

Deutschland auf dem Weg in die « Dritte Welt »

Lieber Leser, seien Sie gewiss: ohne eine billige, zuverlässige und großindustriell nutzbare Speichertechnologie muss die Energiewende scheitern. Und diese Speicher-Technologie ist noch nicht erfunden, auch wenn die grünlackierten Experten noch so schrill das Gegenteil behaupten. Es sollte uns zu denken geben, dass kein einziges Land der Welt den deutschen Vorreitern folgt – Geisterfahrer ist stets der, dem alle anderen entgegenkommen.

Warum unbemerkt?

Die Energiewende surft auf einem Tsunami von Lügen und Unwissenheit durch ein Labyrinth voller Nebelbombenwerfer und Möchtegernexperten.

Energiesysteme sind komplizierte, schwer zu verstehende Zusammenhänge. Sie werden weder vom Laien noch von Journalisten oder gar von Politikern so einfach überblickt. Die Beschäftigung damit ist langweilig und erfordert tieferes Fachwissen. So

kommt es, dass selbst eine Physikerin, die in Chemie promoviert hat, an eine Energiewende ohne industrielle Speicher glaubt. Aber sie glaubt ja auch daran, dass wir das schaffen.

Die von der Energiewende ausgelösten Erosionsprozesse der Wirtschaft sind schleichend und somit für den Laien fast unsichtbar. Da haben es Scharlatane leicht, die der Öffentlichkeit physikalischen Unsinn als Tatsachen verkaufen. Und alle fachkundigen Warner werden von einer grün-moralinsauren Inquisition an den Pranger gestellt, damit ja niemand auf die Idee kommt, ihnen zuzuhören.

Es fehlt auch nicht an Geld, um das Scheitern der Energiewende mittelfristig kaschieren zu können. Immer neue Kurpfuscherei an den Symptomen wird von der Politik eingeleitet. Zwangsbezahlt wird diese Vergeudung von inzwischen 27 Milliarden Euro pro Jahr vom

Stromkunden und Steuerzahler. Auch die Steigerung dieser gewaltigen Summe geht schleichend voran.

Die Profiteure und Scharlatane sitzen in den Redaktionsstuben, auf den politischen Machtpositionen und sogar in den „Expertengremien“. Sie behaupten unisono den selben physikalischen Blödsinn vom Endsieg der Energiewende: es ist bald geschafft, man brauche nur noch etwas mehr vom Selben (Geld) und ein paar Stromtrassen. Die Öffentlichkeit hat keine Chance, sich vernünftig zu informieren. Nunmehr, nach vielen Jahren Propaganda-Trommelfeuer glauben fast alle Menschen in Deutschland an eine erfolgreiche Energiewende.

Im benachbarten Ausland – ohne diese Propaganda – schüttelt man verständnislos den Kopf und baut an den Grenzen teure technische Schutzmaßnahmen, um sich vor den Folgen dieser irrsinnigen

Energiepolitik zu schützen.
Phasenschieber als Stacheldraht, um
die Invasion der deutschen Dumping-
Energie aufzuhalten, mein Gott!

**Warum kann die
Energiewende nicht
gelingen?**

**Stellen Sie sich
vor, Sie wären
stolzer Besitzer
eines
revolutionären Öko-
Volkswagens. Viele**

**Windrädchen auf dem
Auto-Dach und auch
viele
Sonnenkollektoren.
Wenn der Wind weht
und die Sonne
scheint ist das
Fahren damit eine
Freude. Leider
bleibt die Kiste
sofort stehen, wenn
es dunkel und**

**windstill wird,
weil sie keinen
Speicher hat, der
die Energie hätte
speichern können,
während es auf dem
Parkplatz stand. Im
Gegenteil, Sie
mussten die
Windrädchen
blockieren und die
Kollektoren**

**abdecken, damit das
Ökoauto sich nicht
selbstständig
macht, wenn Sie gar
nicht fahren
wollen.**

**Nun können Sie
sagen: „Fahre ich
eben nicht, wenn
kein Wind weht“ –
für die Umwelt.
Aber Sie sind**

**Taxifahrer, Ihr
Einkommen hängt
gewissermaßen von
der Kontinuität
ihrer Fahrerei ab.
Und einen
Energiespeicher hat
Ihr Auto nicht,
weil der noch nicht
erfunden ist.**

**Was tun? Richtig
geraten, Sie**

**brauchen noch ein
zweites Auto für
diese Fälle, eines
mit einem richtigen
Motor, das auch
dann fährt, wenn's
dunkel und
windstill ist. Das
ist machbar, aber
teuer – Sie müssen
zwei völlig
gleichwertige Autos**

**betreiben, eins für
das passende Wetter
und eines für immer
dann, wenn das
Wetter nicht passt.**

***Abb. 1
Netzeingriffe seit
2007. Man sieht
deutlich den
exponentiellen***

Anstieg.

