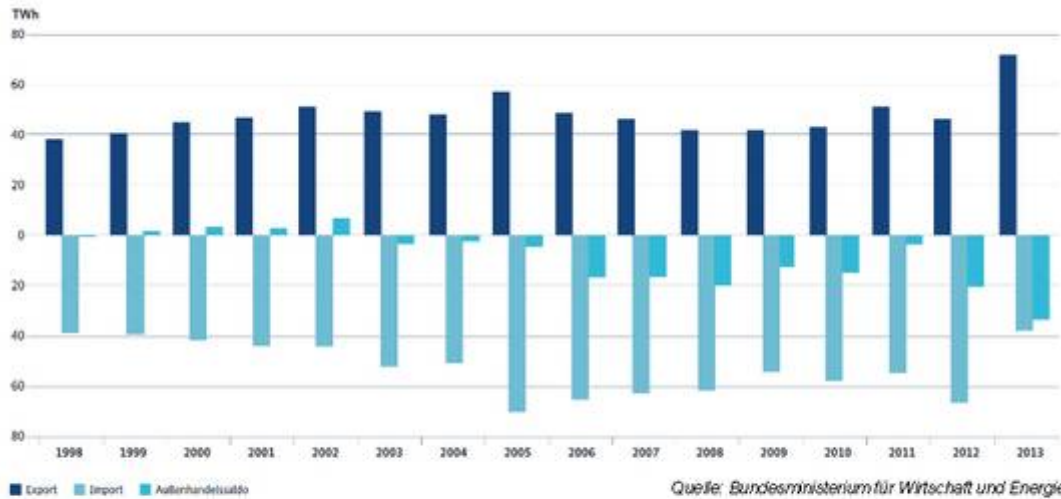

## Stromtausch Deutschlands mit seinen Nachbarländern (in TWh und Umsatz)

Stand: März 2014

Erläuterung:

**Export** ist die Strommenge in TWh pro Jahr, die aus Deutschland exportiert wurde.

**Import** ist die Strommenge in TWh pro Jahr, die nach Deutschland importiert wurde.

**Außenhandelsaldo** ist der Saldo von Export und Import aus Strommenge x Strompreis. (Für 2013 bedeutet dies, dass Deutschland viel Strom (~70 TWh) billig exportiert und weniger Strom (~40 TWh) teurer importiert hat.)

Zum Glück endet damit der Artikel. Leider war es kein Alptraum, sondern raue Wirklichkeit.
