

# Gabriel beerdigt ungewollt die Energiewende

Das EEG zum Beispiel wimmelt nach vielen derartigen Verbesserungen von widersprüchlichen Bestandteilen; deren begrenzter Wirkungsradius richtete aber üblicherweise keine riesigen Schäden am gesamten Programm an.

Bis Sigmar Gabriel kam.

## Das Trassen-Dilemma

**Die Regierung hat wiederholt erklärt, dass die Versorgung der südlichen Bundesländer mit in Norddeutschland und Offshore erzeugtem Windstrom über ein neu zu errichtendes System von Nord-Süd-Höchstspannungsleitungen das Kernstück bzw. den wichtigsten Stützpfeiler der Energiewende darstellt. Dann sei der durch die Stilllegung aller Kernkraftwerke eingetretene Verlust an Stromerzeugung mehr als ausgeglichen – und Deutschland ein leuchtendes Beispiel für den Klimaschutz. (Dass Kernkraft**

auch kein CO<sub>2</sub> erzeugt, vergessen wir mal eben.)

Aber dieses große Werk geriet in Schwierigkeiten.

Die durch jahrelange Strahlenangst-Propaganda erfolgreich sensibilisierten Bürger wussten schon lange, dass Hochspannungsleitungen elektromagnetische Strahlung aussenden. Nach dem Netzausbauplan sollten nun neue Freileitungen durch ihre Gemeinden gebaut werden – die Riesenmasten in Sichtweite. Es kam wie es kommen musste: Bundesweit regte sich Widerstand entlang der geplanten Trassen, zahllose Bürgerinitiativen mit dem Motto „Keine 380 kV bei uns“ bildeten sich. Zur Strahlenfurcht kam noch die Wut über die Täuschungsversuche mit dem angeblich durch die neuen Leitungen fließenden klimafreundlichen Windstrom aus Norddeutschland, der sich durch einfache Betrachtung des Plans für die

**Nord-Süd-Trassen als Strom aus den Braunkohlerevieren herausstellte. Der harte und massive Widerstand veranlasste die bayerische Staatsregierung zu einer spektakulären Kehrtwendung bezüglich der Leitungsführung und sogar zur Infragestellung der Notwendigkeit dieser Pläne.**

**In der bayerischen Landesregierung sah man vermutlich zutreffend den Hauptgrund für den Widerstand in den oberirdisch geplanten neuen Freileitungen. Viele Bürgerinitiativen forderten schließlich eine unterirdische Trassenführung in ihrer Gemeinde: Durch Erdkabel. Die lokale Politik und anschließend auch die Landespolitik – in technischen Dingen ahnungslos wie meistens – unterstützte diese Forderungen in der Hoffnung auf eine Beruhigung der Bürger. Das Gejammer der Netzbetreiber half nichts.**

**Die Politik  
beschloss den  
Vorrang für  
Erdkabel.**

**Das wurde Ende 2015  
Gesetz. Was die  
Politik – speziell  
den Energieminister  
– anscheinend  
nicht so sehr  
interessiert hat,  
ist die fatale**

**Auswirkung dieser  
Gesetz gewordenen  
Neuplanung auf die  
gesamte  
Energiewende. Man  
hatte den Bürgern  
ihre Erdkabel  
gegeben und gut  
war's.**

**Diese Entscheidung  
hat einige  
Auswirkungen, was**

**man schon 2015**

**wusste:**

- Sie verteuert den Leitungsbau – um das vier- bis siebenfache.**
- Sie vermeidet riesige neue Freileitungen; durchaus ein Vorteil.**
- Sie verzögert den**

**Leitungsbau  
beträchtlich, weil  
es die dafür  
benötigten  
Höchstspannungskab  
el technisch noch  
am Anfang stehen.  
Die längsten  
derartigen  
Kabelstrecken auf  
der Welt sind 20  
km lang.**

- **Die gesamte Planung muss neu aufgerollt werden. Die Eingriffe in Grundstücke sind größer; Genehmigungsverfahren könnten länger dauern.**
- **Insgesamt bedeutet der Vorrang für Erdkabel eine**

**starke Behinderung  
und Verzögerung**

**des Netzausbaus –  
was im Sinne der  
Bürgerinitiativen  
ist.**

**· Dass sämtliche  
Kostenerhöhungen  
auf die  
Stromkunden  
abgewälzt werden,**

**in diesem**

**Fall über die  
Netzentgelte, ist  
ein Grundprinzip  
der Energiewende,  
das auch hier  
beibehalten wird.**