Grafik: M. Limburg;

Daten <http://www.netztransparenz.de/de/Redispatch.htm>

**Genauso
funktioniert die
Energiewende. Wir
haben ein schönes
Öko-Energie-System
aus Wind und Sonne,
das uns am 8. Mai
dieses Jahres sogar
für ein paar
Minuten voll mit**

**Elektroenergie
versorgte. Manchmal
wird sogar zu viel
Strom erzeugt. Aber
am 9. Mai war's
vorbei mit Wind und
Sonne und die
Kohlekraftwerksscho
rnsteine rauchten
wieder. Der Strom
kam für den
Verbraucher wie**

**immer aus der
Steckdose. Nur, vom
Kunden unbemerkt,
der konventionelle
„Zweitkraftwerksp
k“ machte den
Strom.**

**Die Windmüller und
Sonnenkönige ficht
das nicht an, denn
den
Zweitkraftwerkspark**

**bezahlt ja der
Staat. Der
französische
Präsident Hollande
hat mal im
Fernsehen gesagt:
„Das kostet nichts,
das bezahlt ja der
Staat“. Dazu hat er
dümmlich gegrinst.
Ein Wutschrei ging
durch Frankreich.**

**Dort weiß jedes
Kind: der Staat
kann gar nichts
bezahlen, was der
Steuerzahler nicht
vorher erarbeitet
hat.**

Also, Liebe

**Leser, den
Zweitkraftwe
rkspark
bezahlen
Sie.**

**Selbst wenn die
Sonne Tag und Nacht
360 Tage im Jahr
schiene und der**

**Wind 364 Tage
durchwehte,
brauchten wir den
ganzen
Zweitkraftwerkspark
mit 100% Kapazität
für die paar
Stunden, in denen
absolut kein Wind
weht und keine
Sonne scheint.
Sonst bricht das**

**Stromnetz zusammen
– es gibt einen
Blackout. Das ist
der unheilbare
Konstruktionsfehler
der Energiewende.
Die Gefahr eines
Blackouts wächst
und wächst mit
jedem
konventionellen
Kraftwerk, dass in**

**diesem
Subventionsgestrüpp
pleitegeht und mit
jedem neuen
Windrad.**

***Abb. 2:
Netzeingriffe pro
Jahr und
Hochrechnung bei
unverändertem***

**Zubau. Wann der
Blackoutpunkt
erreicht wird, ist
unbekannt. Das er
erreicht wird ist
sicher. Grafik: M.
Limburg;
Daten**

<http://www.netztransparenz.de/de/Redispatch.htm>

Was passiert bei einem großen Stromausfall?

**Nun könnten Sie
sagen: „Für ein
paar Stunden
verzichten wir doch
gerne mal auf Strom
und machen es uns
im Kerzenschein
gemütlich. Für die
Umwelt! Das klingt
auf den ersten
Blick gut. Meinen
Sie wirklich?“**

Ein großflächiger Stromausfall heißt „Blackout“. Hier mal eine kleine unvollständige Liste, was bei einem Blackout so alles nach und nach nicht mehr funktioniert:

- **Das Licht geht aus, auch auf**

**den Straßen und in
den Geschäften, in
der U-Bahn, in den
Fabriken...**

- **Tausende
Aufzüge bleiben
stecken...**

- **Verkehrssampeln
fallen aus, es
entsteht ein**

Verkehrschao mit diversen Unfällen...

- **U-Bahn,
Metro und Bahn
bleiben stehen...**

- **Die
Benzinpumpen an den
Tankstellen fallen
aus, es gibt keinen
Sprit mehr...**

- **Geldautomaten und
Ladenkassen
funktionieren nicht
mehr, die Banken
und Geschäfte
schließen...**

- **Kühltruhen
werden nicht mehr
gekühlt...**

- **Das**

**Telefonnetz und
Radio und Fernsehen
gehen nicht mehr –
außer ein paar
batteriegeriebenen
Geräte für kurze
Zeit, dann fallen
auch die Sender
aus...**

**· Die
Heiznetzwälzpumpe
und die Elektronik**

**Ihrer Heizung
bleibt stehen, es
wird kalt in Ihrem
Haus...**

**· Das
Leitungswasser hört
auf zu fließen, da
die Trinkwasser-
Pumpen nicht mehr
laufen – Sie können
ihre Toilette nicht
mehr benutzen, sich**

**nicht mehr waschen...
Hoffentlich haben
Sie genügend
Mineralwasser für
die Familie im
Haus...**

**· Alle
elektrischen
Kochstellen
versagen, auch zum
Wärmen von
Babynahrung, die**

**Leute fangen an und
machen
provisorische Feuer
in den Wohnungen...
es fängt an, hier
und dort zu
brennen...**

.

**Krankenwagen und
Feuerwehr bleiben
im Verkehrschaos
stecken...**

• **Die
Krankenhäuser
werden über
Notstromdiesel
versorgt – für zwei
Tage ... dann ist der
Diesel alle ... die
Ärzte müssen die
nichtversorgungsfäh
igen
Intensivstation
Patienten einfach**

**sterben lassen oder
eutanasierem...**

**· Der
Notstand wird
ausgerufen, es gibt
Ausgangssperren...**

**·
Plünderungen und
Unruhen brechen
aus...**

**Eine Studie des
Büros für
Technikfolgen-
Abschätzung beim
Deutschen Bundestag
(TAB) kommt zu dem
Ergebnis, dass
durch einen
langandauernden und
großflächigen
Stromausfall alle
kritischen**

**Infrastrukturen
betroffen wären und
ein Kollaps der
gesamten
Gesellschaft kaum
zu verhindern wäre.
Insbesondere die
einschlägige
Drucksache des
deutschen
Bundestages Nr.
17/5672 vom Jahre**

**2012 verschweigt
hier nichts mehr.
Trotz dieses
Gefahren- und
Katastrophenpotenzi
als sei ein
diesbezügliches
gesellschaftliches
Risikobewusstsein
nur in Ansätzen
vorhanden – sagt
[Wikipedia](#)**

Bei einem Blackout dauert es oft mehrere Tage, bis das System systematisch wieder angefahren werden kann. Man benötigt „kaltstartfähige“ Kraftwerke und muss nach und nach das ganze Energiesystem wiederaufbauen.

**Einfach zuschalten
geht nicht, da alle
Verbraucher
eingeschaltet sind
und das Netz sofort
wieder
zusammenbricht.**

**In diesen wenigen
Tagen wird es viele
Todesopfer geben:
Kranke auf der
Intensivstation,**

**Verletzte von
Unfällen und
Bränden, Erfrorene,
Opfer von
Kriminalität und
Unruhen. Die
Schwächsten trifft
es zuerst – Babys,
Kinder, Alte,
Kranke.**

**Die Decke
unserer
Zivilisat
ion ist**

dünn

Was ich

hier mit

Blackout

beschreib

e, ist

ein

Worst-

Case-

Szenario,

wenn auch

vielfach

geschehen

. Man

denke nur

an einige

Blackouts

in großen

USA -

Städten

und ihre

Folgen.

Und die

**waren
nicht mal
flächende
ckend.**

Wenn Sie

meine

Beschreib

ung des

Blackouts

für

Übertrieb

en

halten,

dann

stellen

Sie sich

bitte

**folgende
Situation
vor: Sie
sind mit
dem PKW
und ihrer**

**Familie
auf der
Flucht
vor dem
Chaos in
ihrer**

**Stadt zu
Verwandte
n auf dem
Land. Die
Verwandte
n haben**

noch

einen

eigenen

Brunnen,

eine

volle

**Speisekam
mer,
Hühner im
Stall,
einen
Kachelofe**

n und ein
Plumpsklo
. 300 km
vor dem
Ziel geht
Ihnen der

Sprit

aus . Auf

den

Straßen

herrschen

Anarchie

**und der
Mob. Ihre
Familie,
die
Kinder
sind**

bedroht .

Würden

Sie einem

Schwächer

en seinen

vollen

**Benzinkan
ister
wegnehmen
, um Ihre
Familie
zu**

retten?

Würden

Sie sich

am

Plündern

eines

**Supermark
tes**

beteilige

n, wenn

ihr Baby

unbedingt

**etwas
Wasser
und Baby
Brei
benötigen
würde?**

So lange

die

Zivilisat

ion

unsere

Grundbedü

erfnisse

decken

kann,

benehmen

wir uns

einigerma

ßen

zivilisierte

– wenn

man mal

von

einigen

**Fußball-
Hooligans
und der
Antifa am
Rande
einer**

Pegida -

Demo

absieht.

Aber bei

Durst,

Hunger,

**Kälte und
Lebensgef
ahr
reagiert
etwas
Uraltes**

**in uns,
das wir
zum Glück
noch
nicht
kennen**

und auch

nie

kennenler

nen

möchten.

Die Decke

**unserer
Zivilisat
ion ist
papierdün
n und
fragil**

**und wir
möchten
uns nicht
in einer
Situation
sehen,**

**wenn sie
zerreißt .**
